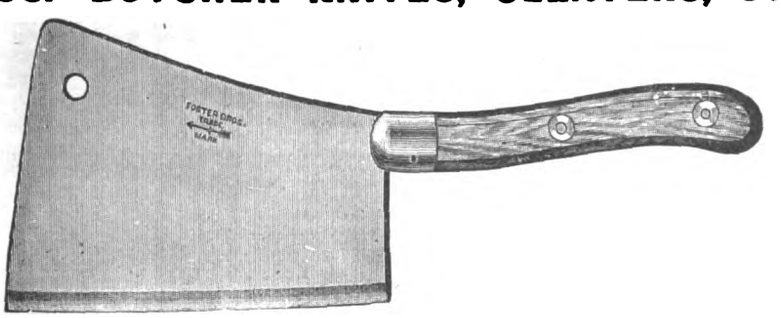
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

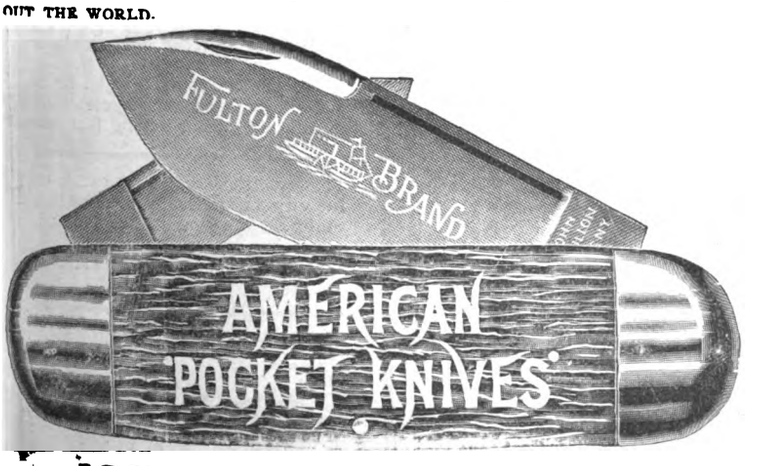


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York, U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

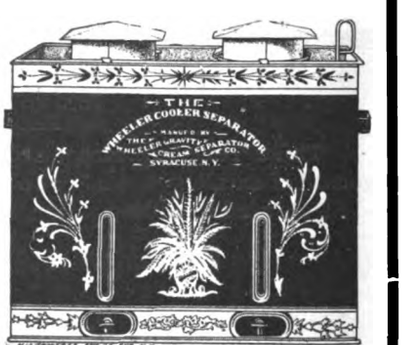
WHY IS THE O. K. THE BEST ROTARY WASHING MACHINE?

—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing the friction and thus making machine so **light running** and almost noiseless.
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without **rubbing** them to pieces.
4.—This washer is made by **experienced mechanics**, and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, **no escape of steam.**



Manufactured by H. F. BRAMMER MFG. CO.,
DAVENPORT, IOWA.

Messrs. Webster & Horsfall,	Best Steel Wire in the World.

THE BEST GOODS ARE ALWAYS CHEAPEST IN THE END.

A Long (K) Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German,* a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

This back cover

of the June 27, 1903 Saturday Evening Post, together with strong ads in all the leading papers and magazines is what we did last year to help sell

Peerless Iceland Freezers

This year our advertising will be even stronger and far more extensive. Every woman who is in the market for a freezer is bound to see the Peerless Iceland advertisements, and "seeing" is "believing"—she will do as she is told, will "ask her dealer." So let every dealer prepare so as not to disappoint.

And *you*—ask *your* jobber.

HARDWARE

NEW YORK PUBLIC LIBRARY 311264 ASTOR, LENOX AND TILDEN FOUNDATIONS 1904

The Third Annual Convention of the Southern Supply & Machinery Dealers' Association will be held at the Hotel Chamberlin at Old Point Comfort, Va., April 12-14. The entertainment features will include a luncheon, reception and smoker; trolley ride, Old Point to Newport News and a visit to and inspection of the Navy Yards; also a boat trip to Newport News and points of interest. On the evening of the 13th a complimentary dance to delegates and visitors will be given by Manager George F. Adams of Hotel Chamberlin. Among the questions to be discussed at this convention is the following: "Is it not to the interest of the manufacturers, as well as to the dealers, for the manufacturers to establish minimum selling prices, and should not the dealers who maintain such prices be compensated by some rebate?"

✤

Topping Brothers, 92 Chambers Street, New York, have leased the entire building at 122 Chambers Street, from May 1st next, containing five floors and two basements, each 25 feet wide and running through the block to Warren Street. They will occupy it just as soon as the extensive repairs they are making in order to fit it for their large stocks of Heavy Hardware and ship chandlery, will permit them. The unexampled growth of their business has compelled this move and it will enable them to concentrate everything in one building, instead of as now having them in separate warehouses inconveniently located.

✤

The J. D. Warren Mfg. Co., Masonic Temple, Chicago, Ill., are desirous of securing the services of thoroughly experienced Hardware salesman to take entire charge of the company's elaborate display at the St. Louis Exposition. The company intend having a fully equipped model Hardware store on exhibition.

AMERICAN CURRENCY IN CANADA.

A special telegram to the *Halifax Chronicle* from St. John, New Brunswick, states that the clearing-house directors have decided to accept American currency at face value in all the city banks. Heretofore one-fourth of 1 per cent. discount has been charged. A bank manager, speaking of the new rule, said that the reason was that American money was supplanting Canadian currency here and limiting the circulation of Canadian notes. A great deal comes across the Maine border and finds its way into St. John. As a discount was charged at the banks, merchants used the American money to pay their help and thus its circulation was aided. Now the banks propose to accept it at face value and will promptly ship it to the United States.

THE IMPROVED PUTNAM HORSE NAIL.

The Putnam Nail Company, of Neponset, Mass., U. S. A., has always considered it of the utmost importance to have its nails drawn down on all four sides alike. This was the "hot process," and they have now adopted it in the "cold process." Anyone can readily understand that by drawing the nail down on all four sides alike with a drawing roll, the tenacity and holding power of the nail is greatly increased. Whereas, if a blank is made and the nail then produced by rolling down on one side only, the molecules of the iron are disturbed and the nail has not the same holding power. This can be illustrated by taking a piece of paper and running a sharp knife over it. It will immediately curl up, which shows that the molecules on one side have been disturbed more than those on the other. Now, the nail cannot curl up, but is held firmly in position; consequently, when this rolling process takes place, there has to be a breakage of the molecules and its tensile strength is diminished. The New Putnam nail seems to have all the advantages of the old, with the additional point that it is absolutely uniform both in set and finish, and that it is a fine driving nail. Inasmuch as the growing tendency is for the manufacturer to sell directly to the consumers, the jobbers and merchants gladly welcome this new nail, as it is sold only through the regular channels of trade. The company will promptly send samples and quotations upon request.

PRIVATE MAILING CARDS.

On and after July 1 next private mailing cards that bear the words "United States of America" will not be accepted at any post office under any rate of postage. This is pursuant to an order issued by Third Assistant Postmaster General Madden, as follows: "The law officer for this department advises that cards issued by private persons bearing on the address side the words 'United States of America,' are in 'likeness and similitude' of the regular United States postal card and therefore in violation of the law, and unmailable. However, in order to give owners of such cards reasonable time to dispose of those on hand, postmasters will accept them for mailing until July 1, 1904, upon payment of postage at the proper rates. On and after July 1, 1904, such cards will be treated as unmailable at all rates."

RHODE ISLAND HARDWARE DEALERS' ASSOCIATION.

The old Providence, R. I., Nail Association has been merged into the Rhode Island Hardware Dealers' Association, which has been organized so as eventually to include the retail Hardware dealers of all Rhode Island. The Nail Association which has been in existence about 20 years, included in its membership retailers of Pawtucket and Central Falls, as well as Providence. No attempt was previously made to include other parts of Rhode Island. The reconstructed association is organized with a membership of about 20 houses that are located in Providence, Pawtucket, Olneyville and Central Falls. It is believed that this membership will be largely increased by additions from other parts of the State. The officers of the association are:

President, E. A. Loomis, Belcher & Loomis Hardware Co., Providence; Vice-President, W. A. Bosworth, Bosworth & Aspinwall, Providence; Secretary, F. T. Kelley, Barker, Chadsey & Co., Providence; Treasurer, C. H. Angell, Union Hardware & Electrical Supply Company, Providence.

The Executive Committee consists of the above officers and Frank Duffy, Duffy Bros. & Co., Pawtucket; John McGlinchey, Olneyville, and George P. Peterson, George P. Peterson Company, Providence. The annual meeting will be held in June.

THE NEOSTYLE WASHING MACHINE.

The Froelich Manufacturing Company, heretofore conducted as an individual enterprise by G. W. Froelich and at present located in the Muckle Building on Cleveland Avenue, St. Paul (Merriam Park), is now an incorporation and its output is to be largely increased. A new location has been secured to which the company will move its plant on April 15.

The company manufactures the Neostyle Washing Machine and when the factory is in complete operation, as it will be in the early Spring, it will turn out fifty machines a day. Four of the incorporators are residents of Merriam Park, viz: G. W. Froelich, John F. Hilscher, a St. Paul attorney; Hon. Grier M. Orr, judge of the Ramsey County District Court, and C. S. Bartram. Mr. Bartram, who is secretary and treasurer of the company, on April 1st will retire from his present position of news editor of *The Minneapolis Tribune* to assume the office and factory management. C. J. Lucken, a pioneer resident and banker of Cooperstown, N. D., is the vice-president of the company and also a director. R. N. Grady, St. Paul, is also a director.

The company claim for the Neostyle Washer that it is the only machine thus far invented that will wash any and every garment and thoroughly cleanse it, no matter how soiled it may be, without wear or tear of the article washed.

It is thoroughly protected by patents allowed by the patent office at Washington, which has approved the claims made after the most rigid examination of more than 3,700 washing machine patents.

The Circulation of "Hardware" is Larger Than That of Any Other Paper n the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

The variable weather we have had since our last issue retarded to some extent the free and full inauguration of the Spring campaign; but the opening of navigation in our immediate vicinity indicates more genial conditions prevailing in other directions that will have their bearing on the natural trend of trade for the season. To the Jobbing trade, prepared as they are with their weekly increasing supplies, trade seems a little backward if it doesn't show the customary eagerness at this time; but a week or two of April will doubtless advance trade conditions as far as appearances are concerned, and increase the halting confidence of those who expect congested conditions among the manufacturers; forgetting they have been spending considerable time during a year past in increasing facilities for turning out goods in excess of any previous period in their history, and consequently the amount of traffic doing to-day would bear a satisfactory comparison with the industrial output of only a few years back.

The fatuity of a number of sympathetic strikes affect local conditions in the building industry, so many individual lines of employment have been made through building so largely in steel construction, that a single division of labor can cry a halt to a dozen analogous branches of work needed to complete the enterprise. It would seem as though something were wrong which permitted the large industry of fireproofing the floors of a skyscraper to be controlled absolutely by the bricklayers, who create the conditions of stultifying the completion of a vast project, by the contention whether their Union shall be acknowledged and recognized as the only simon pure workmen who should control a class of work not requiring the skill of a long apprenticeship.

It was a great relief to the business section of the country tributary to the mining of Bituminous coal, that the labor scale formulated for the present year was finally signed, and the fear of another interruption of a possible lengthy period was placed beyond conjecture. The effect of this on similar disputes in other lines cannot but be of a beneficial character, and bring them to a settlement founded on common sense conditions, amenable to arbitration influences and not of an indefensibly autocratic character.

The statement was made in the recent report of the principal producer of wire products and including wire nails, that the orders on their order books yet unfilled were of much greater volume than ever before at this particular period of the year. This would indicate, in the absence of more definite information that other manufacturers of staple supplies were in a similar condition and that the halting requisitions of mid-winter were caught up at a later date, and will become an output governing Spring deliveries, fully up to, if not beyond the sanguine expectations of a good business in the near future.

The prevailing scarcity, through the booking of advance orders that claim the possible output of a factory, has made a number of lines so fully booked under obligational deliveries, as to stiffen the prevailing prices; and before the season is over will enable the jobber through inability to duplicate orders, to make a greater profit than usual in the shape of a bonus for his wise discretion in securing stock. Already this affects green wire cloth and poultry netting, some brands of lawn mowers, grades of shovels that have been cheapened by the breaking up of the trust; wire nails and other wire products. It isn't safe to encourage pessimistic views about purchasing supplies that your trade demands and expects you to furnish.

The Atlanta Conventions.

Up to the time of going to press with this issue of HARDWARE no official announcement concerning the rate to Atlanta for the May Convention had been made, although it is stated on good authority that the rate granted will be better than the usual one and one third fare for the round trip.

The announcement made in our March 25th issue concerning the special train to Atlanta has brought in a number of letters from all parts of the East and the general opinion seems to be that a fully sufficient number of reservations will be made to make up a good sized train.

The idea at present is to leave Jersey City (Pennsylvania Station) at about four o'clock Sunday afternoon May 22nd, arriving at Atlanta about the same hour on Monday. The Southern Railway will be used and every thing necessary to make the trip a pleasant one is promised by that Company.

It is expected that all arrangements both as to rates and the special schedule will be arranged in time for announcement in the April 25th issue of HARDWARE.

The Manager of HARDWARE will be pleased to send this information by mail as soon as arrangements are perfected, to all who will write him that they expect to make the trip.

ON ADVERTISING SPORTING GOODS.

With the expansion and enlargement of the Hardware store that has been going on, during the last few years, many new lines of goods have been added. With this increased variety of stock has come the question of how best to advertise these new goods—the best methods to use by which people will know that these goods are in the Hardware stock —how best to reach the class of people who are interested in them.

The Hardware dealer finds that in many of these new lines added, there is a large volume of business done, at a small profit, and the goods easily sold; while when the margin is large, sales are small and some difficulty is experienced in making customers. One such line is sporting goods.

To the degree in which the Hardwareman is able to reach the users of sporting goods, will he find this line profitable and that branch of his business a success.

The Hardware dealer realizes that every householder may be a prospective customer for Hardware, for house furnishing goods, crockery, or for silverware. But the sale of sportsmen's supplies is limited to those who are interested in sports —or who may in the future become interested, and the advertising must aim to reach this interested person. Newspaper advertising is good. Such advertising, however, will reach only a small percentage of those interested. Nevertheless, display newspaper advertisements should be used, especially before and during the season when the particular kind of sporting goods are demanded—in the Spring and early Summer fishing tackle and base ball goods—mid-Summer, croquet, Hammocks, camp supplies, lawn tennis and golf goods, should be advertised—while in the late Summer and Fall, gun and gun goods and foot ball supplies should be exploited.

In newspaper display advertising, it is well to mention certain articles and give the price. There are still many men who think that all sporting goods are high priced; they might become shooters or fishermen if they only knew how cheaply an outfit could be bought. In ten years' time, no class of merchandise has been so reduced in price as has the line of sporting goods. Let the people know this. Newspaper displayed advertisements should be followed up with reading notices, such as the following:

"The Biggest Fish Ever Hooked could be successfully landed with the tackle bought of the Hustler Hardware Co."

"A Great Game of Base Ball. Such a game would be easily played and easily won by good players who were fitted out by the Hustler Hardware Co."

"Lawn Tennis is Popular, and would be even more popular if every one only knew how cheaply a good racket could be bought from the Hustler Hardware Co."

"Take a Little Tackle With You. Nothing will add more to the pleasure of your vacation than to have a good fishing tackle outfit from the Hustler Hardware Co."

"When in Doubt, as to where to procure sportsmen's supplies call on the Hustler Hardware Co."

"For That Tired Feeling Play Golf. Out-door exercise is what the doctor says you need. Buy your outfit from the Hustler Hardware Co."

Such little readers will be found good business bringers. Advertisements in base ball programmes will reach a class of sportsmen. But of all ways of advertising sporting goods, the most effective will be found by means of a catalogue. The success of the catalogue houses demonstrates the value of this method of reaching buyers. It would not be a difficult matter for the city retailer who carries on a local jobbing trade to get up his wholesale catalogue with retail prices in the place of the old-time list prices. And in this way use the same catalogue for both wholesale and retail trade. With this catalogue as a basis the business can be easily and profitably increased.

A copy of this catalogue must be put into the hands of every sportsman in the city and vicinity. Now comes the way in which to get the names of those who are sportsmen. One of the best and easiest ways to get addresses of those interested is by getting these names from customers as they come in the store. For this purpose pads should be conveniently placed in the store—printed and ruled similar to this:

SEND SPORTING GOODS CATALOGUE TO

NAME	STREET AND NO.	CITY	INTERESTED IN
Jack Cobb	1724 Penn St.		Tackle

The clerks should make it part of their business to inform each customer that in the Spring the firm would issue a new catalogue of sporting goods—or if the catalogue is gotten out under different heads, as, Fishing Tackle, Base Ball Goods, etc., let the customer know this. That in the Fall a gun goods catalogue will be issued, as the case may be. And if the customer is interested in any of these goods, the catalogue will be mailed when issued. And if he wants a copy down goes his name on above list. The names thus procured will be an up-to-date list of active sportsmen. The rearrangement and classification of this list can be done by an office assistant, who can at the same time address the envelopes. The catalogues should be mailed near the opening of the season, and if possible a short, well-worded letter sent at the same time. In this letter call attention to catalogue being mailed, also to any new goods or novelties in the line.

It has often been said that all advertising is more or less a gamble—that it is difficult to see direct returns for money thus invested; this may be true in many cases, but the Hardwareman who carefully follows up this method of catalogue advertising of his sporting goods department, will see the returns by increased business. If advertising is a gamble, this catalogue advertising will be a gamble in which the merchant wins.

HAMMERNAIL.

OUR WESTERN OFFICE.

To better care for our steadily growing Western business, we have opened a branch office in Chicago, 1115 Monadnock Block, with C. H. Greene, our Western representative, in charge. Copies of HARDWARE and any information concerning rates, etc., desired by our patrons can be obtained at this branch office unless they desire to communicate with our home office direct. Our Chicago telephone is "Harrison 2945."

HARDWARE CLUB OF NEW YORK.

The new Board of Governors of the Hardware Club of New York, elected at the annual meeting Saturday, March 19, met Thursday evening, March 24, and organized for the ensuing year by re-electing the executive officers as follows: R. R. Williams, president; J. Leonard Varick, vice-president; Thos. F. Keating, treasurer, and Arthur G. Sherman, secretary. Two new governors, Francis B. Griffin and Henry L. Freeland, were elected to fill the places formerly occupied by Webster R. Walkley and George T. Laighton, both of whom declined a re-election. Resolutions were adopted expressive of the high regard in which Messrs. Laighton and Walkley are held by the club, and its appreciation of the value of their services during the long period of their identification with the Board of Governors.

DEATH OF W. H. STANTON.

William Hill Stanton, secretary of the Biddle Purchasing Company, New York, died very unexpectedly of pneumonia Sunday, March 27th, while on a pleasure trip to Bermuda. Being somewhat rundown in health, he had started on a little vacation accompanied by Mrs. Stanton, when he contracted a cold which almost at once, in his enfeebled condition, developed into pneumonia. Mr. Stanton was born in New York and was in his forty-sixth year. Soon after the beginning of the Civil War his father, Oliver H. Stanton, moved to Montreal, Canada, where the son remained until the latter part of the seventies, his father being in the real estate business. Coming to New York, W. H. Stanton was employed by C. M. Biddle & Co., Philadelphia and New York, and had been with that house continuously, with the exception of two or three years in the later 80's. Mr. Stanton was a favorite in trade circles from his refined social characteristics and genial temperament. He was of inflexible integrity and excellent habits; to a wide acquaintance he was always noted for his gentlemanly deportment and consideration. He was a member of the Hardware Club.

Damage to Property.

QUESTION: I live on a large stream in Kansas. My neighbor up the creek was a road boss and had a swamp on his place. The creek overflows every once and a while, and would leave a pond on his place. To prevent that he had a deep ditch dug and an arch built in the road. He ran the ditch quite a way on my place, and then he filled the swamp on his place, which made the water run swifter than usual, because of the fall, and it washed the soil for two or three rods wide across the corners of a 12 acre field of mine as deep as it was plowed, damaging me to the extent of about $400. The creek overflows every year, but never before did it wash the soil off until my neighbor turned the current. What can be done for redress? Can I get damages or not or have the ditch stopped?

REPLY: From the statement of facts in your case, we are of the opinion that your neighbor cannot lawfully dig a ditch from his premises leading the water over your property, much less can he go on your property and build the ditch, as we infer from your statement of the facts your neighbor did. Although there is no rule of law to prevent him from improving his property by filling up wet and swampy places, still he cannot do so to your detriment. Furthermore, the creek may be considered a natural water course, and your neighbor cannot, even though he did so on his own property, build a ditch to drain his land and thus increase the torrent of water in the creek. If it was merely surface drain and your neighbor filled up his property, and without any other act on his part the water found its way on your premises, you would have no redress. But in this case he dug the ditch across the road to your property and also continued the ditch "quite a way" on your place to, we presume, a certain creek on your premises. In view of these facts, we believe that you would have two actions against your neighbor, one for trespass, because of his going upon your property and digging a ditch, and the other for a nuisance committed by reason of the increased flow of water in the creek caused by the emptying of the water of the ditch into the creek. The measure of damages in the latter case would be that which you suffered by the washing away of the soil. You may also have an injunction issued restraining the defendant from using the ditch.

Insurance—Avoidance of Policy.

QUESTION: Three years ago I insured my house. Last month it burned down and the company refused to pay the policy. The reason they gave for refusing to pay is that I had the house repaired last Summer without their consent. These repairs had nothing to do with the cause of the fire, and in fact made the property a better risk. Please advise me what are my rights?

REPLY: Your rights depend entirely upon the language of your policy. If it is what is ordinarily known as the "standard fire policy" you will find that it contains a clause which avoids the policy in case "mechanics be employed in building, altering or repairing the within described premises for more than fifteen days at any one time." This is probably the ground on which the company refuse to pay. You do not state the length of time consumed in repairing the premises, but if it exceeded fifteen days prescribed in the policy, and if the company has not waived that term of the contract or consented to the repairs being made, their contention is clearly correct. The fact that the repairs did not increase the risk or contribute to the loss is absolutely immaterial. Such provisions in an insurance policy are held to be warranties; and if they are not observed by the insured, he loses all his rights under the policy irrespective of whether his omission had anything to do with the loss. The rule is a harsh one, but it is well settled, and should emphasize upon the owners of property the necessity of carefully observing and abiding by the terms of their contracts of insurance. Of course, if your policy contains no such terms the fact that repairs were made would be absolutely immaterial.

Right to Double Commission.

QUESTION: I employed a man to sell my farm for me, agreeing to pay him a commission, if he affected a sale. He sold the farm for me and after the deed had passed and I had paid him his commission, I found that the purchaser had also paid him $100 as a commission on the sale. Have I any remedy?

REPLY: The law governing the right of an agent to double commission is well settled. It is that the relation of agent and principal is one of a strictly fiduciary character, and the agent has no power to make any gains by virtue of his employment other than his agreed commission. "A man cannot serve two masters" is as good a principle legally as it is morally and it has uniformly been held in all such cases that whatever profit the agent makes by virtue of his agency enures to the benefit of his principal. You have, therefore, a clear right to collect the $100 commission which was paid to your agent by the purchaser.

SIMMONS HARDWARE COMPANY'S NEW CATALOGUE.

The Simmons Hardware Co., St. Louis, Mo., have recently published and distributed to their trade one of the most complete catalogues they have ever published, covering the vast variety of goods controlled and sold by this important jobbing house. It is their "Catalogue F" and is composed of three volumes, containing in all 2,164 pages. The largest of the three volumes relates to the general line of Hardware and consists of 1,400 pages. One of the smaller volumes, No. 443, is devoted to high-grade Builders' Hardware and other goods used in connection therewith. Catalogue No. 444 comprises in its contents Tin and Enameled Ware, Stoves, etc., and other goods in this field of endeavor. The index is complete for every volume, and also shows the different catalogues in which color work has been used to make more prominent the goods represented, many of the goods being displayed, as nearly as possible, true to life, if one may use the expression. Among these may be mentioned Blue Brand Hatchets, Blue Brand Hammers; a horse collar pictured among the Harness goods is certainly fine, indicating to a remarkable degree the nature and quality of goods used. A color card of "Pennant" Paint, a color page of Banner Baby Carriages, Wonder Freezers, Refrigerators, etc. In two catalogues the Vandyke and Delft ware, which are illustrated on appropriate pages, show the actual colors of these attractive lines of goods. They even show in color a *facsimile* of their annual want book and their special mail order envelopes. In the Builders' Hardware Catalogue some of the leading designs are shown in actual colors, notably the Etrurian design, also plain bronze and old copper finish goods. One of the most interesting methods to a Hardware retailer is shown in the Builders' Hardware, where the different designs in Door Locks are shown on appropriate pages, while on the opposite page is illustrated the trimmings which go with each of these designs; thus making it an easy matter for purchasers to fit up the entire house with goods which will be in harmony. Pages are devoted to giving complete information regarding special lines controlled by them, including Keen Cutter Pocket Knives, Table Cutlery and Keen Cutter Carvers, Keen Cutter Razors and Razor Strops. A bird's-eye view is given of the various buildings occupied by their immense plant with detailed information concerning the various departments that form the complete system. It is very evident that neither time, labor nor expense has been spared to make this latest emanation from their perfect catalogue department a standard volume of practical information for the Hardware retailer.

He Went on Record Properly.

"One of my earliest law cases," said Senator Bacon, of Georgia, "was the defense of a negro charged with stealing chickens. I was making out pretty well until it came time for the negro to go on the stand. 'Are you the defendant in this case?' the other lawyer asked. 'No, sah,' said the negro, pointing to me; "there's the defendant. I'm the one that stole the chickens.'"

RECENT TRADE PUBLICATIONS.

The Syracuse Arms Company, Syracuse, N. Y., are the authors of an extremely high-grade and artistic production in the form of a catalogue relative to their Hammerless Guns, which they illustrate with fine lithographs. This catalogue supercedes all previous ones, and quotations made since the issue of this book are based upon the list prices therein given. Realizing that the tendency of the purchaser is toward better and higher grade guns, the company are prepared to furnish five styles of strictly high-grade guns, cuts and descriptions of which will be found in the above-mentioned book. They state that the guns are made from the highest class of material, and as they are made to order, only the best workmen are employed in their construction; new methods having been employed in the manufacture of the "Syracuse." They also announce that in presenting this, their first large and complete catalogue, it is their aim to show the guns just as they actually appear. The cuts are made from photographs taken from regular stock guns, so they are, of course, in exact proportion. They have also endeavored to show, in a more complete way than ever before, the mechanism of the gun, as well as all parts used in its construction, which they have numbered and listed for the convenience of any one desiring to replace broken parts. The Syracuse Arms Co. desire enquiries and will cheerfully and promptly answer all questions.

The Simmons Hardware Co., Inc., St. Louis, Mo., manufacturers and distributors have sent out to the trade their catalogue No. 447, exploiting their complete line of Laclede bicycles for 1904, which they state are more attractive than ever. They are made by an independent factory, and the Simmons Hardware Co. control the entire output. They keep a complete stock of repairs for each model and can furnish them for years after the machine has been sold. Each wheel is rigidly inspected and thoroughly tested before leaving the Simmons warehouses. Any desired equipment can be furnished on any model regularly carried in stock. Some of the special features of the Laclede bicycle are the star ball retainers in hubs, hanger and head bearings; "Laclede" spindle hubs with knockout axles; flush head, new style "Laclede" triple plate fork crown; strong screw chain adjusters, and the "Laclede" coneless pedals. The book is well worth sending for, containing as it does 96 pages of bicycle information. Another of their catalogues for 1904 is devoted to baby carriages, refrigerators, ice cream freezers, boys' wagons, velocipedes, tricycles, etc., all of which are finely illustrated and comprehensively described and are accompanied by list prices.

The Power & Mining Co., 52-54 William Street, New York, are the authors of an extremely high grade pamphlet neatly bound in green, printed on heavy plate paper in clear handsome type and illustrated with extra fine engravings of their gas engines. In this book they offer for the consideration of the trade the Crossley Gas Engine. The company are confident that in offering these engines to the purchaser, they are furnishing a gas engine which has been thoroughly tested in practice, and may be safely accepted as embodying, in every particular, the highest degree of excellence. They claim it is much more simple, and requires less skilled attendance than any high grade steam engine. As a practical demonstration of this the company call attention to the fact that many of them are in daily and successful operation at mining plants in the Western States and in the Republic of Mexico, points far removed from the centres of skilled labor. The above mentioned catalogue is the finest specimen of typography we have had the pleasure of reviewing representing this class of goods, and will be sent upon request to those interested.

The Elliott & Reid Company, Richmond, Ind., have recently mailed to their patrons a neat envelope size pamphlet of 41 pages, descriptive of their Royal Steel Spring Fencing, which gives exhaustive information on this subject. It is a woven fence, differing from any other heretofore offered to the trade, made in different heights and number of cables according to the purpose for which it is to be used, such as for hogs or sheep, up to the higher fencing necessary for cows or horses. The special practical feature connected with their fencing is the "knot and kink" used in the construction which the company state, are the life of the fence. Together with the above mentioned catalogue, the Elliott & Reid Company issue a very large circular very clearly showing the construction of their fence. The company announce that the sole object of handing this circular to the trade is to interest them in the exclusive sale of Royal Spring Steel Fence in their respective territories. The agency has never been offered before. This looks like a good opportunity for some dealers, and the company contract to do all they can to aid those who will take it up.

The Lefevre Arms Co., Syracuse, N. Y., are placing before the trade an extremely neat little pamphlet catalogue of envelope size portraying the excellencies of the features pertaining to the Lefevre gun. They claim that no better gun can be built than their "Optimus," and they describe it as follows: "The material used and the workmanship employed are of the very highest grade; the barrels are of St. Joseph Whitworth fluid compressed steel or of the highest grade of hard English Damascus steel; the stock is of superior French walnut selected with great care to produce the finest effect in coloring and figure; straight grip, one-half or full pistol grip with horn cap; gold plated triggers; horn or skeleton butt plate, Lefevre full compensating action, engravings of special designs in gold, and of the very highest class of engraving. Superb checkering and perfect finish. Fitted with automatic shell ejector; ten, twelve, sixteen and twenty gauge. Many other styles, each as high grade in its class as the above, are illustrated and described.

The Wire Goods Company, Worcester, Mass., have sent us a copy of their Export catalogue being a selection of goods from their general line especially adapted to the export trade. They have recently issued their new catalogue No. 5 containing 182 pages devoted to general wire Hardware, including bright and brass wire, coat and hat hooks, ceiling hooks, garment hangers, house furnishing goods, wire nails, tacks and staples, novelties and specialties in wire. The above firm devote themselves to goods made from wire and keep in stock at all times upward of 3200 different articles. The firm will be pleased to send to those interested a copy of this last mentioned catalogue upon receipt of fifty cents to cover transportation charges. Included in the contents of the Export catalogue are polished steel hooks with and without screw eyes, double jointed chain, sash irons, brass screw hooks, cup hooks, finger nail trimmers and cutters, drawer pulls, elastic steel door mats, sink, brush and dish washers, fly killers, pot chains, etc., etc. This book has a handy index, and also contains a complete list of all the goods in their catalogue No. 5.

The Branchville Ice Tool Works, Geo. B. Gruman, proprietor, Branchville, Conn., have recently issued an attractive catalogue of 28 pages relative to their ice tools, which catalogue displaces all former editions. For those engaged in the ice-cutting business the book will be found most valuable, as it gives in detail a guide as to just how to get your tools in good condition before commencing operations. Included in the contents of their catalogue, illustrated and priced, with full descriptions are filing plows and markers, patent sulky snow scrapers, snow ice planes, scoop scrapers, foot scrapers, ice saws, grooving forks, chain scoop net, grapples, feeding forks, ice tongs, axes, cleavers, wagon scales, house and car runs, hoisting top and wharf gins, refrigerators, etc., etc. This firm have also printed a catalogue with prices of Spring and Summer ice tools. These two catalogues will be mailed to dealers upon request for same.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED MARCH 22, 1904.

359,704. FAUCET FOR OIL CANS, George W. Banker, Brooklyn, N. Y.

359,705. HANDLED BLACKING BOX, Samuel M. Bixbie, New York, N. Y.

359,708. TUBULAR LANTERN, Isaac N. Buck, Elgin, Ill.

359,815. DOOR SECURER, Calvin J. Sargent, Methuen, Mass.

359,833. CLAMP, James M. Basinger, Buffalo, N. Y.

359,883. MANUFACTURE OF CUTLERY HANDLES, Isaac E. Moody, Northampton, Mass.

PATENTS ISSUED MARCH 22, 1904.

754,987. SAD IRON, Henry C. Fox, Louisville, Ky.

755,036. AUTOMATIC SIPHON VALVE, Arthur O'Brien, Chicago, Ill.

755,052. BLIND FASTENER, Henry A. Schmidt, Phoebus, Va.

755,058. DOOR STOP, John H. Shaw, New Haven, Conn.

755,136. SASH CORD FASTENER, George W. Howard, New London, Conn.

755,195. LOCK, Henry G. Voight, New Britain, Conn.

755,440. PLIERS, Herman E. Bonschur, Philadelphia, Pa.

755,490. SASH HOLDER, Dan O. Hiatt, Greenlawn, N. Y.

PATENTS EXPIRED MARCH 29, 1904.

359,993. TUBULAR LANTERN, Walter S. Burn and Earnest Schultz, Hamilton, Ontario, Canada.

360,029. SHOVEL OR SCOOP, Thomas Lees, Toronto, Ontario, Canada.

360,042. PNEUMATIC DOOR CHECK, Gustavus S. Perkins, Hartford, Conn.

360,159. SHAVING APPARATUS, Robert M. Keating, Springfield, Mass.

360,174. KNIFE POLISHER AND CLEANER, John B. Riley, Toronto, Ontario, Canada.

360,339. ARTIFICIAL BAIT FOR FISHING, William A. Cooke, Gaithersburg, Md.

PATENTS ISSUED MARCH 29, 1904.

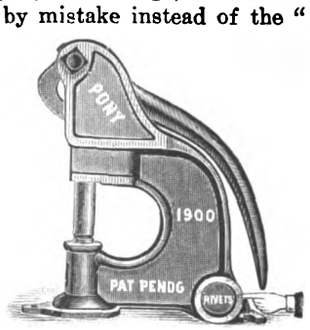
755,607. DOOR HANGER, Frederick F. Bischoff, Chicago, Ill.

755,672. WASHBOARD, James B. Jones, Ardmore, Ind. Ter.

755,683. ADJUSTABLE FLOAT FOR FISHING, Corwin F. Miller, Wolcottville, Ind.

755,778. MOP WRINGER, James A. Hoyt, Scotia, N. Y.

◆



W. O. TALCOTT, 91 Sabin Street, Providence, R. I., manufacturer of the Wilson clinching, combination and Acme steel belt hooks, are distributing an attractive envelope size price list on these goods. The pamphlet is illustrated through the entire 32 pages and is finely printed on coated paper. The Wilson Belt Hooks hold in the belt by the curved shape of the plate and the wedging of the teeth. As the teeth do not clinch, the belt can be shortened as often as required without destroying the hook, and are suitable for the heaviest work on cross or quarter turn belts. The teeth of the clinching belt hooks clinch firmly into each end of the belt, making them especially well adapted for rubber and all kinds of woven belting, and for leather belts running over small pulleys at high speed. The Combination hooks have a single row of teeth, being unequally beveled, which clinch automatically as they enter the belt. They also have a double row of straight teeth not long enough to clinch. They hold in the belt by the wedging of the teeth and the curved shape of the plate. As these teeth do not clinch, the belt can be removed, shortened and replaced at will. These hooks are smooth to handle and suitable for belts running over small or large pulleys at good speed. The Acme steel belts are inexpensive, and need no special tools or rivets to handle. They are quickly and easily applied, and as the teeth stand at an oblique angle on the plate, they do not weaken the belt. They are especially adapted for all high speed machinery. For further particulars regarding them, write for above price list.

COMPLIMENTARY DINNER TO WEBSTER R. WALKLEY.

An extremely enjoyable affair took place at the Hardware Club of New York on the evening of March 24th, following the annual election of officers by the Board of Governors. This consisted of a complimentary dinner which was tendered by the Board to the Hon. Webster R. Walkley, who had declined a re-election as one of the governors. Mr. Walkley was one of the chief founders of the Hardware Club, was one of its incorporators, and has been a member of the Board of Governors continuously for twelve years. He retired at the last annual meeting because he felt that he had put in his full share of work, and that the time had come to place the responsibility on other members. The dinner was a most successful affair, and was a great surprise to Mr. Walkley. The whole affair was in charge of Alfred D. Clinch, which was of itself a guarantee of success. The souvenir menu was appropriate and artistic, containing a portrait of Mr. Walkley, a sketch of his life and several of his poems. President R. R. Williams presided, and acted as toastmaster. The two set speeches of the evening were: "The Hardware Club," by Mr. Walkley, and "The Muse," by James H. Kennedy, ex-secretary of the club. The three new members of the board who had never before attended any of the governors dinners, Francis B. Griffin, Joseph Gales and Terence F. Curley, were introduced and made happy impromptu speeches. Addresses were also made by Ex-Presidents Sargent and Van Glahn, Vice-President Varick, Treasurer Keating, Secretary Sherman and other members of the Board. Tributes of sincere affection and respect were given by all the speakers to Mr. Walkley, and his eloquent response was full of feeling and heartfelt intensity.

THE PONY RIVETER.

In our issue of March 10th, in the advertisement of F. H. Smith Mfg. Company, of Chicago, the cut of the "Best Yet" riveter was used by mistake instead of the "Pony" riveter.

THE "PONY."

We give herewith an illustration of the "Pony" riveter, which, from the large sale with which it is meeting, is certainly a very convenient machine and an article which should be handled by all Hardware stores. Besides meeting with a very ready sale at home this machine is already finding its way quite rapidly into foreign countries.

SOME INTERESTING FIGURES.

The Bradstreet Co. has recently published a record that is quite interesting to business men generally. It shows that in spite of the wide-spread movement toward consolidation of industries, the number in business is constantly growing. There were 9,775 failures in the United States in 1903. This, however, is but seventy-six one hundredths of one per cent. The causes given for failure were: Incompetence, 2,002; inexperience, 627; lack of capital, 3,179; unwise credits, 332; failures of others, 278; extravagance, 88; neglect, 275; competition, 249; specific conditions, 1,638; speculation, 94; fraud, 1,013. Ninety per cent. of the failures were of those having a capital of $5,000 or less. Undue competition is given as the cause of but two and five-tenths per cent. of the failures, while incompetence is said to be responsible for twenty and five-tenths per cent. In other words, one out of every five business concerns fails through incompetency of management.

AUTOMOBILE AND BICYCLE EXPOSITION.

The seventh annual international automobile and bicycle exposition under the auspices of the Society of German Bicycle Manufacturers, will be held at the Crystal Palace, Leipzig, from the 16th to the 25th of October, 1904. Sewing machines, typewriters, cash registers, etc., will also be displayed.

NEW GOODS AND SPECIALTIES.

THE DIME SCREEN DOOR CHECK.

This is one of the simplest and yet one of the most effective devices made to prevent the great annoyance of a slamming screen door and forms one of the special productions of the Caldwell Manufacturing Company, Rochester, N. Y. We illustrate the several positions that convey an idea of its effective utility. The operation of closing the door does not

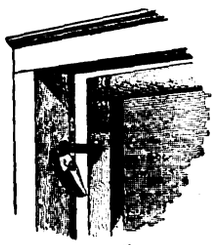

FIG. 1.

depend upon the momentum of the door as it must always work whether the door is opened wide or only partly open. The bumper is moulded rubber tapered to give the greatest amount of spring; it checks the door three inches from the

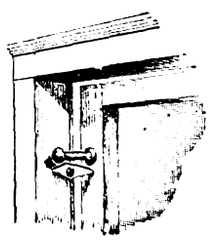

FIG. 2.

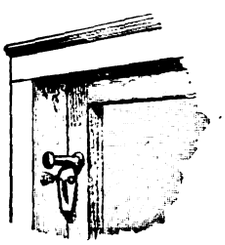
closing point. Fig. 1 illustrates the closing door bringing the plunger on the door in contact with the rubber bumper, throwing it up to a position as in Fig. 2; the door rebounds from the concussion and the rubber drops by gravity to the



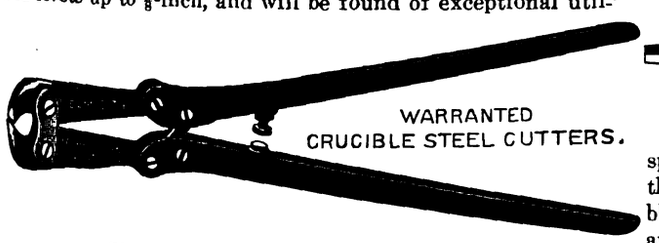


FIG. 3.

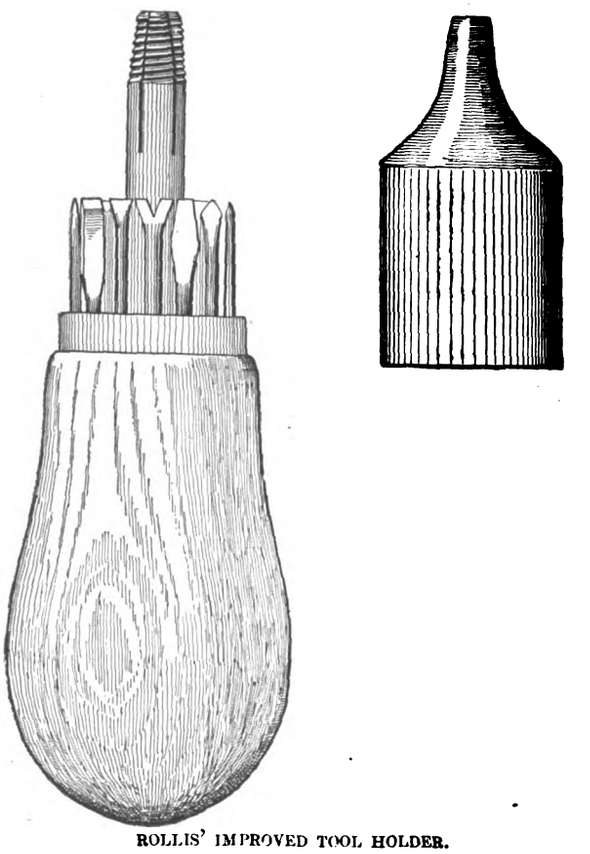
position shown in Fig. 3, thus allowing the door to close. They are distributed to the trade packed in attractive display boxes, and as the name indicates, they are designed to be retailed at ten cents a set.

ELM CITY END CUTTING BOLT CLIPPER.

The William Schollhorn Co., New Haven, Conn., are the manufacturers of the Elm City End Cutting Bolt Clipper which we illustrate herewith. Being of warranted quality, it is provided with crucible steel cutters, has japanned handles, and all parts are interchangeable. It is designed to cut bolts and rivets up to ⅜-inch, and will be found of exceptional util-

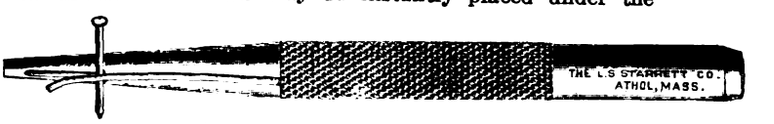


ELM CITY END CUTTING BOLT CLIPPER.

ity by saddle makers, to cut off the end of bolt, fastening check rein hook; also by boat builders to use on the bolts and rivets which fasten sides to the ribs and keel. It will prove serviceable to fire-proof lathing workers for overhead work, and to reach places inaccessible with other tools, and will be found a useful addition to a Hardware stock, as its great convenience appeals to machinists, wagon builders or blacksmiths generally.

ROLLIS' IMPROVED TOOL HOLDER.

The Rollis Hardware Co., 107 Chambers Street, New York, manufacturers of Improved Mechanics' Tools and Hardware specialties are the manufacturers of the improved style of Tool Holder, of which we give an illustration, which is of full size of article. This set consists of twelve tempered and hardened tools set in a highly polished cocobola handle.



ROLLIS' IMPROVED TOOL HOLDER.

A groove in the handle permits the cap to be set inside of the wood, presenting when used, a smooth surface to the hand. The cap shown in the illustration is of steel, finely nickel plated and polished. It will be found there is less wear to the thread in this cap than is generally the case with those made of brass or other softer metals. Further particulars regarding this desirable tool may be obtained by addressing the manufacturers as above.

STARRETT'S NAIL HOLDER AND SET NO.119.

L. S. Starrett Co., Athol, Mass., are the makers of the finished Nail Holder and Set combined, which we illustrate in this article. The nail may be instantly placed under the

STARRETT'S NAIL HOLDER AND SET NO. 119.

spring in the lower end of the holder and there retained by the pressure of same, ready to be driven home. After one blow is struck, the holder is withdrawn and the nail driven in and sunk with the punch. This is rightfully claimed to be a great improvement over the difficult way of trying to hold a small nail between the thumb and finger at the risk of pounding them. The holder also admits of the nail being held to drive in places where the hand cannot go.

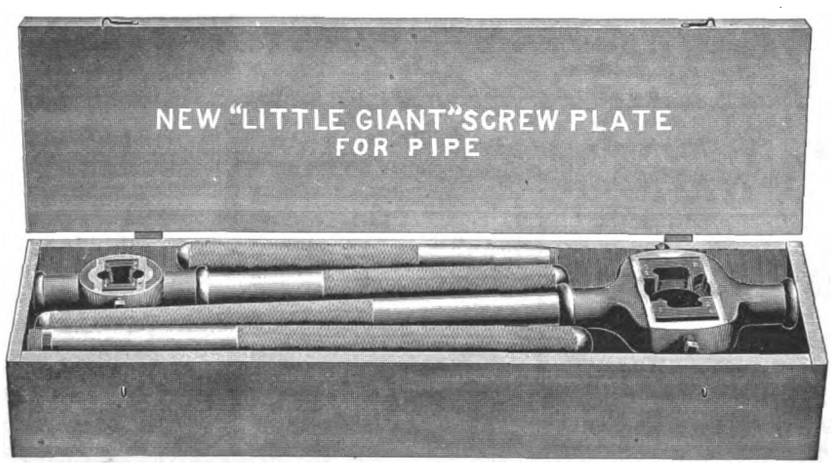
HAMMERLESS SINGLE-BARREL GUNS.

The J. Stevens Arms & Tool Co., 245 Broadway, Chicopee Falls, Mass., and 98 Chambers Street, New York, are introducing the two new guns shown herewith—viz., Nos. 180 and 195 hammerless single barrel. The No. 180 will take the place of their No. 140, which was so popular last year. This new gun has a top snap, special "pyro-electro" steel barrel, choke bored for nitro powder, walnut stock, rubber butt plate, case-hardened frame, pistol grip checked and capped, with a patent fore-arm, checked. The cocking device in this gun is similar to the old Anson & Deeley, only much more simple and with fewer parts. This gun has a barrel cocking device and the shell cannot be inserted until the gun is cocked, hence is perfectly safe, and the entire parts, including the frame, are drop-forged throughout. This will be an ejector gun only and will be furnished in 12, 16 and 20 gauge, regular length barrels.

HAMMERLESS SINGLE-BARREL GUN. NO. 180.



HAMMERLESS SINGLE-BARREL GUN. NO. 195.

The No. 195 the company believe to be the best and handsomest single-barrel hammerless gun on the market. It is a distinctive trap gun, made of high-grade material throughout, with a fancy stock, fancy checking and engraved frame, with a matted top rib and ivory bead sight, and weighs 7½ pounds. The No. 195 is finished in plainer finish if desired.

WELLS BROS. COMPANY PIPE STOCK AND DIES.

The Wells Brothers Company, Greenfield, Mass., are constantly improving, not alone the high grade tools with which their name has been identified for so many years, but also methods of packing in marketing the same, which are everywhere approved by the trade; assisting as such improvements do, in selling the goods, and facilitating the use and care of the appliances so carefully disposed of. In the illustration herewith is shown their method of packing their adjustable Pipe Stock and Dies with bushing guides. They make a large assortment of these Pipe Stocks and Dies at list prices running from $5 and up, which are rapidly superceding the old style of solid Die Plate as their practicability at once suggests itself to all users. Stocks are made of a variety of lengths so as to give sufficient leverage for the work required.

WELLS BROS. CO. PIPE STOCK AND DIES.

The company are confident their experience for years in the manufacture of thread cutting tools for both bolts and pipe, has demonstrated to them that a stock and die made on the principle of the one here illustrated, at a moderate price, will be appreciated by the mechanic who is looking for a serviceable tool. Their catalogue may be obtained for the asking.

The average fish-bone is easier to swallow than the average fish story.

FULPER POTTERY CO.'S WATER COOLERS.

In the large and varied line of water coolers made by the Fulper Pottery Company, Flemington, N. J., are the two which we illustrate herewith, and which, from their perfect sanitary fitness for cleanliness, are exceedingly popular among the moderate priced articles of this description. Fig. 1 shows the Blue Mottled Cooler, which is handsomely blue

FIG. 1.

mottled with a richly brilliant glaze. The coolers, the manufacturers state, are especially burned and glazed to retain the cold conditions; they are provided with finely finished brass faucet handsomely nickel plated, or if requested, self-closing faucets will be furnished instead. Fig. 2 illustrates the Fulper Germ-Proof Cover Filter and Cooler, the filter being built to fit their line of Water Coolers, although any receptacle for storing water may be used in connection with this filter, even a 50-gallon barrel or larger tank. Every filter is

FIG. 2.

assembled and thoroughly tested before it leaves the factory, and is consequently warranted to be absolutely germ-proof. All parts are interchangeable, and a full stock of parts can be furnished by the Pottery at any time. This combination of Cooler and Filter shown in Fig. 2 is recommended by the makers as being especially adapted for hotel, restaurant and railroad use, for large families or where all the water for drinking and culinary use is to be filtered. By using separate Ice Chamber in the Cooler the filtered water does not come in contact with the ice.

BATES WATER MOTOR FANS.

D. L. Bates & Brother, Dayton, Ohio, are well known manufacturers of high-speed Water Motor Fans for office and domestic use, illustrations of two of which are presented herewith. In Fig. 1 is shown the Wall Bracket Fan, with adjustable ball and socket, so motor may be adjusted to throw air in any direction. Each fan is provided at the inlet with a threaded brass fitting, to which may be screwed the ordinary rubber hose coupling, or a permanent connection can be made at small expense. They are nicely finished in a combination of japan, oxidized copper and polished brass, and

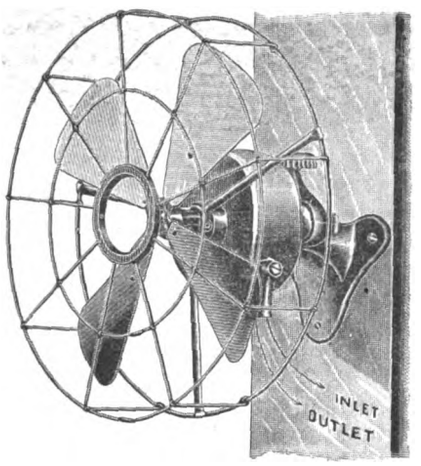

FIG. 1.

are made in two sizes, 12 and 16 inches. Fig. 2 is the Movable Desk or Counter Fan identically the same in point of construction as Fig. 1, but arranged to place on the counter or desk, connections to be made with rubber hose; or if desired, it can be set permanently on a shelf. These are also

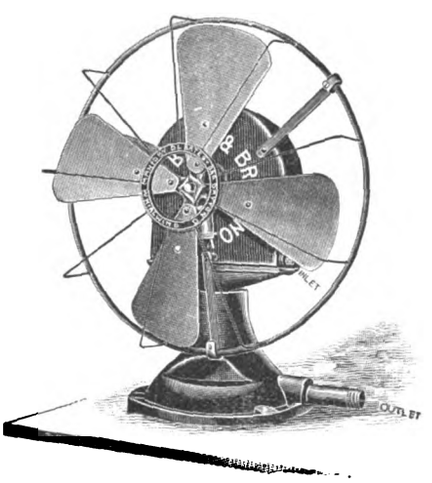

FIG. 2.

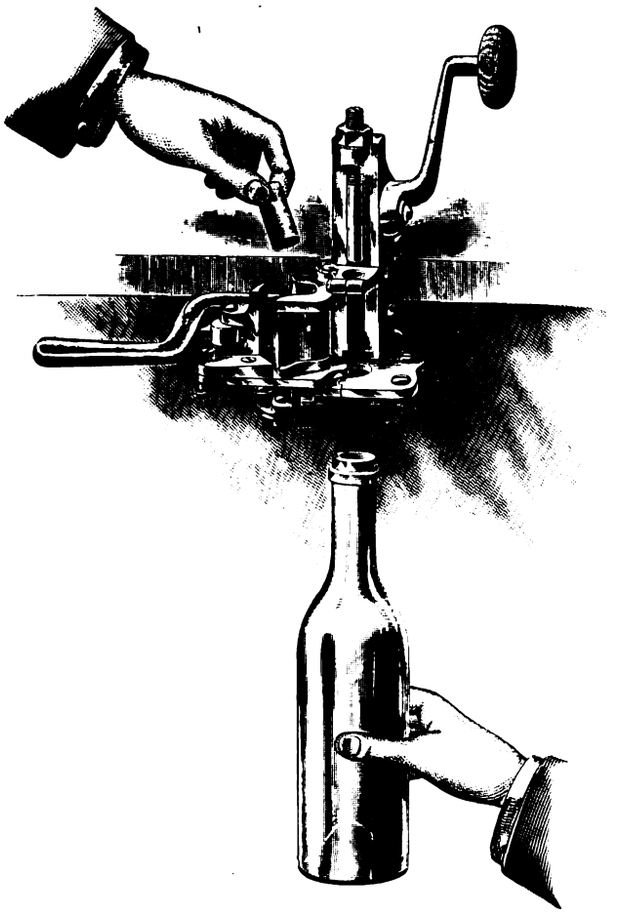
made in two sizes, 12 and 16 inches. The 12-inch fan will give 1600 revolutions a minute under 65 pounds pressure with 1-16-inch jet. The 16-inch fan under similar conditions will give 1100 revolutions; speed, of course, will vary according to local pressure, but results obtained are claimed to be far ahead of any other water motor fan. Write for circulars and catalogue giving further information.



L. & I. J. WHITE CO.

The L. & I. J. White Co., 137-159 Perry Street, 53-93 Columbia Street, Buffalo, N. Y., in presenting their latest catalogue and price list, desire to call especial attention to the fact that their Edge Tools and Machine Knives have been manufactured and extensively used for nearly three-quarters of a century, and during this time their trade has steadily grown from a small beginning, until now they claim there are more of their goods sold than of any other manufacturer in their line, and are a recognized standard of excellence in the various markets of the world. They announce it is their intention to continue in the future, as in the past, to manufacture only highest grade of goods, fully warranted and at moderate prices. The above catalogue includes a full line of tools fully illustrated and listed, which the manufacturers will be pleased to mail upon application.

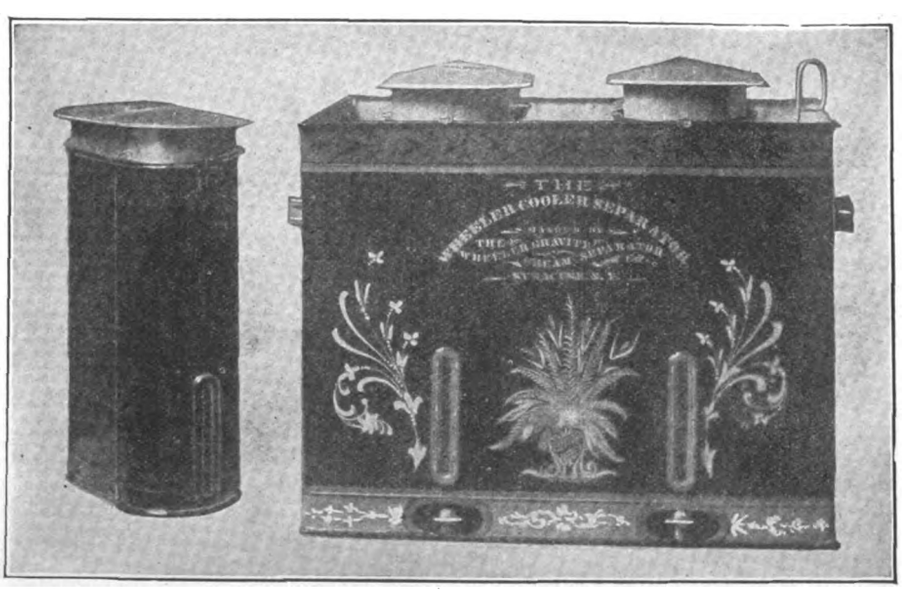
"INVINCIBLE" HAND POWER BOTTLE CORKING MACHINE.

Hugo Reisinger, 11 Broadway, New York, is offering to those interested the bottle corking machine shown herewith. The illustration represents the machine attached to a solid

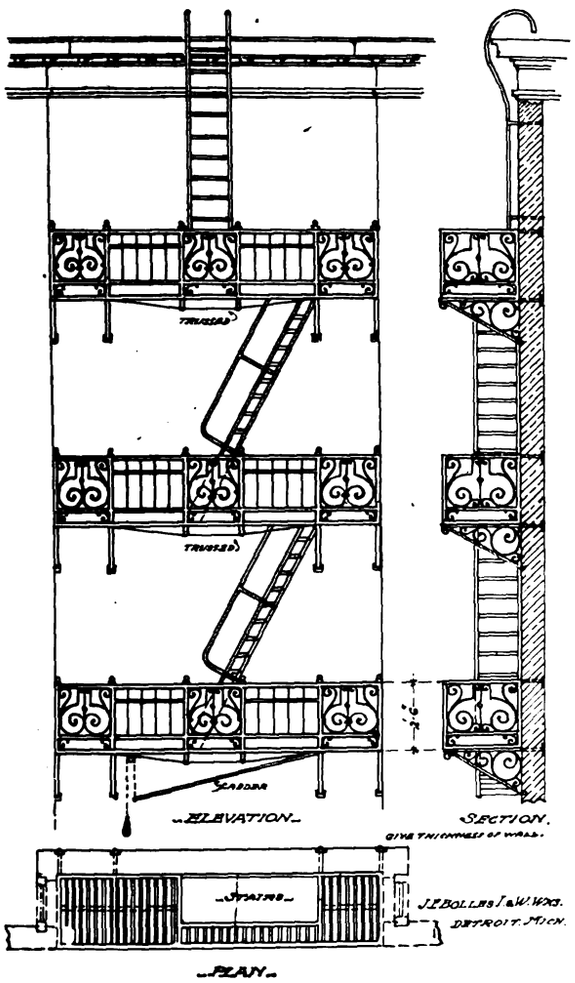


INVINCIBLE HAND POWER BOTTLE CORKING MACHINE.

bar or heavy table ready for operation, with the compressor open to receive the cork and the bottle holder open to receive the neck of the bottle. In operation a cork is inserted in the open compressor, while at the same time the bottle neck is inserted in the bottle holder. The operator, while holding the bottle with the right hand, closes the compressor with the left until it locks automatically. The cork is thus compressed, and the bottle is held automatically in position. The plunger is then brought down by moving the side handle downward, which forces the cork into the bottle. The plunger handle is now raised, the bottle held in the right hand and the compressor is opened with the left hand, leaving the machine ready to cork another bottle. Among the points of excellence referred to are the following: That the machine is suitable for all corks up to 2 inches long; that it may be used for corking all kinds of beer, liquor, wine and mineral water bottles, quarts, pints and splits; that the work of precompressing the cork is greatly facilitated by the side swinging cork compressor, which works entirely independent of the plunger movement; that practically no moisture or juice from the cork enters the bottle; that the simplified plunger movement doubles the power of leverage and effects a concentration of the force required to drive the cork into the bottle, saving time and energy; that the automatic bottle holder, constructed to grasp tightly, hold and center any size and shape of bottle, prevents all breakage, and that the machine is compact, weighing 7 pounds and being 7 inches in height; that it is simple in construction and convenient for use. Each machine is packed in a wooden slide cover box with excelsior and 6 boxes in strong shipping case.

THE WHEELER DOUBLE CAN CREAM SEPARATOR.

The Wheeler Gravity Cream Separator Co., Syracuse, N.Y., whose Gravity or Dilution Cream Separator has been on the market since 1897, has improved that article to meet the views of that class of farmers who do not like the dilution process, by the addition to the line of a Double Can Cooler, which is made oval in shape, the outer can being made from heavy galvanized iron, the two cans which hold the milk being formed in the same shape and constructed of heavy AA tin. The entire outfit is thoroughly painted two coats for preservation, and the outer can made especially attractive by being handsomely decorated. While the milk cans are rigid in their position they can be readily removed without further operation, by simply taking off the faucet. This arrangement is original with this company and has met with universal approval. The Separator is furnished with a well-shaped and perfectly constructed cover, which, when reversed, may be utilized as a strainer. The device for drawing off the water is claimed to be the most unique and perfect on the market. Among the many advantages of this cooler it is remarked that not only does it have double the capacity of the single one, but by its use the separate milkings can be placed in individual cans, so that milk may be allowed to stand any length of time desired. It is claimed that though a cheap and practical separator, with ordinary care it will last for years.



THE WHEELER DOUBLE CAN CREAM SEPARATOR.

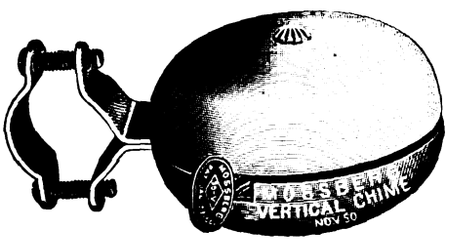
ARTISTIC FIRE ESCAPES.

In apartment houses as at present constructed with all the latest improvements and appliances, and this is also true of high-grade buildings generally, a demand is created for artistic iron work that has of late years taxed the inventive abil-

BOLLES ARTISTIC FIRE ESCAPE.



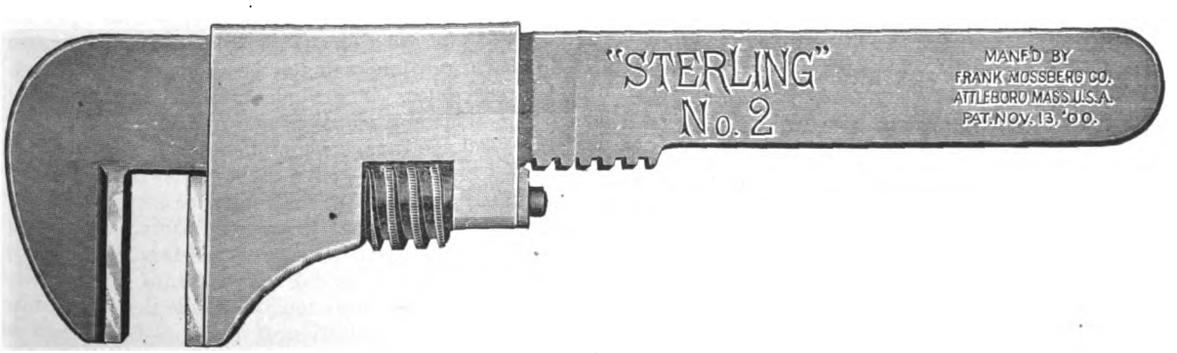
ity of the artificer in metal, to conscientiously supply, as representing advanced construction in that line. We present in the accompanying illustration an ornamental Fire Escape, suitable for the buildings indicated in the above remarks; this Fire Escape being one of a number of styles manufactured by the J. E. Bolles Iron & Wire Works, of Detroit, Mich., whose ability for finished products of this character is well known to many of our successful and leading architects. Parties interested in this class of Iron Work especially, should write this firm for their circular No. 10 H, which displays a fine variety of all wrought iron Fire Escapes, and merits a wide distribution among architects and builders who take a pride in their work.

NILES MFG. CO.

Niles Manufacturing Co., 14-16 North Canal Street, Chicago, Ill., have issued an attractive catalogue, the cover being all white, having the appearance of a pink watered silk ribbon about the middle of it, lengthwise of the book, and with an artistic monogram in an upper corner, and 1904 in a lower corner. The book is devoted to exploiting their Spring Hinges and Lavatory Door Trimmings. They also make other Hardware specialties. This is their catalogue and price list No. 15, intended for the use of architects, plumbers, Hardware dealers and marble works. The goods are well illustrated and are priced in each of the different finishes in which they are furnished. The company will also make special finishes to order. They announce that all orders received by them are subject to prices ruling on the day they are received, and also that their prices are subject to change without notice.

FRANK MOSSBERG CO.'S SPECIALTIES.

Frank Mossberg Company, Attleboro, Mass., has recently issued a 1904 catalogue of envelope size, devoted entirely to bicycle wrenches and bells. They also issue a special catalogue of sheet metal stamping punching dies, special tools and machinery, which they desire to send to dealers who have not yet received a copy. The most popular of their wrenches



MOSSBERG'S BICYCLE BELL.

is their Sterling No. 1, because they claim it to be the best wrench of its class; it is furnished case-hardened and nickel plated or mottled finish, and is made to retail at 25 cents. The length of this wrench is 5 inches, weight 4½ ounces, thickness of jaw 5-16-inch and opens 1¼ inches. At the nominal charge of 15 cents extra it is furnished with a neat leather case. Superior features of the Mossberg chime tire bells, the makers claim, are that it can be operated on either front or rear wheel without extra fixtures; its unusually loud tone; has few parts; no spring is used in its striking mechanism; the friction wheel runs very easily and the slightest contact with the tire produces a clear resonant ring; and can be operated successfully while riding at any attainable speed. This is a very handy and interesting pamphlet, especially at this season of the year, and can be had upon request.

The Kicker.

"Who is that man inside the car raising such a racket?" asked the platformite. "Is he a stockholder?"

"No," responded the conductor, "he's a strapholder."—*Chicago News.*

MOSSBERG'S "STERLING" WRENCH NO. 2.

No Cash Here.

Moneybaggs—That cashier must be pretty well off by this time.

Witticuss—Yes; he's well off in Canada.—*Columbia Jester.*

CONSULAR COMMERCIAL COMMENTS

COLORING TIMBER IN SWEDEN.

A remarkable invention, by which logs of timber may be colored right through in any shade desired, has been for some considerable time a subject of thorough experiments in this country. Fully satisfactory results are now attained, at least as far as alder, beech and birch are concerned. All the sap is expelled from the log, which is then treated with chemicals and, as the case may be, is made hard or soft, and one or more colors are pressed into the log.

By this process, the wood gets dry sooner than by ordinary ways of seasoning. It may also be rendered fire-proof by adding special chemicals, that is to say, it will only carbonize, not burn. It goes without saying that painting becomes superfluous when this colored wood is used; it only requires polishing in the ordinary way and retains, therefor, its natural structure, gets, as it were, a gayer and more vivid aspect than the dull appearance of common painting. The colors are absolutely free from arsenic and otherwise harmless, do not fade, and, of course, can not be worn off by rubbing or freeting, when used, for instance, for flooring.

Besides the cabinet making industry, this new sort of wood seems to be worthy of being largely used for wainscoting, pannelled walls, ceilings, doors, and otherwise fitting up of houses, as well as for finishing steamers, yachts and railway compartments. For export to the tropics it is useful to know that the dreaded white ant does not bite upon this wood.

A company is now in full swing turning out this new article, and their export business is in the hands of Alban Herlitz, whose offices are situated in the Rosenbad palace of Stockholm.—*Affarsvalden.*

PUMPS AND LAMPS NEEDED IN CHINA.

(*From United States Consul Gracey, Fuchau, China*).

Nearly all parts of China are greatly in need of better facilities for supplying the people with pure drinking water. In all the city of Fuchau, with its million of people, there is not a single pump, windlass, or other mechanical appliance for raising water from wells or bringing it from the river to supply the city. Every householder brings his own pail and rope by which it may be lowered into the well, and when supplied carries both away with him, so that a traveler must be the recipient of this hospitality or go without a drink. If the supply is brought from the river it is carried on men's shoulders, two pails being suspended from a bamboo carrying pole. There is no public water system in all Southern China. Some Japanese engineers recently made surveys with a view to introducing waterworks, but I am now informed that they have abandoned the project because of lack of encouragement or the least assistance from the local authorities.

Neither has this great city any system of lighting its streets or public buildings. Kerosene is being extensively used by the better class of Chinese, and there is a great demand for foreign-made lamps. Many of these are of very cheap quality, and are really unsafe to use. Most of the natives use small cups or tumblers about three-fourths full of oil, with a small piece of wood floating on the surface of the oil, through which a tin tube containing a round wick is placed. This is a very common form of lamp in which tea oil is burned, and is utterly unfit for kerosene. Many very poorly made foreign lamps are sent here, which are even more dangerous for use, as they are very poorly put together and the tops soon fall off. A really good low-priced lamp is desired. SAMUEL L. GRACEY, Consul.

BRITISH SAFETY-LAMP DEVICE.

(*From United States Consul Mahin, Nottingham, England*).

An invention which is claimed and currently believed to give absolute safety to oil lamps is being applied to practical uses in this country. The device consists of a circular metal box, the size varying according to the candle power required. In the box is a deposit of salt, over which is a layer of cotton waste specially prepared. Running through the cotton packing is an asbestos wick, woven by hand, which projects through an aperture, and which is practically indestructible and requires only occasional attention. By immersing the box in petroleum or paraffin the cotton waste absorbs the requisite quantity of oil in a few minutes through small lateral interstices. That accomplished, and the metal being dried externally, the application of a light to the asbestos wick produces a bright, steady white light, the candle power being in proportion to the size of the box, the consumption of oil being less and, accordingly, the cost being correspondingly cheaper than if the light were obtained from an ordinary lamp. Moreover, it is claimed, absolute safety is assured. The asbestine lamp may be inverted, may exhaust itself, may be thrown down or whirled about, but there is no danger, it is averred, as there is no free oil or oil gas that can be ignited, and consequently there can be no fire or explosion. The patent is said to be applicable to every species of lamp, from the modest night light necessary in the nursery, through the entire gamut of domestic illumination, to the drawing-room lamp. In the industrial world it would be utilized in every direction, especially where a bright, steady light is essential, such as engine headlights and lights on ships. The Great Northern and several Scottish and Irish railways are engaged in testing the capabilities of the new process with a view to its adoption in railway work. Every description of lamp—the bicycle lamp, the motor lamp, the carriage lamp, lamps for domestic purposes, lamps in mines—can, it is declared, be fitted with the asbestine patent, and oil of any flash point can be used with perfect safety and with the additional advantage of considerable economy. The problem of the safety lamp would appear to have been solved.

POPULATION AND RESOURCES OF BRAZIL.

(*From United States Consul-General Seeger, Rio de Janeiro, Brazil*).

A fair estimate of the population of Brazil—the official statistics vary—is 16,000,000, of which 1,500,000 are Italians, 1,000,000 Portuguese, 250,000 Germans, 4,000 English, 400 Americans, and about 20,000 of the various other nationalities. The average number of immigrants during the last three years was about 3,000 a year, the Italians predominating; the German immigration during the same time was about 200 a year. The Italians are considered as transient rather than stable, the majority going back to Italy as soon as they have acquired a competence. The Germans may be considered settlers. Nearly all are absorbed by agricultural pusuits, skilled laborers arriving here only in very insignificant numbers.

It may be stated right here that there seems to be a misconception abroad as to the resources of Brazil and the possibilities for immigrants. It is true Brazil is a vast country and to a great extent unexplored, but its climate and geological conditions can not be compared with those of the United States. The whole extreme north and middle north of Brazil is not adapted for European or American immigration, and the inducements offered to immigrants in the coffee States or the three southern States do not compare with those of the United States. There may be room for a moderate number of miners in the west of the mining State of Minas Geraes and for an increase of the farming population of the three southern States, Parana, Santa Catharina, and Rio Grand do Sul, but as long as in the north the United States has room for an addition of millions of producers, and in the south Uruguay and the Argentine Republic, with a climate much more congenial than that of Brazil, offer exceptional facilities to new settlers, immigration into Brazil, whether assisted or unassisted, must be comparatively insignificant.

NATIONAL RETAIL HARDWARE DEALERS' ASSOCIATION

(Convention Proceedings, continued).

Wednesday Morning Session, March 23d.

The proceedings were resumed by the reception of the annual report of the National treasurer, A. T. Stebbins, which presented in detail the receipts and expenditures during the year. The report, which showed a balance in the treasury over $500, was referred to the Auditing Committee. In the report Mr. Stebbins, after stating that important Association work had to be neglected for the want of sufficient funds to promote it, urged that some action be taken to increase the income of the National Association for such purposes. A discussion as to the method of accomplishing this followed.

E. C. Atkins extended an invitation to the delegates to visit their Indianapolis plant, which on motion was accepted with thanks, and the hour for the visit was appointed for the following day at 8 A. M.

W. H. Tomlinson, Vice-President.

A permanent Transportation Committee, consisting of Dennis McLaughlin and F. F. Porter, of Chicago, and M. L. Corey, of Argus, Ind., was appointed by the president, to whom all matters for securing reduced rates for convention purposes and all other transportation matters should be referred.

Parcels Post legislation, now before Congress, and all matters relative to the same, was referred to the Committee on Resolutions.

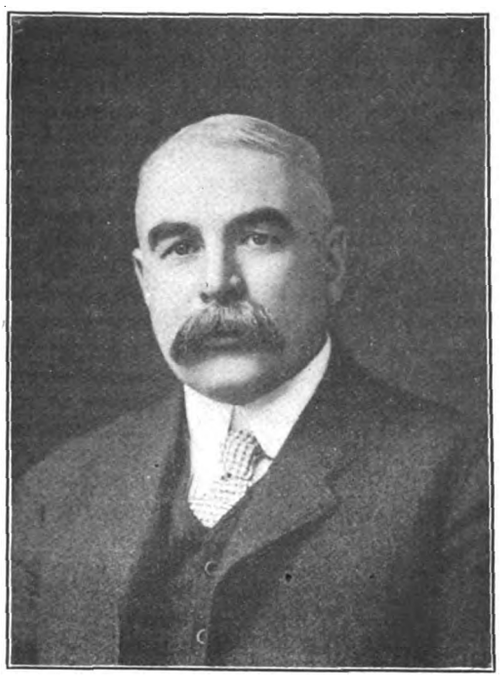
Wednesday Afternoon Session.

An address on "National Insurance" was delivered by Vice-President C. H. Miller, as follows, in part:

Mr. Miller on Co-operative Insurance.

This matter of co-operative insurance is strictly a business proposition. When I am offered Hardware at 25 or 50 per cent. below what I have been paying, and I am satisfied as to the quality, I buy at the lower figure, don't you? The past experience of well conducted mutuals warrants the claim that

SUCH A SAVING WILL RESULT,



and for the following reasons:

1. On account of the risks being scattered, it is scarcely possible and highly improbable that more than any one risk is subject to the same fire. It is impossible for our company to suffer such a calamity as befell many companies at the great fires of recent years, such as Patterson, N. J., Waterbury, Conn., and, more recently, the city of Baltimore. It is only stock companies and mutuals conducted on an entirely different plan that suffer in such great conflagrations.

2. Class risks. Statistics show that Hardware risks are not so hazardous as the underwriters are wont to try to make us believe them, and for that reason we are suffering an unjust tax from stock companies.

3. Selected risks. That the members of the National Association comprise the better and more enterprising element of the Hardware dealers is evident, and since the insurance in this company is limited to association members, we at once confine our operations to the most desirable class of Hardware risks, and, further than that, every risk is subjected to the most rigid inspection by the Executive Committee, and I regret to say they have found it necessary to pass unfavorably on some applications.

With these three advantages—scattered risks, class insurance and selected risks—we have

A. H. Abbe, of Executive Committee.

AN ADVANTAGE IN FIRE PROTECTION.

which is impossible in stock companies as conducted to-day, whose plan is at best a betting that bad risks will not burn. I might also add that it is the intention of the speaker to take such steps as may enable us to employ certain simple fire preventives that may decrease the present hazard.

My remarks to-day would be incomplete indeed if I did not direct attention to the services rendered the National company by certain members. I beg to suggest the propriety of this meeting passing a resolution of thanks to be tendered to the seven Hardware merchants in Pennsylvania who formed a temporary organization of the insurance company and constituted their Board of Directors and officers, who held office until January of this year. In this connection I desire also to call attention to the signal service of one who has labored untiringly from the first, whose counsel was often sought and who was always ready to respond. I refer to W. P. Lewis, of New Albany, Ind.

Mr. Miller's report was adopted and he was tendered a vote of thanks, on motion of Mr. Hall, of Nebraska.

Thursday's Proceedings.

Quite a number of the delegates took the opportunity offered of visiting the saw works of E. C. Atkins & Co., at their invitation, and found the trip an exceedingly interesting one, so much so, it delayed the opening of the morning session of convention until 11 o'clock.

Digitized by Google

The Auditing Committee reported on treasurer's report, which was found correct, and report was adopted as read and committee discharged.

In regard to advertising in convention programmes, some discussion was had and it resulted in a motion being adopted that secretaries be instructed to leave the general field of advertising as much as possible to the National manual, confining their solicitations for advertisements in State programmes to jobbers in their own States, jobbers doing business in many States, and manufacturers in their own States.

The Next Annual Convention to Meet at Minneapolis.

The first order of business for the afternoon session was the selection for the next place of meeting. Mr. Moys, of Colorado, presented the claims of the city of Denver; Mr. Digby, of McKee's Rocks, Pa., placed Pittsburgh in nomination; an invitation to select Detroit, written by the secretary of the Detroit Board of Commerce, was read by the secretary; C. A. Peck, of Berlin, Wis., spoke in behalf of Milwaukee. A number of Minnesota delegates presented the claims of Minneapolis in a manner so eloquent and convincing that that city was selected as the next place of meeting.

The Committee on Resolutions

reported the usual resolutions of thanks to all who had in any way contributed toward the successful outcome of the convention; acknowledging their manifold courtesies in an appropriate manner. Included in the several resolutions were the following:

Resolved, That a vote of thanks be extended to E. C. Atkins & Co. for the courtesies shown us in giving the members of the association an opportunity to visit and inspect their plant, which is one of the great industrial works of this city, and we also commend the stand taken by that company in marketing their products through legitimate trade channels—viz., the retail Hardware dealer.

Resolved, That a vote of thanks be extended the following-named members of the Pennsylvania Hardware Association: Jos. M. Selheimer, Jas. L. Kline, S. S. Bryan, Geo. V. Thompson, Harry Swank, C. H. Miller, Geo. W. Hackett, A. H. Kauffman, and others who rendered such valuable assistance to the Executive Committee in the organization of the National Insurance Association, and the secretary be instructed to transmit a copy of this resolution to each of the above-named gentlemen.

NATIONAL HARDWARE INSURANCE ASSOCIATION.

Resolved, That a vote of thanks is due and is hereby tendered to the officers and Executive Committee of the National Hardware Insurance Association for their untiring and successful efforts in launching the National Hardware Insurance Company, and we especially recommend this company to all association members as affording safe and reliable insurance.

We hereby suggest and recommend that some action be taken by the officers and Executive Committee whereby the National Hardware Insurance Association may contribute a just and equitable amount to the support of the National Retail Hardware Dealers' Association, and that in accepting business they keep strictly within the bounds of the constitution, and under no circumstances accept business from non-association members.

* * * * * * * *

TO MANUFACTURERS WHO SELL DIRECT TO CONSUMERS.

WHEREAS, As it has been called to the attention of this association that the manufacturers of Screws, Bolts, Tacks, Set and Cap Screws, Nuts, Washers, Rivets and kindred lines, are selling their products to the consumer at as low prices as can be obtained by the legitimate Hardware dealer; therefore, be it

Resolved, That it is the sense of this association, in convention assembled, that this practice works a very great injustice to the members of this association, and we would suggest that this question be referred to the officers and Executive Committee as a proper subject for conference with the manufacturers and jobbers.

The report of the committee was accepted and the resolutions adopted by a rising vote.

The Legislature Committee made their report.

Election of Officers.

The Committee on Nominations recommended the following members as officers for the ensuing year, the office of second vice-president having been newly created:

PRESIDENT, W. P. Bogardus, Mt. Vernon, Ohio.

FIRST VICE-PRESIDENT, W. H. Tomlinson, Le Sueur, Minn.

SECOND VICE-PRESIDENT, F. C. Moys, Boulder, Col.

EXECUTIVE COMMITTEE: T. Frank Ireland, Belding, Mich.; James L. Kline, Williamsport, Pa.; Frank F. Porter, Chicago, Ill.; S. E. Jones, Richmond, Ind.; A. H. Abbe, New Britain, Conn.

The report of the committee was adopted and the secretary was instructed to cast the vote of the association for the nominees.

Short addresses were made by the newly-elected officers, in which they thanked the association for the honor conferred upon them.

At a meeting of the Executive Committee held in the evening M. L. Corey was re-elected secretary of the National Association.

Previous to adjournment Secretary Corey took the opportunity of addressing the assembled delegates, and after explaining how difficult it was for the most talented and indefatigable of secretaries to keep in touch with the intricacies of a business so elaborate as the Hardware business, he urged all the members present to help in every way possible, by writing frequently to the secretaries of their State Associations, reporting anything that favorably or unfavorably affected the interests of the association or its vigilant members.

The convention then adjourned *sine die,* the date of next meeting to be decided upon and announced later.

Delegates Who Were Present.

The following delegates who were in attendance, answered the roll call.

ARKANSAS: C. E. Taylor, Little Rock.

COLORADO: F. C. Moys, Boulder.

CONNECTICUT: A. H. Abbe, New Britain.

ILLINOIS: Dennis McLaughlin, Chicago; F. F. Porter, Chicago; L. D. Nish, Elgin; Geo. Meyer, Peoria.

INDIANA: A. N. Shidler, South Bend; J. L. Fulton, Portland; Adam Stratman, Huntingburg; Chas. Hall, Indianapolis; Sharon E. Jones, Richmond; E. M. Bush, Evansville; M. L. Corey, Argos; W. P. Lewis, New Albany.

INDIAN TERRITORY: S. R. Frazee, Vinita.

IOWA: S. R. Miles, Mason City; L. Lindenberg, Dubuque; H. S. Vincent, Fort Dodge; Chas. Swaine, Council Bluffs; A. R. Sale, Mason City.

KENTUCKY: John R. Sower, Frankfort; U. S. Shacklett, Fulton.

MICHIGAN: A. J. Scott, Marine City; Frank M. Brockett, Battle Creek; T. Frank Ireland, Belding.

MINNESOTA: W. H. Tomlinson, Le Sueur; C. F. Ladner, St. Cloud; A. T. Stebbins, Rochester; C. D. Decker, Austin; D. H. Evans, Tracy; W. T. Cowing, Alexandria; M. S. Mathews, Minneapolis; Julius Schmidt, Wabasha.

MISSOURI: F. Neudorff, St. Joseph.

NEBRASKA: H. J. Hall, Lincoln.

NEW YORK: H. J. Knapp, North Tonawanda.

NORTH DAKOTA: C. N. Barnes, Grand Forks; H. F. Strehlow, Casselton.

OHIO: Geo. N. Meyer, Cincinnati; C. A. Hutsinpillar, Ironton; Frank Briggs, Delta; Frank A. Bare, Mansfield; W. P. Bogardus, Mt. Vernon.

PENNSYLVANIA: James L. Kline, Williamsport; J. E. Digby, McKee's Rocks; C. H. Miller, Huntington.

WISCONSIN: C. A. Peck, Berlin; H. L. McNamara, Janesville.

A Cataclysm.

Your making of "calliope" rhyme with "grope," Cyrenus, we might pass; but when you say—

"And in the moonlight, with eclat,
Proudly strikes the Angora cat,"

we must draw a broad and indelible line. Returned with thankfulness.—*Browning's Magazine.*

JAPANESE HARDWARE.

Written for HARDWARE.

The Japs, the Yankees of the Orient, are sort of a compromise between New Englanders and Chinese as far as their Hardware is concerned. They have many tools and pieces of Hardware like those of the Yankees of this country, and other tools and Hardware which are used in a manner directly opposite to the American way, a practice commonly credited to our antipodes "The Heathen Chinese."

For instance, the Japanese have some hammers like those of American craftsmen, but their saws have teeth which are set exactly opposite to the set of teeth of American saws, and the Jap cuts wood by pulling the saw towards him. The Japanese plane, too, has its cutting edge set exactly opposite to the blade of the American plane, and the Jap carpenter shaves wood by pulling his plane towards him, instead of pushing it away from him, but, regardless of his peculiar methods, he can plane down a board surface as smooth as the top of a shiny bald head.

Probably the finest collection of Japanese tools and Hardware in this country is exhibited in the Peabody Academy of Science, in Salem, Mass. It was arranged by Prof. Edward S. Morse, a distinguished authority on Japan and its people, and part of it was loaned by the Educational Museum, of Tokio.

Of course, in these war times, the fighting Hardware is most conspicuous in the collection, and the armor and weapons of old Japan as shown in the exhibit stand out in marked contrast with the modern battleships, rapid-fire guns and up-to-date equipment with which the Japs are doing so much damage to-day.

The helmets, swords and guns of the old Japan appear to be a product of queer workmen. They are light, but of great strength, and the swords are wonderfully keen, like the Japs. The helmets are of many fashions, and are grotesque. They are all of iron. Some look like inverted dishpans, others like bird cages, one or two like a pie turned upside down, and one seems like a flattened out locomotive stack, it being four feet tall. Several helmets have iron face masks, with fiery mustachios, and a man behind one of them would make a terrible looking antagonist, especially as some masks have the features of the devil. But this grotesque horror of war has to-day passed into history with the Middle Ages of the European civilization.

However, the swords of Japan still remain, and some, which are said to be 700 years old, are as sharp as the day they were made, though they may have carved more than one unfortunate individual in their seven centuries of existence. These swords range in size from little ones about as big as a paper knife for "my lady's" desk, to great ceremonial swords 15 feet long. Most of the Japanese swords, however, are short and straight, like those which may be noticed in the comic operas of *San Toy, The Giesha Girl,* etc. These Japanese swords, of many sizes and weights, all appear to have an edge which would cut even a thick Russian. The Japs to-day use a sword like that of the American National Guards.

The guns of old Japan are by no means up to the modern arms of that country. A cannon of old Japan looks as if it had been rescued from a dump pile, and some rifles would have done for old Father Knickerbocker to have used on the troublesome redskins. Indeed, the guns suggest the Dutch of old New Amsterdam, and as well they might, for the Japs patterned them after the weapons of the Dutch traders, who invaded Japan, as well as America, in their days of naval strength.

But coming to the exhibition of the implements of the pursuits of peace, one is struck by the uniqueness of the Japanese tools. Many Japanese tools are like those of his American brother workman, though the Jap's kits lack the completeness, style and finish which gives the American kits their handsome appearance.

For instance, the Japanese carpenter's kit includes hammers, awls, chisels, adzes, pincers, rules and other implements like those of the American craftsmen. But the Japanese saw, and the Japanese plane, as before stated, are very different. The Japanese saw, besides having its teeth set in a fashion directly opposite to that prevalent in America, is mounted on a cylindrical handle as long as itself, and has no curious crooked handle as has the American saw. But the Japanese carpenter grabs the handle of his saw in both hands, pulls it towards him to cut. He holds his board in place, by the way, with his foot. The Japanese mechanics often strip to the buff, and then work like beavers. With bare feet and bodies, it is a wonder that they do not cut themselves more, especially in using their keen edged adzes, a favorite tool with the Japs.

The Japanese have no augers, or gimlets, and they make holes by the dexterity of their hands. They drive one of their awls into a board, and whirl it around by rubbing their hands back and forth on it, something like an American rolls tobacco between his hands, except that they press down on the awl all the time. In this way, they manage to bore a hole.

The Jap has no vise, but he uses a substitute made of a couple of boards and some ropes. Neither has he a square or a hundred other implements which American mechanics think necessary for their tasks. The Jap is, by the way, a natural born carpenter, and some families have been at the trade for generations, the children learning of their fathers.

An ink line is used instead of a chalk line by the Japanese carpenter, and his string pays out through a pot of ink.

The bamboo tree furnishes many nails for the Japanese carpenter, especially shingle nails. These nails are like big shoe pegs, and the Japanese carpenter fills his mouth with them, and feeds them into his hammer hand, while he holds the shingles in place with his other hand. The Japanese shingle hammer has a flat head, and the Jap drives in the bamboo nails by a pushing blow, bending them over to make a head.

As honesty, and consideration of another's property and person is characteristic of the Japanese, locks, bolts and bars are few in the Flowery Kingdom, though some brass and iron locks are shown in the Morse collection. Hinged and latched doors are also uncommon in the Yankeeland of the Orient, for screens serve the purposes of doors. Nor are a hundred and one of the so-called modern improvements, deemed indispensible by the American, to be found in Japanese homes, for the Japs live simply, but with neatness that approaches the immaculate.

Some curious looking scissors and knives and a few wooden frames are the chief tools used in the manufacture of the queer Japanese paper lanterns, so common to American fetes. The Japanese scissors are of one piece, with a spring top, like sugar tongs, instead of being two crossed blades, as are American scissors. These Japanese lanterns are used for street and house lighting. A few metal candle sticks and lamps are also used.

The "habachi" is a characteristic Japanese invention, of which necessity was the mother. The hibachi is a portable fire place, and as wood and coal are scarce in the Flowery Kingdom, charcoal is burned in it. Its fire box is of wood, copper lined, and an iron ring, resting on three legs, keeps the omnipresent Japanese tea pot warm. In tea gardens, geisha girls manage these Japanese stoves, and in homes of the wealthy a hibachi is passed out to every visitor. And in quiet hours the family gathers about it, talk and drink tea as Americans gather around the open fire place. Some Japanese families try to keep these hibachis burning for a long time, and Prof. Morse says that, when he was in Tokio, one family had kept one going for 200 years.

Some gardener's tools are also shown in the collection. A rake looks as if it were made by driving four spikes, each three inches apart, through a stick of wood, making a rake that would never do in this country, except for a lazy farmer's son. A sickle looks like a small American scythe, and pruning hooks and shears are something like those in use in this country.

JAP-A-LAC

"WEARS LIKE IRON"

JAP-A-LAC, the new wood finish, has grown in popular estimation until to-day it is the recognized superior of all wood finishes.

We have had unbounded confidence in **JAP-A-LAC** and have backed up this faith by the expenditure of vast sums of money to make it a household word in every corner of the land.

We are still spending money for this purpose and shall continue doing so.

Watch the leading magazines and exclusive women's publications and see what we are doing.

Start with the April issues of the *Ladies' Home Journal, Delineator, Designer, New Idea, Woman's Home Companion, Ladies' World, McCall's, Everybody's* and *Good Housekeeping* and many other publications, and try to realize the millions upon millions of people who each month read at least a portion of the "Story of **JAP-A-LAC.**"

Never before was a varnish product so thoroughly known. It insures millions of sales for **JAP-A-LAC,** and you will have your share of the demand.

Won't it pay you to place your order now and be ready to supply your customers' wants?

We have a specially alluring proposition for dealers and will gladly furnish information regarding it upon request.

The GLIDDEN VARNISH CO.

MAKERS OF HIGH GRADE VARNISHES

No. 44 Williamson Bldg., Cleveland, O.

Some Japanese stone cutter's hammers are like American sledges, but if any Jap goldsmith should present himself with his kit at Tiffany's, he would be sent to the blacksmith shop, so clumsy do his tools look.

Some remarkably wood and ivory carving is done by the Japanese, and they have queer little knives and gouges for this work.

There are also many other queer Japanese pieces of Hardware, for instance: thief catchers, some like eel forks and others like hooks on American fire department wagons; sword catchers, which are characteristically Japanese; unique designs in iron and copper for family crests; great steel tipped spears; tiny insect cages, and many other articles which reveal the peculiar semi-civilization of old Japan. But the Flowery Kingdom is quickly taking on civilization, its ways and its advantages, and to-day many of the wares of old Japan have been superceded by the products of the new Yankeeland of the Orient, or imports from this great Yankeeland, the United States.

Though some of the Japanese tools and pieces of Hardware described above may seem of crude workmanship in American eyes, yet the Japs possess a remarkable skill in metal working, and some of their castings of artistic designs are not equalled in the world. The Japs could work metals even in prehistoric times of that country, and ancient bronzes and copper and iron weapons are still preserved to show something of their skill.

The advent of Buddhism into Japan led to an increased activity in metal working, and the evolution of the feudal system in the government of people produced some of the most remarkable sword makers the world has known. Some of the ancient Japanese swords were keen edge enough to cleave an iron nail without nicking the edge, and the memory of their makers is preserved in Japan to-day as is the memory of great artists in Europe.

In the latter part of the 15th century, the Japs combined art with working in metals, and some of their designs, especially of on swords and tea kettles, were most elaborate and beautiful.

The Japanese work most of their metals much as do people of other countries, though they have a few tricks of trade that are distinctly Japanese. They are able to combine metals, and produce beautiful shades in colors of metals better than any other iron workers. Though their tools and methods are simple, yet they display a wonderful patience and perseverance, and never give up until their task is perfectly finished. This, of course, is possible only in a land where the strenuous pace of trade is unknown, and the toiler may devote himself to his task without thoughts of the morrow, or even where his dinner is coming from.

The Japs of to-day, however, are adopting new ideas in metal workmanship, and though they are very clever, yet they are unable to supply their own needs, and they buy extensively from other countries. F. A. G.

CULTIVATE CREAM SEPARATOR TRADE.

Dairy products are looking up, encouraged by statistics from the Government, showing how important a production it is, and annually increasing in value. In Iowa alone the Creameries now number over 920 and produce more than one-half the total butter product of the State. The number of farm cream separators in use is over 8,323. The dealers of Iowa, in view of these facts, are beginning to realize the possibilities of profit-making in the sale of these machines. A large proportion of those sold went direct from the factories to the consumers, which ought not to have been the case. Dealers in other States where the farm separator is fast coming into use should see that the trade does not get away from them.

REVIEW OF THE MARKETS.

WIRE NAILS. There has been such a plethora of orders received for this staple line, manufacturers have full order books for goods undelivered, in excess of any previous Spring season for this line. Owing to the lack of cars they have not been able to deliver to the extent of their present output; in fact, they would just as lief see a let-up in the orders going forward, for a little while, anyway. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots $1.95
Retailers, carload lots 2.00
Retailers, less than carload lots 2.10

New York. Local distributors are doing a fair business, although no great demand is apparent compared to that of contiguous territory, which looks to the city for its general supply. Quotations are as follows:

Single carloads $2.10
Small lots from store 2.20

CUT NAILS. While the volume of Cut Nails distributed bears no comparison with that of Wire Nails to create surprise, the trade is calling for them more generally than usual, and they are held in high esteem by many classes of customers, which is the cause of an increasing demand. The scarcity of cars, in common with other lines, affects deliveries to an appreciable extent. Quotations are as follows: On either Steel or Wire Nails, with no discrimination as to locality, quotations are as follows:

Carload lots .....$1.75 base
Less than carload lots $1.80

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. The trades union disturbances, having a disposition to unsettle the hopefulness that should prevail, has caused a lessened demand in local territory, although nearby trade is doing fully their share of consumption. Quotations are as follows:

Carloads on dock $1.90
Less than carloads on dock 1.97½
Small lots from store 2.05

BARB WIRE. There is no let-up as far as the mills are concerned in the production of this great staple. The area for its consumption is annually extending. Large buyers have already secured themselves by booking good contracts of greater size than usual, and requisitions on these contracts as called for, would keep the mills well occupied for some time to come. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.25	$2.55
Retailers, carload lots	2.30	2.60
Retailers, less than carload lots.....	2.40	2.70

SMOOTH FENCE WIRE. In common with other Wire products difficulty is experienced in making prompt shipments. The output of this commodity this year bids fair to be a phenomenal one. While the prevailing demand is continuously an eager one, the volume of its wants has not been so strenuously in evidence. The mills have enough to keep them busy for months. Quotations are as follows, f.o.b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads $1.90
Retailers, carloads 1.95
Less than carloads 2.05

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

SHEET ZINC. Matthiessen & Hegeler Zinc Co., of La Salle, Ill., on March 31st advanced prices of Sheet Zinc to $6.10 per 100 pounds, in casks of 600 pounds, f.o.b. La Salle, Ill., the usual discounts on quantities being given the large buyers.

CORDAGE. The prevalence of more favorable Spring conditions has stimulated a fair demand for Cordage. The following quotations may be said to represent the market, the usual rebate of ¼-cent per pound being given to carload buyers:

Pure Manila, 7-16-inch and larger 12
⅜ inch 12½
¼ inch and 5-16 13
No. 2 Manila .....10½@11
Pure Sisal, 7-16 inch and larger 9¼
No. 2 Sisal, 7-16 inch and larger 8¼
⅜ inch 8½
¼ inch and 5-16 inch 9¼
Lath Yarn, Medium and Coarse 8½
Jute Rope, No. 1 ..... 6½
No. 2 6

LINSEED OIL. The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

At the time of writing this letter we are still in the possession of freezing weather, the temperature going nightly below the freezing point, and outdoor work is still difficult and has scarcely begun. There are, however, some signs of Spring, and feeling that it is at least Spring by the calendar, dealers are calling urgently for Wire Netting, Wire Cloth, Forks, Hoes, Rakes, and other Spring goods, and as the supply is very meagre there is already a famine and much dissatisfaction with the state of affairs. Locally, a large part of this confusion is due to the action of the Fork and Hoe Trust, which closed two out of the three factories in Philadelphia, making it almost impossible for the remaining factory to satisfy the demands of the Philadelphia jobbers. There is a hopeful feeling in regard to trade and every one seems to believe that a week of Springlike weather will have a marked effect on trade, and we share in this belief. Prices are without important change. Raw material seems to have stiffened up somewhat if not actually advanced during the past few weeks, and the market is firm in consequence. Wire Nails and Wire are also scarce and this scarcity is likely to be increased by the fire which destroyed the Rankin Works, containing nail machinery and some 8,000 kegs of Wire Nails. On the whole, therefore, there seems to be a fair prospect and we trust that April and May will make an extraordinary showing in the year's record.

Biddle Hardware Co.

THE PITTSBURG TRADE.

Trade is undoubtedly improving, but the rate is not so rapid as many would like to have it. The daily papers make the most of every good token, such as a large order placed or an idle mill started. This is commendable, as it tends to spread the feeling of better times, but it some times leads people to overestimate the rate at which the improvement is moving. The business actually doing in steel and the various lines dependent upon it, is probably 25 per cent. less than it was at this time one year ago. This amount of business would have been considered very large five years ago, but we have been educated to the big output of 1902 and 1903 and anything less seems small by comparison. The signing of the Bituminous-Coal Labor-Scale removes a great incubus from this community, and other labor scales are gradually

Digitized by Google

being adjusted. Our builders trades seem to be quiet and will probably have no trouble this Spring as there is not a large amount of building contemplated. Our rivers again reached flood stage to-day, April 2nd, for the fourth time since January 1, 1904, but not so high as to do much damage as we read of west of here. The long severe winter and late opening of Spring has undoubtedly proved a drawback to trade, but we look for a strong demand for goods now that weather conditions are more seasonable.

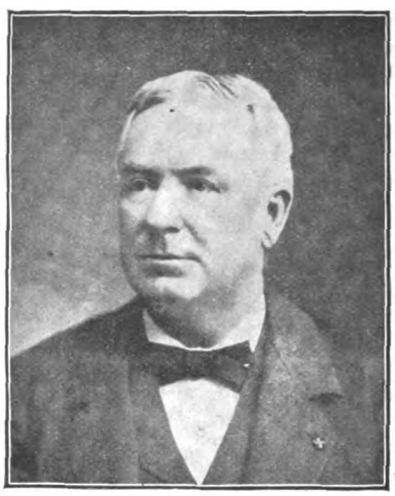
Logan-Gregg Hardware Co.

THE CLEVELAND TRADE.

The general belief that combinations prevent individual success was not warranted as the results show. No age in any country has offered more inducement to young men to prepare for business. They do not need capital to begin with, as that can be earned while experience is being gained that prepares them to use it. In fact, those without capital are most likely to get the opportunities. Wealth in hand or in prospect is usually a detriment, as it is likely to sap the vitality of the qualities necessary. Houses that educate men for their best positions are influenced in the selection of their employes by these considerations. One's patience is often tried by hearing the statement that there is no longer a chance for young men. To one not a part of it, it is difficult to realize the changes in business by the introduction of labor saving devices without which it would be difficult to do the increased business. An office man can easily duplicate himself and yet there is no over supply of men, but a man needs to be alive all over to keep pace with the increased activity. Business is improving with the weather. Pig iron and steel are in more demand and the weakness in price has disappeared. Boats are taking on cargoes of coal for upward trips, farmers are busy preparing for crops and if the sun and rain do their part, the winter of our discontent will soon be forgotten. Business is good compared with an average year, compared with the best, is only moderate.

The Lockwood-Taylor Hardware Co.

THE CINCINNATI TRADE.



The old time prediction, "If March comes in like a lamb, it goes out like a lion," has certainly proven true for this March. The damage done by storm and rain and flood is beyond reckoning. Railroads entering the city had for a time to abandon their trains caused by washed-out bridges or were obliged to come in by some round-about way. The flooded towns within a radius of one hundred miles of Cincinnati have left thousands of their people in destitute circumstances, which have in a measure been relieved of their worst suffering through the efforts of the Associated Charities, Salvation Army and Church Organizations, Cincinnati being called upon for assistance in the work. The damage resulting to the business and factory districts is very great, much more so than was estimated it would be while the waters held full sway. The Hardware trade say they felt the effects very seriously, but since the railroads have been able to run trains, they have been rushed with "hurry fence and tool shipments to the flooded districts." George M. Bishop, the saw manufacturer, who has just returned from California and the Northwest, said he viewed from the top of the State House, in Sacramento, Cal., a wild waste of waters for thirty miles. He said at the same time that Southern California was experiencing a drought, Portland, Oregon, was flooded. Mr. Bishop's firm is shipping saws to Honolulu and the Philippines, and has orders ahead for six months. The Salt Lake Hardware Company, of Salt Lake, Utah, placed an order with the Razall Printing Company, this city, for fifty thousand printed nail sacks. Part of the order has already been shipped. There being but few responses to invitations sent the ladies to attend the St. Louis World's Fair May 24th, the general committee having charge of Cincinnati day state that it will be a stag affair; purely a business men's trip. The various cities *en route* at which the party will stop both going and coming are making elaborate preparations to entertain them. About 200 expect to make the trip.

POSTPONEMENT OF MILAN EXPOSITION.

The proposed exposition in Milan, the date of the opening of which was fixed for April, 1905, will not take place until April, 1906.

COLONEL JAMES R. NUTTING.

In the March number of *Thrift*, published at Cedar Rapids, Iowa, we observe an interesting biographical sketch of our Davenport correspondent, Col. James R. Nutting, showing what a busy, all-around man a prominent Hardwareman can be. Col. Nutting, although a characteristic Westerner, was born in Washington County, N. Y., of New England progenitors, and with his father migrated to Davenport, Iowa, when a boy. His life since shows the surplus energy early exhibited in his youth. As stated in the sketch referred to, he was cut out by nature for a professional career, circumstances turned his talents into commercial lines. He early learned that whatever was worth doing was worth doing well. No one appreciated this more than his employers, and the proof of this lies in the fact that he is now the head of the house he entered in the capacity of errand boy, with both of the original members of the firm still living and enjoying the manifold benefits of its increased prosperity. Under his management, the house, Sickels, Preston & Nutting Company, soon became the leading Hardware establishment in the State of Iowa, and from its prominence and the active part Col. Nutting has taken in commercial matters of State and National importance, benefits of no small consequence have occurred to the city of his home. For example, he was the

Col. J. R. Nutting.

first president of the Iowa Hardware Jobbers' Association, now one of the most influential in the West; was the first secretary of the Mississippi and Missouri River Hardware Jobbers' Association, the organization of which he was instrumental in effecting in the city of Davenport; was the first vice-president of the Mississippi and Missouri Trade Association, organized at St. Louis and comprising all classes of manufacturing and jobbing interests in the Mississippi and Missouri River Valleys, and was invited by the president to preside at its second annual meeting held in St. Paul; was a member of the Western Hardware Association, which included all of the Western Hardware jobbing territory from the Ohio River to the Pacific Ocean; has been for years an active member of the National Hardware Association and has been and still is chairman of the Press Committee.

His keen foresight has created a demand for his opinions, and his advice is frequently sought in the councils of his party. In recognition of this, Governor Drake made him a member of his staff and gave him, on several occasions, special commissions, among which was to attend the formal transfer by New York to the general Government, the tomb of General U. S. Grant. It is this power to see to the bottom of things—to get at the kernel of the nut and to express himself clearly, concisely and understandingly, that has brought Colonel Nutting to the front in another direction, namely, as a writer and public speaker. Those who know him have learned that when he talks something will be said. He does not deal in meaningless platitudes. He has written many trade articles, which have been copied far and wide, and several of his addresses before trade conventions and committees have been cited by leading editorial writers of the country.

NICHOLSON FILE COMPANY
GENERAL OFFICES: PROVIDENCE, R. I., U. S. A.

MANUFACTURERS OF
FILES AND RASPS
NICHOLSON, KEARNEY & FOOT, ARCADE, AMERICAN, GREAT WESTERN, McCLELLAN, EAGLE, J. B. SMITH, "X. F.", GOLD MEDAL.

THE NAMES OF THE STATES, TRANSLATED.

In response to an enquiry as to the meaning of the names of several States, we print the following fairly complete list of the names of the different States, alphabetically, with the translations thereof:

Alaska—"The Great Land."

Alabama—"Here We Rest" (Muscogee).

Arkansas—"Bow (Indians) on the Smoke Water."

Arizona—"Sand Hills."

California—"Hot Furnace."

Colorado—"Ruddy" (River).

Connecticut—"Long River."

Dakota—"Allied" (Indian tribes).

Delaware—In honor of Thomas West, Lord de la Warre, governor of Virginia, 1610. The estate La Warre (Warwick) was in Gloucestershire, England.

District of Columbia—Feminine of Columbus (dove).

Florida—"Flowers." Spanish for Easter Sunday, the day that Ponce de Leon discovered the land.

Georgia—Feminine of George ("Farmer"), in honor of George II, who established a colony, 1732.

Idaho—"Mountain sheen of the morning sun."

Illinois—"Tribe of men."

Indiana—"Indian land," from Indus, Sanscrit, Sindhu, "river."

Iowa—"Drowsy Ones" (Indian tribe).

Kansas—"Smoky water."

Kentucky—"At the head of the river."

Louisiana—In honor of Louis XIV of France, Ludovicus, "Bold Warrior."

Maine—The mainland, as distinguished from neighboring insular parts.

Maryland—In honor of Henrietta Maria (bitter), daughter of Henry IV of France, and queen of Charles I of England.

Massachusetts—"The Place of the Great Hills."

Michigan—"A Weir of Fish"—the lake resembling a fish trap.

Minnesota—"Muddy Water," Indian name of St. Peter's river.

Mississippi—"The Father of Waters."

Missouri—"Great Muddy" (river).

Montana—"Hilly Country"—a mountain.

Nebraska—"Shallow Water" (the Platte river).

Nevada—"Saw-toothed" (mountain range, Sierra Nevada).

New Hampshire—From Hampshire (Hants), England, by John Mason, governor of Plymouth, in Hampshire. Saxon Chronicle, 755, Las Hamtaurerie.

New Jersey—From the Isle of Jersey, Cesarea, (Cesar, Latin, "Hairy"), one of the channel islands, defended by Sir George Carteret against the Long Parliament..

New Mexico—From the Aztec god "Mexitli," god of war.

New York—From the Duke of York (afterward James II of England), Eboracum, Caer Ebroc, or Tbroc castle in British.

North Carolina—From Carolus (Little Darling) Charles IX of France, in whose reign the Huguenots planted the first colony.

Ohio—"Beautiful" (river).

Oklahoma—"Red People" (Choctaw).

Oregon—From Oregano, Spanish name for wild sage, "artemisia," which grows on the shores of the Columbia river.

Pennsylvania—"Penn's Woods," in honor of William Penn.

Rhode Island—From the Isle of Rhodes ("Roses") in the Mediterranean.

South Carolina—Separated from North Carolina in 1729.

Tennessee—River of the Great Bend.

Texas—"Friendly" (Indian tribe).

Utah—"Dwellers in the Moutains" (tribe of Indians). Proposed name Deseret, "honey bee."

Vermont—"Green Mountain."

Virginia—From Queen Elizabeth, in honor of her unmarried state.

Washington—In honor of George Washington, from Wessyngton, Durham, England.

West Virginia—Separated from Virginia, 1863.

Wisconsin—"Wild Rushing Channel," (river).

Wyoming—"Broad Plains."

TRADE NOTES

Fremont, Ohio.—The Hardware firm of Drown & Newkirk are enlarging their stock and will connect an adjoining room with the new one now occupied, and will thus have a handsome and commodious Hardware store.

Green Bay, Wis.—J. Kresge has sold his Hardware store to Louis Moford, of Lincoln, for $10,000. Mr. Moford will convert the building into a modern hotel.

Lasalle, N. Y.—Thomas R. Smith has bought out the grocery, Hardware and general store of E. A. Knisey, and will conduct it hereafter.

Layton Corners, Mich.—Bueche C. Schlachter has sold his Hardware business to the new Chesaning Hardware & Implement Co., of this place.

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN., U. S. A.
Improved Carpenters' Tools.

HARDWARE FACTS AND FICTION NOT GENERALLY KNOWN.

Specially Compiled By GEORGE CECIL.

THE ANTIQUITY OF IRON.

The ironmongery business is said to be never thoroughly understood and this is not to be wondered at when we remember that it is unquestionably the oldest business known. Like other retail trades the Hardware trade has been one of continued growth and development; during the centuries it has been followed by different generations of ironmongers.

Wherever nations become civilized the iron age gradually dawns upon them, and the handicraft of the smith stands out clear from among his fellow workers. The early vendors of Hardware were also workers in iron, and even to-day in country villages, smiths and workers in tin, iron and brass, are oftentimes the distributors of their own productions, as well as acting as the agents through whom Hardware, made by the aid of machinery and modern tools and appliances, is retailed.

There are many matters connected with ironmongery and folke lore as well as legends about iron, things not generally known, which are of an extremely interesting character. After much research into musty volumes and investigation into old literature the facts dealt with in these columns have been dragged forth to light.

Retailers of ironmongery must always remember that whatever the materials the goods they handle consist of, the metal from which they earned their trade name was iron. It is still the backbone of the trade and the principal constituent in the bulk of the metallic articles they distribute.

> "Life is not an idle ore,
> But Iron dug from central gloom,
> And heated hot with burning fears
> And dipped in baths of hissing tears
> And battered with the shocks of doom
> To shape and use."
>
> Tennyson, "*In Memoriam.*"

THE INFLUENCE OF IRON ON MANKIND.

When the stone age gave way to that of bronze, man was but groping after the minerals and metallic ores which lay concealed beneath the earth's crust, and which were in after years to play so important a part in the destinies of the race. The era of the discovery of iron is unknown and very remote, it is only by tradition or by digging up some rude instruments of our forefathers, that we learn that mankind was originally unacquainted with the use of metals, and was content with employing the flints, shells, bones and other hard substances for the same purposes which metals serve among civilized nations to-day. Gold, silver, and copper ore are found in their perfect state in the clefts of rocks, in the sides of mountains, and in the channels of rivers; these were accordingly the first known and applied to use. Iron, the most serviceable of all metals, and the one to which man is most indebted, is never discovered in a workable form; its ore must first pass through the fire and many laborious processes, before it becomes fit for use.

Many readers familiar with holy writ recall the mention made in Gen. IV-22 to Tubal Cain, said to be an instructor of artificers in brass and iron. We have no wish to enter into an argument as to the true rendering of that passage, nor yet as to the date when the Hebrew patriarchs of early days advanced in civilization so far as to learn how to manipulate iron ore and make it workable. The various allusions to "iron" in the sacred records would perhaps in many cases be more correctly rendered "bronze." Nevertheless the Canaanites are said to have used iron in their wars, and a thousand years before the Christian Era mention is made of the iron spear head of Goliath, of bars and rods of iron, fetters of iron and of bright iron on the markets.

In Thomas Hood's "Wit and Humours" the poem of "The Forge" is a romance of the iron age. To repeat it would be wearisome, but many lines are striking and reveal a depth of meaning to the intelligent Hardwareman.

> "The Forge, the forge itself is in sight,
> Like the pitch black hull of a burning bark
> With volleying smoke and many a spark,
> Vomiting fire red, yellow and white.
> Restless, quivering tongues of flame,
> Heavenward striving still to go,
> Whilst others reversed in the stream below."

The antiquity of iron in manufactured form is vouched for in historical works of undoubted repute. Homer mentions a mass of iron as one of the prizes at funeral games given by Achilles in honor of Patroclus.

> "Then hurled the hero, thundering on the ground,
> A mass of iron, (an enormous round)
> Whose weight and size the circling Greeks admire,
> Rude from the furnace, and but shaped by fire.
> This mighty quoit Aetion wont to rear,
> And from his whirling arm dismiss in air."

Pliny, born A. D. 62, after treating of other metals, observed: "It remaineth now in the next place to discourse on the mines of iron, a metal which we may well say is both the best and worst implement used now in the world, for with the help of iron we break up and tear the ground, we plant our groves, we set our vineyards, and range our fruitful trees in rows, and we prune our vines. By means of iron and steel we build houses, hew quarries, and cut in stone, yea, in one word, we use it to all other necessary uses of this life. This I take to be the wickedest invention that was ever devised by the head of man, for to the end the death may speed away the faster to a man, we make iron to fly as it were in the air, and to the arrow, headed at one end with deadly iron, we set feathers at the other, whereby it is evident that the mischief proceeding from iron is not to be imputed to the nature of it, but to the unhappy wit of man."

AVOID TROUBLE!

WHY SOME ARE POOR; Dr. Marden in "Success."

They do not dream that little mortgages on their homes can ever turn them out of doors.

They have indorsed their friends' notes or guaranteed payment just for accommodation.

They risk all their eggs in one basket when they are not in a position to watch or control it.

They think it will be time enough to begin to save for a rainy day when the rainy day comes.

The head of the house is a good man, but he has not learned to do business in a businesslike way.

They do not know that giving a full power of attorney to an agent or lawyer puts their property at his mercy.

On a six-hundred-dollar income, they try to compete in appearance with a two-thousand-dollar-a-year neighbor.

They subscribe for everything that comes along—organs, lightning rods, subscription books, pictures, bric-a-brac—anything they can pay for on the installment plan.

GILBERT & BENNETT MFG. CO.'S NEW OFFICES.

The Gilbert & Bennett Mfg. Co., manufacturers of the "Climax" Poultry Netting, have recently completed their new office building at Wireton Works, Blue Island, Ill. The structure is two stories high, with attic and basement; is built of pressed brick and has a slate roof. The interior is finished in ash and the floors are of hardwood. The illumination is by electric lights and the heating by steam. The building is 25x50 feet. The general offices of the company have been moved to this new building. The city office and stock rooms in Chicago, remain as heretofore, at 153 Lake Street.

MARSHALL FIELD'S ADVISE TO HIS SALESMEN.

All fixtures and property of the house should be treated with the greatest care; the first scratch paves the way for carelessness.

Each day should find us doing things better than previously. Acquire the habit of promptness in every matter, large or small, which is left to your care.

Know the value of a good personal appearance; do not think that any detail of your attire will escape notice.

Spend wisely your spare time; count every hour golden, every moment an opportunity; don't waste a minute at any time.

Avoid being influenced for the wrong by other persons; have a purpose of your own; weigh counsel, but act from your own best thought.

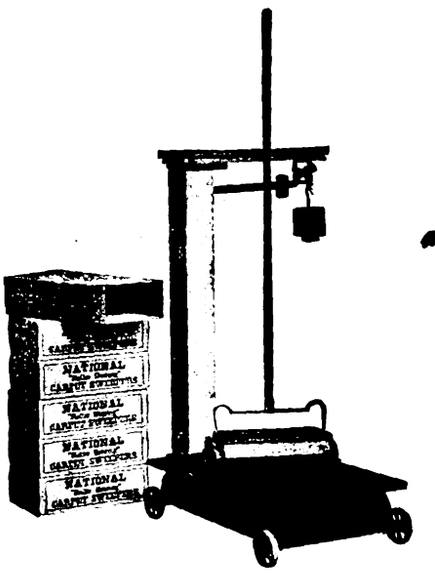
Cultivate a happy expression and a happy manner; feel it; mean it; the advantage is wonderful in every way.

Learn to ask such questions as will draw out the most profitable information.

Let every effort be toward the idea of permanence; do things to last; make the casual customer a permanent one through satisfaction.

Salesmanship may be made a profession, and receive the same degree of respect accorded to an artist of any class. Be emphatically unwilling to ask or receive favors from any person who expects a return in business favors.

The great majority of errors are made through carelessness. Learn to care; be exact; strive to have it absolutely right—making a mistake in business is like falling down in a foot-race; it is a setback.



Cultivate a good, clear, legible handwriting; many people judge quickly on this point; a good hand is always appreciated.

However attached to your business, do not allow the commercial sense to deaden, but rather to quicken, the moral, artistic and all wholesome sentiments.

In giving orders give reasons, thus teaching subordinates to think for themselves.

Learn to show a thorough interest in a customer or any person approaching you; try to look at the matter from his standpoint as well as your own.

Make memoranda of little points while you think them; run over the various sub-divisions of your work to recall any points you may have forgotten.

The "National Weigh"

Weigh the arguments pro and con that figure in the construction and sale of carpet sweepers, look at the illustration, and you have a decision decidedly in favor of "NATIONAL" Sweepers.

The argument of most weight carries conviction.

The illustration not only voices our own confidence but the reliance the trade put in our goods—the influence "NATIONALS" bear upon the consumer—the weight in competition.

The future is not in doubt—superior goods will continue to grow in favor. Possibly you haven't given us the opportunity of convincing you of the merits of the "NATIONAL" line. Let us get together to-day—a postal will do.

CALIFORNIA STATE RETAIL HARDWARE ASSOCIATION

The third annual convention of the California State Retail Hardware Association was held at the California Hotel, San Francisco, on Wednesday and Thursday, March 2d and 3d.

Wednesday Morning Session.

The convention was called to order on Wednesday morning at 10 o'clock, President Roy Hall, of Fresno, in the chair. The president appointed Johnson Grover, of Colusa, sergeant-at-arms. One hundred and ten delegates responded to the roll call.

The reading of the minutes of the previous annual meeting was dispensed with.

The North Coast and Humboldt Associations were proposed for affiliation and were unanimously admitted to membership.

President appointed an Auditing Committee, consisting of G. A. Gutman, of Pacific Retail Hardware Association, and F. W. Fisher, of San Joaquin Valley Association, to audit the accounts of the secretary and treasurer.

Wednesday Afternoon Session

was opened by the delivery of the Annual Address of President Roy Hall.

This was followed by the report of Secretary Henry Gracey, which showed that on February 15, 1901, State association was organized by the affiliation of two local associations—the Pacific Retail Hardware Association, with 78 members, and the San Francisco and Oakland Association, with 20 members, making a total of 98 members. To-day have affiliated with the State association eight local associations, with a membership of 350 good, wide-awake and intelligent members, thus making an increase of 66 members for the year.

The treasurer, H. C. Bennett, presented his report, as follows:

Treasurer's Report.

Received during the year, as per capita of $5 on 242 members	$1,210.00
Received from voluntary subscriptions toward State Fund	411.00
Balance carried over from last year	.30
Total	$1,621.30
Total expenditures to date	1,569.35
Balance in treasury	51.95
Total indebtedness to date, not including expense of the present convention	300.00

The Auditing Committee reported finding the secretary and treasurer's report complete and correct in every particular. Report was accepted, and committee discharged.

The report of the Executive Committee was an exhaustive one, embodying the following:

About February 18, 1903, at the earnest solicitations of the officers of the Southern California Association, the president, Roy Hall, appointed a special committee, consisting of Vice-President William F. Lutz, the ex-president, O. F. Sites, and the ex-vice-president, G. A. Gutman, to which was afterward added the president, Roy Hall, to meet with the Southern California Association at their annual convention, held in the city of Los Angeles, with the purpose in view of stimulating association work in the Southern portion of our State. It appears by the report made by this committee to the Executive Committee that much good resulted at that time through this visit.

This has been the only effort that it has been possible for your Executive Committee to make along the line of organization work. We have, however, endeavored to keep closely in touch with conditions existing in various localities throughout the State, and present for consideration reports prepared by members of the Executive Committee, who represent the several district organizations.

These reports were very complete and were of great interest to the assembled delegates.

All the above reports were, on motion, ordered accepted and filed.

Election of Officers.

The Nominating Committee appointed by the president then submitted their report, as follows:

President, O. F. Sites, San Francisco.
Vice-President, G. A. Gutman, Orland.
Secretary, Henry Gracey, San Francisco.
Treasurer, H. C. Bennett, San Francisco.

Executive Committee: James W. Hellman, Los Angeles, and William F. Lutz, Santa Ana, of the Southern California Association; John C. White, Marysville, and A. L. Nichols, Chico, of the Pacific Association; Chas. W. Barrett, Fresno, and R. Barcroft, Merced, of the San Joaquin Valley Association: C. M. Brown, Hollister, and H. E. Robinson, Hollister, of the Central Association; M. M. Brown, San Francisco, and C. H. Philpott, San Francisco, of the San Francisco Association; J. P. Maxwell, Oakland, and G. H. Smith, Oakland, of the Alameda Association; J. C. Mailer, Santa Rosa, and J. H. Steves, St. Helena, of the North Coast Association; J. E. Janssen, Eureka, and H. E. Reid, Eureka, of the Humboldt Association.

These gentlemen were unanimously elected by acclamation.

Following the suggestions contained in report of the Executive Committee, the president appointed Messrs. Hellman, of Los Angeles, Brown, of San Francisco, Maxwell, of Oakland, and Janssen, of Eureka, as a special committee to carry on the work, it is hoped, to a successful issue.

Montague & Co. Will Abandon Retailing.

S. F. Grissim, representing W. W. Montague & Co., briefly addressed the convention as follows:

I come before you as a representative of W. W. Montague & Co., after having talked with some of your committeemen here to-day, and afterward with the members of my firm and Mr. Watkins. They have decided to join in with you and not retail any goods in the State of California. They asked me to convey this news to you and said that the detailed arrangements would have to be determined by themselves and a committee you may appoint to come before them; some little matters will have to be looked into, but the special part is that they will not retail any goods in the State.

Constitution Amended.

Section 1, Article 3, of the constitution, on motion, was amended to read as follows:

The Executive Committee shall consist of the president, vice-president, secretary, treasurer and two members from each local association affiliating with this State Association and who shall be elected at each annual meeting.

A motion for a joint conference with the wholesalers on Thursday afternoon was defeated.

The convention adjourned until Thursday morning.

Thursday Morning Session

was devoted to executive business.

Thursday Afternoon Session.

A resolution was offered increasing the salary of the secretary to $600 per annum, which was adopted unanimously.

J. W. Hellman, of Los Angeles, addressed the convention on the subject of "Why the Retail Hardware Merchants Should Work in Harmony with the Wholesaler, Provided the Latter Performs His Duty Toward the Former."

Harmony Among Wholesalers.

The following resolution was unanimously adopted:

Resolved, That this convention earnestly desires the restoration of harmony among the wholesalers and requests that they take such action among themselves as will speedily restore the former satisfactory conditions.

On motion by Mr. Ingalls that thanks be extended to the retiring officers for their very efficient service was unanimously carried, after which the convention adjourned *sine die*.

Entertainment.

The programme of entertainment included a bay excursion for the ladies on Wednesday afternoon, a banquet in the evening at Golden Gate Hall for members, guests and ladies, a trolley ride for the ladies on Thursday afternoon, and a theater party on Thursday evening for members, guests and ladies.

TEXAS HARDWARE JOBBERS' ASSOCIATION.

The annual meeting of the Texas Hardware Jobbers' Association will be held at the Rice Hotel, Houston, April 21-23. A number of interesting papers will be read, among which are the following: "Taxation on Goods Carried in Storage," by F. A. Heitmann; "How Can Manufacturers Assist in Maintaining Prices?" by W. L. Sanford; "Should Not Staple Goods be Sold on 30 Days' Time?" by H. W. Cortes; "System and Its Advantages to the Hardware Business," by Chas. Nash. There will also be a Question Box.

WACHTER MFG. COMPANY, BALTIMORE, MD

Digitized by Google

tures of this trade-bringing staff, enumerating the territory on which each man is now out hustling for business, and getting it, too. The company are fully confident, and have reason to be, that the orders for Spring will be far in excess of a year ago, and they are prepared for the results of an ever-growing popularity of the "National" line of Sweepers, which is conclusive evidence that the trade appreciate a good article when it is presented to them.

THE NATIONAL SWEEPER COMPANY.

We are advised by the National Sweeper Company, of Marion, Ind., that the volume of their business has increased so rapidly that they have been compelled this year to double their force of traveling salesmen, making the number now employed ten instead of five as heretofore. We illustrate the pic-

"NATIONALS" AT THE WORLD'S FAIR.

The National Sweeper Company., Marion, Ind., are not ready to announce to their patrons and friends the nature of their exhibit at the St. Louis World's Fair, which opens April 30th, but they assure us that their display will surpass any of their past efforts in this direction. The company will be located in the Manufacturers Building, where the trade will have an opportunity of seeing the most handsomely constructed carpet sweepers ever designed for practical purposes. This company is deserving of more than passing attention as they have led "The Way" in everything pertaining to new ideas in carpet sweeper building since they have started in business. If you go to the Fair don't forget to see the National Sweepers.

DEMONSTRATION MADE EASY.

A Unique Feature at the St. Louis Exposition.

A unique feature of the Department of Manufactures of the St. Louis Exposition will be the sections known as Bazars or Arcades. These have been designed to cover the requirements of exhibitors who wish to demonstrate and sell their wares to the visitors at retail, or for demonstrations without selling. There will be several of these sections in the two palaces of the Department. Each section will be divided into booths, six and eight feet deep, and demands for space in them permitting, an applicant can have as many running feet of either of these depths of booth as his installation demands. When the exhibits are all installed each Bazar will have the appearance of a busy Department Store, in which will be carried on the retail business of the Department of Manufactures, the balance of the building being devoted to the larger booths of the manufacturers who devote their energies to increasing their connections for wholesale trade. The contract that will be made for these Bazars will cover the building of the entrances to the section, the facade, the booth and counters, platforms, signs and other necessities of installation. Exhibitors will be allowed in the interior to arrange and display their goods as best suits their requirements, and also to redecorate it as they desire, subject, of course, to the approval of the Department of Manufactures. The cost of these necessary constructions will be $3 for each square foot of space occupied by the booth. These booths will be of three sizes, 6 feet deep, 8 feet deep and 12 feet deep, and the length of each will be made to conform to the needs of the exhibitor so far as possible, the smallest being 6 feet long.

THE DAVISON HARROW COMPANY, Eureka Mower Co., Utica, N. Y., are the authors of a 52 page pamphlet catalogue of more than ordinary attractiveness, displaying the merits of their agricultural implements. Included in the contents are harrows, mowers, riding planters, weeders, hay carriers, cultivators, plows, etc., also lawn swings, atomizers, balance lever fodder cutters, wagon jacks, etc. All of the implements in the catalogue are warranted to be well made, of good material, and durable with proper care. The manufacturers claim as advantages for their Eureka mower as compared with other side draft mowers that it has a direct draft; is mounted on larger wheels; it leaves the cut crop in best condition to cure rapidly being left nearly in a standing position; it mows back and forth on one side of the field so that the cut crop is by itself, stop when you may, and beginning to rake where you began to mow, gives uniformly cured hay to draw, will cut over uneven and rough surfaces and around trees, as the cutter-bar is flexible at both ends. Many other advantages are also cited in the catalogue, which will be found to contain very valuable information and will be mailed upon request.

RECENT TRADE PUBLICATIONS.

Masbach Hardware Company, New York, have compiled a catalogue, which, after thirty years experience in the practical Hardware line, will be found of great assistance, as well as a ready guide to the Hardware trade. In this edition they have added several new lines, the special features of which are electrical goods and bath room fixtures. Besides this, they have greatly increased numerous other lines which will be noticed on almost every page. They state that they carry in stock, almost without exception, everything which they illustrate, enabling them to make prompt shipments. The company explain that they have taken particular pains to catalogue only salable goods which are always in demand. The book is regulation size, bound in imitation leather and contains 137 pages, on every one of which is illustrated several articles, giving sizes and prices. It will be found greatly to the advantage of the retailer to secure one of these catalogues and to devote proper time and attention to the same.

The Red Jacket Manufacturing Co., Davenport, Iowa, have recently issued their catalogue No. 36, a very artistic production. The cover is an appropriate one, bearing a fine picture of an Indian's head and a little rustic scene which shows the tepee and canoe of the Indian. In the catalogue they show a very complete line of up-to-date pumps and pump specialties. The only thing illustrated in the entire catalogue which the company do not manufacture is Standard pipe and steel rod. This catalogue has been especially designed for the jobbers. The distribution of Red Jacket goods is fast extending to all parts of the world, and at the present time they have ten salesmen on the road looking after general jobbing trade. This catalogue and price list cancels all former issues and the company request that all old issues be destroyed. They call attention to the many new styles of pumps and cylinders which they have enumerated and state that as they have tried to make the descriptions of their various products perfectly comprehensible, they request a careful perusal of the book, feeling confident that it will be time well spent to those who are interested.

The National Screw & Tack Co., of Cleveland, Ohio, are the distributors of one of the neatest and most attractive Price Lists it has been our pleasure to review for some time. The cover is a beautiful shade of green with "The National Screw & Tack Company, Cleveland," in embossed, black letters. The inside is equally as attractive, containing a very handy finger index, making it valuable as a book of reference, and is finely printed on coated paper. The book certainly does credit to the company who issued it. Included in its contents are wood screws, machine screws, nuts, stove bolts, stove rods, sink bolts, knob and cap screws, tire, carriage, machine and hanger bolts, coach screws, special goods, bulk and tinners rivets, special rivets, etc., etc. It also gives valuable information regarding weights, etc., of these goods. The book should be in the hands of every dealer interested in this line.

T. L. Slocomb Company, Providence, R. I., manufacturers of machinists' tools, are distributing a catalogue showing a complete line of their goods, all of which are usually kept in stock or can be furnished with very little delay. An important feature of their manufacture are micrometer callipers which were designed especially for machine shop service. The Slocomb micrometer is constructed on considerably different principles from all others, one of the most important improvements being the adjustment between the measuring screw and its nut. Another valuable feature not found in other micrometers lies in the spring, which causes a slight uniform friction on the spindle, so it is never loose at any point and will not move around of its own accord. Incidentally, this spring keeps the spindle back in its seat, and does not call for rigid fit between spindle and nut with its consequent danger of roughing up and sticking. Their catalogue explains in detail all the advantages of these goods and dealers interested in micrometers will find it advisable to send to the above address to secure one.

CRYSTAL REGISTERED TRADE MARK. CORUNDUM

IF CORUNDUM be no better than emery, then emery is no better than iron ore.

If you grant that the United States Government is right when it states that emery is a mechanical admixture of Corundum and magnetite or hematite iron ore, you must at once grant the above deductionis logical.

But to use iron ore for polishing or grinding iron and steel would be absurd. If so, why use iron ore and corundum (emery), instead of the pure abrasive

Craig Mine Crystal Corundum.

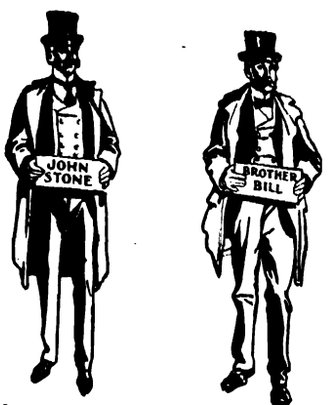
...E OF BROTHER BILL.

BY CHARLES AUSTIN BATES.

There is a particular brand of lunacy, of which the following clipping from a literary publication is an example, that should be suppressed.

Why does this man succeed and that one—his twin brother—fail?



Who knows?

John Stone, for instance, took all of the honors at college. Before middle age he conquered fortune and position. His wife has all the charms of Rachel and the virtues of Leah, and the solid dowers of both. If he writes a poor book it sells by the hundred thousand; if he buys shares of failing stock it soars out of sight the next day; his children never die of measles, nor take to low company. He goes joking and laughing heartily through this comfortable world into another just as comfortable, weighted by nothing but honors.

But his brother Bill, who is just as honorable, just as hard-working and probably a more able man, invariably misses all of the good chances of life. He is always just grazing the bull's eye of success by a hair's breadth. He never conquers wealth, nor fortune, nor happiness. Yet he always has a following of men and women who believe in him with a devout and frantic fidelity.

This stuff is not only nonsensical, but reprehensible.

When you think that money has been spent for the printing of thousands of copies of such a theory, you wonder if there is such a thing as a fool-killer.

Why does this man succeed and his twin brother fail?

It is the worst possible kind of stuff to put into a paper that goes into the home and that pretends, and to a large extent really does, provide the rules of existence for a large portion of the population.

What sort of instruction is it to give to a boy or a young man?

It gives him an excuse for failure. It suggests to him that he may say he is just as hard-working and just as able as another man, but that he fails to succeed for some unknown reason, or because he has no luck.

There are no "ifs" and "ands" about it.

I tell you that people succeed because they deserve to succeed, and they fail because they deserve to fail.

There are no "ifs" and "ands" about it.

Take any man who has made a success in life and you can generally find the cause within him.

* * *

This stuff was written by a literary man. The literary man mostly looks upon manufacturing and other useful pursuits as very low forms of human endeavor.

He would make John Wanamaker and Andrew Carnegie look like coin.

He is quite sure in his own mind that if he were only to devote his massive intellect to the paltry affairs of trade, he would make John Wanamaker and Andrew Carnegie look like coin of a very small denomination.

If some one of his fellow literary workers succeeds, he calmy folds his hands and says, "Well, that fellow always was lucky anyway." It strikes me that it is about time the business man had his innings.

For centuries incense has been burned under the nose of the makers of so-called literature.

Time the business man had his innings.

Personally, I can conceive of no more useless occupation than that of imagining and writing more or less harrowing romances.

Just think for a moment of what, at least, looks like a real man, of middle age, or thereabouts, sitting down to write a romantic story of the love affairs, quarrels and general goings on of a couple of young people who, if they were real, wouldn't amount to anything and most of whose actions and conversations, whether real or imaginary, are the rankest foolishness.

For centuries incense has been burned under his nose.

Fancy this grey-head working himself up to a pitch of excitement over an imaginary murder and the hero's awful position when he is arrested on suspicion.

And after our literary friend has concocted such trash, he swells up to about four times the size of the builder of a railroad, the developer of a new town, or the builder of a battleship that can travel 13,000 miles and be ready for immediate action—he's a bigger man than old Grant ever dared be. He looks down upon everything and everybody from the heights of his ignorance.

Of course, he looks upon himself as a heaven-inspired genius, and, of course, he is quite sure that that is the reason he has succeeded where other people have failed.

Mebbe so.

But I will venture the assertion that I can take the machinery of my own ad-writing literary department and produce any given brand of literature, from dialect story up or down, better than the average that is published in the magazines.

And we won't do it because we are inspired or because we are geniuses.

We will do it because we know our trade—trade of handling words. And we can get our situations and incidents for novels either out of the news columns of the daily press or by doing what other novelists do consciously or unconsciously—by rewriting stories that have been written before.

All the situations that are possible in human life have been threshed over and over again in the same combination and in different combinations until there is absolutely no new thing in any novel under the sun.

We know our trade of handling words.

I believe that literary workers succeed by absolutely fixed rules, just as people succeed in other lines of endeavor. They do it by giving to the public what they find the public wants.

A busines man, or a banker, or a railroad builder, or a milliner, or a novelist succeeds because he does something that people want done.

He succeeds on the Stock market because he knows the game.

People are willing to pay for the things they want. They are willing to pay for good work in any line. The man who gives them good

Digitized by Google

work, in the way they want it, will succeed. The man who does not will fail, and that is absolutely all there is about it.

The man who succeeds on the stock market succeeds because he knows the game and plays it properly. If his children "never die of the measles," it is because he has sense enough to take proper care of them and to see that they get promptly the best medical attendance.

If they do not "take to low company," it is because he has given them the sort of education, both at home and in school—the sort of environment, the sort of companionship—that will make it, mentally and physically, impossible for them to take to low company.

There is no luck about it. It is just the plainest kind of common sense.

If he "goes heartily through this comfortable world into another just as comfortable," it is because he helps to make this world comfortable, because he behaves himself and lives and works and plays in a wholesome manner, and doesn't fulminate fool theories about luck and ill-luck.

It is probably because he believes in "doing what his hand finds to do with all his might" and because he gives his attention to his work instead of sitting by and crying because he has no luck.

Do you suppose that Paderewski plays the piano as he does simply because he is lucky?

Do you think you are a more able piano player than Paderewski and that it "just happens" that he is famous and you are not?

Is it impossible to understand why Edison and Tesla make electrical discoveries?

Is it astonishing that John Wanamaker succeeds in dry goods business, or that the Pennsylvania Railroad is successful while others are not?

Is it luck that gives the Pennsylvania a good roadbed, the best engines and a perfect train service?

Don't you ever think for a moment that it's luck in these cases or in any other case of success.

It is good, earnest, honest, hard work—work in the right direction—work with brains—but everlastingly, persistently and continuously—work.

Most of the people who fail, fail because they are lazy.

There are a great many more failures, because of lack of energy, than because of lack of ability.

And, while it probably hasn't anything to do with this case, I want to register the fact, which I have observed over and over again, that a very large proportion of the failures of young men is due to laziness and inattention to business, directly caused by personal vanity.

Let a man once get the idea that he is either a genius or a thing of beauty, and you can cross him right off the map. He is never going to succeed. He is "Brother Bill," all right, and he is going to be left at the post.

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

The Southern Hardware Jobbers' Association holds its annual convention at Atlanta, Ga., May 24 to 27. The following programme has been prepared:

Morning Session—Tuesday, May 24th, 1904.

Convention Hall, Kimball Hotel Ball Room.

Delegates and visitors will please assemble promptly at 9.30 A. M. The manufacturers, their representatives and the ladies are cordially invited to this session.

Meeting called to order by the President.
Prayer.
Roll call.
Chorus—"America."
Address of welcome by the President.
"Here's Our Hand."—Evan P. Howell, Mayor, Atlanta, Ga.
Address of welcome to the Manufacturers.
Response.
Annual Address of the President.
Report of Reception Committee—Irby Bennett, Chairman.
Introduction of new members, visitors and guests.
Impromptu Addresses.
Informal reception of manufacturers, jobbers and their representatives.

During this reception each person is requested to register in the association's official register, at which time the Sergeant-at-Arms will distribute one to each person, the badges prepared for those in attendance at the convention.

Afternoon Session.

Executive, for jobbers only.
Meeting called to order promptly at 2.30 P. M.
Reading of minutes of 1903 convention.
Report of Secretary-Treasurer.
Report of Transportation Committee.
Report of Press Committee.
Report of Grievance Committee.
Report of Manufacturers' Committee.
Report of Membership Committee.
Report of Supply Committee.
Report of Metal Committee.
Report of Executive Committee.
Appointment of Special Committees.
Communications.
Miscellaneous Business.
Discussion of Executive Committee's Report.
"Our Association. What Shall be Done to Nurture It?"
General Discussion.
Each speaker limited to five minutes.
Opening of Question Box.
General Discussion.

Evening.

Entertainment Features to be Announced.

Morning Session—Wednesday, May 25th.

Executive, for jobbers only.
Meeting called to order promptly at 9.30 A. M.
"The Hardware Jobber—His Worst Enemy."
Open Discussion, each speaker limited to five minutes.
Opening of the Question Box.
General Discussion.

Afternoon Session.

Joint session of jobbers, manufacturers and their representatives, the Southern Hardware Jobbers' Association being the guests of the American Hardware Manufacturers' Association.
Convention Hall, Piedmont Hotel.
Meeting called to order promptly at 2.30 P. M.
Rebates and Restrictive Prices from Manufacturers of Association Goods vs. Open Market.
Open Discussion, each speaker limited to five minutes.
"Should Not Manufacturers Protect the Jobbers Against Radical Declines Brought About by Disagreements in Their Own Associations?"
Open Discussion, each speaker limited to five minutes.
Opening of Question Box.
General Discussion.

Evening.

Smoker, 8.30 to 12.00. Dining Room, Kimball Hotel.
Complimentary to Delegates and visitors.
Tendered by the Reception Committee.

Morning Session—Thursday, May 26th.

Executive, for jobbers only.
Meeting called to order promptly at 9.30 A. M.
Discussion of Committee Reports.
"Increased Expense Account and How to Reduce It."
Open Discussion, each speaker limited to five minutes.
"Employees Mutual Benefit Association."
Open Discussion, each speaker limited to five minutes.
Opening of Question Box.
General Discussion.

Afternoon.

Joint session of jobbers, manufacturers and their representatives.
Convention Hall, Ball room, Kimball Hotel.
Meeting called to order promptly at 2.30 P. M.
"Suggestion to the Buyer from the Traveling Man."
"The Injustice of Associated Manufacturers Withholding Premiums from Jobbers on Account of the Purchase of Goods Other than Their Manufacture."
Open Discussion, each speaker limited to five minutes.
Opening of Question Box.
General Discussion.

Evening.

Banquet.
Tendered by the Manufacturers.

Morning Session—Friday, May 27th.

Executive, for jobbers only.
Meeting called to order promptly at 9.30 A. M.
Unfinished Business.
Miscellaneous Business.
General Discussion.
Reports of Special Committees.
Election of Officers.
Selection of place for next annual convention.
Adjournment.

Afternoon.

Trolley Ride over the City of Atlanta. Tendered by the Atlanta Jobbers to the visting jobbers, the manufacturers, their representatives and the ladies.

Evening.

Entertainment features to be announced.

The GENUINE BUCKEYE PRUNER

like all other good things, has a number of imitators, that seek to grow fat on the reputation which it enjoys.

Be sure that you offer your customers the **Genuine Buckeye Pruner.** See that our trade-mark, (Buck's Head,) is on the label. It is a Pruner that will give satisfaction. Others may, but it's doubtful.

Strong, with hand-forged blades, easy to operate—grasp the limb with the hook and cut towards you. No other pruner like it.

Size:—25-inch.
One dozen in a case.
Prices sent on request.

Write to-day about a Sample Order.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Baltimore, Md.—The Duke-Peterson Hardware Company, a new corporation, has been formed to take over the business of the wholesale Hardware firm of Findlay, Roberts & Co., formerly located at 25 Hopkins Place. The new firm has a capital stock of $50,000, and is located at 308 West German Street. The officers are: W. B. Duke, president; W. J. Hopper, vice-president, and J. W. Peterson, secretary and treasurer.

Boston, Mass.—W. H. Magoon Co., Hardware, has been incorporated. Capital, $50,000. President, Alfred W. Drew; treasurer, Bertrand L. Drew.

Brownwood, Texas.—Weakley Hardware Company has been incorporated. Capital stock, $25,000. Purpose, purchase and sale at wholesale and retail all kinds of Hardware. Incorporators: J. I. Cinham, C. H. Benjamin, Ira W. Hall, J. J. Pimmins and C. Weakley.

Camden, N. Y.—James Stark, Jr., has rented the Newland Block, and will open a Hardware store soon.

Canajoharie, N. Y.—W. R. Wheeler has opened a plumbing, stove and tinware store in the Conboy Building.

Charlotte, N. C.—The Allen Hardware Co. has been incorporated with $100,000 capital, $75,000 paid in.

Chester, S. C.—The Waters & Spratt Company has been incorporated to sell merchandise, particularly crockery and Hardware. The capital is $5,000, and the officers are: Walter F. Waters, president, and B. M. Spratt, Jr., secretary and treasurer.

East Liverpool, Ohio.—King Eells Hardware Co. has been incorporated by A. W. King, L. N. King, J. E. Eells, M. M. Eells, E. N. McKelvey. Capital, $25,000.

Edwardsville, Pa.—W. G. Watkins has opened a new Hardware store.

El Reno, Texas.—The Bonebrake Hardware Company has been incorporated with $30,000 capital stock. The incorporators are: E. A. and J. E. Bonebrake and J. H. Nail, of El Reno; H. E. Bonebrake, of Weatherford; George E. Johnson, of Sayre.

Frazeysburg, Ohio.—Lawrence and Edward McNaught, of this city, have opened a Hardware store in the room formerly occupied by the Frazeysburg Manufacturing Co.

Grand Rapids, Mich.—The Monroe Hardware Co. has been incorporated. Capital stock, $20,000.

Greenwich, Conn.—The Jaynes Hardware Company has been incorporated. Capital stock, $10,000.

Hardwick, Vt.—R. S. Hooper will open a Hardware store at an early date.

Little Rock, Ark.—Bracy Brothers Hardware Company has been incorporated; capital stock, $25,000. The corporators are: M. C. Cross, S. A. Buchanan, W. F. Bracy, S. V. Bracy, E. D. Bracy, J. T. Bracy and A. V. Walker.

Lockesburg, Ark.—The Lockesburg Hardware Company has been incorporated. The corporators are: A. C. Steel, T. W. McCown, C. W. Russey, R. A. Gilliam, M. L. Norwood, J. M. Thompson, Thos. Dillahunty, J. T. Wright, John T. Locke and Alex Luther. The capital stock is $12,000, of which $6,000 has been subscribed.

Longview, Texas,—Northcutt Hardware Company has been incorporated. Capital stock, $30,000. Incorporators: W. D. Northcutt, W. S. Mayfield, E. B. Prothro, S. C. Forman, C. L. Taylor and W. G. Northcutt.

Middletown, Pa.—B. Frank Seltzer, of Washington, N. J., will open a Hardware and general variety store in the basement under the saddlery shop on Union Street. B. F. Seltzer expects to be ready for business in a few weeks.

Mobile, Ala.—The Walter A. Zelnicker Company, of Alabama, has been incorporated. The capital stock placed at $90,000. The incorporators are: Walter A. Zelnicker, of St. Louis; Ella W. Stanton, Wilson Ashley, James H. Zelnicker and B. B. Boone, of Mobile. The principal place of business will be Mobile, and the purpose is to do a general railway, mill and steamships' supply business, and also a Hardware business.

Nashville, Tenn.—The Jones & Hopkins Manufacturing Company has been incorporated; capital, $50,000. The company is a reorganization of the firm of Jones & Hopkins, stove and domestic supply dealers, on North College Street. The incorporators are: John A. Jones, A. Mosely Hopkins, H. M. Sawrie, George T. Finnegan, David A. Binns and I. L. Pendleton. The new company will engage in the business of jobbing and manufacturing Hardware and kindred lines, and will put several men on the road covering for the present Tennessee, Kentucky, Alabama and Georgia. The company will increase its stock to meet the exigencies of the case, carrying a full line of goods, both for the wholesale and retail business.

New York, N. Y.—On or about April 15th, Louis Hartmann and his son, Henry W., will open a new Hardware store at 169th Street and Prospect Avenue, under the firm name of Louis Hartmann & Son.

North Castle, Pa.—Alfred J. Graham, of Lowellville, and D. E. Myers will open a store shortly and engage in the Hardware business.

Pasadena, Cal.—The Graham, Salisbury, White Company has been incorporated for the purpose of engaging in a general mercantile business, but more particularly in Hardware. The incorporators are: Samuel F. Graham, M. H. Salisbury, Nathan White, Mrs. M. A. Graham and Mrs. Georgia White. The capital stock is $25,000, of which $500 is subscribed.

Portsmouth, Va.—Bohanon & Blick will shortly open up a wholesale and retail Hardware store, and will carry an up-to-date line of that class of goods.

Port Washington, Wis.—The Kraus & Graw Hardware Co. has been incorporated; capital stock, $25,000, divided into 250 shares of $100 each; incorporators: John W. Kraus, Adam A. Graw, Lawrence H. Kraus and Peter J. Kraus.

Salem, Mass.—James Welsh, of this city, has opened a Hardware store in the Hawthorne Block. In addition to Hardware, Mr. Welsh will carry a full line of shoemakers' supplies.

Shawnee, Okla.—The Harry Meade Hardware Company has been incorporated with $25,000 capital stock. The incorporators are: Harry Mead, S. T. Pierson and Frederick Brown Wells.

St. Louis, Mo.—Schoening Hardware Company has been incorporated by E. E. Schoening, William L. Schoening, Charles A. Schoening, to do a general wholesale and retail Hardware business; capital stock, full paid, $20,000.

Sturgeon Bay, Wis.—The Schmidtke & May Company has been incorporated; Hardware and farm implements; capital, $20,000; incorporators: Herman A. Schmidtke, John A. May, William H. Hembel, and Lillian H. Schmidtke.

Sutton, W. Va.—The Braxton Hardware Company has been incorporated to deal in all kinds of Hardware. Capital, $10,000. Incorporators: Lee E. Hyer, E. L. Bland, Jake Fisher, of Sutton, W. Va.; C. A. Wearengen, C. B. Chancellor, of Parkersburg, W. Va.

Syracuse, N. Y.—The W. H. Landers Company has been incorporated with a capital of $20,000 to deal in stoves and similar commodities. The directors are: William H. Landers, Anna Landers, and James B. Murtagh.

Watkinsville, Ga.—W. T. Ashford, of Atlanta, will furnish the capital for a Hardware store in Athens, Ga., to be established at an early date.

Changes.

Cazenovia, N. Y.—The Hardware firm of Aikman & Norton has been dissolved. Mr. Aikman will continue the business and Mr. Norton will do a plumbing business for himself.

Cleveland, Ohio.—The firm name of the Western Glass & Hardware Company has been changed to The Western Gaslamp Co.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Chattanooga, Tenn. — The Chattanooga Plow Company has been incorporated. The incorporators are: Newell Sanders, G. W. Wheeland, C. C. Bloomfield, C. D. Mitchell, and Judson Buchanan, of Chattanooga.

Columbus, Ohio.—The Champion Steel Range Company has been incorporated to manufacture and deal in steel ranges. stoves, etc.; $100,000 capital stock.

Derby, Conn.—The D. M. Bassett Bolt Works has been incorporated; capital stock, $50,000, to take over and continue the business of Dickerman M. Bassett carried on in the towns of Derby and Huntington.

Fort Smith, Ark.—The Fort Smith Refrigerator Works has been incorporated. Capital stock, $10,000. Incorporators: W. L. Tracy, C. A. Tracy, R. H. Smolinske and O. W. Campbell.

Fremont, O.—S. H. Wilson, an expert cutler, for many years employed in a local factory, is at the head of a project to establish a new cutlery concern in this city for the manufacture of pocket cutlery.

Grand Rapids, Mich.—The Grand Rapids Saddlery Hardware Manufacturing Company has been organized with a capitalization of $20,000. The company will engage in buying, selling and manufacturing saddlery Hardware.

Morristown, N. J. — The Sausome Stove Company has been incorporated; capital, $25,000. Incorporators: George Sausome, Frederick Muchmore, Charles W. Vernon.

Peru, Ind.—The Peru Wire Fence Co. has been incorporated, with $3,000 capital, by Anson T. Reed, H. E. Whiting and Charles E. Redman.

Pittsburgh, Pa. — The Pittsburgh Scale Co. has been incorporated with a capital of $100,000. It proposes to build a scale works in the Pittsburgh district.

Reading, Pa.—The Crescent Brass Manufacturing Company, which has leased the three-story brick building owned by the P. & R. Company at Bingaman and 7th Street, has been incorporated. The plant is now being remodeled and equipped for the new business. Brass castings and articles of building Hardware will be the principal products of the new company. C. George McCord, the principal member of the company, has for many years been connected with the Reading Hardware Company.

Royersford, Pa.—The Floyd-Wells Company, manufacturers of stoves and heaters, has been incorporated. The subscribers are: Isaac Brooke, C. W. Wagoner, I. Irwin Wells, W. J. Wagoner, George W. Wagoner. All are directors, and G. W. Wagoner is treasurer. The capital stock is $210,000.

Salem, Mass.—Salem Stone Tool Co. has been incorporated; capital, $40,000; president, M. J. O'Rourke; treasurer, A. E. Douglas.

St. Louis, Mo.—The St. Louis Mfg. & Model Perfecting Co. has been incorporated. Incorporators: W. H. Baumann, S. T. Bradley and J. D. Hodges; to manufacture and deal in Hardware specialties and novelties, etc. Capital stock, $50,000.

Syracuse, N. Y.—The W. H. Landers Company has been incorporated; capital, $20,000. The company will manufacture and sell stoves, furnaces and plumbers' supplies. William H. Landers, Anna Landers and James B. Murtaugh are the directors.

Toledo, Ohio.—The High Speed Tool Company was organized in this city on March 14, and it will have its offices at 613 Spitzer Building. E. R. Davis, formerly a representative of a steel concern, of Sheffield, England, will be the general manager. It is the present intention to establish a factory in this city within the next three months, where cutters, drills and reamers, of which the company will make a specialty, will be manufactured.

Woodville, Miss. — The Woodville Broom & Mfg. Co. has been incorporated with a capital stock of $5,000.

Worcester, Mass. — The Worcester Lawn Mower Company has been incorporated with a paid-up capital of $15,000 for the manufacture of an improved lawn mower that has many advantages over the old style machine. The company is made up of men already prominently identified with the manufacturing interests of Worcester, the chief owners being Albert B. Curtis and F. E. Reed, of the Reed & Curtis Screw Company. Mr. Curtis is president of the new company, Mr. Reed, treasurer, Eben F. Thompson, clerk of the corporation, and Waldo A. Loud, superintendent.

York City, Pa.—A new nail plant is to be started here, the promoters of which are Wm. Kline, Benjamin Busler, of Sunbury, who is now superintendent of the Sunbury Nail Works, and others. The plant is to be modern in every respect.

Changes.

Augusta, Maine.—The American File Company, a corporation organized under the laws of Maine, has changed its name to the Colonial File Company.

Baltimore, Md.—A large four-story brick factory will be built on the lot 303 x316 feet bounded by Byrd, Barney, Johnson and Wells Street, to be occupied by the William J. Hooper Company, manufacturers of nets and twines, whose place of business was formerly at 116 South Street and who are now at 15 West Franklin Street.

Kalamazoo, Mich.—The Bremer Machine Co., of this city, will close its plant in a short time and consolidate with the Burnham Tool Co., of Jackson, and the Caldwell Furnace and Foundry Co., of Toledo, O. The new concern will be located at Toledo with a capital stock of $200,000.

Rockford, Pa.—The Emerson Manufacturing Co. has increased its capital stock of its Spokane, Wash., branch from $12,000 to $35,000, it being its purpose to make a more active effort to secure trade in that territory. The company manufactures agricultural implements.

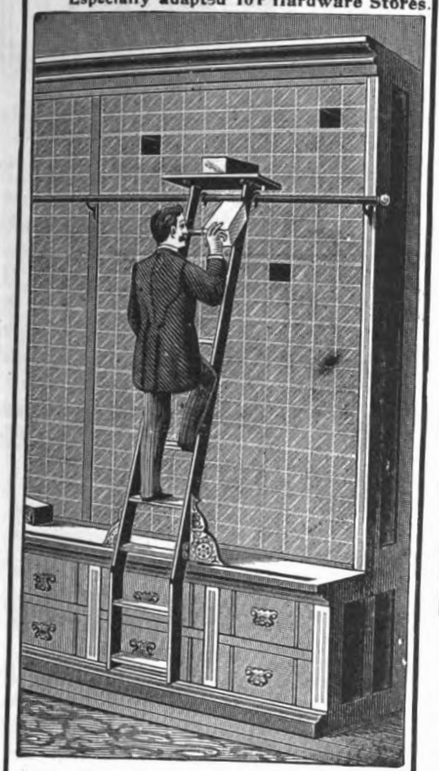
Springfield, Ohio.—The Western Tool and Mfg. Co. has changed its name to The Western Manufacturing Co.

Syracuse, N. Y.—The Hyle Steel Tool Company will take possession of its new plant in the Eastern part of the city in about ten days. It is a big plant and all of the buildings are nearly in readiness with new equipment.

Taunton, Mass.—The Globe Manufacturing Co., manufacturers of special nails, etc., has recently been installing new and improved machinery and has increased its output 75 per cent. It now makes more than 100 different special nails.

Miscellaneous.

Lansing, Mich.—At the annual meeting of the Western Tool Co. stockholders, the old officers were re-elected, as follows: H. H. Larned, president; James P. Edmonds, vice-president; A. T. Van Dervoort, secretary and manager. The business has shown a steady, profitable growth, and a stock dividend of forty per cent. was declared on paid-in capital.



Portland, Me.—The first annual meeting of the Marine Hardware and Equipment Co. was held at the offices of the N. & H. B. Cleaves, the following directors being elected: George H. Griffin, of Portland; John E. Fisher, of Portland; Walter F. Robinson, of Portsmouth, N. H.; William H. Whiting, of Baltimore, Md.; George T. Spear, of South Portland. John E. Fisher was elected clerk and treasurer. George H. Griffin is the president of this corporation, which was organized several months ago and which has an extensive plant at the old bicycle factory at South Portland.

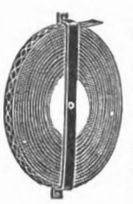
SAVONA DESIGN (ITALIAN RENAISSANCE) SARGENT'S ARTISTIC HARDWARE.

Educate your customers—those who are erecting homes and other buildings in your neighborhood—to the use of better hardware. A fine house should be fitted with fine hardware; cheap goods are out of place in an elegant dwelling.

It will give you a larger profit and your customers will be better satisfied if they trim their buildings with



Sargent's Artistic Hardware and Easy Spring Locks

than if substitute goods said to be "as good" are used.

We have a complete line of Locks suitable for all classes of work and a variety of Designs to harmonize with all schools of architecture.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Canon City, Colo.—The Rodda-Thomas Cycle and Supply Company has been organized to deal in sporting goods, bicycles, phonographs, etc., by J. H. Rodda, former manager of the bicycle department of the Cooper Electric and Cycle Company, whose business the new firm acquired, and L. S. Thomas, of Fayetteville, Tenn.

Danvers, Mass.—Danvers Sporting Goods Company has been incorporated; capital, $5,000; president, John T. Carrol; treasurer, Joseph J. Jolly.

Grand Rapids, Mich.—Wheelmen of this city met recently and organized the Grand Rapids Bicycle and Motor Cycle Club. The following officers were chosen: W. B. Jarvis, president; A. B. Richmond, secretary and treasurer; George A. Beelby, captain, and W. S. Daniels, lieutenant.

Hagarstown, Md.—R. S. Crawford, former manager of the Crawford Bicycle Works, now the Pope Manufacturing Company, of this city, has completed arrangements for locating a factory here for the manufacture of his new motor car. Mr. Crawford has just had the car patented.

Jersey City, N. J.—Excelsior Powder Company has been incorporated; registered office, Commercial Trust Building, Jersey City; capital stock, $100,000. Corporators: C. T. Willard, H. H. Nieman and A. H. Kelley. The company is to make blasting and sporting powders.

Jersey City, N. J.—The Excelsior Powder Manufacturing Company, with capital stock of $100,000, has been incorporated by C. T. Willard, H. H. Nieman and A. H. Kelley.

Lynn, Mass.—Willard S. Achorn will open a bicycle and automobile store in the new one-story building 30x75 now in the course of erection, on or about the first of May.

Nottingham, Eng.—Shaw and Shrewsbury, Ltd., a new concern, has been incorporated to acquire a business of sports outfitters. Queen's Square, Nottingham, is the registered office.

Poland, N. Y.—The Seavey-Cruikshank Company has been organized and a building is being erected for the new company. In connection with several other lines, they will carry sporting goods.

Portland, Ore.—Reckard & Co. has been incorporated; capital stock, $10,000; A. M. Reckard, Alice Reckard, A. C. Emmons. The purpose of the corporation is to deal in Hardware, guns, bicycles, etc.

Shenandoah, Pa.—The Locust Mountain Powder and Dynamite Company, capital $10,000, has been incorporated.

Spokane, Wash.—J. D. Alexander has opened a store at 908 Sprague Avenue. He will handle the Rambler line of machines.

West Haven, Conn.—N. D. Etheridge has opened a bicycle repairing establishment at 469 Campbell Avenue.

Wilmington, Del.—The Sterling Dynamite Company, capital stock $100,000, has been incorporated under the laws of Alabama. P. B. Griffin, of Birmingham, is the State agent.

Changes.

Addison, N. Y.—An arrangement has been recently consummated whereby Charles Reynolds, president of the Reliance Motor Cycle Company, purchased the building occupied by the Empire State Cycle Company as a permanent quarters for the manufacture of the Reliance Motorcycle. Negotiations are now being made for the purchase of the machinery which is at present the property of the Empire State Cycle Company and now being used to manufacture the new machines. The old Empire State Cycle Company are clearing up the floors and disposing of their stock and will give entire possession to the new company early in the Summer. The company was incorporated last September with a capital stock of $15,000 with C. D. Reynolds, president, J. F. Doll, vice-president, and W. H. Ives, secretary and treasurer.

Buffalo, N. Y.—Ephriam Bros. have opened salesrooms at 557 Main Street, and are carrying sporting goods, athletic outfits, bicycles and automobiles.

Hartford, Conn.—F. H. Turner, former treasurer of the Hartford Rubber Works Company, has resigned from his connection with the company and has been chosen president of the Carlton Foundry Company, at Hartford. Mr. Turner had been connected with the Hartford Rubber Company for twelve years, and is the inventor of the Turner tire.

Hartford, Conn.—The Colts Arms Co. has secured exclusive rights to manufacture in the United States the Vickers-Maxim automatic machine guns. These guns have heretofore been manufactured exclusively by Vickers Sons & Maxim, Limited, of London.

Homestead, Pa.—The Kilgore & Atkinson Sporting Goods Company has increased its capital stock from $20,000 to $40,000 to devote to the extension of its wholesale business.

New York, N. Y.—E. J. Willis Co. will open a store at 38 Columbus Avenue, Boston, Mass., which will be under the management of George H. Brown.

New York, N. Y.—J. H. Lau, of 75 Chambers Street, has made arrangements with two representatives to take care of the Ballistite and Empire powders and the Reble guns in the West. H. W. Vietmer, of Chicago, will cover the territory as far West as the Missouri River, while the Denver district and westward to the Pacific coast will be in the hands of D. W. King, Jr., well known as the maker of the King rifle sight.

Philadelphia, Pa.—The building located at 2513 North Broad Street, has been fitted up and will be occupied by the Philadelphia Motor Cycle Club as a club house.

Portsmouth, O.—The Lloyd, Adams & Simpson Company, manufacturers of patented toy pistols, has bought the Labold Building at the corner of Front and Jefferson Streets, which they will at once remodel to make conform to their needs, and as soon as it is finished they will occupy it.

Riverside, Cal.—V. O. Harter has sold a one-half interest in his store to G. W. Allen.

Springfield, Mass.—Smith & Wesson have been compelled by the heavy demand for their goods to add a new wing to their factory, and have had to engage additional men, and are now making every effort to keep pace with the demand made upon them.

Topeka, Kan.—The Central Cycle and Supply Co. have opened a branch office at 841 Kansas Avenue, where they carry gas light supplies and bicycle supplies.

Washington, D. C.—A. G. Spalding & Bros.' new store at 709 14th Street Northwest, in the Colorado Building, was formally opened on March 21st to its friends and patrons. Handsome floral decorations helped to beautify the establishment, and an orchestra furnished music during the evening. They have leased one of the handsome stores on the Fourteenth Street side of the Colorado Building, where they have put in a full line of their famous athletic goods.

Wilmington, Del.—The St. Louis branch office of the E. I. Dupont Company has been discontinued, and in future the Explosive Supplies Company will handle their goods in that territory. William McBlair, of William McBlair & Co., Chemical Building, was, until his death on January 24, general agent for the company, and the change was made necessary because of his death. The offices of the Explosive Supplies Company are 607-610 Commercial Building, corner of Sixth and Olive Streets, St. Louis. The change went into effect March 1. The Explosive Supplies Company will also handle the business of the Hazard Powder Company in St. Louis.

WRITE FOR QUOTATIONS

Mention "Hardware."

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

Catalogue and information free.

Address Dept. H,

THE American Steel Roofing Co.

BUILD UP YOUR SAW TRADE.

You can easily do it if you handle **Atkins High Grade Silver Steel Hand Saws.** Their superiority and fine cutting qualities have firmly established an enviable reputation among carpenters and users of hand and small saws. First class mechanics prefer them for fine work above all others.

ATKINS ALWAYS AHEAD!

Atkins High Grade Silver Steel Hand Saws excel in Material, Temper, Workmanship, Design and Finish. Nothing overlooked in manufacture that adds quality to the saw.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

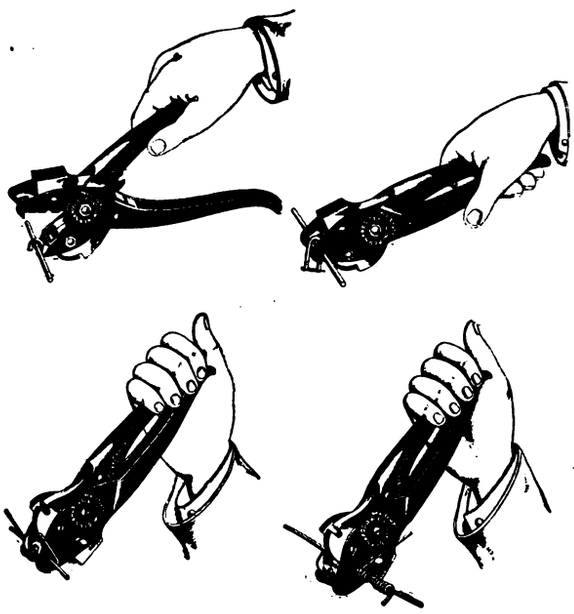
Three Quarters of A Century

We are the oldest and best known makers of EDGE TOOLS: Hammers, Hatchets, Axes, Adzes, Sledges, etc., in the United States.

If Quality Counts Command Us . .



Our complete catalogue tells all about them.
Mention HARDWARE when writing.

L. & I. J. White Company
BUFFALO, N. Y., U. S. A.

Schollhorn's New Model

"Elm City" Staple Pulling Plier

Does rapid, accurate and high grade work. Convenient, durable, powerful. Will cut No. 7 wire.

SIX TOOLS IN ONE
Staple Puller, Wire Splicer, Plier, Cutter and Hammer combined.

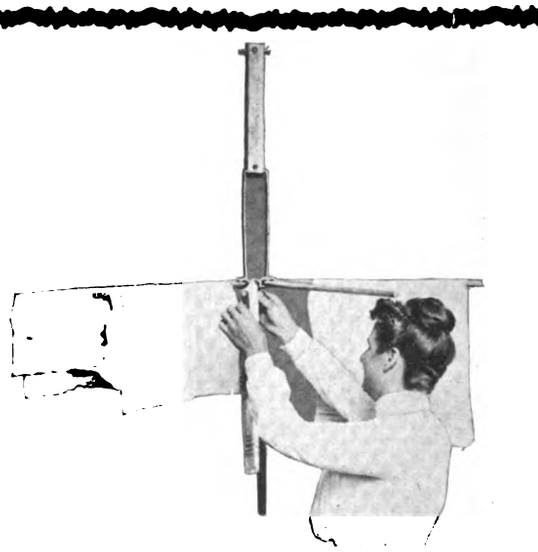
***The* Wm. Schollhorn Company**
New Haven, Conn.

YOU OUGHT TO SEE IT!

The New Putnam Ⓦ Horse Nail

Is made by a new and down-to-date method. It has stood the severest practical tests for six months, and

***The* Highest Test**



for tensile strength, elongation and elastic limit.

The New Putnam will not crimp, break or sliver. Will not cut off; will hold in the clinch. Drives most easily.

These are some of the reasons why you should handle them.

Send for samples. Special Offer to Hardware Dealers.

PUTNAM NAIL CO.
Neponset, Boston, Mass., U. S. A.

NATIONAL CLOTHES DRYING RACK

for Usefulness, Convenience and Simplicity is unsurpassed by any other rack on the market. The rack is easily lowered for filling and as easily raised to a position out of the way. In offering your trade the "National" you are supplying an article that proves a boon to the housewife, as it provides a simple, quick way of drying clothes, towels, etc. Always handy and always out of the way. One demonstration sells them. Retail price 50 cents.

"BLUE BOOK" CREDITS
OF THE
HARDWARE
IRON & METAL
TRADES.

We have just issued the most complete and reliable book of credit ratings for this special branch of trade that has ever been published, containing about 400,000 rated names of wholesalers, retailers and manufacturers, covering the trade thoroughly. The ratings are conservative and very reliable. The *paying record* is based upon *ledger experience* of credit men everywhere.

You buy credit information. Isn't it the part of a good buyer to post himself thoroughly on the merits of a book of ratings, gotten up especially for his trade by men with ample capital and who are thoroughly trained in this class of work and who make a *specialty* of it?

Terms of subscription can be had by addressing

Iron and Hardware Mercantile Agency,

BOSTON, 157 Federal St.
NEW YORK, 320 Broadway.
CINCINNATI, 106 East 3d St.
CLEVELAND, 844 Society of Savings Bldg.

Do you handle OHIO WATER TIGHT STEEL HODS?

We have created a demand for these goods that must be supplied, and you should be getting your share of this trade.

They are absolutely WATER TIGHT, the back end being folded like the corner of a dripping pan. No slitting or piecing.

They are light, yet strong and durable. We use a good iron paint, drab in color, which makes them very attractive and if placed where masons can see them, will sell themselves.

The adjustable malleable iron fork and socket, admits of the replacing of a broken handle or taking up shrinkage in a few moments.

Made exactly as represented in cut.

Write to-day for prices. Orders filled promptly.

The GEAUGA MANUFACTURING CO.
Painesville, Ohio.

are being converted as fast as we can get a whack at them to use our

Patont Rope Reel

EVERY HARDWARE MAN, handling rope, needs it.

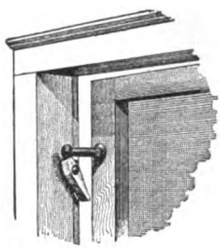
No recoiling necessary. Rope is placed upon spools in the shape the coils come. Made of best material, nicely finished and varnished.

The Udell Works
Indianapolis, Ind.

Tool Truths

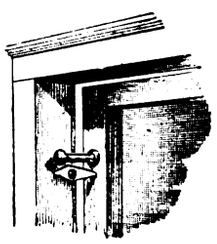
PECK'S EDGE TOOLS---

all of them, are strictly hand forged, carefully tempered and fully guaranteed against flaws.



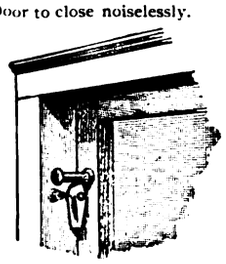
They have made a record in the past for quality, durability and saleability; they enjoy the same distinction to-day. No tool is allowed to leave the factory unless absolutely perfect.

Send for catalogue.



Peck Edge Tool Co.
Cohoes, N. Y., U. S. A.

10 CENTS
BUYS
The "DIME"
Screen Door Check



Door closing tips up rubber bumper.

There's nothing so annoying as a slambing, banging, nerve-racking screen door.

Rebounds slightly.

STOP IT!
Use the **Dime Screen Door Check.** It causes the Screen Door to close noiselessly.

Silently closes.

Hardware Dealers!
NOW is a good time to put in a stock of them. Send at once for circular and prices.

Over 40,000

Gillette Clippers

Model E Machine, shown above, are in use all over the world.

It has the same qualities and advantages as our high-priced machines.

1000 Pounds

strain can be placed on its bearings, which are Drawn Steel Bushings.

1600 Revolutions

per minute is the speed of the cutters.

They will cut the hair as fast as you can push the knife.

Our Guarantee

We warrant every machine we manufacture for Five Years from the date of its purchase.

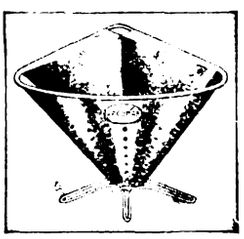
This guarantee does not include the Cutters which are tempered very hard to ensure best cutting.

Send for Catalogue and Prices.

When writing mention HARDWARE.

The Gillette Clipping Machine Company

110, 112, 114 West 32d Street
New York, U. S. A.



VROOMAN'S

PATENT

SANITARY SINK STRAINER

"The Favorite One"

Eight Years On the Market

Preferred and Used Everywhere

Imitated but not excelled. Unequalled as an economic, sanitary and cleanly device.

Keeps sink clean and is easily cleaned. Prevents stoppage of sink pipe and saves frequent plumbing.

Fits into any sink with stand.

Peerless as a Seller

Hundreds of thousands have been sold at a good profit The best selling strainer is The Vrooman. Ask your jobber about it.

F. H. & E. B. Vrooman

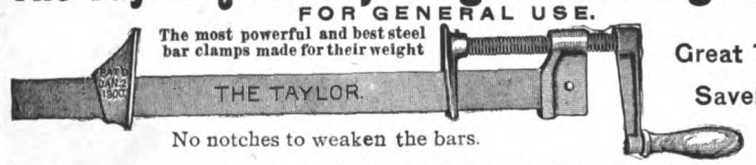
WHY IS THE O. K. THE BEST ROTARY WASHING MACHINE?



—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing **the friction** and thus making machine so **light running** and almost **noiseless.**
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without **rubbing** them to pieces.
4.—This washer is made by **experienced mechanics,** and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, **no escape of steam.**

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

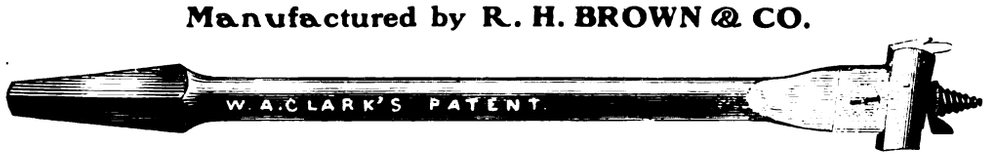
¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.



¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

"BLUE BOOK" CREDITS OF THE HARDWARE IRON & METAL TRADES.

We have just issued the most complete and reliable book of credit ratings for this special branch of trade that has ever been published, containing about 400,000 rated names of wholesalers, retailers and manufacturers, covering the trade thoroughly. The ratings are conservative and very reliable. The *paying record* is based upon *ledger experience* of credit men everywhere.

You buy credit information. Isn't it the part of a good buyer to post himself thoroughly on the merits of a book of ratings, gotten up especially for his trade by men with ample capital and who are thoroughly trained in this class of work and who make a *specialty* of it?

Wm. A. Prendergast, for five years secretary and during the past two years also treasurer of the National Association of Credit Men, has resigned to accept the position of vice-president and general manager of the International Mercantile Agency. Chas. E. Meek, formerly with the National Lead Company, of New York, and who is now serving his third term as president of the New York Credit Men's Association, has been elected to fill the vacancy.

✤

In a recent report U. S. Consul Albion W. Tourgee, at Bordeaux, France, says: The enterprise of American manufacturers of windmills has revealed some curious things in this region. Among these is the fact that within historical periods there have occurred very considerable changes of climate, especially of wind currents. During the Roman period, and even down to recent epochs, the windmill was a very important factor of the industrial civilization of the interior provinces of this consular district. In several of these the old windmill towers still stand, evidently occupying sites chosen with special regard to wind currents, which no longer exist or are too feeble to be of economic value. In others, as in the Department of the Landes, which within a century was practically a desert, reforestation has so modified the wind currents of great areas that winds long regarded as reliable for use are now too weak and variable to render profitable any attempt to use them.

✤

Billings & Spencer Co., Hartford, Conn., are manufacturing a line of drop forged Machinists' Hammers, Octagon Pattern, of ball, straight and cross pein varieties in all the complete series of sizes demanded by the trade for this class of serviceable tools. The ball pein covers all sizes from 5|0 to 6, and the other patterns 000 to 4. They are claimed to be superior as to quality, with handles correctly hung, made of thoroughly seasoned hickory, turned and fitted at their own works. Every hammer, bearing their well-known trade-mark "B" in triangle, is freely warranted.

"THE ZENITH."

The Marshall-Wells Hardware Co., Duluth, Minn., are the publishers of one of the prettiest and most artistic "house" publications, under the above name, we have among our exchanges. It forms a very clever little magazine of nearly 100 pages filled with good readable material, including the advertising matter, it presents notable excellence in composition. The editor is an expert to command attention to his excellent work, and each issue reflects great credit on the progressive house and its advertising methods.

THE MATHER 1,000 MILE AXLE OIL.

Salable specialties that have merits that create a permanent demand after introduction are sought after by all Hardware dealers at the present time with greater avidity than ever before in the history of the business. This has possibly been made necessary by the desire to have in stock every article of utility that is able to hold its own after the public becomes familiar with its individual excellence. This is especially the case with "The Mather Thousand Mile Axle Oil," which is a pure mineral lubricant expressly prepared for all kinds of wagon and carriage axles, and was introduced about eight years ago to meet the demand for an oil suitable for thousand mile long distance and felt pad axles. A number of the large carriage manufacturers bought the oil in large lots and sent a pint can out with each job. This created such a demand for the "Mather Thousand Mile Axle Oil" that it is now carried in stock by the largest Hardware houses in the country. See list in advertisement on page — in attestation of this fact.

We are under obligations monthly to Joseph Dixon Crucible Company, Jersey City, N. J., for a supply of calendar blotters "which touch the (ink) spot" in such a perfectly absorbing manner that we should miss their assistance were they withheld.

✤

The St. Louis exhibit of F. E. Myers & Brother, which will be one that will command the attention of those who are interested in their line of manufacture, will be located on block 3, extreme south end of the Agricultural Building, where they expect to make an extensive and attractive exhibit of Myers' Domestic, Windmill, Power, Spray and Tank Pumps, Myers' Hay Carriers, Tracks, Forks, Pulleys, Myers' Flexible Stayon Door Hangers of various styles, Store Ladders, etc., etc. This exhibit will be installed in close proximity to other important manufacturers, and they respectfully invite our readers to keep track of their space and visit them during the continuance of the Fair.

VERY CLEVER, DON'T YOU KNOW.

Dana & Company, Cincinnati, Ohio, the well known progressive manufacturers of the "Peerless Iceland" Freezers, are extremely original in their modern methods of general advertising. One of their latest novelties is in the shape of a package of "Seeds" they are sending to the retailers on their mailing list, on which they have inscribed "Take these seeds out. Plant them this Spring. They are the Seeds of business Success; the kind of seeds it pays to plant—quick growers, hardy, profitable." The "seeds" consist of a series of diminutive cards exploiting the merits of the Peerless Iceland Freezers, a cut of which adorns the reverse side.

THE MOTOR & ACCESSORY MANUFACTURERS.

At a meeting held in Hollenden Hotel, Cleveland, recently, at which a half a hundred manufacturers of automobile parts and accessories were present, an organization was formed known as "The Motor and Accessory Manufacturers," whose object is the promotion of the general interest of the trade and of the automobile industry generally. The officers are: President, D. J. Post, Veeder Manufacturing Company, Hartford, Conn.; first vice-president, Howard E. Raymond, B. F. Goodrich Company, Akron, Ohio; second vice-president, H. W. Chapin, Brown-Lipe Gear Company, Syracuse, N. Y.; third vice-president, Phineas Jones, Phineas Jones & Co., Newark, N. J.; secretary, F. E. Castle, Twentieth Century Manufacturing Company, New York city; treasurer, W. S. Gorton, Standard Welding Company, Cleveland, Ohio. Directors: H. T. Dunn, Fisk Rubber Company, Chicopee Falls, Mass.; H. H. Timken, Timken Roller Bearing Axle Company, Canton, Ohio; H. O. Smith, G. & J. Tire Company, Indianapolis, Ind.; R. H. Welles, Badger Brass Manufacturing Company, Kenosha, Wis.; P. L. Hussey, Hussey Drop Forging and Manufacturing Company, Cleveland, Ohio; F. C. Billings, Billings & Spencer Company, Hartford, Conn.; V. G. Apple, Dayton Electrical Manufacturing Company, Dayton, Ohio. Constitution and by-laws will be adopted by a mail ballot.

THE AMERICAN DISINFECTANT.

Among new additions to a Hardware stock we find dealers are adding to their department of polishes and finishes, wood fillers, etc., popular disinfectants that are easily handled at a satisfactory profit. Among this class of goods, the American Disinfectant, prepared by Frederick C. Nye, Syracuse, N. Y., has proved popular wherever introduced. It is a scientific article, made of the best materials for the purpose of deodorizing or disinfecting offensive odors or disease germs in toilet rooms, cellars or storage rooms, making such rooms pleasant, healthful and comfortable.

The Circulation of "Hardware" is Larger Than That of Any Other Paper n the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

A more sanguine feeling prevails in regard to business, which on account of unseasonable weather had lessened the usual urgency regarding early delivery. Jobbers are reporting an excellent trade for April in the middle West where comparisons with last year on seasonable goods are extremely encouraging being in excess as to volume and value over 1903. It can scarcely help becoming milder and warmer ere long, when a rush trade will become the feature, everybody wanting goods at once, and night work will become necessary in order to facilitate the necessary shipments. Strike conditions in the several sections recently causing apprehension, have yielded to arbitration or influences probably affecting them, and the industrial skies for the present are without a cloud to obstruct the sunshine, which at this season of the year should everywhere prevail.

Prices are really as satisfactory as could have been anticipated. The advances that have taken place have not been radical in their nature, but braced the markets sufficiently to make a fairly eager demand for goods that were good purchases with a hardening tendency since. The market for Builders Hardware is in better condition than for several years, the prices having been equalized by the competing makers under a selling agreement that is a desirable feature for the trade to recognize, and the advance placed on this line to take effect on a subsequent date, enabled the jobbers to book a season's orders so that the future of the trade could be handled judiciously at a fair profit and give the manufacturers at the same time full order books to work upon. In no line are the prices quoted with more confidence as to equality in quotation than in this important branch of the industry.

There are few concessions possible in any branch of trade on which to hang a pessimistic fear regarding the future, and contrary to tendencies that formerly affected the market during presidential election year, less fear is expressed regarding the trend of trade, and as there is but little of a speculative import affecting the several markets, the regular business of the country will doubtless be transacted without the irritating controversies that create animosities and interrupt the movements of commercial intercourse.

A great deal of the prosperity of the country is connected with good crops which are expected to prove no exception as to fulness or importance than of late years. The severe cold weather of the Winter and the late Spring has tended to lessen current business which will soon show a healthy improvement and the farmers will be actively employed in making assurance doubly sure by getting down to the Spring work with an abundant promise for the bountiful gifts of Nature.

Collections are reported as being somewhat slow, which is usually the case at the end of a long season of severe arctic conditions, as the country roads being difficult to use, the farmers are unable to get to town to make their customary settlements and assist the retailer topay the Jobber.

EXPORT OF MANUFACTURES MAKING A RECORD.

Exports of manufactures from the United States seem likely to make their highest record in the fiscal year which ends with the month of June, 1904. In the eight months ending with February, for which the Department of Commerce and Labor, through its Bureau of Statistics, announces the figures of exports of manufactures, the total is 20 million dollars larger than in the corresponding eight months of the fiscal year 1900, which was the record year in exports of manufactures. For the eight months ending with February, 1904, the total exportation of manufactures was $288,400,924, against $268,537,972 in the corresponding months of 1900.

While conditions in the Far East are causing a considerable diminution in the exports of cotton manufactures from the United States, practically all of the other important exports show a marked increase, and it seems not improbable that the grand total for the year will exceed that of the banner year 1900, and certainly that the total for 1904 will compare favorably with that greatest year in our exports of manufactures and surpass that of any other year. An analysis of the details of exports just made by the Department of Commerce and Labor, through its Bureau of Statistics, shows an increase in nearly all of the important articles other than cotton goods as compared with last year or earlier years.

Iron and steel exports show an increase of nearly 2 million dollars for the single month of February and of about 5 millions for the eight months ending with February. Mineral oils show an increase of 1 million dollars in the month of February and of over 8 millions in the eight-month period under consideration. Copper manufactures show for the month of February an increase of nearly 3 million dollars, and for the eight months an increase of nearly 12 millions; leather and its manufactures show for the eight months a slight increase; agricultural implements an increase for the eight months of 2½ millions; chemicals show a slight increase in the month of February, also a slight increase in the eight months ending with February; and this is also true of paper manufactures, scientific instruments, fiber manufactures, cars and carriages, india rubber manufactures, clocks and watches.

On the import side conditions are also satisfactory. The check in importations of manufacturers' materials seems to have been but temporary, as the total importation of raw ma-

Digitized by Google

terial for use in manufacturing was, in February, 1904, equaled in total value by that of February, 1903, while in many cases prices were considerably less, indicating an actual increase in quantity imported. For the eight months ending with February, 1904, the total value of raw material imported for manufacturing fell but 10 million dollars below the extraordinarily high figure for the corresponding months of the preceding fiscal year, and this is probably accounted for, in part at least, by the reduction in prices.

Hemp, manila, and sisal all show a lower price per ton in February, 1904, than in February, 1903, according to the reports of the Bureau of Statistics; and this is also true of sheet, plate, and taggers' iron, rubber, and numerous other articles utilized in manufacturing. The average price per ton of hemp imported in February, 1904, was $144.06, against $172.85 in February, 1903; of manila, $179.93, against $192.63 in February, 1903; of india rubber, $0.696 per pound as against $0.734 in February of last year.

The following table shows the value of the more important manufactures exported in the eight months ending with February, 1904, compared with the corresponding eight months of the preceding fiscal year:

	Eight months ending with February—	
	1903.	*1904.*
Iron, etc.	$62,922,173	$67,887,037
Oils, mineral, refined	40,035,629	47,777,700
Copper and manufactures	25,393,949	37,109,945
Leather, etc.	20,962,003	21,314,506
Cotton manufactures	21,190,183	14,738,321
Agricultural implements	10,471,911	12,930,228
Chemicals	8,752,049	9,399,230
Wood manufactures	8,208,840	8,704,604
Paper manufactures	4,691,528	4,770,614
Instruments, scientific	4,647,940	5,935,808
Paraffin and wax	6,292,294	6,010,894
Tobacco manufactures	3,457,663	3,426,077
Fiber manufactures	3,467,882	4,051,099
Cars, etc.	6,495,568	6,740,673
Rubber manufactures	2,845,424	3,084,273
Books, etc.	3,002,326	2,885,970
Spirits, distilled	1,625,292	1,458,425
Musical instruments	2,328,288	2,273,293
Cycles	1,253,348	1,224,700
Clocks and watches	1,396,350	1,552,697
Glass, etc.	1,445,835	1,275,513

The following table shows the total value of manufactures exported from the United States in the eight months ending with February of each fiscal year from 1894 to 1904:

Exports of Manufactures from the United States.

Eight months ending with February—	*Total.*	*Eight months ending with February—*	*Total.*
1894	$123,232,048	1900	$268,537,977

1898	180,606,072	1904	288,400,924
1899	206,822,334		

DEATH OF WILLIAM BINGHAM.

William Bingham, one of the best-known and most prominent Hardwaremen of the country, died at his home in Cleveland, Ohio, on Sunday morning, April 17th. The cause of his death was weakness of the heart, superinduced by old age. Mr. Bingham was born in Andover, Conn., March 9th, 1816. He was a descendant of the early settlers of Connecticut, his ancestors having come to this country in 1660 and founded the towns of Saybrook and Norwich. The farm on which he was born was an old estate of the Bingham family, and had been occupied by his father for many years. He remained in Andover until he was 20 years of age, when he went to Cleveland, then in its infancy. He traveled over the Albany & Schenectady Railroad, the first steam line in successful operation in the United States, as far as Schenectady, N. Y. Thence he went by canal and coach to Buffalo, taking boat at that point for Cleveland. Upon his arrival, he entered the employ of George Worthington and remained there for two years. A little later, in 1841, he purchased the business of Clark & Murphy, and founded the firm of William Bingham & Co. He continued in charge of the business until 1888, when the name was changed to the William Bingham Company, of which corporation he was elected president, but retired from active control of affairs some years later.

DEATH OF RUSSELL SARGENT.

Russel Sargent, of Sargent & Co., of New Haven, Conn., and son of Joseph B. Sargent, died Saturday, the 16th inst., at Boston, after a short sickness of cerebro spinal meningitis.

Russell Sargent was born in New Haven, August 31, 1864. He graduated at the Sheffield Scientific School in 1884, and had been his class secretary since graduation. Shortly after completing his college course he began his connection with Sargent & Co., and for a number of years previous to his death was the head of the firm's Lock department. He was married to Margaret Berrien Motte, April 19, 1894. Besides his widow, he leaves two children, a boy of nine and a daughter of four years. He was a member of the Graduates' Club, New Haven Country Club and New Haven Lawn Club. Services were held at the residence at New Haven, Monday afternoon, when an opportunity was given the men of the Lock department to look for a last time on the face of the man under whom they had worked.

THE RATE TO ATLANTA.

It gives us pleasure to announce to our friends that the Southeastern Passenger Association have granted for the occasion of the Atlanta Conventions a rate of one fare plus 25 cents for the round trip between Washington and Atlanta. This will make the fare for that section of the trip $17.75. These tickets are good to May 31st, but can be extended to June 30th, if deposited by original purchasers with the joint agent at Atlanta.

The rate between New York and Washington has not as yet been agreed upon. The regular round trip between these two places is $10 and if nothing better is granted it will make the cost from New York to Atlanta and return $27.75; however, it is fully expected that a rate of one and a third fare will be granted; this will make the round trip between New York and Washington $8.65, and between New York and Atlanta $26.40. The cost of a berth in a sleeping car from New York to Atlanta is $5.50 and of a drawing room with three berths $20.

The diagrams for Hardware's special train are ready at the office of the Southern Railway, corner of Chambers Street and Broadway, New York, and it is advisable that reservations be made as early as possible, particularly in cases where several people wish reservations close together. Of course, those who make application first will have the best choice, but even the late ones will be well cared for.

These reservations can be made either through the Manager of Hardware or at the office of the Southern Railway, mentioned above, or at that railway's office in Philadelphia. It is not necessary to send money for reservations, as that matter can be attended to on the day of departure when purchasing tickets.

As laid out at present, the special train will leave New York—23d Street, Pennsylvania Station, at 4.25 P. M., Sunday, May 22d; West Philadelphia, 6.50 P. M.; Baltimore, 9.15 P. M., and Washington, 10.45 P. M., arriving at Atlanta 3.55 P. M. Monday. It will be a solid vestibuled train with Dining, Observation, Cafe and Sleeping Cars.

THE CONVENTION BARBECUE.

At the Atlanta convention of the Southern Hardware Jobbers' Association and Hardware Manufacturers' Association, arrangements have been perfected by the Atlanta Jobbers to give a genuine old-fashioned barbecue, and it is firmly believed by the Entertainment Committee that an extremely enjoyable time may be anticipated. According to the programme as at present laid out, the trolley ride will start at eleven o'clock Friday morning to the private park, where it is intended the barbecue shall be held, and where every convenience is obtainable to make the novel affair a successful one.

THE SOUTHERN SUPPLY AND MACHINERY DEALERS' ASSOCIATION.

The Southern Supply and Machinery Dealers' Association held their third annual convention at the Hotel Chamberlin, Old Point Comfort, Virginia, on Tuesday, Wednesday and Thursday, April 12th to 14th. The morning session of Tuesday, April 12th, was one in which the manufacturers, their representatives, visitors and the ladies, whose presence added so much interest to the proceedings, were all especially invited to be present. The ballroom of the hotel where the convention held their sessions was fairly well filled by those present, consisting of ladies, guests and members of the association. The address of welcome was delivered by Capt. Wyndham R. Mayo, president of the Chamber of Commerce, of Norfolk, Va. John G. Christopher, of Jacksonville, Fla., responded on behalf of the association in a happy speech of thanks. An address of welcome to the manufacturers, which was enthusiastically received, was delivered by C. H. Briggs, of the Briggs Machinery & Supply Company, Dallas, Texas. The response was made by George T. Coppins, of the Walworth Mfg. Company, Boston, Mass. It was very characteristic, and received frequent interruptions of applause.

The session of Tuesday afternoon was executive and was occupied in the reading of reports of standing committees, and closed with a discussion of the question, "What Has the Association Accomplished During the Past Year?"

On Tuesday evening a reception and smoker was given, at which various members were called upon to contribute, and many offered impromptu features of entertainment, to the great amusement of those present.

Wednesday morning's session was executive, and in addition to the presentation of and discussion on the suggestions of the Executive Committee and like matters, the officers and Executive Committee for the ensuing year were elected. The election resulted as follows:

President, Peter E. Blow, Southern Brass & Iron Company, Knoxville, Tenn.

First Vice-President, W. H. Kettig, Milner & Kettig Company, Birmingham, Ala.

Second Vice-President, C. H. Briggs, Briggs Machinery & Supply Company, Dallas, Texas.

Secretary-Treasurer, C. B. Carter, Knoxville, Tenn.

The following members were elected to serve on the Executive Committee:

John C. Dozle, Nashville Machine Company, Nashville, Tenn.

George A. Smith, Smith-Courtney Company, Richmond, Va.

Edward L. Stream, Gibbens & Stream, New Orleans.

George V. Denny, Georgia Supply Company, Savannah, Ga.

Considerable of the work done in the several sessions was of an executive character and held behind closed doors on account of its importance for members only.

A joint session of dealers and manufacturers was held on Wednesday afternoon. The principal topic under discussion was as follows:

Is it not to the interest of the manufacturers, as well as of the dealers, for the manufacturers to establish minimum selling prices, and should not the dealers who maintain such prices be compensated by some rebate?

The discussion that followed was participated in by W. H. Kettig, of the Milner & Kettig Company, Birmingham, Ala.; Edward L. Stream, of Gibbens & Stream, New Orleans; W. M. Crumley, president of the Southern Hardware Jobbers' Association, who was called upon by President Blow for a few remarks. He said that he was in favor of having the manufacturers arbitrarily establish stiff prices. John J. Voorhees, of the Voorhees Rubber Mfg. Company, and Forbes Liddell, of the Liddell Machinery & Supply Company, Montgomery, Ala. The views were of such a varied character, no definite action was taken and the question is still a debatable one.

On recommendation of the Executive Committee the following resolution was brought to the attention of the manufacturers:

Resolved, That the association use its influence with the different manufacturers of all lines of goods which they sell to have them adopt a standard size of leaflet or page perforated for a standard size border to be adopted by the association showing cuts or lists of any articles which they manufacture and which they wish to bring before the notice of the dealer and his salesmen.

In the discussion which followed the presentation of this measure it was brought out that the association simply wished the adoption of a special standard leaflet for dealers' use supplementary to their regular catalogue system. The manufacturers present showed a willingness to comply with the request and upon motion a committee was appointed to take the matter up and suggest a standard size of leaf to be adopted by the association. This committee consists of C. H. Briggs, of the Briggs Machinery & Supply Company, Dallas, Texas; J. A. Riechman, of the Riechman-Crosby Company, Memphis, Tenn., and J. J. Disosway, of the Cotton States Belting & Supply Company, Atlanta, Ga.

A resolution was adopted permitting manufacturers to be elected to honorary membership, making the standard of eligibility their being in accord with the policy of the association. Such honorary members are not chargeable with any fees or dues, and cannot attend executive sessions.

On Wednesday evening a reception and dance held at the hotel proved a brilliant success.

The sessions on Thursday were executive, the only feature of general interest being the selection of the next meeting place. It was decided that the meeting should be held in Savannah, Ga., at a date in next April to be selected by the Executive Committee.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED APRIL 5, 1904.

360,417. Sash Fastener, Francis M. Chase, Denver, Colo.

360,418. Fishing Buoy, Emri W. Clark, Nashua, N. H.

360,426. Tool Handle, John S. Fray and James Fray, Bridgeport, Conn.

360,453. Dust Pan, Abram B. Levy and George W. Decker, Canandaigua, N. Y.

360,497. Lamp Stove, Orin P. Whipple, Abilene, Kan.

360,579. Sifter and Strainer, Robert G. Fruend, Chicago, Ill.

PATENTS ISSUED APRIL 5, 1904.

756,202. Radiator, Roy Barrett, Palmyra, N. Y.

756,204. Washing Machine, Ross C. Beekman, Independence, Kan.

756,262. Wheelbarrow, Thomas J. Montgomery, Youngstown, O.

756,263. Lamp Suspender, Arthur S. Moore, Notting Hill, London, England.

756,266. Stovepipe Fastener, Charles T. McClarin, Williamsport, Pa.

756,294. Broom Holder, William T. Spillane, Red Lake Falls, Minn.

756,358. Carpet Sweeper, John F. Hardy, Chicago, Ill.

756,364. Fishing Reel, Louis M. Hermance, Poughkeepsie, N. Y.

756,373. Vent Apparatus for Oil and Other Cans, William Joyce, New York, N. Y.

PATENTS EXPIRED APRIL 12, 1904.

360,866. Pocket Knife, Thomas R. Ellin, Sheffield, County of York, England.

360,879. Manufacture of Table Knives, Hubert C. Hart, Unionville, Conn.

360,937. Door Check, George Weinley, Rutland, Vt.

360,943. Window Fastener, Douglas Allport, London, County of Middlesex, England.

360,990. Expansive Bit, Charles E. Billings, Hartford, Conn.

361,022. Lifting Jack, John North Middletown, Conn.

361,055. Micrometer Gage, Albert H. Emery, Stamford, Conn.

361,056. Micrometer Gage for Internal and External Measurements, Albert H. Emery, Stamford, Conn.

361,113. Skate Fastening, Everett H. Barney, Springfield, Mass.

RECENT TRADE PUBLICATIONS.

Joseph Dixon Crucible Co., Jersey City, N. J., have sent us another of their attractive folders, this time exploiting their graphite joint compound for pipe joints, gaskets, bolts, nuts, etc., and which is equally useful for gas, steam or water pipes, put up in the very handy form of collapsible tubes of a size that may be readily carried in the pocket or tool-bag. This form is particularly useful for all small work away from the shop, the graphite is squeezed directly upon the threads, making unnecessary the use of a dauber, and saving any soiling of the hands or clothing. Send for this envelope-size folder and learn more about this convenient article.

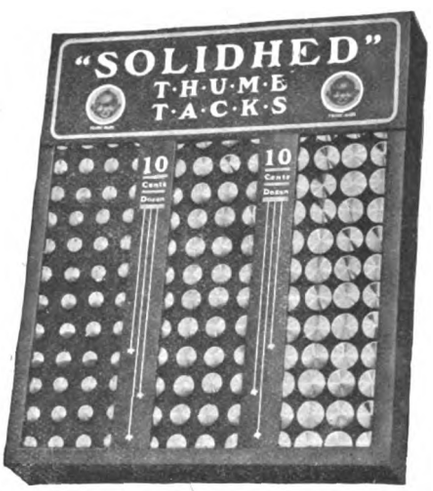
The American Steel & Wire Co., Chicago, under date of January, 1904, have issued a leaflet regarding telephone and telegraph wire, of which they give the different gauges, bundles required to a mile, approximate weight in pounds per 1000 feet and weight per mile. Much other useful information on this subject is also found on the leaflet which may prove profitable to those who avail themselves of the opportunity to secure one.

North Bros. Mfg. Co., Philadelphia, Pa., manufacturers of the "Yankee" tools, have issued another of their extremely interesting envelope size pamphlet catalogues embracing ratchet screw drivers, chucks and drills, countersinks, automatic drills, reciprocating drills, pocket magazine screw drivers, tool sets, etc., also giving a table of weights of one dozen tools in regular paper boxes which will be found very valuable when ordering. In response to frequjent demands for "Yankee" screw drivers put up in substantial and well finished boxes to be used by mechanics who desire to keep tools in fine order, and by gentlemen or amateur mechanics who especially appreciate tools put up in handsome sets, they have prepared the following set which they illustrate in their catalogue. The box, which is very substantially made of oak, handsomely finished, contains one each of the following "Yankee" tools which are each separately described in their catalogue. No 30 spiral ratchet screw driver, chuck with drill points, eight sizes in 64ths from 1-16 to 11-64 inches to use for drilling holes with the No. 30 spiral ratchet screw driver; countersink to use in the same tool; No. 11 ratchet screw driver with blade six inches long, and No. 15 ratchet screw driver with finger turn on blade with blade three inches long. The box measures $12\frac{1}{2}$x$4\frac{3}{4}$x$2\frac{3}{4}$ inches.

The Berger Mfg. Co., Canton, Ohio, have issued a large, handsome catalogue describing and graphically illustrating the uses of the Multiplex Steel Plate for floors, roofs and fire-proofing as used in the construction of modern steel and iron buildings; the Economy Partition Stud and Ceiling Furring strip for steel skeleton buildings, churches, storage houses, jails, bridges, etc., and also their Perfection Luminous Sidewalk. The Multiplex steel plate consists of a series of vertical corrugations of sheet steel, painted or galvanized, ending at the top and bottom in three half circle arches, separating the vertical sides of these corrugations from each other. The upper portion of these manifolds is filled with concrete. When used for floors, roofings and ceilings, it is made of various heights and gauges of material to suit the span and load to be carried. The results of practical tests and uses are given to which the plate may be applied, and the company is prepared to furnish the material from their works at Canton on short notice. They will be pleased to send estimates and sketches if they are furnished with floor plans and live load to be carried. They have also distributed an artistic catalogue treating on the merits and advantages of steel furniture over wood, which will be forwarded to those applying to the above company.

E. W. Bliss Company, Brooklyn, N. Y., have issued a very artistic book of 51 pages, being a treatise on their Power Presses. The book is finely printed on heavy coated paper, handsomely illustrated, and bound neatly with an embossed cover. The above company claim to be the largest manufacturers of sheet-metal working machinery in the world, and are the exclusive manufacturers for the United States Navy of the Whitehead automobile torpedoes' launching tubes, air compressors and appliances. They manufacture projectiles from the small one-pound shells up to those used in the largest modern guns. They announce that every modern appliance has been provided to facilitate the rapid and economical execution of orders. On the two center pages as the book is opened out, is presented a very comprehensive map of the St. Louis World's Fair, showing the position of the different buildings and exhibits, with a star in the machinery building to indicate where the exhibit of E. W. Bliss Co. will be found. This concern is now considering the manufacture of automobiles, full particulars of which they will be glad to furnish upon application.

E. C. Atkins & Co., Indianapolis, Ind., are proving their claim for superior quality goods with bare facts, by means of a unique folder which they have sent to the trade, in which they have enclosed a sample of their "Triple A" Spring Flexible Back Blades. There is certainly no fairer means of establishing relative merit than by ocular demonstration, and E. C. Atkins request in their folder that the sample blade be given a practical test along with blades of other manufacturers. They claim that their "all-hard" blades have greater durability than any similar blade on the market. They are made from the highest grade of steel, manufactured especially from their own formula. The teeth, they state, are sharp and so set as to present a square cutting surface to the work and just enough set to insure a free, smooth and rapid cut, removing no more stock than necessary. They are tempered hard and tough by their special process. On their folder they add a very concise price list for hand hack saws. Write for their booklet and discounts.



L. H. Mace & Company, 111-117 East Houston Street, New York, have issued a 1904 refrigerator catalogue and price-list, which is extremely well gotten up, and presents illustrations of a large variety of their goods, of which they make five different lines, exclusive of special orders, and they vary sufficiently to give the dealer a range of styles and prices to meet all ordinary requirements. Their five lines include the "Diamond," a soft wood refrigerator painted by a new process in imitation of golden oak. While designed to meet the demand for a low-priced refrigerator, the construction is equal in preserving qualities to their higher priced refrigerators. The "Empire," which they claim is the cheapest hardwood refrigerator on the market, is made of ash, nicely finished and ornamented. The "Puritan" is a hardwood refrigerator, solidly made throughout, excellent cabinet work and beautiful finish. The "Excelsior," they state, is their best. The case is of new design, made of oak, very thorough in construction and handsomely finished, and they claim for this that as a refrigerator it cannot be surpassed as an example of the cabinet-maker's art. Their line of glass and tile-lined refrigerators has been increased this year by the addition of some new sizes and patterns of the Puritan grade to the fine Excelsior line of last year. While no changes are made in the outward appearance of the Excelsiors and Puritans, the inside linings are of opal glass, and the floors tiled, making these Refrigerators in all respects, they claim, the finest in the world. The above catalogue will be found valuable to dealers handling this line of goods.

NEW GOODS AND SPECIALTIES.

"SOLIDHED" THUMB TACKS.

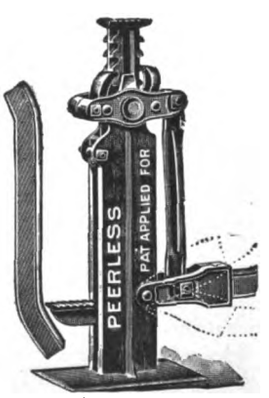
Among the various little specialties that can readily be added to a general Hardware stock and would be appropriately placed and found salable, the solid head thumb tacks, which we illustrate herewith, would furnish a good specimen. They are manufactured by the Hawkes-Jackson Company, 82 Duane Street, New York. The solid head thumb tack is a flat, smooth-headed tack that can be pushed in wood or other

"SOLIDHED" THUMB TACKS.

material without injury to the thumb, and are with equal ease removed when necessary. The head of the pin is firmly and securely imbedded in the top without penetrating it, thus making a solid joint. They are placed upon the market in a display case as shown in the illustration where the tacks are mounted on blocks of one dozen each, making individual counting by the dealer unnecessary. They furnish a neat and convenient fastening for general use, both for office or household purposes. The popular price at which they are sold enables them to be used for fastening blotters to the desk or pictures, calendars, photographs or posters to the wall; they are extremely convenient for the use of artists and draughtsmen when using drawing boards, also by advertisers when fastening show cards in stores and shop windows. Write to manufacturers for further information.

CLAYTON & LAMBERT'S GASOLINE TORCHES.

Clayton & Lambert Mfg. Co., Detroit, Mich., are the manufacturers of a line of Gasoline Fire Pots and Torches, which



THE NO. 32 TORCH

meet with the full approval of the trade and have already achieved a deserved success. Among the many torches shown we note the No. 32, which we illustrate here; the makers have the following to say of the No. 32 Torch: It was designed for the use of mechanics who desired a powerful burner capable of doing heavy work out of doors in cold or windy weather. A glance at the generator will show that it has great generating power, and it will produce a clear, blue, intensely hot flame which is under perfect control of the operator, and is economical in the use of gasoline; in fact, will soon save its cost in the saving of gasoline alone. A hook and support are provided so that soldering coppers may be heated when desired. The tank is quart size, drawn out of heavy brass, free from seams, and all fittings are heavy. Reinforcements are used to make an extra strong tank. A brass air pump of the latest design screws into the tank and is submerged in gasoline, which aids in keeping it cool and also protects it from injury. A careful inspection will convince you that only the best of workmanship and materials have been used. It is supplied in polished brass or nickel plated, as desired. Like everything made by Clayton & Lambert Mfg. Co., this torch is sold under the guarantee "Your money back if you are not pleased." From the above our readers will see that this firm guarantees anything made by them, and no doubt exists their guarantee means just what it says. We are also glad to call your attention to their ad which will be found top of middle column inside front cover. In this space will appear a series of ads which should interest all our readers. Their catalogue describes twenty styles of Fire Pots and forty-six styles of Torches. Users of gasoline fires should have this catalogue, which we understand will be sent free to any of our readers.

THE PEERLESS AUTOMOBILE JACK.

Oliver Manufacturing Company, 203 South Desplains Street, Chicago, Ill., are the manufacturers of the Peerless Automobile Jack, of which we give an illustration, which shows very clearly how exceedingly simple are all its movements, and yet it commands great strength and remarkable lifting range. It works at any angle and may be used for pushing as well as for lifting. At present an indispensable part of an automobile equipment is a lifting jack, and one

THE PEERLESS AUTOMOBILE JACK.

that is not only portable and small, but also strong and powerful, is in demand. The "Peerless" meets completely all these requirements, and is claimed to possess the greatest lever power in proportion to its size of any similar lifting jack before the trade. It is made in four sizes: No. 16, suitable for vehicles of two tons, No. 18 for three tons, No. 21 for 10 tons, while a larger and heavier size, No. 23 for vehicles of 10 tons, is made that is 17½ inches high, with a rise of 11 inches and weighs 25 pounds.

SURFACE SPEED ATTACHMENT FOR SPEED INDICATOR.

L. S. Starrett Co., Athol, Mass., among the many high-grade mechanical devices which emanate from their well-equipped works, are the manufacturers of the speed attachment for speed indicators, of which we give illustration herewith. This attachment, Fig. 1, applied to one of their speed indicators, is designed to show the number of lineal feet per minute the periphery of a shaft or pulley is running, and

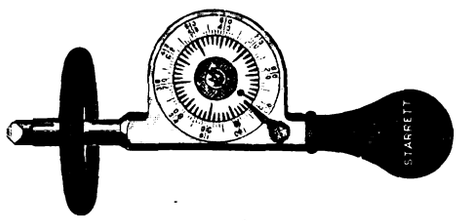

FIG. 1.

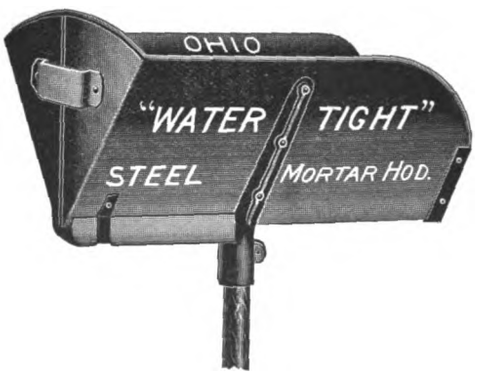
thus enable a workman to know if the speed is too fast, or is too slow to get the most work the tool will stand. For instance, the speed of a cone pulley being turned needs to be changed at every step. Heretofore it has been all guess work as to the number of feet per minute the periphery of the work is traveling. It may be so fast as to heat and spoil the tool, or it may not be nearly fast enough to perform what should be done. The same is true when shifting the tool

FIG. 2.

from the hub to the rim of a pulley. The rubber-banded indicator wheel, Fig. 2, may be instantly slipped off or on the spindle of any of their speed indicators, and when held against the periphery of a shaft or pulley a half minute or a minute, by multiplying the figures showing the revolutions on the dial on the indicator by 2, the number of feet the surface of the thing is traveling is obtained, as each revolution of the indicator wheel shows six inches, twice around, one foot. A close approach to accuracy is not claimed for this attachment, but it will be found very convenient and adequate for the purposes intended, as suggested above.



STEEL MORTAR AND BRICK HODS.

The Geauga Manufacturing Co., Painesville, Ohio, are manufacturers of the improved, up-to-date specialties which

OHIO STEEL BRICK HOD.

we illustrate herewith. The water-tight steel hods when in use, will be found to be 25 to 50 per cent. lighter than the ordinary wooden hod so commonly used. The steel bodies of these hods are claimed to be the only ones made that are folded from a single piece of sheet steel without cutting the metal. They are reinforced on the edges and at the dumping

OHIO STEEL MORTAR HOD.

point. By the use of specially devised machinery the manufacturers are enabled to produce what they claim are the strongest and most durable double-end mortar and brick hods before the trade. These hods are provided with an improved malleable iron fork and wooden shoulder saddle, making it easier than the old style for the user to carry, or should he so desire, to attach a piece of cloth to the under side of the saddle. This malleable iron fork and socket for holding the hardwood handle and taking up the shrinkage, makes it easy to replace a broken handle, and it enables hods to be shipped knocked down.

MALLEABLE IRON CAP FOR CHISEL HANDLES.

The Onondaga Mfg. Co., 120 S. State Street, Syracuse, N. Y., are the manufacturers of a number of patented specialties, one of which we illustrate in the accompanying cuts. Fig. 1 shows a malleable iron cap which is designed for use on the ends of chisels that are used in connection with a mal-

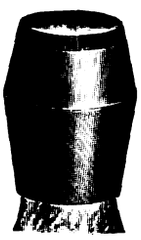


FIG. 1.

FIG. 2.

let or other appliance to force the power of its application when in use. Ordinarily the end of the chisel handle presents the appearance of Fig. 2, and is soon destroyed as far as regards the utility of its handle. By this simple device, a

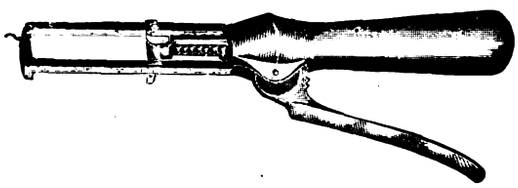

FIG. 3.

sectional view of which is given in Fig. 3, the handle is protected from injury and lasts as long as the tool to which it is supplied. They are made in three sizes, which have been found to answer every possible demand. A larger size for tent stakes can also be furnished by the company. Catalogues and circulars of their several specialties will be forwarded upon request.

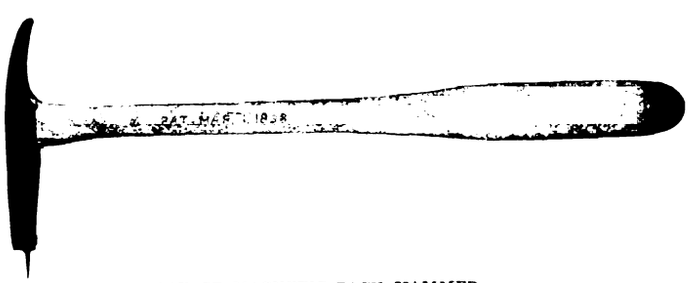
THE STORK ADJUSTABLE CAN OPENER AND CUTTER.

Notwithstanding the number of Can Openers invented every year, there seems still to be admirable features of utility not already embodied in those at present on the market. George L. Stork, Dayton, Ohio, is placing upon the market through the Hardware and house-furnishing trades one of the most complete, in the way of usefulness, that we have

ADJUSTABLE CAN OPENER AND CUTTER.

noticed, embracing as it does several new features that commend it for salability. A tool has long been needed to open fruit jars or other screw top appliance to remove tin tops from paint and other cans. Care has been taken to make this a feature in this tool. In preserving operations, it may



WHEN USED AS A CAN TOP REMOVER.

be used to draw the hot cover tighter than by any other method, and will remove with equal facility any tin cap on cans or bottles, no matter how tight they may be. In connection with this adjustable feature, there is a cutter attachment for opening skillfully any tin top can, now so popular, in grocery supplies, such as tomatoes, corn, peas, beans, or paint cans, cutting any sized circle from one-half inch to six inches. Write to the manufacturers for particulars, which will be given on request.

SAVAGE MAGNETIC TACK HAMMER.

The Savage Arms Co., Utica, N. Y., who are noted as manufacturers of Rifles of standard reputation, are placing before the Hardware trade a little specialty that is destined to become popular. It is in the shape of a new model Magnetic Hammer, an illustration of which we present herewith. A

SAVAGE MAGNETIC TACK HAMMER.

horseshoe magnet made of the finest steel forms a solid head; the hammer itself is a nicely balanced tool, the magnetism being permanent in its character. The upper end of the hammer is shaped so as to make a powerful tack puller. It is designed to be retailed at 25 cents, from which price the trade is given a liberal discount. Write for price and further information (this being tack hammer season) at once.

PECK'S EDGE TOOLS.

Peck Edge Tool Co., Cohoes, N. Y., are one of the oldest manufacturers of reputable Edge Tools in the line of Adzes, Broad Axes, Hatchets, etc., that appeals to the most exacting

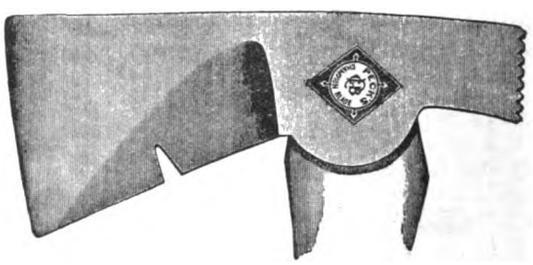


FIG. 1.

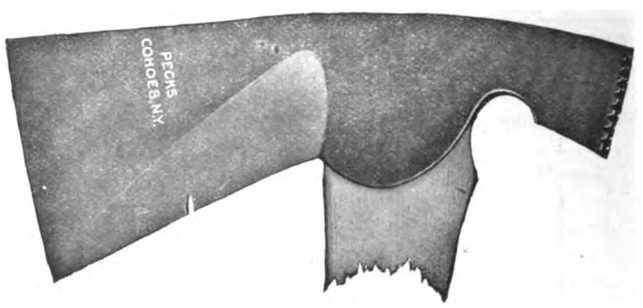
trade. They are well made, strictly hand forged, carefully tempered and fully guaranteed against flaws in manufacturing. Among those of special utility, their line of Lathing



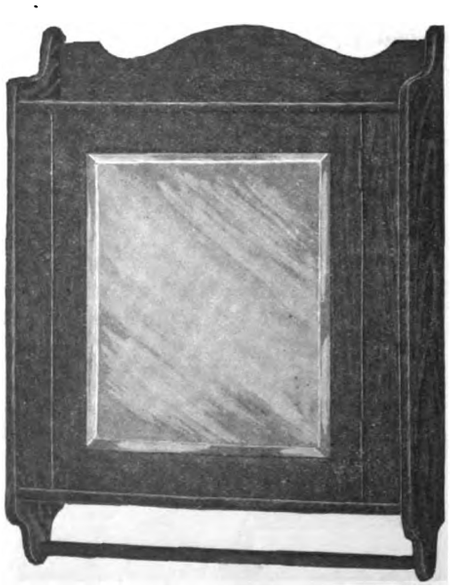


FIG. 2.

Hatchets have always been of unrivalled quality. The patterns have been favorites with the consumer, and gained a commendable record for superiority that forms the foundation for a steady demand wherever sold.

UDELL TOILET CABINET.

The Udell Works, Indianapolis, Ind., are the manufacturers, among a number of similar specialties, of the Toilet Cabinet No. 199½, which we illustrate. It is made in quartered oak and finely polished. It is 24 inches in height, 19 inches

UDELL TOILET CABINET.

in width and 6 inches in depth. The French bevel mirror shown in illustration is 8x12 inches. The company on request will forward catalogue showing a line of goods that would find ready sale if handled by Hardwaremen.

FARWELL, OZMUN, KIRK & CO.'S NEW CATALOGUE.

About as good a working catalogue as the up-to-date retailer requires is the one recently distributed to their customers by Farwell, Ozmun, Kirk & Co., St. Paul, Minn. Being, as they declare themselves, in favor of issuing a general catalogue more frequently, or, as they call it, "the-new-book-more-frequently plan," no attempt has been made in this instance to make the bulky volume from the heaviest paper, or to spent a great deal of money unnecessarily in color-work throughout the contents. They believe "the Hardware catalogue of the day referred to most by the merchant, is generally the last one issued, provided it illustrates and describes an unusually large and complete line." This old house was established in 1859, and is consequently regarded as one of the pioneer Hardware houses of the West. They were incorporated in 1887. One of its Board of Directors occupies the prominent position of President of the National Hardware Jobbers' Association, comprising most of the wholesale houses of the country in the organization. A frontispiece to the catalogue gives a view of the wholesale district of St. Paul, displaying the convenience of their business location for receiving and shipping, which is plainly shown in the illustration, both of their warehouses having tracks of their own, giving direct communication with the railroads, and with a private railroad track running the entire length of their building. The catalogue is divided into 17 departments, representing those in which they are divided in their immense establishment. They are arranged as follows: Mechanics' Tools, Butcher Supplies and Ice Tools, Locks and Builders' Hardware, Riverside Hardware Cabinets, Farming Tools and Miscellaneous Hardware, Harness and Saddlery Hardware, Paint, Varnishes and Painters' Supplies, House Furnishing Goods, etc., Favorite Stoves and Ranges, F. O. K. & Co.'s Stoves, Ranges, Furnaces, Gasoline Stoves, Hotel Ranges and Kitchen Utensils, Tinners' Trimmings, Machines and Supplies, Tin Plate, Sheet Steel, Steel Roofing and Siding, Stationery, Office Supplies and Show Cases, Cutlery, Silver Plated Flat and Hollow Ware, American Cut Glass, Clocks, Watches, Chains, Novelties, etc., Sporting Goods, Guns and Ammunition, Fishing Tackle, Bicycles and Bicycle Sundries, Freight Classification. An index of 38 pages in which the goods are indexed under every possible variation of name, makes an easy reference when needed information is required. Containing as it does 1872 pages of regular catalogue contents, the paper on which it is printed is as thin as its continuous use would demand for convenience in handling, and the illustrations and descriptions of goods have been carefully attended to, by which goods may be ordered in an intelligent manner. List prices accompany all the articles, which make the volume amenable to a discount sheet or series of discounts.

PRESIDENT FAYETTE R. PLUMB.

Fayette R. Plumb, president of the Manufacturers' Club, of Philadelphia, and ex-president of the American Hardware Manufacturers' association, while in New York recently referred to the success of the Manufacturers' Club and Association as follows: "Including affiliated manufacturers throughout Pennsylvania, our club, which was established in 1887, now has a membership of about seven hundred, and while we take no active part in matters of a political character locally, we take a lively interest in all State and National questions that have any practical bearing on business generally. Among other subjects, are, of course, the relations of employer and employee, and when conflict has arisen the club influence has been exerted to bring about an adjustment of differences. Our National Hardware Association had its birth in Cleveland, Ohio, in October, 1901, and began business with a membership of sixty-five, which has since grown to more than two hundred. This comprises not only the manufacturers of the several lines of Hardware that would be carried by a general jobber, but the allied industries of iron and steel. The United States Steel Corporation is included in the membership, and without counting its large capitalization, it is within the truth to say interests representing several hundred millions are co-operating in the purposes for which the association was organized. The enhancement of prices was not one of the objects sought to be attained. Certain abuses, however, had crept into the relations obtaining between manufacturers and dealers in our products. Some manufacturers, prompted by an eagerness for orders, had permitted deviations from the terms and discounts usually accorded, and the manufacturers, as a whole, suffered from the unbusinesslike practices that were tolerated. Within six months after our organization came into existence many of the abuses had been corrected. One of the matters for which I was sponsor was the appointment of committees to represent the several lines in the business, that greater facility might be had in considering grievances. The desirability of this action has become obvious by the demonstration of its utility. Business conditions have been steadily improving in all lines and in all parts of the country since the first of the year, and the outlook for the future is entirely hopeful."

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

"Deed of Trust."

QUESTION: I have just received through a rating agency the information that a creditor has given a deed of trust and I do not just understand what that means. Will you please inform me through your Legal Department, as to what the significance is of a "deed of trust" in this State (Minnesota).

REPLY: A trust deed or a "deed of trust" may signify one of two things. It may mean that the grantor has created a trust in his property in favor of some person, or it may mean that he has conveyed certain property to a trustee in trust to secure the performance of some obligation on his part. The latter is the ordinary meaning of the term. Such a trust deed is in effect a mortgage of the property conveyed.

Liability for Wrongful Delivery of Goods.

QUESTION: A bill of goods was shipped from New York to Buffalo, billed as follows:

"To order "X" notify John Smith, Buffalo." After they had arrived at their destination, the railroad company delivered the goods to John Smith on his written order, without requiring the production of the bill of lading. Smith dishonored the draft with the bill of lading also attached after he had actual possession of the goods. Smith is insolvent. Has the consignor of the goods any remedy against the railroad company?

REPLY: It is well settled in most of the States, and particularly in New York, that a railroad company has no authority to deliver goods under such circumstances without requiring the surrender of the bill of lading. The name "X" is evidently fictitious, and the fact that the bill called upon the railroad company to notify John Smith, indicates that he is not the consignor of the goods, since if he were, it would be their duty to notify him without the insertion of any such provision in the bill of lading. It follows, therefore, that the company would be liable to the consignor for the full amount of the goods in case Smith refused to pay for them.

Law in New York State in Relation to Veterinary Medicine.

QUESTION: I would like to ask, has any one a right to manufacture and sell veterinary medicines, such as colic cure, condition powder and liniments? Kindly inform me what the law is, and what I will have to do to start in business.

REPLY: The public health law of the State of New York forbids the practice of veterinary medicines or surgery without obtaining a license and without registration in the county under penalty of $50 for every day of such unlawful practice. The same law also provides that the sale of drugs, medicines and poisons must be by licensed pharmacists under similar penalties, but the latter provision does not apply to the manufacture or sale of proprietary medicines. We know of no law expressly requiring a license for the manufacture and sale of veterinary medicines, except the foregoing, and suggest that for full information regarding compliance therewith you communicate with W. H. Kelly, Esq., Secretary of the State Board of Veterinary Medical Examiners, 195 Western Avenue, Albany, New York.

JAP-A-LAC

"WEARS LIKE IRON"

JAP-A-LAC, the new wood finish, has grown in popular estimation until to-day it is the recognized superior of all wood finishes.

We have had unbounded confidence in **JAP-A-LAC** and have backed up this faith by the expenditure of vast sums of money to make it a household word in every corner of the land.

We are still spending money for this purpose and shall continue doing so.

Watch the leading magazines and exclusive women's publications and see what we are doing.

Start with the April issues of the *Ladies' Home Journal, Delineator, Designer, New Idea, Woman's Home Companion, Ladies' World, McCall's, Everybody's* and *Good Housekeeping* and many other publications, and try to realize the millions upon millions of people who each month read at least a portion of the "Story of **JAP-A-LAC.**"

Never before was a varnish product so thoroughly known. It insures millions of sales for **JAP-A-LAC,** and you will have your share of the demand.

Won't it pay you to place your order now and be ready to supply your customers' wants?

We have a specially alluring proposition for dealers and will gladly furnish information regarding it upon request.

The **GLIDDEN VARNISH CO.**

MAKERS OF HIGH GRADE VARNISHES

No. 44 Williamson Bldg., Cleveland, O.

ATLANTA CONVENTION ENTERTAINMENTS.

The following extracts are from a letter addressed to the members of the American Hardware Manufacturers' Association by the secretary-treasurer, F. D. Mitchell. They will prove of interest to our readers generally, having reference to the conventions on May 24-27 at Atlanta:

"The attendance of both manufacturers and jobbers will be unusually large, and as we must soon place the orders for badges, banquet menus, numbered buttons, etc., etc., we would ask that you kindly fill out the enclosed return-addressed postal card and mail same at your early convenience, that we may closely approximate the quantities which will be required. These cards will also be used as 'printer's copy' in compiling printed key-to-numbered-buttons, and the data summarized for use of the Entertainment Committee and others, to secure to all in attendance the various privileges of the occasion.

"We are to-day in receipt of advices from President Crumley, of the Southern Hardware Jobbers' Association, stating that the Atlanta Hardware jobbers have perfected arrangements for a "barbecue" which they will tender to the visitors at this convention on Friday afternoon, May 27th, at 2.30, and that their Friday morning meeting will be made brief to admit of starting promptly at 11 o'clock on a trolley ride around Atlanta terminating at the "Cue Grounds." These Grounds are private property, and Mr. Crumley assures us that "Those who do not go will regret it." The committee at Atlanta desires to learn at this time how many will attend the barbecue, and we would ask that you indicate on the enclosed postal the names of those who will accept their invitation to this entertainment feature.

"While the various passenger associations have not published the reduced rates for the convention, we understand that it will be one-fare-round-trip for passage through "Southeastern" territory (south of Ohio and Potomac Rivers and East of the Mississippi) plus 1⅓ fares for round trip for passage through all other passenger association territories. For example, New York members upon presentation of certificate showing payment of one first-class fare, New York to Atlanta, may exchange same (properly vised at the convention), for return ticket upon payment of one-third first-class fare from Washington to New York."

THE WORLD'S RECORD FOR 100 SHOTS TIED BY A "STEVENS" RIFLE.

H. M. Pope tied the world's record of 917 for 100 shots, off-hand, held by D. W. King, of Denver, Col., at the regular weekly shoot of the Rod and Gun Rifle Club at the Lake Lookout range on April 9th. The scores were shot at 200 yards on the standard American target, Mr. Pope using his Stevens-Pope 33-caliber rifle, mounted with a Stevens-Smith telescope. Mr. Pope's performance is regarded by marksmen as most remarkable and one that called for not only great skill and the finest judgment, but courage and endurance as well. The conditions under which he shot grew more adverse as he neared the end of his long string, until the rain, the wind and the gathering dusk made it very difficult to shoot accurately; and yet the five last shots of his 100 were placed in the center of the target where they scored 10, the highest possible score to make. The 10 circle is 3 36-100ths inches in diameter and to put five consecutive bullets in this circle at 200 yards, off-hand, under those conditions was a fine achievement. More than that, several of these shots were within rings inside the 10 circle, which are used for scoring when shooting with machine rests. The 12 circle is buit little more than one inch in diameter, and yet two of the five hit this tiny mark. All of the 100 shots were in the bull'e-eye and 94 of them were within the eight ring. This 100 shot score completes the list, and Stevens and Stevens-Pope rifles now hold all records on all the targets used for off-hand shooting at 200 yards used in the United States for all the different numbers of shot usually fired in contests on these targets.

REVIEW OF THE MARKETS.

WIRE NAILS. There is a satisfactory demand as far as the mills are concerned, though not as active as it was a little earlier. The mills are complaining of inability to get steel as promptly as they could wish as the order books are quite full as yet with orders to complete, and the transportation problem shows less congestion. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.90
Retailers, carload lots	1.95
Retailers, less than carload lots	2.05

New York. A fair trade is being done in Wire Nails locally, the nearby territory contributing to make the demand a satisfactory one. Quotations are as follows:

Single carloads	$2.10
Small lots from store	2.20

CUT NAILS. The delivery of Cut Nails has been less hampered of late by outside conditions. Orders not being too strenuous in their requirements, the mills have been able to keep the output in comfortable shape for prompt shipments. Quotations are as follows: On either Steel or Wire Nails, with no discrimination as to locality, quotations are as follows:

Carload lots	$1.75 base
Less than carload lots	1.80

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. Prices remain unchanged; with a satisfactory local demand. Quotations are as follows:

Carloads on dock	$1.89½
Less than carloads on dock	1.97½
Small lots from store	2.05

BARB WIRE. Less activity in the demand is shown by the orders now being received. The mills have been able to make shipments on contracts with greater regularity. There are indications in the effects of the Western floods that a larger amount of fencing will be needed than was anticipated in the previous estimates, making confident conditions regarding the future. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.20	$2.50
Retailers, carload lots	2.25	2.55
Retailers, less than carload lots	2.35	2.65

SMOOTH FENCE WIRE. Back orders are being filled with greater regularity; a slight lull in the usual pressure for immediate wants being noticeable. Quotations are as follows, f.o.b. Pittsburgh; terms, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.80
Retailers, carloads	1.85
Less than carloads	1.95

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BOLTS AND NUTS. The manufacturers of Bolts and Nuts, at a meeting held April 20, made the following advances in prices. These are the lowest printed prices, and are subject to the usual extras for quantity:

Common Carriage Bolts, ⅜ x 6 and smaller and shorter, rolled thread	75%
Common Carriage Bolts, ⅜ x 6 and smaller and shorter, cut thread	70 and 12½%
Common Carriage Bolts, longer and larger than ⅜ x 6, cut or rolled thread	70 and 5%
Machine Bolts, H. P. or C. P. Nuts, ⅜ x 4, smaller or shorter	75 and 5%
Machine Bolts, H. P. or C. P. Nuts, larger than ⅜ x 4	75%
Machine Bolts, with C. and T. Nuts	70 and 5%
Machine Bolts, without Nuts	75 and 10%
Machine Bolt Blanks	75%
Bolt Ends, with H. P. or C. P. Nuts	75%
Bolt Ends, with C. and T. Nuts	70 and 5%
Plow Bolts	65 and 10%
Hot Pressed Square Nuts	$5.80 off list.
Hot Pressed Hexagon Nuts	$6.30 off list.

The prices represent an advance of about 5 per cent. on Bolts and two-tenths on Hot Pressed Nuts. Cold Punched Nuts and Coach, Lag or Skein Screws are unchanged. The manufacturers state that prices have been well maintained and the market is very firm.

BINDER TWINE. On April 15 the International Harvester Company announced prices of Binder Twine as follows:

	Cents per lb.
Sisal	10¼
Standard	10¼
Standard Manila (550 feet)	11¼
Manila (600 feet)	12¼
Pure Manila (650 feet)	13¼

Five-Ton lots, ¼ cent less; carload lots, ¼ cent less. Kansas City, Minneapolis, Omaha, Council Bluffs, ¼ cent higher. Pacific Coast points, 1 cent higher. Some Eastern manufacturers are quoting on the basis of 10 cents for Sisal and Standard, f.o.b. Eastern mill, ¼ cent less in carload lots.

CORDAGE. The demand for Rope holds its own very well and a fair market is noted in this especial line, with little disturbance in prices as far as regards the best grades; the competition affecting the lower grades more particularly. We continue previous quotations as fairly representing the average market, the usual rebate of ¼ cent per pound being given to carload buyers:

Pure Manila, 7-16-inch and larger	12
⅜ inch	12½
¼ inch and 5-16	13
No. 2 Manila	10½@11
Pure Sisal, 7-16 inch and larger	9¼
No. 2 Sisal, 7-16 inch and larger	8¼
⅜ inch	8¾
¼ inch and 5-16 inch	9¼
Lath Yarn, Medium and Coarse	8½
Jute Rope, No. 1	6½
No. 2	6

LINSEED OIL. The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

Although it is now the 20th of April, Spring has hardly yet established itself, and we are still receiving reports that frost remains in the ground and trade naturally hangs back in consequence, although it is easily seen that a warm spell of a few days would make a great change in affairs. Even now Spring goods are in urgent demand and much dissatisfaction is felt at the slow deliveries made by the factories. Already the sales in this line have been unusually heavy, so that if the weather settles soon the consumption promises to be unusually large. Prices are almost uneventful, as there are but few changes and these are more in the direction of equalization than a decided change either way, and prices made during the last few weeks are well maintained. Col-

Digitized by Google

lections are regrettably slow. The farming trade especially has had great difficulty in collecting money during this long and severe Winter and it is scarcely a cause for wonder that remittances should be delayed. For this and many reasons we are strongly inclined just now to be sun worshippers, and believe that as soon as the sun once more sends his warming beams upon the earth, not only will trade improve but we shall all feel more like attending to business.

Biddle Hardware Co.

THE PITTSBURG TRADE.

Cold weather, continued until the date of writing, April 16th, has held back the sale of seasonable goods to some extent, yet we are pleased to report an increase in sales for the first half of April over the corresponding time of 1903. When warm weather sets in, as it may at any day now, there will be a rush for goods that will make jobbers work overtime. The improved condition in the mill district continues, orders come in freely and prices are held firmly at the recent small advances. The coal and coke trade is also improving since settlement of the wages scale with the prospect of steady work throughout the year. If the crops give an average yield this year we see no reason why 1904 may not prove a profitable one in all lines of business.

Logan-Gregg Hardware Co.

THE CLEVELAND TRADE.

One of the hindrances to business is lack of cars to move goods. The policy of the railroads to postpone purchases effects the steel trade and will, if continued, seriously affect business through lack of transportation. It is inadequate now and there will not likely be less demand, but more. The fact that transportation facilities were at one time in advance of needs may encourage a conservative spirit, but it certainly seems now to be a wrong policy. As the railroad management is in the hands of able men, they are very likely to change their policy soon. In the meantime, there is little overproduction in finished goods and many of the manufacturers are behind shipment on orders entered in January, and in many cases are prevented from shipping by lack of cars. As the season advances, there are many more advances than declines in price. March trade has made good by shipments of orders taken earlier; April trade is not as brisk as last year and the Summer months are likely to be the poorest of the season, as the promise for the last half is excellent, unless poor crops and labor troubles interfere. The election is likely to create less apprehension than usual, as the result is not so uncertain.

The Lockwood-Taylor Hardware Co.

THE CINCINNATI TRADE.

Unseasonable weather is still resisting the continuance of favorable trade conditions. Sales in general average up to last year, but would have far surpassed previous records had the weather been at all favorable. Sales being made now are all for immediate consumption caused by the late Spring and high waters. The jobbers report a fairly good outlook with chances of greatly improved prospects, as soon as the weather permits the farmer to broaden his work. The planting of potatoes and transferring garden truck from lot beds to field is a month late, although some farmers took chances of frost with the result that plants will have to be replaced on many farms. The Ray Co., 143 West 5th Street, have added Sporting Goods to their line of Phonographs, making quite a display of baseball goods. The Crawford-Roll-Brendamour Company has made an addition to the regular Sporting Goods line in the manufacture of baseball uniforms for the Cincinnati League Baseball team, as well as for the Oakley, Ohio, team. Arthur E. Jones, who for a number of years manufactured Babbitt and Type Metals and Solder; Harry L. Anstead, who was in the Supply business, and George H. Cunningham, formerly in the Rubber Goods trade, have organized The Cincinnati Mill & Mine Supply Co., with headquarters at 227 West 5th Street, having four floors and basement to be filled with belting, packing, pulleys, rope, chains, valves, pipe fittings, Babbitt metal, type metal, solder, rubber hose, etc. Mr. Jones is president; Mr. Anstead, vice-president and manager, and Mr. Cunningham, secretary.

Craig Mine Corundum

CORUNDUM is the best abrasive obtainable. It cuts clean, fast and cold. Not until three years ago when Craig Mine Corundum was placed on the market, could corundum be obtained in quantity. We can now supply any quantity of uniformly pure and carefully sized corundum, and enquiries and orders will receive prompt and careful attention.

THE COLUMBUS TRADE.

Trade has been as erratic as the weather; a bright day or two brings a very noticeable increase in orders. There has not been very much encouragement for dealers to buy freely, as the weather has been very discouraging. Rain, snow, sleet and continual cold is not what we need in April. On account of heavy rains farmers have done but little plowing. Oats should have been sown before this, but we doubt if there has been any sown yet: and the ground is not ready. It is not wise to kick before we are hurt, but it is human nature. The wheat crop is improving, and more promising than it was a few weeks ago, but the trouble is the acreage is small this year; the estimated crop is about 67 per cent. The building outlook in our city was never better, and there is no cloud visible in the way of labor troubles, which is certainly satisfactory all around. The price of binder twine has been fixed at 10¼ cents for Sisal and Standard, in less than car lots. This is about the price that was expected. Prices are pretty firm and advances are frequent; this is certainly an indication of confidence for the year. Axe and hatchet manufacturers (the Combine) are not satisfied with letting well enough alone, but it won't last long; mourners never would stand being crowded too hard and it will be so in this case. There has been one egg laid all ready and the hen will no doubt be on soon; and if she does not "Hatch it" before the end of the year we miss our guess.

The Smith Bros. Hardware Co.,
J. H. Smith.

THE ST. PAUL TRADE.

Terribly cold and disagreeable weather was the rule during all of March, but in spite of that, our sales were very satisfactory. With the advent of Spring and nice weather, business is picking up so that the volume of trade is exceedingly gratifying. The advances in prices made in Nails, Wire, Bolts, etc., has resulted in a feeling that prices are not going to pieces, for which we, as well as the retailer, are duly thankful. Before we can expect a large trade, we must get nearer to the crop, which is not, as yet, planted. Our crop of last Fall was not as good as usual, some sections being either drowned out by too much water or dried up by lack of it. Then, the Winter weather has been so severe that cattle were killed to a more or less extent, both in North Dakota and Montana—still we know that generally the farmer is prospering.

When thinking along the line of what is in store for us, and for our section, during the next three months, we feel that the promise is a fair amount of business and at reasonable prices. We are glad of a firm market. Our trade, too, are satisfied with it. Business is opening up rather late, but at last it looks as though Spring was arriving. On prices we have nothing new. Everything will, without doubt, continue on the present basis until next Fall.

Hackett, Walther, Gates Hardware Co.

THE GRAPHITE INDUSTRY.

The sales for the first quarter of the year show a decrease from those of the same period of 1903. While this decrease is not alarming, it shows the result of the effect of the severity of the Winter, labor agitations and an unrestfulness in business circles. Yet we are comfortably busy, and in a position to fill orders with more promptness than last year. Believing that "In times of peace, 'tis well to prepare for war," we have commenced excavations for a new five-story building, which will be equipped entirely for the brass and rubber department of the pencil works. The mails contain more than the average number of inquiries for prices and descriptive catalogues in all lines, which would indicate that customers are holding off, and that possibly we may yet have to hustle to supply demands. Collections are fairly prompt, some few of the smaller accounts requiring prodding.

Joseph Dixon Crucible Co.

A LITTLE ARTICLE THAT HAS BECOME INDISPENSABLE.

At the end of most of the logs cut in this country are measurement marks made with Dixon's Lumber Pencils. Dixon's were the first pencils made for this special purpose and when they came upon the market many years ago they filled a real want among the lumber people for a good marking pencil. In black alone six varieties are made suitable for green or dry lumber and the preference of the user for a square or hexagonal crayon. Some are paper covered and some are japanned to protect them from wet. These black crayons, like the Dixon pencil leads are all of the finest selected American graphite. Seven bright colors are also made, brown, yellow, terra cotta, red, green, blue and white. The pigments are the very finest obtainable, in most cases imported from the best European color makers, and the colors are particularly vivid and permanent. These crayons are thoroughly waterproof and the marks are unusually brilliant and strong and not easily rubbed off. If there are any who are not familiar with these crayons or who are interested in general purpose or special purpose pencils or crayons, the Joseph Dixon Crucible Co., Jersey City, N. J., will gladly supply full information and send their catalogues and samples.

WHY SOME ARE POOR.

Their ideas are larger than their purses.
They think the world owes them a living.
They do not keep account of their expenditures.
They are easy dupes of schemers and promoters.
They reverse the maxim—"Duty before pleasure."
They have too many and too expensive amusements.
They have risked a competence in trying to get rich quickly
They allow friends to impose upon their good nature and generosity.
They try to do what others expect of them, not what they can afford.
They do not think it worth while to put contracts or agreements in writing.
They prefer to incur debt rather than to do work which they consider beneath them.—Dr. Marsden in *Success*.

STANLEY RULE & LEVEL CO.

NEW BRITAIN, CONN., U. S. A.

Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

FAIR FACTS.

Some Brief Pointers for Visitors Who Will Be Short of Time and Want to See the Best Part.

Opens April 30th, closes Dec. 1st.
Exposition costs $50,000,000.
Special buildings for sculpture.
Mining Gulch—12 acres in extent.
Six acres in roses of many kinds.
Sunken gardens, 750 feet long.
Electricity building, cost $399,940.
Machinery building, 265 feet tall.
Idaho Silver Nugget—weight ten tons.
For athletic events, $150,000.
Quadrennial Olympic games.
Anthropology building, cost $115,000.
Machinery building, cost $496,597.
Manufacturers' building, cost $719,399.
Live stock, 37 acres; $250,000 in prizes.
Art pottery works in operation.
Rainbow gardens, and the Cascades.
Hank Monk's famous stage coach.
Any point reached by Intramural Railway.
Replica of walls of Ancient Manila.
Natural garden of wild flowers.
Festival Hall, dome 200 feet high.
Transportation building, cost $696,000.
Replica of Queen Anne's Orangery.
The Pike, 1 mile: costs over $5,000,000.
Fifty Foreign Countries exhibit.
Old St. Louis—100 years ago.
Inside Inn, capacity 6,000 guests.
U. S. map in growing crops, 5 acres.
Mines building, 9 acres, cost $498,000.
U. S. Government building, cost $450,000.
Replica of Grand Trianon by France.
Thomas Jefferson's home reproduced.
Liberty Bell in Pennsylvania building.
In Transportation building, 4 miles tracks.
Temple of Fraternity, 200 by 300 feet.
Emergency Hospital, perfectly equipped.
Rustic house over old springs.
The Creation, a Pike illusion.
Charlottenburg Castle, Germany's building.
Gondolas and Electric Launches.
Model Farm, exhibited by U. S. Government.
Many historic structures reproduced.
Indian exhibit: covers 40 acres.
Concerts by John Philip Sousa's band.
Grenadier band from London.
Indian Band of 50 pieces.
Mexican Copper Mine reproduced.
Louisiana Purchase monument, 100 feet high.
Daily paper issued from '43ers' camp.
Indian Giants from Patagonia.
Locomotive tests throughout season.
Grounds cover 1240 acres.
Forty-four States participate.
Typical '49 mining camp.
Queen Victoria's Jubilee presents.
"King Cotton" statue 50 feet high.
Louisiana history told in flowers.
Education building, cost $319,999.
Power equal to 40,000 horses.
Turbine engine of 8,000 horse-power.
United States Fisheries building, 133 feet square.
Philippine exhibits, cost $1,000,000.
Horticulture building, cost $228,000.
Liberal Arts building, cost $475,000.
Conservatory, 200 feet square.
Vulcan statue, coal, coke, iron, 50 feet high.
Decorative sculpture, cost $500,000.
Many International Congresses.
Airship tournaments; $200,000 in prizes.
Floral clock, dial 100 feet across.
Melon day, 500,000 melons served free.
The Cabildo, Louisiana's State building.
Varied Industries building, cost $604,000.
Wireless telegraph station in operation.
Art Palaces, cost $1,040,000; 135 galleries.
Roadways, 35 miles; asphalt and gravel.
Model schools for blind and deaf.
Ice plant—300 tons daily.
Andrew Jackson's Hermitage reproduced.
Robert Burns' Old Home reproduced.
Forestry building, cost $171,000.
Three Artificial Cascades, largest ever.
Agricultural building, covers 23 acres.
Working display of U. S. big guns.
Full sized model U. S. War Ship.
Largest organ, 145 stops, 10,000 pipes.
Gen. Grant's log cabin home reproduced.
Jerusalem, many historic spots shown.
Germany vs. America in forestry exhibit.
Galveston Flood, realistic effects.
Lagoons, nearly 2 miles long.
Brazilian Building, cost $150,000.
Model Creamery, in Agricultural Building.
Statue of John Stewart in butter.
Geronimo and Chief Joseph at Fair.
La Garde Republicaine band from Paris.
Mexican National band.
Placer Gold Mine in Mining Gulch.
Tree 800 years old from Carolina.
Southwest Pass Lighthouse in Liberal Arts building.
Pygmies from Darkest Africa.
Giant locomotive at full speed.
Automobile speeding contests.

COLLECTIVE NAMES.

Old English Terms For Groups of Persons and Animals.

In a book on British sports, written in the eighteenth century, Joseph Strutt gives the old English terms for groups of various beasts as follows: "When beasts went together in companies there was said to be a pride of lions, a lepe of leopards, a herd of harts, of bucks and of all sorts of deer; a bevy of roes, a sloth of boars, a sownder of wild swine, a drift of tame swine, a route of wolves, a harras of horses, a rag of colts, a stud of mares, a pace of asses, a baren of mules, a team of oxen, a drove of kine, a flock of sheep, a tribe of goats, a skulk of foxes, a cete of badgers, a richness of martins, a fesynes of ferrets, a huske or a down of hares, a nest of rabbits, a clowder of cats and a kyndall of young cats, a shrewdness of apes and a labor of moles."

Similar terms were applied to gatherings of human beings. Strutt gives them as follows: "A state of princes, a skulk of thieves, an observance of hermits, a lying of pardoners, a subtiltie of sergeants, an untruth of sompners, a multiplying of husbands, a safeguard of porters, a stalk of foresters, a blast of hunters, a draft of butlers, a temperance of cooks, a melody of harpers, a poverty of pipers, a drunkenship of cobblers, a disguising of taylors, a wandering of tinkers, a malpertness of pedlars, a fighting of beggars, a rayful—that is, a netful—of knaves, a blush of boys, a bevy of ladies, a nonpatience of wives, a gagle of women, a gagle of geese."

In the old days the word "leash" was applied to three greyhounds, while two were "a brace." On the other hand, two spaniels or harriers were called "a couple." A number of hounds went under the term of "a mute of hounds," while it was correct to speak of "a kennel of raches, a little of whelps and a cowardice of curs."

THE LARGEST SCREW DRIVER IN THE WORLD.

Undoubtedly the most powerful as well as the largest screw drivers in the world have recently been delivered in the vicinity of New York. The Pennsylvania railroad in planning for its double tube under the North River has decided that it needed them and the engineering department, working with the construction department, has provided them.

The carpenter in using the ordinary screw drivers exerts a power of about 30 pounds. The new screw driver will have a power of 200,000 pounds, equal to that exerted by 6,666 carpenters. They will drive the great piles which must be sunk under the tunnel—they will, in fact, be the piles themselves. Inasmuch as about 1,000,000,000 pounds of metal will be used in the tubes, a faint idea of what the piles will have over them can be formed.

The screw driver piles are cylinders two and one-quarter feet in diameter, made of cast iron one and one-quarter inches thick. They will be located every 15 feet centrally, so that both tubes will be re-enforced. They will be made in length short enough to be handled in the tunnel, the successive lengths being belted on as the pile sinks. The screw driver, or screw point so-called, is at the end of the pile and is so constructed that it will have one turn to 21 inches and a diameter of four and three-fourths feet.

OUR BRITISH LETTER.

(*From our Special Correspondent*).

London, April 12, 1904.

A PLEASING INCIDENT.

In my last letter I referred to the meeting of the I. F. A., at Bournemouth, which was held a few weeks ago. The Central Board of the I. F. A. spent an active time not only in deliberations and fraternal meetings with the local ironmongers' association at Bournemouth, but in happy social functions at Poole, the adjoining ancient borough. Mr. Bacon, J. P., who may almost be called "The Grand Old Man" of associations in this country, is the 631st mayor of Poole this year, and in the generosity of his heart he invited a large gathering of fellow Hardwaremen from different parts of the kingdom including, of course, the Central Board of the I. F. A., to a grand banquet held in the ancient Guildhall. He was supported by Alderman Woodrowe, the 642d mayor of Salisbury (formerly known as Old Sarum, the remains of which consist of the earthworks of the old British hill camp on which Old Sarum was built, which camp itself had been a walled city for a thousand years previously), and other celebrities. A pleasing surprise awaited Walter J. Bacon, for the I. F. A. Board and a few friends had arranged to commemorate the festive occasion by presenting the veteran with a silver tea and coffee service, tray, etc. Such incidents are small in themselves, but they work wonders toward promoting association work. They smooth off rough corners, and cause a broader spirit of charity towards one another, making "life worth living" and promoting good will among brothers in the trade, and especially among those whose business relations sometimes make them competitors.

TRADE PROSPECTS IN GREAT BRITAIN.

The trade in Hardware in Great Britain has not yet received the impetus generally expected in Spring. Indeed, the cold and boisterous weather is not conducive to good business, and does not encourage retail traders to "launch out." As a matter of fact, commercial travellers complain that they experience great difficulty in securing orders, and especially so in opening up new accounts. Manufacturers of cutlery and tools in Sheffield are loud in their complaints of bad trade at home, although they admit they are doing well abroad. The gun trade is good, and consequently there is a demand for steel of the highest qualities. Trade in garden furniture and horticultural appliances is not what it should be at this season, although there are now some enquiries moving, and ironmongers are more inclined to place orders.

The prospects of retailers are of variable character and fluctuate according to the weather and local trade. In Lancashire and the cotton trade districts retail business is bad, orders are few and money is scarce. On the other hand, the reports from some of the English county towns are encouraging, and in many country places, despite the superabundance of rain in the early Spring, agricultural operations are fairly forward, and retail ironmongers are doing well.

Business in Scotland is said to be good, and the wholesale merchants of Glasgow are actively engaged in supplying the wants of their clients—some of the wholesale Hardwaremen covering a wide ground, not only for the sale of building materials and heavy ironmongery, but visiting villages, where they plant large quantities of ironmongery to be again retailed to customers.

WHAT BRITISH IRONMONGERS ARE SELLING.

It may be interesting to American retailers of Hardware to know what British ironmongers are selling at the present time. The recent Easter holidays gave some impetus to the trade in holiday appointments, travelling baskets and shinshu hampers, which cheap and effective receptacles are very popular just now. A considerable quantity of builders' ironmongery is selling and chimney pieces, and kitchen grates, as well as complete hearth suites, are being bought by builders who are finishing off houses and in large towns, flats and residential mansions. During the last few months there has been considerable enquiry for electrical appliances, and ironmongers are now stocking electrical domestic accessories very freely, these include electric irons and cooking utensils, together with electrical heating appliances, also pocket lamps and self-lighters. There is always an extra demand for china and earthenware during the Spring months—though why this should be so it is difficult to say. If the present prospects of a few weeks of fine weather are realized much business will be done in the sale of garden furniture and horticultural appliances, which latter will include watering pots, hose pipes, garden reels, wheelbarrows, etc.; and as the Summer advances British ironmongers will be busy selling tents, outdoor garden furniture and folding chairs. An interesting furniture exhibition is just now being held, and ironmongers who have household furnishing departments will doubtless take the opportunity to lay in stocks of new goods, many of which will be seen during the next few weeks in their shop windows. Many of the beautiful art productions, chromos and reproductions of well-known pictures, such as those sold by Hildesheimer & Co., are handled by ironmongers, who find an increasing sale for such goods in their furniture departments. Portable wood and iron buildings are being used freely in country districts, as well as in towns for temporary use, such buildings are very convenient and are selling well. Furnishing ironmongers, in addition to pushing the sale of trunks, leather bags and other travelling appointments, are making good shows of japanned goods, including baths, lavatory basins and portable washstands. Perambulators and mail carts are seasonable, and there is an active demand for go-carts and carrying chairs of American patterns. Among the sundry novelties which have found their way recently into the stocks of British irnmongers phonographs and talking machines are by no means the least important.

FORTHCOMING EVENTS.

Among the prominent events which British Hardwaremen are now looking forward to, the May conference of the I. F. A. is undoubtedly of paramount importance. A good programme has been prepared, and it is expected that a large gathering of English ironmongers will take place. The conference meets at the Grand Hotel, Birmingham, May 4, 5 and 6. A banquet will be held, at which the Lord Mayor of Birmingham will preside. Business connected with the trade will be considered, and members who attend the conference will have many facilities for visiting the important works of the districts, as well as enjoying many social functions and fraternal gatherings. There are in addition many minor matters and events which ironmongers look forward to with interest. The May meeting of the Iron & Steel Institute will be held on May 5 and 6 at Westminster. The Bessemer Gold Medal has been awarded this year to R. A. Hadfield, of Sheffield, and will be presented on May 5. Mr. Carnegie will preside at the annual dinner, which will be held at the Hotel Cecil, London. I understand there are nearly 150 applicants for election to membership. The eighth annual Furniture Trades Exhibition and Market is now being held at the Royal Agricultural Hall, Islington. It gives promise of great success, and is attended daily by numerous visitors, among whom are many ironmongers—the ironmongery trade in this country is undoubtedly giving more attention than formerly to the sale of household furniture, and British ironmongers are keenly alive to the introduction of new goods, and keeping their stocks up to the mark as to style, finish and decoration.

ADVERTISEMENT REFORM.

I have several times referred to the advance made in British advertising—not only by manufacturers, but by retailers—during recent years. A glance at the pages of British trade journals of today, and afterwards another at some of those published in this country a decade or two ago, reveals in a marked manner what different presentations are now required in order to catch the attention of buyers. Those old-fash-

ioned firms who set out their advertisements in plain type, and run on line after line, describing their goods, or worse still, simply announce that they sell certain articles, are either gradually dropping out of existence or, if their position is assured, may just as well write off the amount spent as so much lost. Retail ironmongers, too, are fast rising to the necessities of the occasion, and are adopting more brilliant schemes of advertising. Catchy and pithy phrases are the order of the day; picture post cards and posters in striking characters of an artistic type, and short but bright presentment of the subject matter, are being introduced. Here and there some more enterprising man breaks through the environment which fences in even these modern types of advertising. Music does not often appeal to the Hardware trade, but occasionally Hardwaremen break forth into song, and set their rhymes to music. One of the most striking examples of this kind of advertising has recently been conceived by the Kitlene Syndicate, Ltd., who sell a wonderful furniture renovator. In several recent issues of well-known Hardware trade journals this enterprising firm fill up half a page with a song set to music, one of the verses of which starts, "The Spring is coming, 'tis goodbye to all snow;" the other half of the page in good bold type, in prose, announces the fact that "So are the smart girls coming to buy Kitlene." This example will serve to show American Hardwaremen that there is still some originality in the old country. Catch phrases are good advertisers when they are properly applied, and driven home in the right way. In such methods of advertising the Hardware manufacturers of the States are adepts, and their ads. in English trade journals are leaders, fully appreciated by the retailers of Hardware in this country.

THE C. O. D. IS SAID TO BE COMING.

During the last few months much discussion has taken place in commercial circles in reference to the Cash on Delivery system which the Postmaster-General has intimated he is prepared to introduce into Great Britain should it appear to be in the interest of the public. Retail traders are generally agreed that as far as small towns and country districts are concerned the introduction of a postal system by which customers in isolated districts may order small consignments of goods from advertising firms and catalogue houses and pay for the goods on delivery will be prejudicial to their interest and materially affect their local sales. Since the Parcel Post was introduced into Great Britain there has been a great increase in the number of small packages sent from large towns by post, and the opportunities afforded by that system have materially increased direct trading, and allowed manufacturers to distribute large quanities of small and light articles by parcel post without employing the medium of retailers. Naturally a system which safeguards customers, and minimises to a large extent fraud will be popular among buyers and lead to a greater number of orders being sent direct to manufacturers and to large advertising firms, and thus rob retail traders of their profits. The opposition has been very strong and deputations from the Grocers' Associations as well as the I. F. A. have waited upon the Postmaster-General and laid their case before him. During the last few weeks other associations have taken the matter up, and the secretary of the National Association of Goldsmiths has recently obtained a letter from the Postmaster-General which establishes once for all the fact that the officials at St. Martins le Grand are strongly inclined to believe that such a system of cash on delivery will be in the interests of the general body of the British public, and largely benefit retail traders. The battle still rages and it will depend largely upon the arguments traders are able to bring forward whether the system will be put in force or not.

OPPORTUNITIES FOR DEALERS.

The Iowa dealer who sold 100 washing machines last year has given the implement dealers of the United States something to think about. A merciful man ought to be merciful to his wife as well as to his beasts, and there is no doubt that any farmer who would bend his aching back over a wash tub for a while would consider it an act of mercy to provide the family with a machine to relieve as much as possible of the drudgery of wash day. But washing machines are not the only neglected articles on which thousands of dealers might make a good profit. One of the leading manufacturers of garden implements was forced into the hands of the mail-order houses because the implement dealers of the country would not give this line of implements the attention that it deserves. A score of "side lines" might be named which are not pushed as they ought to be. It costs very little to handle these side lines, and the profit on them is practically a net addition to the annual showing of gain in the balance sheet. The fact that dealers generally neglect them is all the better for the man who is willing to push them, for it gives the progressive dealer a little corner of the business where he does not have to worry about competition.

We can scarcely realize how times have changed in this country in the past ten years. The dealer who tried to sell some side line eight or ten years ago, and got stuck, can often try it now and coin money on the very same article. Farmers have made more money in the last seven or eight years than ever before in the history of American agriculture. Ten years ago they had to hustle to pay for their plows and other "necessities." To-day, they have money to buy "luxuries" in the way of implements and machinery, and little things to make life easier or make their farms more productive. It was no harder work and no easier ten years ago to pitch hay by hand, but only the most fortunate farmers could afford then to fit up their barns with tracks, forks and carriers. They had to worry along with the old pump, even if it did kick like a mule, and patch up everything else that prayers or repairs would hold together. "Mother" had to worry along with the old hoe and dismiss childish hopes of implements to lighten her toil in the garden, and a new woven-wire fence around the garden or the house was a dream of wild extravagance. But seven years of fat times have enabled millions of farmers to enjoy the economy and profit as well as the comfort of many of these things, and the dealer who keeps his eyes open can make a nice addition to his bank account by selling things that were practically dead stock a few years ago. Times have changed and the implement dealer must change and broaden out with them, if he would make the most of his opportunities.—*Implement Age.*

Do you handle OHIO WATER TIGHT STEEL HODS?

We have created a demand for these goods that must be supplied, and you should be getting your share of this trade.

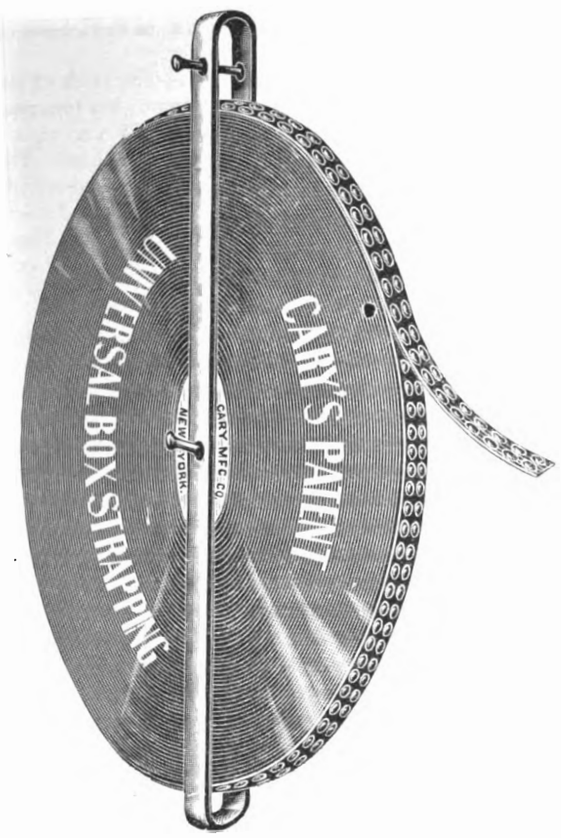
They are absolutely WATER TIGHT, the back end being folded like the corner of a dripping pan. No slitting or piecing.

They are light, yet strong and durable. We use a good iron paint, drab in color, which makes them very attractive and if placed where masons can see them, will sell themselves.

The adjustable malleable iron fork and socket, admits of the replacing of a broken handle or taking up shrinkage in a few moments.

Made exactly as represented in cut.

Write to-day for prices. Orders filled promptly.



The GEAUGA MANUFACTURING CO.

Painesville, Ohio.

Notice to the Trade:

¶ Judge Ray of the United States Circuit Court has just rendered a decision, on final hearing, confirming previous decision of Judge Thomas, and concurring with that of Judge Lacombe, declaring that the BOX STRAP REELS, similar to cut illustrated herewith (made by the De Haven Mfg. Co. and other parties), are an infringement of our PATENT, and that Patterson Bros., prominent hardware dealers of New York City, are liable for all profits and damages arising from their selling such goods, and are also liable for costs of said proceedings.

The Court has also declared that all claims of our Patent are valid.

Respectfully,

CARY MFG. CO.,

S. C. CARY, Prest.

P. S.—The above suit was brought as a test case to establish the fact, beyond controversy, that DEALERS and USERS are liable for handling infringing goods as well as the manufacturer.

Our goods are superior in quality, and prices are reasonable. We guarantee full weight and measure.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bangor, Me.—Messrs. McCurdy and Goehegan have opened a new Hardware store.

Boise City, Idaho.—J. K. Loree and his son, Findlay N., will open a Hardware store in the Wood Building about the first of May under the firm name of Loree & Son.

Croghan, N. Y.—Frank M. Zehr has opened a new Hardware store in the Gerner Block.

Dunkirk, N. Y.—S. R .Cole has opened a Hardware store at 39 East Third Street. He also conducts a bicycle repair shop in the rear of the store.

Elmira, N. Y.—The Ferguson-Carr Hardware Co. has been incorporated. Capital stock, $8,000. The stockholders and directors of the company are: William H. Ferguson, Collison E. Ferguson and Farlin B. Carr. They will immediately open a store on West Water Street.

Medina, N. Y.—A new firm composed of John Chase and Carl H. Breed has opened a Hardware store in the Rice Building on Main Street.

New York, N. Y.—J. C. McCarty & Co. (Hardware) has been incorporated; capital, $50,000. Directors: J. C. McCarty, G. B. McCarty, and E. W. McCarty, Brooklyn.

Oakland, Cal.—The Robert Dalziel Company has been incorporated for the purpose of carrying on a general plumbing and Hardware business. The directors are: Robert Dalziel, Jr., Alexander Dalziel and Everett J. Brown, of Oakland, and John Hodge and William Chalmers, of San Francisco. The capital stock is $5,000. The new company is to handle the business at present conducted by Dalziel & Moller, in Oakland, while Mr. Moller will assume charge of the San Francisco wholesale store which is managed under the firm name of the Dalziel, Moller Company.

Passaic, N. J.—The Forsythe Hardware Co. has been incorporated with a capital stock of $7,000 to conduct a general Hardware business.

Philadelphia, Pa.—The Messinger Hardware Company has been incorporated. Capital stock, $10,000.

Scammon, Kan.—Mackie Anderson Hardware & Furniture Company has been incorporated. Capital stock, $6,000.

Trenton, Ill.—The Leonard, Brefeld & Sauter Hardware Co. is a new concern, capitalized at $10,000.

Wilkesbarre, Pa.—Elmer Williams has opened a Hardware and tin shop on Jackson Avenue.

Changes.

Allentown, Pa.—The Hardware department of the Martin Graver store, at Catasauqua, has been transferred to F. Hersh & Sons, and placed in charge of Harry H. Aubrey.

Ann Arbor, Mich.—J. W. Gale & Son, of Detroit, have purchased the Hardware stock of the late H. T. LeFurge.

Anniston, Ala.—L. T. Smith and son, Ray Smith, have purchased of E. E. Cheatham the business of the Dixie Hardware Company and will conduct it in the future.

Clinton, Mass.—The Hardware and lumber business formerly conducted by W. A. Fuller & Co. is to be divided. The Hardware end will hereafter be run under the name of the Gavin Hardware Co. the company to include W. A. Fuller, of this town, and W. T. Gavin, of Leominster.

Fort Worth, Texas.—J. B. Burnside has just purchased the business on Houston Street from the William Henry & R. E. Bell Hardware Company, and will conduct the same under the name of J. B. Burnside. He is still interested in the William Henry & R. E. Bell Hardware Company on Main Street, and the business relations between the two houses will be conducted on a basis that will be entirely mutual. The business on Main Street will be under the management of R. E. Bell, who has been actively associated with the firm since the consolidation of William Henry & Co. and the R. E. Bell Hardware Co. in September, 1902.

Hartford, Conn.—Leon M. Case has secured an interest in the Hardware business of Stedman & Co.

Jackson Center, Pa.—Joseph S. Laughlin has bought the Hardware, tin and stove store formerly owned by Willis B. Taylor.

Knoxville, Tenn.—R. Z. Roberts has purchased the stock of Hardware owned by Adams Bros. & Co., which firm has been located for several years in the Braine property on Depot Avenue. The stock of Hardware has been removed to Asylum Avenue.

Little Valley, N. Y.—A. J. Pratt, a former resident of this place, has purchased the Hardware store owned by E. E. Parsons and will take possession about May 1st.

Mansfield, Ohio.—John Drake, a prominent citizen of Zanesville, O., has purchased the W. F. White stock of Hardware.

Oakland, Me.—The firm formerly known as "Marshall Brothers," dealers in heavy and light Hardware, has been dissolved by mutual consent and will be known hereafter as D. M. Marshall & Co.

Oshkosh, Wis.—Uttormark Brothers have sold their Hardware business to Mr. Frederick, of Almond.

Oxford, N. Y.—The Oxford Hardware Co., composed of Messrs. Hopkins, Boname and Meade, has dissolved. Messrs. Meade and Hopkins retired, their interests being purchased by Mr. Boname and George R. Stratton, who are continuing the business under the same name, the Oxford Hardware Co.

Roscoe, N. Y.—David T. Curry has become a partner in the Hardware business of Charles Breiner.

Sandyhill, N. Y.—S. V. & J. C. Morton, of Middlebury, Vt., have purchased the stock and good will of S. E. Scott in the Hardware business.

Spencerport, N. Y.—The stock of the Brown Hardware Company has been purchased by B. C. Mathes & Co., of Albion, furniture dealers, for $1,660. The local company will continue the business.

Troy, Ohio.—I. N. Woodcox, formerly of Dayton, who purchased the Hardware store of D. R. Burr & Co., of Piqua, has formed a partnership with W. B. Taylor, of Jackson Center.

Walla Walla, Wash.—The Drumheller Hardware Co. has purchased the business of the J. L. Elam Hardware & Agricultural Implement Co.

Waterloo, Ill.—John B. Schmidt succeeds J. L. Jobusch in the Hardware and tin business.

Changes.

Binghamton, N. Y.—C. A. Brown has entered the firm of James H. Carver & Son, which hereafter will be styled "J. H. Carver, Son & Co." The firm has just removed to the building at 122-124 Washington Street, where they will occupy the double store and three floors above. The new store is being stocked with an extensive line of furniture, stoves and housefurnishings, and when the work is completed the firm will have a handsome and attractive store.

Birmingham, Ala.—The Birmingham Stove and Hardware Company is erecting a warehouse on Second Avenue between Sixteenth and Seventeenth Streets whose floor space will make it one of the largest in the State. The building will be of brick, one story, and will occupy a lot 100 by 140 feet. There will be 22,000 square feet of floor space, with 27,000 square feet of shelf space. The warehouse occupies the site of the old building which was recently burned. It will be equipped and ready for occuyancy by April 15.

Caledonia, N. Y.—R. V. Greenough has purchased Robert J. Fraser's interests in the Sedgwick Hardware Company.

Stafford Springs, Mass.—Chapman & Brown have sold their stock of Hardware to Harvey Chapman & Co., who will dispose of the stock by a special sale during April.

Wilmington, Del.—D. C. Wood has purchased the stock of Hardware owned by the late W. J. Slack, and is now in charge of the business.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Brooklyn, N. Y.—P. R. Almond Manufacturing Company has been incorporated (tools and machinery). Capital, $65,000, and directors: T. R. Almond, of Brooklyn, and J. L. Suydam and O. V. Schrenck, of New York city.

Butte, Mont.—Henderson Brothers Co. has been incorporated. The company will engage in the general Hardware and manufacturing business with a capital stock of $25,000.

Chicago, Ill.—National Tool Company has been incorporated; capital, $10,000; manufacturing tools and machinery; incorporators: Clarence A. Moore, R. A. Allen, A. E. Park.

Chicago, Ill.—The Jarvie Shop has been incorporated; $5,000; manufacture and deal in interior Hardware and decorations and publishing; Robert R. Jarvie, L. M. Souders and George Ingersoll, incorporators.

Chicago, Ill.—Western Co-operative Supply Company has been incorporated; capital, $2,500; manufacturing Hardware implements and specialties; incorporators: William D. Fay, Simon Steiner, Thomas M. Herringshaw.

Jamestown, N. Y.—William Hjorth & Co. have purchased the plant of the Empire Plating Works, and will manufacture wrenches, pliers, etc., while their new factory is in course of construction. The new factory is to be a brick structure, 45x110 feet, two stories in height, located on Crescent Street. It will be devoted to the manufacture of wrenches and other Hardware specialties, and the machinery will be of modern pattern. Building operations will be commenced this Spring.

Langston, Okla.—The Perfection Wire, Tool & Novelty Company has been incorporated. Capital stock, $5,000. Incorporators: Charles Stoolfire, W. J. Jackson and A. J. Alston.

Nashville, Tenn.—The Nashville Screen and Swing Mfg. Co. is a new establishment for manufacturing screen doors, window screens and lawn swings in wholesale quantities. A sawmill will be a part of the enterprise. They have erected three buildings on the corner of First and Oldham Streets. Two of the buildings are one-story frames, and the third is a very much larger two-story building. Operations will commence at once. L. O. Tibbs is the principal owner of the enterprise. He has associated with him D. R. Hunnicutt, A. P. McMurtree and P. W. Tibbs. A sawmill will be operated in connection with the Nashville establishment.

New York, N. Y.—Alford Window Lift and Safety Lock Company has been incorporated; capital, $100,000; directors: C. J. Basil, J. W. G. Alford and G. W. Beckel, of New York.

New York, N. Y.—The Headson Tool and Manufacturing Company has been incorporated in Indiana. Herman Pottlitzer, of Lafayette, is the Indiana agent. Capital stock, $50,000.

Seattle, Wash.—The Rainier Mfg. Co. is a new concern organized to manufacture screens.

St. Louis, Mo.—The Colonial Scale Co. has been incorporated. Capital stock, $25,000. Incorporators: Robert M. Mays, Frank L. Roop and T. W. Fryhofer.

St. Louis, Mo.—The St. Louis Mfg. & Model Perfecting Co. is a new concern, capitalized at $50,000, for the manufacture of Hardware specialties and novelties.

Syracuse, N. Y.—Amenoco Novelty Co. has been incorporated. Objects, manufacture Hardware specialties; capital, $20,000. Incorporators: T. W. Dixson, E. C. Britcher, Syracuse; H. D. Coville, Central Bridge.

Toledo, Ohio.—The Toledo Handle Company has been incorporated. Capital stock, $25,000. Incorporators: W. R. Bennis, I. L. McAfee, H. J. Leary, W. W. Campbell, A. T. Christmann and B. F. Wagoner.

Changes.

Anderson, Ind.—The Neely Knife and Saw Works will move from Greenfield, Ohio, to this city.

Detroit, Mich.—The Detroit Screw Co., which absorbed the Pearson Manufacturing Co., of Chicago, about four months ago, has decided to move its recently acquired property to Detroit and make this city the headquarters. W. B. Pearson is the president of the company.

Hamilton, Ont.—The Frost Wire Fence Company will move from Welland to Hamilton.

New Haven, Conn.—The W. & E. T. Fitch Co. has purchased the factory and property at 155-163 East Street, which has a frontage of 80 feet on East Street and a depth of 190 feet.

Pittsburgh, Pa.—The rebuilding of the nail mill at the Rankin plant of the American Steel and Wire Company, which was destroyed by fire recently, has been started and will be rushed to completion. The men rendered idle by the fire have been given employment at the company's mills at Donora and other places until the Rankin mill is completed.

Pt. Clinton, Ohio.—The United States Hardware Company will erect a new plant here. The buildings will cover eight acres of ground.

Ravenna, Ohio.—A. C. Williams has purchased the Hardware specialty manufacturing business of the Sheehan Mfg. Co., Salem, Ohio, including all machinery, patterns, patents and good will, and is dismantling the factory at Salem and moving the business to Ravenna.

Rochester, N. Y.—The Rochester Non-Rust Tinware Company has increased its capital stock from $25,000 to $100,000.

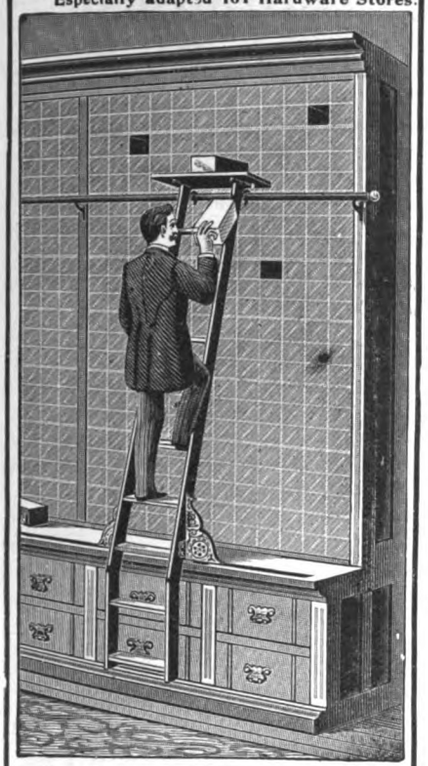
West Winsted, Conn.—Plans have been drawn for an additional story to the main factory building of the Empire Knife Company. The structure will be of brick, 18 by 120 feet, and will be used as a cutlers' room.

Miscellaneous.

Detroit, Mich.—On March 26th the Simonetta File Co. gave an informal reception to the stockholders and friends at its factory, 192-196 High Street West. An opportunity was given to inspect the plant and meet Vincenzo Simonetta, head of the file manufacturing industry of Italy, who made a special trip from Turin to be present at the starting of the factory.

Shelton, Conn.—The factory of the Derby Silver Plate and Cutlery Company was almost totally destroyed on March 31st by a fire of unknown origin. The loss was $60,000; the total valuation of the property being $70,000. The plant will be rebuilt.

Terryville, Conn.—At a meeting of the shareholders of the Eagle Lock Company, held on March 31st, A. E. Hart, of Hartford, was elected a director to fill the vacancy caused by the death of M. C. Ogden.



Troy, N. Y.—The Troy File Company, on April 1st, elected Joseph A. Leggett, A. D. Banker, and Henry White directors. The officers chosen were: President and secretary, A. D. Banker; vice-president, Henry White; treasurer, Joseph A. Leggett.

Four Leaf Clover--Symbol of Good Luck

The Hardware Dealer who handles our famous

4-LEAF CLOVER CREAM SEPARATOR

will be "in clover" because he will find that it is destined to be one of the greatest sellers ever offered, and on every one he sells he will MAKE A LEGITIMATE PROFIT.

In the 4-Leaf Clover Separator the water cannot get into the milk. The milk is surrounded by cold water in such a manner as to cool it almost instantly owing to the large water space UNDER as well as AROUND the milk. By simply unscrewing the faucet the inner can is quickly and easily removed. No tainting of the milk by rubber gaskets; in winter no water required as the cold air circulating through the water space accomplishes the result. There is a cold air chamber with ventilator over the entire can. There is an improved milk faucet—instantly locked. Made of very best material all through, thoroughly tested and nicely decorated. And our discount—that's interesting. Send for our catalogue—TO-DAY. The 4-Leaf is well advertised in farm papers.

PLYMOUTH MANUFACTURING CO.

(Dept. 4)

PLYMOUTH, OHIO

Digitized by Google

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boston, Mass.—The American Smokeless Powder Company has been incorporated. Capital stock, $100,000. Incorporators: Murray Ballow, Edward B. Drake and M. Howell Garfield.

Boston, Mass.—Hercules Tire Company has been incorporated; capital, $100,000; president, Charles F. Palmer; treasurer, Sarah A. Barry.

Brewer, Me.—The Brewer Bicycle Co. has opened their store at 65 North Main Street. A Beaupre, the manager, intends to carry a fine line of bicycles and do all kinds of repairing in the best possible manner.

Bridgeport, Conn.—A new organization, the Bridgeport Athletic Mfg. Company, has just been formed for the manufacture of the line of golf and tennis goods until recently made by the Bridgeport Gun Implement Company, besides a general line of athletic and sporting goods. Victor M. Delano is president of the new company, and Henry C. Jenkins, brother of George W. Jenkins of the B. G. I. Company, is secretary and treasurer. The company has offices at 311 Broadway, New York city. The Bridgeport Athletic Mfg. Company has an authorized capital of half a million of dollars. Contrary to expectations, the company will not locate in Bridgeport. Recently the company purchased from the Bridgeport Gun Implement Company, its machinery, stock and good will of the golf and tennis goods department. The B. G. I. Company, because of a press of business in its legitimate line, abandoned the manufacture of athletic goods entirely. However, the trade mark B. G. I. will be used by the new company because of the reputation which that line of goods has secured from devotees of golf and tennis.

Chillicothe, Ohio.—Will Shaffer has opened a bicycle repair shop at the corner of Court and Water Streets.

Hopkinton, Mass.—Andrew Fyrberg Arms Co. has been incorporated. Firearms; capital, $125,000. Promoters: Andrew Fyrberg, Richard W. Sears, Albert H. Loeb, N. J. A. Fyrberg, F. A. Stephani.

Kingston, N. Y.—James Austin has opened a bicycle repair shop on Broadway, near the corner of Downs Street.

Lansing, Mich.—Frank Sedley has opened a new bicycle store on Turner Street.

Newport, R. I.—Newport is to have a gun industry, that of the Whitney Safety Firearms Company, which is taking possession of part of the old Aquidneck mill. The line of firearms to be manufactured consists of shotguns, rifles and revolvers. The company was incorporated in Providence, Feb. 3, 1904. All the officers and directors are business and professional men of Newport. Dr. Rufus E. Darrah, president of the Board of Health, is president of the new Whitney corporation; Sigmund Weiss is vice-president; Norman Whitney, a son of the inventor, is treasurer, and Allan Woodruff, who has been advertising and selling firearms for the past 10 or 12 years and who has been connected with the Whitney inventions for the past four years, is secretary. The directors, other than the officers, are: Joseph Haire, Clarence A. Hammett and Henry B. Whitney, another son of the inventor, who worked with his father for several years and who is superintendent of the new company.

New York, N. Y.—The Fisk Rubber Co. has opened a downtown branch in New York City at 158 Chambers Street, where a full stock of tires will be kept on hand. The headquarters of E. A. Hoffman, the local manager for the company, is at 51 West Sixty-third Street.

New York, N. Y.—The Pennsylvania Rubber Co. has been incorporated with $5,000 capital. F. A. Wilcox, Jeannette, Pa.; Jesse Froehlich, New York, and F. P. Hayes, Brooklyn, are the directors.

Peekville, Pa.—B. E. Fagan has opened up a bicycle repair shop on Main Street.

Providence, R. I.—The Suddard Motor Cycle Company has been incorporated. Capital stock, $50,000. The incorporators are: William A. Suddard, Wm. W. Nichols, and Dexter B. Potter, of Providence, and John E. Thomson, of Central Falls. They are to engage in the business of manufacturing and selling motor bicycles and motors for automobiles and yachts and power for stationary use.

Sandwich, Mass.—Benj. A. Cook has opened a repair shop in the Donovan Block.

Sharon, Conn.—Wm. J. Hotaling has opened a new bicycle store.

Swanton, Vt.—The manufacture of powder has been begun at the new plant by the Robinhood Powder Co.

Turners Falls, Mass.—George A. Gove has opened a bicycle shop in the Rist Building.

Changes.

Charleston, S. C.—Palmetto Novelty Co., bicycle and automobile dealers, at 194 King Street, have been succeeded by Bissonette Bros., who have moved the business to 317 King Street.

Des Moines, Iowa.—W. E. Tapley has sold his interest in the Tapley-Anthony Bicycle Company, 630 East Grand Avenue, to E. P. Anthony.

Falmouth, Mass.—Crocker Cycle Company will reopen store.

Fargo, N. D.—The Fargo Hardware Co. have again increased. They are better prepared than ever to do all kinds of bicycle and automobile repairing.

Goshen, Ind.—The Goshen Rubber Works has increased its capital stock from $100,000 to $200,000.

Grand Rapids, Mich.—The R. O. Brown business has been purchased by the Michigan Automobile Co. R. O. Brown will manage the department for the new owners.

Hartford, Conn.—Charles L. Way, for several years with the Way Hardware Company, has left that company and will be associated with George M. Brown, of this city, in an automobile agency located in Boston.

Lima, Ohio.—F. W. Mullenhour has taken O. L. DeWeese into partnership and the business will hereafter be known as Mullenhour & DeWeese.

Nazareth, Pa.—William Friebely has sold his bicycle business to Lewis Wunderly, of Easton, who has already taken possession.

New Haven, Conn.—The American Cartridge Co., of Hartford, has sold its machinery to the Marlin Fire Arms Co., of this city. The Marlin Co., by acquiring the Hartford Company, will soon be in a position to begin the manufacture of cartridges. The amount of machinery, which is a specially patented design, is quite large. All of it will be moved to this city, and its removal here means the adding of another industry to this city. The Marlin Company has been making rifles and has not been in the cartridge manufacturing business.

New York, N. Y.—Wm. Wooster, who has been in the jobbing business uptown for the past eight years, has moved to 10 Barclay Street, near Broadway, where he will carry a large stock of bicycles and automobile supplies.

Oklahoma City, Okla.—The Oklahoma Cycle Co. will remove to 222 West Main Street.

Salem, Mass.—John J. Kelleher has reopened a store at 201 Washington Street.

Salem, Mass.—R. H. Robson has rented a store under Mechanic hall and has opened it as a salesroom for his regular bicycle business, which he has conducted for years on Boston Street.

South River, N. J.—William Roth has moved his bicycles and tools from his former place of business on Ferry Street, to his new building on Main Street, where the business will be continued under the name of Roth & Farr.

Syracuse, N. Y.—The H. H. Franklin Mfg. Co. has increased its capital stock from $250,000 to $300,000.

Tiverton, R. I.—Benjamin Davenport has opened his bicycle store at Stone Bridge for the season.

Washington, D. C.—The Central Automobile Co. has removed its garage from Summer Court to 1126 Connecticut Avenue.

Watertown, Wis.—Crossby Bros. have been succeeded by the Watertown Cycle & Auto. Co.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

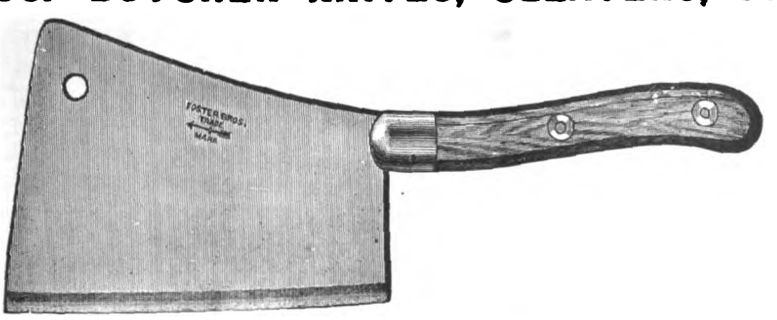
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

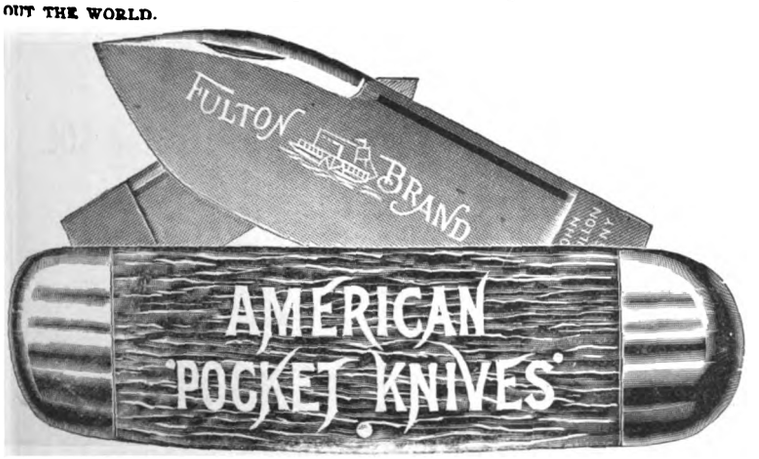


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

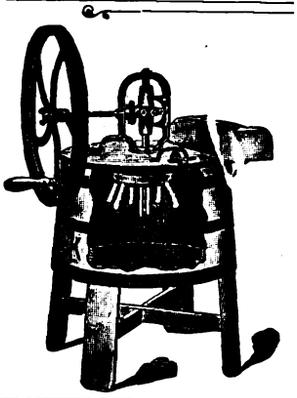
MILLER'S WAGON JACK.

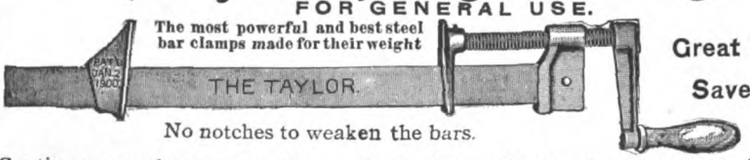


Simple Practical and Efficient.

If not handled by your Jobber we will supply your order. Manufactured by

J. V. HANKINSON, FRANKLIN, O.
Successor to Thos. F. Miller, Jr.

WHY IS THE O. K. THE BEST ROTARY WASHING MACHINE?



—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing the friction and thus making machine so light running and almost noiseless.
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without rubbing them to pieces.
4.—This washer is made by **experienced mechanics**, and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, **no escape of steam.**

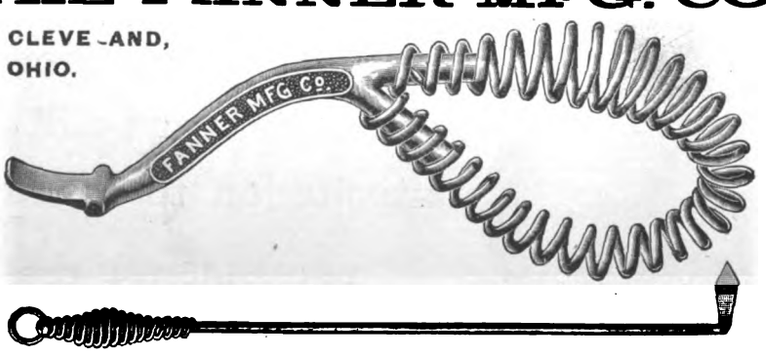
Manufactured by H. F. BRAMMER MFG. CO.,
DAVENPORT, IOWA.

The Taylor Quick Adjusting Self Locking Clamp

FOR GENERAL USE.

The most powerful and best steel bar clamps made for their weight

Great Time Savers.



No notches to weaken the bars.

Continuous use by concerns who need superior quality, have proven these clamps to withstand the most severe tests and have been given preference over all others.

"White Lily Washers wash lily white."

PERFECTION

in the manufacture of Washing Machines is best attained by long experience—we have been at it for 27 years—the use of the best materials, and the employment of skilled workmen.

The Blackstone Rotary Washer

enjoys that distinction. The best is none too good for the Blackstone Rotary. That's why it's name is a synonym for quality among Hardware men.

It gives double pleasure: It sells and stays sold. It lives up to its reputation on wash-day. The Blackstone Rotary does it's work perfectly. Write us for catalogue and prices. Mention HARDWARE.

The Blackstone Mfg. Co., Jamestown, N. Y., U. S. A.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent*; enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

HARDWARE

William T. Wood & Co., Arlington, Mass., the well known prominent manufacturers of Ice Tools of every description have recently added an important line of work to those already in existence; that of the manufacture and installation of Ice Elevators and Conveyors. As conditions vary considerably in regard to the erection of these Elevators, they desire it understood they are in a position, with a necessarily skilled staff, to design and build them, superintending the construction of them to a finish.

The Joseph Dixon Crucible Company, Jersey City, N. J., held their annual meeting April 18. These directors were elected: E. F. C. Young, John A. Walker, George T. Smith, Edward L. Young, William Murray, Joseph D. Bedle, and George E. Long. The directors subsequently elected Edward F. C. Young, president; John A. Walker, vice-president and treasurer, and George E. Long, secretary. Joseph D. Bedle was re-elected counsel.

The Chantrell Tool Company, of Reading, Pa., is represented in New York by F. E. Hutchins, who has just changed his local address by moving to 103 Reade Street, being next door to his old location. The business already established by him has needed additional facilities for some time, so that the store floor, basement and cellar will be occupied greatly to the advantage of Mr. Hutchins, who will also represent the Richards Manufacturing Company, of Aurora, Ill., whose large line of Door Hangers will be carried in full stock.

James E. Patton, Jr., was recently elected president of the Patton Paint Company, Milwaukee, Wis., succeeding his father, the late James E. Patton, Sr., who died in February last. The new president was formerly vice-president of the company, but for the last three years has been located at Pittsburgh as an officer of the Pittsburgh Plate Glass Company.

U. J. Ulery, the New York representative of the Clauss Shear Company; the Atlas Shear Company; Naponoch Knife Company; Clyde Cutlery Company; Deerlick Oil Stone Co., and the International Cutlery Company has removed his domestic and export offices from his former location to more commodious rooms in the Rogers-Peet Building, 7 and 9 Warren Street, New York, where his increasing business could command facilities for prompt attention, which he has long desired.

M. F. Cunningham, who for fifteen years has been identified with the Waltham Emery Wheel Company, has severed his connection with that company in order to assume the management of the Superior Corundum Wheel Company, of Waltham, Mass., and is now engaged in making emery and corundum wheels for all purposes.

A USEFUL WANT BOOK.

Schrieber, Conchar & Westphal, Dubuque, Iowa, have recently distributed to their trade a Want Book possessing interesting features of a unique character. Not only is it convenient for the registering of the daily wants of a Hardware dealer as they occur, but is illustrated throughout on the opposite page with many of the new special patented articles constantly being added to a jobber's stock. It also contains a revised table of freight rates from Dubuque and Chicago, also both the Western and Iowa freight classifications. Included with the freight classifications, are the average weights of goods usually shipped in original packages. The table will undoubtedly be found of value in making comparisons of cost on goods delivered at customer's station. As the book has been prepared with a view to making mail orders more frequent in order to facilitate the shipment of goods promptly, it will be welcomed by those in the trade who are fortunate enough to receive a copy.

ON THE "PREVENTION OF STRIKES."

Amos Judson Bailey, of Meriden, N. H., who is the author of that prize plan of the American Humane Education Society on the "Prevention of Strikes," from his thorough knowledge of the Labor Problem, has also prepared a lecture which puts the industrial problem on the constructive side. He would like to have an opportunity to deliver it before interested audiences who desire to hear such a discussion, and solicits correspondence on the subject. Sample copies of his pamphlet on the "Prevention of Strikes" may be obtained on request. It is an able document.

BIRD'S-EYE VIEW OF THE GREATEST WORLD'S FAIR.

A magnificent bird's-eye view of the Louisiana Purchase Exposition, or World's Fair at St. Louis, has just been published. As this is the greatest and grandest exposition ever held, the subject is one of fascinating interest, and the picture brings out in wonderful detail all State and foreign buildings, all the great exhibit palaces and amusement structures. The eye sweeps from the southeast corner of the vast grounds (a distance of two and three-quarter miles) to the western limits. By means of it, the intending visitor may become familiar with the arrangement of the grounds and buildings before he starts from home, and prepare to save much time and secure for himself far greater enjoyment. This splendid picture is 25x34 inches, and makes a beautiful ornament for home or office display. The picture on heavy paper is mailed for 30 cents (in 2c. stamps or coin), by the publisher, Robert A. Reid, 411 Olive Street, St. Louis, Mo.

PACIFIC COAST HARDWARE AND METAL ASSOCIATION.

The annual meeting of the Pacific Coast Hardware and Metal Association have been fixed for the dates of July 6th, 7th and 8th to take place at Santa Barbara, where the meeting was held last year. The headquarters will be at the Hotel Potter. The Association had such an enjoyable gathering at that place last year they are in hopes of having a large attendance of members from up and down the Coast, in which case interesting discussions will follow of topics of mutual interest to the entire Hardware and Metal jobbing trade of the Pacific Coast.

A NEW DEPARTURE.

Farwell, Ozmun, Kirk & Co., St. Paul, Minn., have adopted a remarkably clever scheme for the use of their customers, which we should think would become exceedingly popular. For years past they have had many requests from customers for a "Cost Price List" applying to their general Hardware catalogue. Owing to the frequent changes in market values it would be impossible to issue such a list that would hold good for any length of time. With an earnest desire on their part to give customers something of a permanent value they have compiled "The Retail Dealer's Price List," covering the line of goods listed in their 1904 general Hardware catalogue. This is not a list of approximate values or any other make-shift expedient that would vary with each "change of the moon," but a reliable, dependable retail selling list. It will show what the dealer should get for the goods, not what he pays for them; and will aid him in making sales of articles not usually carried in stock. In ordering goods it will be of material assistance, as often the merchant desires a certain article that he can retail at a stated price, and this information is given on each and every item in the catalogue, with the exception of a few staples. To the merchant just starting in business it will be of the greatest help, as it will enable him to mark up his stock and gives him information which otherwise he could only acquire after years of experience. Another point: In making sales, this list can be shown to a customer—a thing that would not be practicable with any of the so-called cost price lists. The retail dealer's price list is now in the hands of the printer, and will be ready for distribution about May 14th. A copy will be mailed on request as soon as possible thereafter and will, we feel sure, be found of material benefit.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

The season continues to exhibit a backwardness in regard to geniality of temperature that causes considerable comment in business circles. The trend of trade in the customary channels is fully active in the way of general supplies, such as every well assorted stock should have in proper proportions; but the eager seeking for an enlarged addition to ordinary requirements is in a way to be postponed to the immediate future, when the season assumes its wonted activity. This has seemingly prevailed over a large extent of territory, and the complaint is heard that the demand is not a nipping and an eager one on any special department of commercial activity. It is a disadvantage to have this feeling prevail to any extent, as many of these postponed purchases will find a lessened desire permeate the buyers intentions, unless some unusual movement will inspire changed conditions.

It is perfectly natural that the retailers wants for an active distribution, should find a closer calculation confront the buyer with each week that passes; and the smaller local market is watched for carefully noted changes in its possible demand.

May is opening in a style and manner not so apathetic as to immediate results. The stocks with which the retail houses are now provided, are not of that satisfactory fullness that generally checks a natural demand, so that the regular seasonable requisitions must be called for and corresponding preparations made to stimulate it. The only apprehension that is felt is that the customary trade will be concentrated in a period so short, that supplementary orders will not as usual enable the supply to reach its full fruition as to results; as competition for immediate wants must be counted when buyers go on the hunt. Fortunately the jobbers have had time to prepare their stocks to enable prompt shipments to become more of a feature than might have been the case two or three weeks ago.

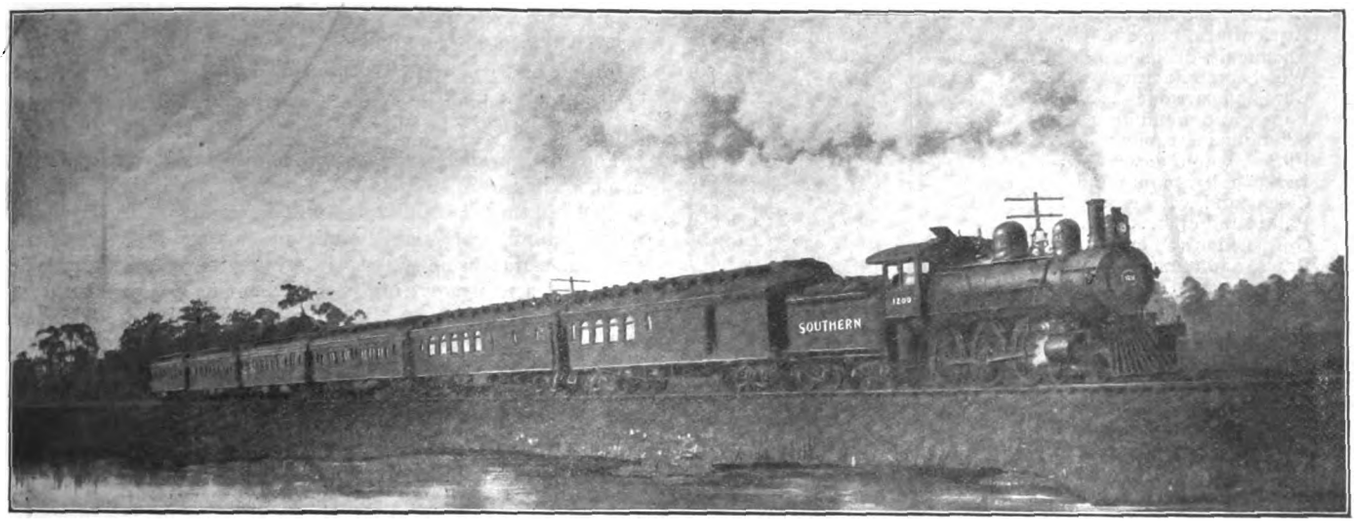
Trade is generally reported as being fairly active, and by no means apathetic, but the conditions are of April rather than of May. In the West where water transportation is frequently relied upon for movements of stock, the bulk of which is of large proportions, the great Lakes have to be relied upon, many orders being grounded on conditions of that character. Navigation is about resuming between Duluth and Cleveland, and that fact will make a livelier atmosphere surround the large Western distributors.

There are lines of goods that are scarce from causes not dominated by atmospherical delays or similar considerations; among such goods may be counted those requiring wood handles of good quality, which have been so difficult to obtain for agricultural implements, shovels and spades, etc., hay and manure fork and rake handles, that the dealer who has already secured the stocks for which these scarce goods are indispensable may consider he has cause for gratification.

The backward character of the season has developed a disposition on the part of some dealers, who desire to hold "both ends of the stick" in every contract to which they are a party. This is referred to in our Columbus letter in the "Review of the Markets" as follows: "We find some Merchants are not considerate for jobbers or manufacturers when conditions change. They are always ready to place orders for season goods but do not hesitate to cancel all or part of their order. This is proving true on Binder Twine. Jobbers do not decline to reduce an order to their customers' requirements, but it is unfair for any dealer to cancel his entire order, as the jobber cannot do so with the manufacturers. If a jobber contracts for a stipulated quantity he cannot arbitrarily cancel or reduce his contract, but there are some dealers who seem to think they are under no business obligation whatever; if it suits them to take the goods, they take them, but if they see some other make they fancy they want, all that is necessary is to write and say—'cancel my order'—and the jobber must hold the bag." It is unnecessary to say, if this code of commercial morality governed every transaction, business prosperity would prove difficult to determine, and honest intentions prove an uncertain quantity.

THE TRIP TO ATLANTA.

Secretary Carter, of the Southern Jobbers' Association, writes that judging from the reports received up to date, there will be over one thousand members and guests in attendance at the coming Atlanta convention, and considering the many attractive features in the programme and the brand for hospitality for which Atlanta is noted, it would seem that Mr. Carter's estimate could hardly be very far from the correct figure.



Reservations for HARDWARE'S Special Party are coming in at a good rate, at the present date one car has been very nearly filled in Philadelphia and more than one car has been reserved in New York, besides reservations in Baltimore and Washington, at the latter place the party will be joined by the delegation from the Pittsburgh district.

Present indications would seem to indicate that a special train will be necessary, as several of those who regularly attend these conventions have not been heard from as yet.

Digitized by Google

We illustrate herewith the train that will be used by HARDWARE's Party. It consists of Dining, Observation, Cafe and Sleeping Cars.

In case a sufficient number of reservations are not obtained to warrant the running of a special train, the HARDWARE cars will be attached to the "Washington & Southwestern Limited," which leaves New York (23d Street) on the Pennsylvania R.R. at 4.25 P. M. Sunday, May 22d; West Philadelphia, 6.50 P. M.; Baltimore, 9.15; Washington, 10.45 P. M.; Danville, 5.40 A. M. (Monday); Greensboro, 7.05 A. M.; Salisbury, 8.18 A. M.; Charlotte, 9.25 A. M., arriving at Atlanta at 3.55 Monday afternoon. In the event of a special train being run, it will follow about ten minutes behind the Limited.

THE HARDWARE SPECIAL TRAIN.

A sufficient number of cars will be provided to give room for all applicants, but it is advisable that all reservations be made as soon as possible, especially in cases where several persons wish reservations near together.

Reservations can be made either through A. Eugene Bolles, Manager of HARDWARE, or the Passenger Agents of the Southern Railway in New York or Philadelphia.

GROWTH IN EXPORTS OF MANUFACTURES.

The growth in the exports of manufactures from the United States which is so strongly marked in the present fiscal year extends to a very large proportion of the list of articles included under that term, manufactures. This is shown by some tables just prepared by the Department of Commerce and Labor through its Bureau of Statistics. They include all manufactured articles or groups of articles whose exportation aggregated, in the last fiscal year, as much as one million dollars in value, or seem likely to aggregate that sum in the present fiscal year.

Necessarily many of the articles can only be stated under the general classification to which they belong, such as manufactures of iron and steel, which are all stated in the single group, iron and steel manufactures. Leather, boots and shoes, harness, etc., are included under the term leather and manufactures thereof; reapers and mowers, plows, and other agricultural machinery are included under the general term, agricultural implements; naphtha, gasoline and mineral oil for lighting are included under the general term of refined mineral oil; cotton cloths, wearing apparel of cotton, cotton yarn, and cotton-mill waste are included under the general term cotton manufactures.

Taking all manufactured articles or groups of articles whose exportation in the last fiscal year exceeded one million dollars, the Bureau of Statistics has brought together in one table all of those which show an increase in the value of exports in the nine months ending with March, 1904, over the same period in 1903, and in another table all of those showing a decrease in value of exports in the nine months ending with March, 1904, compared with the corresponding nine months of 1903. These two tables include about 95 per cent. of the total exports of manufactures.

In the first table, which shows the articles in which there is an increase in value, article by article, or group by group, down to one million dollars in value, twenty-two articles or groups are shown, with an aggregate value for the nine months in question of 280 million dollars in 1904, while the table showing decreases includes but seven articles or groups of articles and aggregates 36 million dollars in 1904.

The articles or groups of articles which show an increase are iron and steel manufactures; mineral oils; copper; leather and manufactures; agricultural implements; chemicals, drugs and dyes; wood, manufactures of; cars and carriages; paper and its manufactures; scientific instruments; manufactures of fibers; manufactures of india rubber; clocks and watches; paints and oils; gunpowder and other explosives; brass and manufactures thereof; soap; marble and stone and manufactures of; wool manufactures; jewelry; lamps and chandeliers; and sugar and confectionery. The articles or groups of articles showing a decrease in exportation are cotton manufactures; paraffin; tobacco; books, maps and engravings; musical instruments; distilled spirits; and glass and glassware.

The 29 articles or groups of articles whose exportation is thus compared with that of last year include about 95 per cent. of the total exports of manufactures. The group which includes those showing an increase aggregates $280,762,453 in value for the nine months ending with March, 1904, against $241,344,902 in the corresponding months of last year, an increase of $39,417,551. The group which includes those showing a decrease aggregates $36,307,076 in value for the nine months ending with March, 1904, against $44,835,897 in the corresponding months of last year, a decrease of $8,528,821. Of this total decrease of $8,528,821, as shown by the table of decreases, nearly 8 millions occurs in manufactures of cotton, of which the total exports in the nine months ending with March, 1904, amounted to $16,735,456, against $24,658,789 in the corresponding months of last year. Thus the chief article in which a decrease occurs in exports of manufactures is cotton manufactures, and this occurs largely in cotton cloths, of which the price has materially increased by reason of the unusually high price of cotton in the past few months.

The tables which follow show the exportation in the nine months ending with March of all articles or groups of articles whose export value in the last two fiscal years reached or exceeded one million dollars. The first table includes all those in which exports show an increase and the second includes all those in which exports show a decrease. These two tables include about 95 per cent. of the $317,069,529 of manufactures exported from the United States in the nine months ending with March, 1904.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The May meeting of the Executive Committee of the New England Hardware Dealers' Association was held at the Committee Room of the Boston Merchants' Association, 77 Summer Street, at two o'clock P. M., Tuesday, May 3d, President Sayward, of Haverhill, presiding. The following resolutions were adopted on the death of the secretary, James A. Farless, which occurred April 23d in his 78th year.

Resolutions on the Death of James A. Farless.

WHEREAS, Divine Providence has removed from our midst our friend and Secretary, James A. Farless; be it

Resolved, That while we bow to the will of that Supreme Being "Who doeth all things well," yet we feel in his death a loss, and his absence and assistance from our future meetings will be keenly felt.

Resolved, That his high character, his hopeful, buoyant spirit, his close application to the details of his work, and all that made up the best of manhood exemplified in him, will be an example and incentive to us in the years that may come.

Resolved, That we, the New England Hardware Dealers' Association, extend to his relatives and friends our most heartfelt sympathy.

Resolved, That these resolutions be spread upon our records and a copy sent to the family of our deceased secretary.

BOSTON, MASSACHUSETTS, May 3d, 1904.

D. FLETCHER BARBER,
F. ALEXANDER CHANDLER.
Committee on Resolutions.

Assistant Secretary F. Alexander Chandler, of Chandler & Farquhar Co., Boston, was elected secretary to succeed Mr. Farless. Ten new members were elected to membership. A discussion of trade topics was very fluently entered into by all the members of the committee.

The association has recently been re-organized under a plan of having but one large meeting a year instead of monthly, having the Executive Committee meet monthly or oftener as necessary and transact business and issue bulletins when necessary. The indications are that the annual meeting in March will be attended by about 200 members.

OPENING OF THE ST. LOUIS EXPOSITION.

Representing a larger expenditure than any similar enterprise heretofore attempted on this continent, greater in its ambition and wider in its scope of any previous effort of its kind, the Louisiana Purchase Exposition was formally opened April 30.

The inaugural exercises could hardly have been improved upon. They were simple, were carried through without delay and without a halt or delay of any description. The weather, notwithstanding the pessimistic predictions of the Weather Bureau, which promised a gloomy morning, a threatening noon and a rainy evening, was without flaw. No fairer day from dawn to sunset could have been hoped for. The sun was warm, but tempered by a pleasant breeze, whose temperature was sufficient to cool and too mild to chill.

The formal exercises began at 10 o'clock in the morning. Rev. Frank W. Gunsaulus made the invocation, which was followed by brief addresses by President Francis, Mayor Welles, of St. Louis; Director of Exhibits Skiff and Director Taylor, and the poem of Edward Clarence Stedman, which was sung to music by Prof. J. K. Paine, of Harvard. President T. H. Carter, of the National Commission; Senator Burnham, of New Hampshire; Representative Towney, Commissioner Nimcio, of Mexico, and E. H. Harriman, of the New York Commission, also spoke briefly, and then Secretary of War Taft was introduced. He made a formal oration upon the progress of the nation.

Immediately upon the conclusion of the address of Secretary of War Taft, who represented the President, Director of Works Isaac S. Taylor, who stood at the base of the Louisiana Monument, waved a white ribbon to men at the various industrial buildings as a signal, the mechanism used to unfurl the banners was put in operation and instantly thousands of flags fluttered from the poles on the many buildings of the exposition.

From the time that Director of Works Taylor waved his baton with the fluttering ribbon of white as a signal for the actual opening, the exposition as the epitome of human achievement was the thing with the people, and speeches of men were in the background. President Francis was the first to realize this, and his hearty laugh as he shouted to his fleeing audience showed his unqualified joy in the fact.

The throng of visitors promenaded the various boulevards, saw the immense cascades—the first public view of it in operation, sought the exhibits that appealed to them and viewed the interesting sights of "The Pike," corresponding to the Midway of the World's Columbian Exposition.

DEATH OF JAMES A. FARLESS.

James A. Farless, who, as secretary of the New England Hardware Dealers' Association, was one of the best-known of the Hardwaremen of Boston and vicinity, died at his residence in Boston on Saturday, April 23d, in the 77th year. James Augustus Farless was born in Salem, Mass., the son of Thomas Farless, February 2d, 1827. At the age of 22 he entered the firm of Goodsmith, Newcomb & Farless, of Boston. The firm was dissolved in 1858 and Mr. Farless engaged in business under the style of James A. Farless & Co., continuing for six years. In 1873 he associated himself with George W. Boynton and the business was continued as Farless & Boynton until 1883, when Mr. Farless retired. He had not been in good health for a long time before his demise, never having completely recovered from the effects of a fall in 1902. Mr. Farless leaves a widow and two grandchildren.

RECENT TRADE PUBLICATIONS.

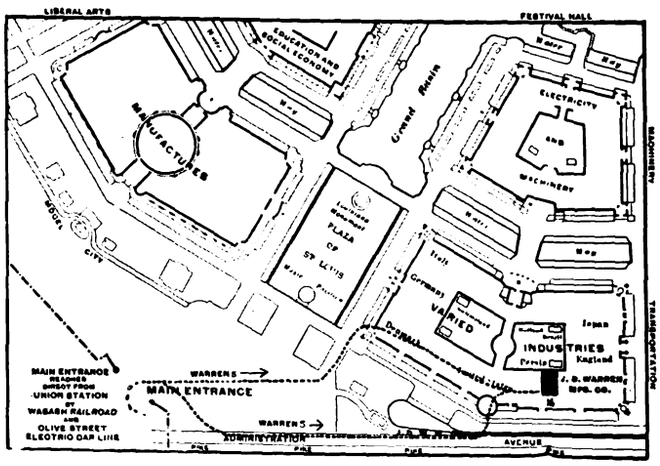
The American Tap & Die Co., Greenfield, Mass., have recently completed their catalogue No. 1 relative to their Machine Relieved Taps, which catalogue will be found a convenience by the trade in making known their wants. Their factory, they state, is equipped with nothing but the latest improved machinery, which has been designed especially for their own use in making taps, which insures a uniformity and accuracy of dimension which it is not possible to get with the old methods. The pamphlet is illustrated throughout, and has list prices on machine hand, machinist hand, machine nut, tapper, stove bolt, wash-out mud, boiler, patch bolt, pulley, hob, pipe, pipe reamer, Beaman and Smith, and blacksmiths' taps and also on dies.

The Grand Rapids Hardware Co., 1-3-5 Pearl Street, Grand Rapids, Mich., have recently issued an attractive pamphlet catalogue of 16 pages. It has a neat red cover with gilt decorations, and the interior of the book is correspondingly attractive. It exploits the "Grand Rapids" and "Fox" patent all-steel sash pulleys, giving illustrations in actual finishes. They illustrate their new ball-bearing wheel which, they claim, is one of the greatest improvements ever made in Sash Pulleys. This bearing is made of solid steel balls running on a turned steel cone-axle, and is furnished in three sizes, 2, 2¼ and 2½ inches. No other is made this way, it being the only steel pulley made with an axle. A rope groove is regularly furnished on these, but a chain groove will be shipped at same price when so ordered. Architects, or any one else wishing samples or detailed information, will confer a favor upon the company by writing them. Samples are freely sent upon request.

Logan Gregg Hardware Co., Pittsburgh, Pa., are the authors of a large and handsome catalogue for the Spring and Summer of 1904. This is their catalogue No. 22, intended to be used in connection with their catalogue 21 until the issuance of their next Fall catalogue. In addition to the goods heretofore carried by this house, the above book contains many new goods in the Hardware line, it being their aim to carry a stock of seasonable goods, sufficient to supply all demands of both early and late buyers. They have now arranged their business so that it is divided into three departments; General Hardware; Cutlery and Sporting Goods; and Heavy Hardware; believing that this will enable them to handle orders more expeditiously than ever. The book is very thoroughly illustrated, having colored samples of their paints, varnishes, stains, enamels, etc. This catalogue will be found of unusual value to the dealer, and those who have not received a copy would do well to secure one at once. The company state they will be glad to send it to any merchant who handles Hardware. It contains fresh and accurate information, as well as prices of goods for which the retailer will have an active demand during the next few months.

N. & G. Taylor Company, Philadelphia, Pa., have issued in the form of a handsome little volume, a series of talks by "Rufus the Roofer," who will be remembered by our readers by his dissertations on the subject of good roofing tin, in "The Arrow," the monthly house organ of the Taylor Company. These conversations are supposed to take place between "Rufus the Roofer" and his son, and contain many good practical suggestions and arguments in a homely, matter-of-fact style. Incidentally, he manages to include a number of "personal recollections" which give a humorous tone to the work. The book furnishes bright, newsy reading for anybody, whether he is the man who puts the tin on the roof or the man who lives under it. The cover of the book shows a portrait of "Rufus" ready for work, and the book is fully illustrated throughout. The company will be glad to send it to anyone upon receipt of ten cents in stamps.

The Storm Mfg. Company, Centre Street, Newark, N. J., have placed before the trade an attractive catalogue of dumb waiters and elevators of their manufacture. They also make a dumb waiter check which is a very useful device, preventing as it does, noise and shock from sudden stopping when the dumbwaiter is carelessly handled, thus often saving china and glassware from breaking. It can be applied to either top or bottom, or to both, as desired. One of their specialties is the Improved Humphrey Hand Eleveator made in three sizes with lifting capacity of 500, 750 and 1,000 pounds respectively for use in store and factory work, hospitals and public buildings for trunk and invalid lifts. They are so simple and low priced that they may be used in many places instead of a dumb waiter. The machinery is handsomely bronzed, the shafts run in Babbitted bearings, are perfectly fitted and guaranteed in all respects. Directions for ordering different styles are given in their catalogue, and much useful information will also be found.



Archer Iron Works, 34th Place and Western Avenue, Chicago, Ill., have placed before their trade a well arranged pamphlet catalogue exploiting their steel wheel barrows, lumber carts, trucks, steel ore and coal cars and wheels of all kinds. The book is finely illustrated, and all goods are graphically described. The company call attention to the construction of the wheel on their barrows and the width across the hub. Their hub is 13 inches across, while they claim that of other barrows on the market run 6 and 7 inches. They claim this feature insures strength and prevents upsetting. The tube making the two handles extends around the front of the wheel, which also adds strength. The legs and cross braces are made of heavier material. The trays are made of one piece, heavily banded. The handles are of one piece of one-inch steel pipe, and the tray is made of the very best grade of Juniata sheet steel strengthened by a ¾x¼-inch steel band, strongly riveted, passing all around the top of tray. The tray and handles are connected by strong wrought iron braces, rendering the whole barrow solidly compact and pleasing in design, and is so constructed that the load bears on the wheel instead of on the operator. For one interested in this line, the above-mentioned book will be found of interest and value.

The Stowell Mfg. & Foundry Co., South Milwaukee, Wis., have prepared for distribution among the farmers a booklet describing all of their Hay Tools, and they request the dealers to furnish them with the names of farmers whom they think will be interested in up-to-date goods. This will benefit the dealer, as the manufacturers refer all enquiries to him, and do not sell direct. Included in the contents of the above book are hay and track carriers and attachments, sling pulleys, the Boyd grapple fork, double harpoon, hanging hook, end brackets, folding fork pulleys, anti-friction hay fork pulleys, track hooks and hangers for wood track, swivel rope hitch and hook, barn door hangers, etc., etc. Some time ago the Stowell Mfg. & Fdry. Co. started a contest for the largest number of words to be made from the letters in the words, "Stowell Hay Tools," which was to close on March 1st, 1904. One hundred dollars in cash was to be divided among the winners: $25 to the first, $10 to the second, $8 to the third; $7 to the fourth and $5 each to the next ten. The successful candidates in the contest were as follows, the first making over 8,000 words: D. T. Boone, Saltsbury, Pa.; F. E. Meeker, Syracuse, N. Y.: G. F. Ackerman, Bucyrus, Ohio; Emma Seiler, Dundas, Ill.; F. J. Langwell, Andover, N. Y.; Dwight Sawhill, Edgerton, Kan.; Pearl Johnson, Linn, Kan.: Alice R. M. Pilgrim, Brookfield, Wis.; Josiah Lewis, Jewett, Ohio; Bertha I. Smith, Endeavor, Wis.; E. A. Beecker, Granton, Wis.; Edith McKinstry, Holman, Ind.; Mrs. John Goeppinger, Youngstown, Ohio, and L. A. Kinzer, Athelfelts Va.

THE WARREN MODEL HARDWARE STORE.

One of the finest, most attractive and instructive exhibits at the St. Louis World's Fair for a Hardwareman, and one that will prove of interest to manufacturers, jobbers, retailers, traveling salesmen or other employees is the Warren Model Hardware Store, 20x45 feet, which is certainly a marvel in its ingenious method of displaying, carrying stock or selling all kinds of Hardware products. We give herewith a ground plan showing its location in the Varied Industries Building, which is the first building at the right of the main

entrance. The model store is located on the North side, directly in front of entrance No. 16. Of the multifarious object lessons to be inculcated in the minds of visitors at a World's Fair, there are few, if any, that will appeal in a manner so direct to the ambitious members of this ever-expanding industry of Hardware, as the one to which we direct attention; which was originated, and is manufactured, by a Hardwareman who believes that no easier, more profitable and pleasant way of arranging the store can be found, or one that adds more to the comfort and wealth of the proprietor.

A LOVING CUP PRESENTED TO LORING COES.

Loring Coes, of Worcester, Mass., president of the Coes Wrench Company, and the original patentee of the Screw Wrench now bearing his name, on April 22d completed his 92d year. Notwithstanding his advanced age, Mr. Coe is still active in the management of his extensive business, which includes not alone the Coes Wrench Company, but also the Machine Knife business under the name of Loring Coes & Co., Incorporated. The employees of the Coes Wrench Company celebrated the anniversary by the presentation of a beautiful sterling silver loving cup. Frank L. Coes, his grandson, made a brief presentation speech, the men from all the shops having been assembled in the office. Many other friends and well wishers and business associates presented flowers in great variety. Loring Coes has been manufacturing Screw Wrenches in Worcester, Mass., since 1840, and is now the sole owner of the entire Wrench business, the works of which even now are doing an immense business and considerably behind their orders.

KNIFE BLADE THIRTY FEET LONG.

The biggest carving knife ever manufactured may be seen at the World's Fair. This monster blade is thirty feet in length and has an edge as sharp as a razor. It is made out of the finest steel, and the handle is a masterpiece of the cutler's art, elaborately carved and beautifully polished. It would take a veritable giant to wield a knife like this. The blade is altogether of American manufacture, and it is expected to show for the first time that American cutlery has now reached a point of perfection where it fears no rivalry. The giant carving knife cost several thousand dollars, and special machinery had to be made before its construction could begin. No such knife was ever before manufactured.—*American Inventor.*

HARTFORD HARDWARE ASSOCIATION.

The Hartford Hardware Association is composed of a membership which embraces every retail Hardware dealer in Hartford and New Britain and is entirely confined to the retail trade. They meet on the first Tuesday of every month and almost invariably this social meeting is supplemented by a dinner in the good old Down East style. This method of subduing strenuous competition is worthy of all commendation. "Behold how good and how pleasant it is for brethren to dwell together in unity." The association was organized in July, 1889. The officers are: President, A. H. Abbe, A. H. & E. W. Abbe, New Britain; secretary, C. L. Way, Way Hardware Company, Hartford. The Press Committee consists of J. F. Tracey, Tracey, Robinson & Williams Company; W. E. Cone, J. H. & W. E. Cone; Isaac, Bragaw, Way Hardware Company; H. H. Ensworth, L. L. Ensworth & Son, and J. C. Woolley, Woolley Hardware Company, all of Hartford. The Entertainment Committee consists of E. M. Francis, W. E. Cone, J. H. & W. E. Cone; Isaac Bragaw, Way Hardford, and H. L. Mills, New Britain. The other members of the association are Cadwell & Jones, Blodgett & Clapp Company, R. C. Witte, J. C. Bidwell Company, Ralph E. Page, all of Hartford, and the Barnes Hardware Company, New Britain.

SUBTERFUGES BY CORPORATIONS PREVENTED.

Use of Misleading Words in Their Titles Now Legally Forbidden.

Governor Odell has signed three important bills of Senator Brackett affecting the business of fiduciary corporations. Two of them are aimed to curtail the business of corporations whose titles are held to be misleading, owing to the presence in them of the words "trust," "banking," "guarantee," "Investment" and the like, and one of them is admittedly designed to affect the Corporation Trust Company, which was alleged before the legislative committees to have been instrumental in the incorporation of the United States Shipbuilding Company, the Franklin Syndicate, the Iroquois Theatre Company and others concerning which irregularities have been alleged.

The new laws forbid any corporation not a moneyed corporation to use any of the prohibited words in its title; require any such corporation heretofore organized to add to the title the phrase "not a moneyed corporation;" forbid any domestic corporation to act as agent in this State for any foreign corporation using the prohibited words in its title unless it be in fact a moneyed corporation, and also forbid the issue of any certificate of authority to any foreign corporation having any of the prohibited words in its title, unless it be in fact a moneyed corporation.

The third bill authorizes banking corporations "to transfer, register and countersign certificates of stock, bonds or other evidences of indebtedness, and to act as agent of any corporation, foreign or domestic, for any lawful purpose."

♣

Our valued Baltimore contemporary, *The Manufacturers' Record*, has long been known to make, months in advance of government reports, conservative estimates of crop production in the Southern States; the agricultural, mineral and manufacturing resources of which section of our country it has for many years made an intelligent study. The remarkable growth of the South and the equally remarkable development of the statistical department of *The Manufacturers' Record*, enables that publication months in advance of the census reports to present a close approximation of Southern growth, a fact fully demonstrated in some comparisons presented in its last issue. It is also always made a rule in its statistical estimates to understate rather than overstate real conditions, its aim in this being never to give exaggerated estimates.

Keeps on the Move.

Customer—Say, you'll have to take this thermometer back.

Dealer—Why?

Customer—It can't be relied on, one day it says one thing and the next day it says another.—*St. Paul Pioneer Press.*

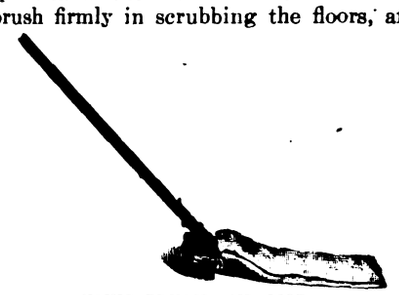
NEW GOODS AND SPECIALTIES.

IDEAL MOP AND BRUSH HOLDER.

The Stover Mfg. Co., Freeport, Ill., are introducing through the Hardware and housefurnishing goods trade a very clever device to be used by the up-to-date housekeeper, in their Ideal

IDEAL TINNED STEEL MOP.



WITH BRUSH ATTACHMENT.

Mop and Brush Holder, of which we present illustrations. This is a new specialty of its kind and presents many salable features to commend it. It is claimed to be the only all-steel

HOLDING MOP RAG.

Tinned Mop Stick on the market. The brush holding device holds the brush firmly in scrubbing the floors, and the mop

USING BRUSH AND MOP.

rag may be used at the same time. The brush can be detached from the mop in an instant, so it may be used with or without the mop.

OLINGER'S DIBLER AND TRANSPLANTER.

John J. Olinger, 1328 Webster Avenue, New York, is placing upon the market through the Hardware trade a very simple patented device, which we illustrate. Fig. 1 shows the instrument closed and ready to be thrust into the ground; Fig. 2 shows it in the ground and opened by pressure of the hand. This handy planter may be used for transplanting, inserting, and removing plants from the ground; also for in-

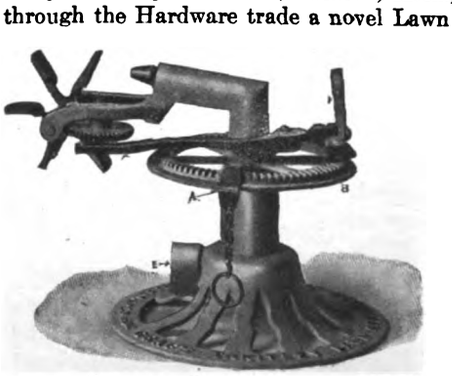
FIG. 1.

FIG. 2.

serting fertilizer with the plants or at the sides of the plant roots. The device consists of two jaws pivoted together and forming when closed a continuous round body tapering to a point and, therefore, adapted to be easily inserted in the ground. The handles which extend upward from each jaw are bent at right angles to the body and may be easily grasped in a single hand. Springs secured to these handles hold the jaws normally in closed position. In using this device the plant may be placed therein when the planter is closed, and then after forcing the device into the ground the jaws are spread apart by pressure on the handles. Upon withdrawing the planter the plant will be left in the ground. It is obvious that at the same time of inserting a plant a fertilizer may be also inserted, or fertilizer alone may be inserted at the side of a plant or its roots. This planter is of convenient size for small plants and may be readily carried about and easily operated.

THE SIMPLEX TRIMMER.

The Webster & Perks Tool Co., Springfield, Ohio, have recently published a catalogue of paper hangers' tools which should be in the hands of all dealers catering to that class of trade. Among other specialties that would seem to be indispensable in the handling of paper hanger and decorative tools, they call attention to the Simplex Trimmer, of which we herewith give an illustration. This is claimed to be the simplest wall paper trimmer on the market; it is extremely light, as



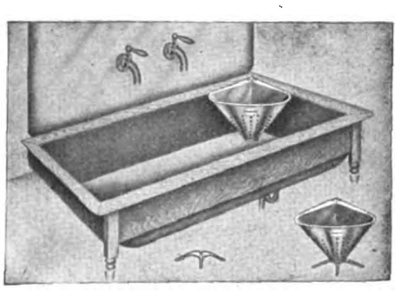
THE SIMPLEX TRIMMER.

every part, even to the smallest screw, is made of steel and hardened, which it is claimed insures its cutting true to the straight edge every time. The leverage is given it by means of a fulcrum, thereby enabling one to cut with the greatest ease and least pressure. The wheel is tempered and drawn after the most modern and scientific methods, and ground and beveled on special machinery. Each wheel is carefully honed and inspected before shipment. There is claimed to be practically no friction to the Simplex Trimmer, as there are but two points of contact covering a surface of but one-eighth of an inch. The Trimmers are highly polished and nickel plated, inspected and packed in a neat card board box.

THE "TAKITEZY" LAWN SPRINKLER.

The Takitezy Lawn Sprinkler Co., Jackson, Mich., are introducing through the Hardware trade a novel Lawn Sprink-

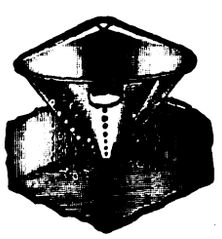
THE "TAKITEZY" LAWN SPRINKLER.



ler, which they market under the name of the "Takitezy." The construction is so different from the usual article known

Digitized by Google

for this purpose we present an illustration indicating its original construction. It is a sprinkler which utilizes a stream to sprinkle the ground, and, at the same time, provides power for the automatic operation of the sprinkler, to alter the direction of the spray. It permits the passage of a full size stream through the nozzle, and also sprays the entire distance from the sprinkler to the point at which the main stream strikes the ground. It can be approached, while in operation, so as to adjust or remove the machine, without being obliged to pass within range of the spray. The appliance is adjustable to different areas. It will make a complete revolution, or describe any part of a circle, according to the desire of the operator or the requirements of the ground. In the illustration, letters A and B mark the reversing points. The clamp marked A can be placed to any desired point on ratchet wheel, to reverse nozzle or stream. The lug on ratchet wheel marked B is the other reversing point. By placing clamp A within an inch of lug B the nozzle will spray a space only four feet wide. If clamp A is removed it will make a complete revolution and sprinkle evenly a space 65 feet in diameter, which is by far the largest space ever sprinkled by any machine on the market. The "Takitezy" weighs four pounds, is six inches high and is neat and attractive in appearance and simple in construction. It is not affected by any foreign substance in the water, and we should imagine may be relied upon to do its duty.



VROOMAN SANITARY SINK STRAINER.

Mrs. Vrooman's patent sanitary sink strainer, made by F. H. & E. B. Vrooman, 225 Dearborn Street, Chicago, Ill., is illustrated herewith. The strainer has a cleverly devised receptacle ingeniously placed to receive the waste material

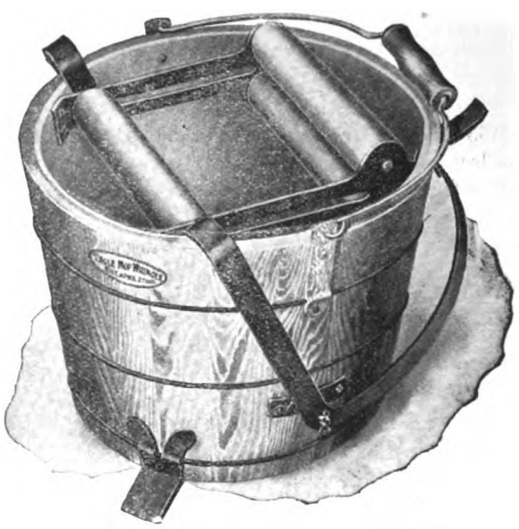
VROOMAN SANITARY SINK STRAINER IN POSITION.

that formerly accumulated in the sink, and was apt to get in to the waste pipe and stop it up. The strainer is made in plain or japanned tin, is very light, and is readily removed, with its contents for emptying into any suitable receptacle. Through a number of holes in the front and bottom the water and other liquids flow out of the strainer into the sink and so down the pipe, while the solids are retained, to be thrown

SINK STRAINER WITH WIRE FEET.

when convenient, into the refuse can. The device can be hung in the corner of the sink, as shown in Fig. 1, or, when preferred, it can be provided with wire feet, on which it can stand in any convenient part of the sink and be removed when not required. The strainers are shipped in boxes, each containing three dozen. They are packed nested, thus taking up but little room.

THE SPORTSMAN'S POCKET STONE.



The illustration herewith shows a new brand of sharpening stone, which the Pike Mfg. Co., Pike, N. H., and New York, are placing before the trade. The stone is designed especially for sportsmen, and can scarcely fail to meet a hearty welcome. Realizing that the man in the woods does not have access to a grindstone, the Pike Mfg. Co. has endeavored to supply him one in pocket size, also a file, knife sharpener and hone combined. The sportsman's pocket stone is a combination stone, one side of coarse corundum, which answers admirably as a sharpener for dull axes and knives; also as a file for filing any metal surface, it being so hard that it will cut, it is claimed,

the hardest steel, rapidly. The reverse side is a fine Washita similar to the well-known "Lily White" brand and is suitable for sharpening skinning knives, pocket knives or any wood working tools. It is claimed that with proper care in using, it will set a razor edge. This is an article which the camper and woodsman cannot afford to be without, and will henceforth form a part of his outfit. Each stone is enclosed in a neat pasteboard box bearing the Pike trade mark, which guarantees it to be an article of exceptional merit.

THE EAGLE MOP WRINGER AND BUCKET.

Only a few years ago and the idea of manufacturing a device to obviate much of the disagreeable work attendant upon mopping had not been seriously thought of. Since that time, however, many patent Mop Wringers and devices of that character have been put upon the market. Among such articles, the Eagle Mop Wringer and Bucket combined have met with signal success, their sales having more than quadrupled within the past year. The Eagle Mop Wringer has many distinct and valuable features which recommend it to the trade

THE EAGLE MOP WRINGER AND BUCKET.

and the consumer. The wringing device is claimed to be as perfect as any wringer can be made. It is attached to a strong white cedar pail, made especially for this purpose with electrically welded hoops, thus insuring long life even though subjected to hard usage. The wringer will wring perfectly any kind of mop, cotton, twine or cloth, and mop cords cannot become entangled with springs or other working parts. All parts are claimed to be carefully made of the best materials, thereby insuring great strength and rigidity. The rollers are of maple with steel axles, springs of oil tempered steel; the treadle and portable roller shanks are of machine steel, while the guide plates, treadle axles and foot holders are of best refined malleable iron. All parts are carefully made and assembled. The treadle devices are now fastened with bolts where screws were formerly used, insuring much additional strength. The Eagle Mop Wringer and Bucket are recommended by the manufacturers for any purpose where mopping must be done. They are especially valuable in public institutions, city, county and State buildings, offices, hotels, stores and barber shops, and for use in the home will be found especially valuable for cleaning floors, porches and verandas. The manufacturers, Eaple Cooperage Works, Circleville, Ohio, invite correspondence, and will be pleased to furnish any information desired regarding the device, prices, etc.

MAYHEW COMPANY'S SPECIALTIES.

H. H. Mayhew Company, Shelburne Falls, Mass., manufacture a line of small tools which are well known for quality and finish by the Hardware trade, which has handled them for years. They have recently issued a new and complete catalogue embracing the many additions to their usual assortment since their last catalogue was issued, and to call attention to this line we present a few illustrations from the pamphlet. Fig. 1 is a pocket screw driver No. 809 designed for electricians, locksmiths, engineers or any one having use for a pocket screw driver, who will find this a very handy and useful tool of its kind, and possessing an excellent temper. Fig. 2 is an illustration of a Bolstered blade ice pick No. 8, made from extra steel stock, is 6 inches long by 7-32, hand forged from tool steel, oil tempered and needle pointed, with hardwood handle, having nickel plated brass ferrule. Fig. 3 illustrates the Scratch or ice awl No. 1030, 5½-inch blade, of tapered drawn steel, nickel plated ferrule. This salable line of small tools should be well represented in every Hardware stock. Dealers interested should send for this desirable catalogue.

FIG. 1.—POCKET SCREW DRIVER NO. 809.

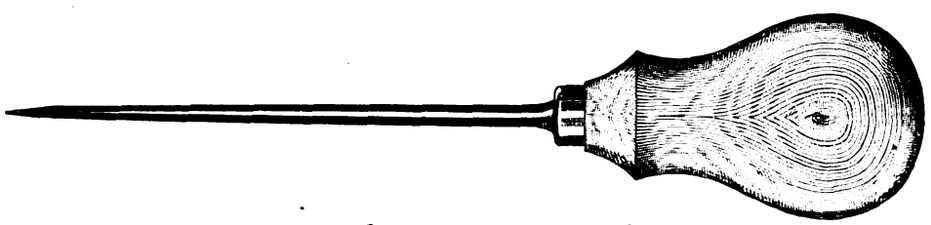

FIG. 2.—FORGED ICE PICK NO. 8.

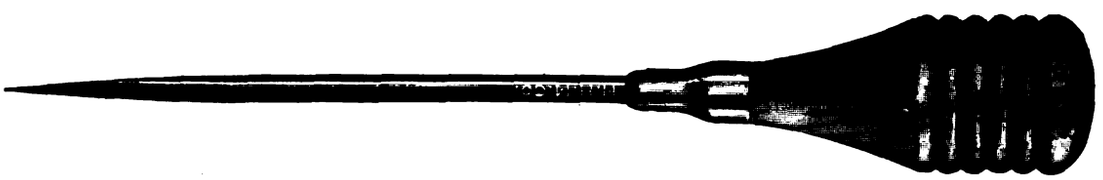

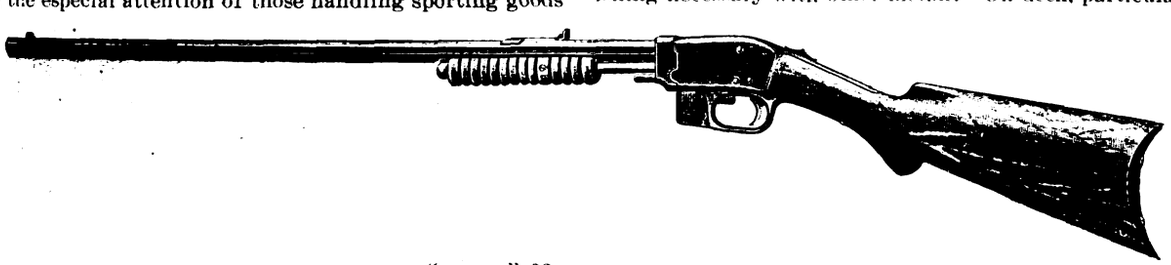

FIG. 3.—SCRATCH OR ICE AWL NO. 1030.

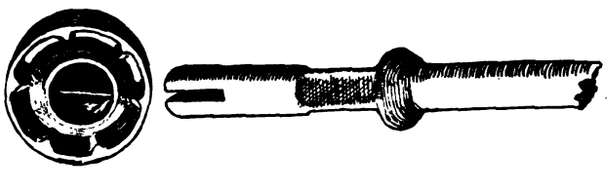
THE "SAVAGE" 22 CALIBER REPEATER.

The Savage Arms Co., Utica, N. Y., have good reasons for calling the especial attention of those handling sporting goods among the Hardware trade to the Savage 22 caliber repeater, shown on page 55. For Spring shooting no arm appeals to the sportsman more than the 22 caliber rifle, Among arms of this type the Savage 22 caliber repeater is different from any other rifle of its kind. It is a clean cut little gun using the best of the 22 caliber ammunition—the short, long and long rifle all in the same arm. Its beauty of outline and finish will always be a source of pleasure to the owner. Perhaps the two strong points of the Savage are accuracy and the smooth and easy manner in which it works. This arm has met with a great success and there is no reason why it should not. Savage rifles, the 22 in particular, are well exemplified in the phrase used by the makers, "Savage Quality" is a commonplace term, but it means everything to a shooter. Being honestly made all Savage products are sold by the manufacturer under the strongest guarantee. Dealers will study their own interests by writing at once for catalogue.

THE "SAVAGE" 22 CALIBER REPEATER.

VICTOR NON-CORROSIVE SILVER METAL.



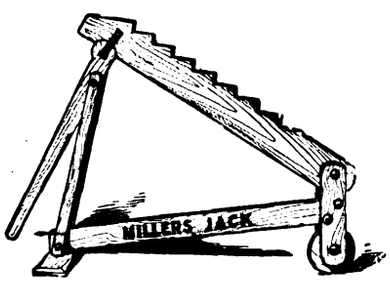
After years of thorough trial the Victor Metals Co., of East Braintree, Mass., is urging the use of their metal, known as Victor Non-Corrosive Silver, for various uses on board ship, as they are fully satisfied that it is especially suited to this line of work. The metal is claimed to fulfill the requirements of being absolutely salt water proof and non-tarnishing, as well as acid proof. Besides, the metal has a tensile strength of 53,280 pounds to the square inch, with an elongation of 15.7 per cent. in 3 inches, as per Government test. In addition to possessing these qualities, it is claimed the metal will, when polished, take a high finish like silver. No zinc protection is necessary where propellers, condensers, sea connections, etc., are made of the Victor Non-Corrosive Silver Metal, nor is there any danger from the bilge water, if valves, pipes, fittings, pumps, etc., are made of same. For interior fittings, which are constantly in use, as, for example, plumbing fixtures, Hardware trimmings, etc., this Silver Metal is of importance on account of its lasting and non-tarnishing qualities, whereby it not only saves the expense of replating such fittings, but also the time of cleaning and polishing necessary with other metals. On deck, particularly on yachts and launches, where in the past a great deal of brass and bronze have been used, the Silver Metal is now being adopted, and a great number of both large and small vessels have been fitted out with this metal for all such fittings as cleats, chocks, ring and eye bolts, rail and awning stanchions, skylight and side ladder fittings, air ports, pin rails, mast bands, gaff jaws, chain plates, steering gears, windlasses, engine telegraphs, search lights, etc. Any of our readers wishing further information can obtain such by applying to the general manager of the company, Eric H. Ewertz, 29 Broadway, New York City.

INDESTRUCTIBLE SCREW DRIVER.

The Thomson Drop Forge Co., Plantsville, Conn., are placing upon the market through the Hardware and Tool trade the Indestructible Screw Driver, illustrations of which are presented herewith. It is drop forged throughout, cap, ferrule and blade, the handle being made of the toughest wood

Digitized by Google

for the purpose, making it justify its name by quality of material, method of construction and corresponding fitness for general use that gives evidence of originality in all its

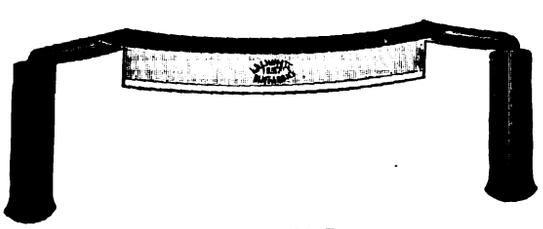


ORIGINAL FEATURE OF CONSTRUCTION.

stages. The Thomson Drop Forge Company have a plant for manufacturing purposes that is thoroughly equipped with every facility for the production of drop forgings of every character, including special work, automobile forgings, and specialties in the line of gun work. The latest additions to their line of drop forge work consists of the Indestructible Screw Driver and the Four Blade Screw Driver and Chisel.

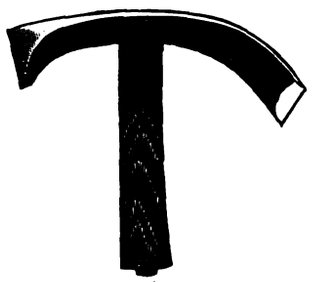
MILLER'S PATENT WAGON JACK.

J. V. Hankinson, Franklin, Ohio, successor to Thomas Miller, is the manufacturer of the Miller Patent Wagon Jack, of which we present an illustration herewith. These Jacks are made of selected hardwood, put together with bolts and constructed with a view to strength and durability, the strain coming parallel with the wood, causing the weight to be



MILLER'S PATENT WAGON JACK.

equalized throughout. The Jack is so constructed that special adjustment for varying heights is unnecessary, being regulated by the notch bar, which, rising perpendicularly, keeps the vehicle from pushing backward or forward when in use. It is not necessary when placing it under a wagon or truck to get down under the bed when placing it beneath the axle. It is made in three sizes: No. 1, capacity 2,000 pounds, and made from 1-inch lumber; No. 2, with a capacity of 3,000 to 5,000 pounds, and made from 1¼-inch lumber, and No. 3, for heavy wagons and trucks, with a capacity sufficient for raising traction engines, being made from 2-inch lumber.



L. & I. J. WHITE COMPANY'S COOPERS' TOOLS.

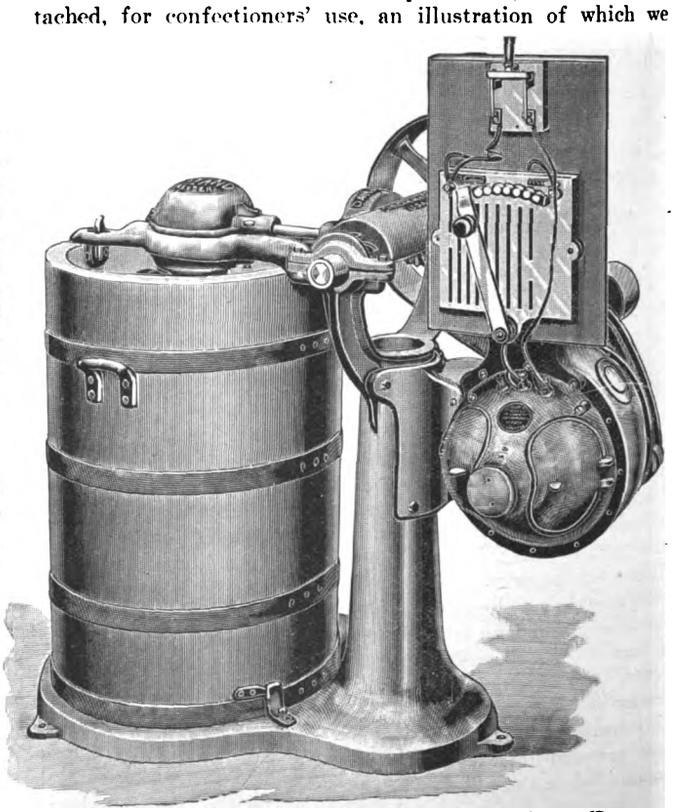
Among the large variety of high grade tools made by the L. & I. J. White Company, of Buffalo, N. Y., they manufacture a line of Coopers' Tools which today is recognized as

HOLLOWING SHAVE.

the standard of excellence in quality and manufacture in the active markets of the world where merit is recognized and quality is demanded. Their Coopers' Tools, shown in the accompanying illustrations, have long been known in the home markets as being a safe and trustworthy product on which full reliance may be placed, accompanied as it is with a full warrantee of freedom from flaws, the goods being finely tem-

COOPERS' ADZE.

INDESTRUCTIBLE SCREW DRIVER.



pered. Their new catalogue should be in the hands of every dealer handling tools of established reputation.

CHAMFER KNIFE.

PEERLESS ICELAND FREEZER.

Dana & Company, Cincinnati, Ohio, realizing how closely confectioners would stick to the old-fashioned freezer made on the principle of the "French Pot" for making their finest and most expensive product, have manufactured the Peerless Iceland Freezer in 25 and 40-quart sizes, with motor attached, for confectioners' use, an illustration of which we

PEERLESS ICELAND FREEZER WITH MOTOR ATTACHED.

give in this article, which fulfills every requirement possible in the French Pot Freezer. There is claimed to be a number of advantages in attaching the motor to the power-driven Freezer. When operated with a shaft and belt the ordinary

Digitized by Google

Freezer must always remain in the same place, while with this Freezer one is enabled to move it to any part of the building by simply making a connection with the lighting current by means of a socket and flexible wire.

The motor, used in connection with the Peerless Iceland Freezer, is of very high efficiency, simple and attractive in appearance. It is in a convenient position, out of the way and yet easily accessible for use, the idler practically eliminates any chance of breakage either in the freezer or motor by anything about the freezer becoming stuck, because if such a thing did happen, the idler would release the belt and allow the belt to slip. By means of the idler attachment, the belt is always kept at proper tension without the necessity of having to take up the slack or tighten the belt. The idler is automatic in its adjustment, and the belt will run for a long time, practically indefinitely, without having to be taken up.

Another advantage of this method is the fact that no current is lost by transmitting the power from the motor to the freezer through gearing, as is very often done.

The controlling apparatus is of the highest grade. The regulators will control the speed from 50 per cent. of the full speed up to full speed, which gives all the range of speed that would be required in operating the freezers.

This motor is attached directly to the stand of the freezer, as shown in illustration, and is a direct current motor 110 volts. ¾ H. P., 900 R.P.M. for 25 quart and 1½ H. P., 1125 R.P.M. for 40 quart. The motor can also be furnished in 115, 125, 220, 250 and 500 volts. It is furnished complete with switch board and starting box, idler and belt. The manufacturers can furnish a motor to order for alternating current, but the motors illustrated are for direct current only.

ON PREPARATION OF COPY FOR ADS.

A Practical Printer's Views on the Subject.

The following is by Charles B. Harris, the foreman of one of the largest printing establishments in St. Louis:

There always has been a feeling of animosity between the ad-writer and the man of the types, because of an apparent disinclination on the part of either of them to "get together" and compare ideas and offer suggestions. The purpose of this short talk is to, so far as possible, bring about that end. The printer who is worthy of the name has an innate pride in making his work as near perfection as it is possible for him to, and it is only through lack of material, or a misunderstanding of instructions that he fails to carry out an idea that appeals to him as being good.

It is the desire and chief aim of an advertiser to make his ads more attractive than those of his competitor, and in so doing he should seek the assistance and ask the opinion of the printer in regard to the presentation of an idea which has occurred to him. It must first be understood that many ads and designs which appeal to the advertiser as good and appropriate, are impossible to execute in the majority of offices throughout the country. A merchant looks through his trade journal or the month's magazines and sees something which he thinks would improve the appearance of his next ad. He attempts to use it and expects his home printer to be able, with the limited equipment of a country office, to secure the same appearance as the magazine ad, which was probably set in an office with unlimited facilities. Do not get the idea that any design you may submit will be executed as you desire, because it cannot always be done, but rest assured that if you give the printer suggestions which he is prepared to follow, that he will do so and be very grateful.

Try and impress upon the disciple of Guttenberg the fact that you appreciate the difficulties he labors under and that you want to co-operate with him in securing the best results with the material he has at hand.

Let your copy first of all be legible and do not write upon any old scrap paper you may find handy. Write on one side of the sheet only. Where you use unusual words print them, so that they cannot be mistaken. Always be sure you know what you want to say before submitting copy to the printer, as changes in the proof are very hard to make and also expensive. Very frequently the change of one line necessitates changing the whole ad.

Underscore words or lines you wish displayed, by one or two strokes of the pencil, according to the strength you wish given to them. And do not lose sight of the fact that the more you can condense your text the stronger your ad will be.

In using cuts do not fail to make proper allowance for them so as not to crowd out the display lines, and specify as nearly as possible the position in the ad the cut is to occupy.

Specify display lines if you have any choice in the matter and rest assured that the printer will give them to you if possible. Always bear in mind the fact that there are hundreds of type faces and no office on earth has them all. Do not specify type to be used in body, as the printer, through his years of experience, has generally learned enough to know what will harmonize and what will be necessary to complete the ad.

Give the "man of the stick and rule" the benefit of your experience and judgment and you may be sure that he will not fail to make good use of it. But at the same time give him credit for having a little judgment of his own and you may be equally sure that you will profit by it.

I hope that the time may soon come when the ad-writer and the printer by pooling their issues may bring this art of advertising to its highest state of perfection. To that end let us all "get together."—*American Merchant.*

OKLAHOMA RETAIL IMPLEMENT AND HARDWARE DEALERS' ASSOCIATION.

The Oklahoma Retail Implement and Hardware Dealers' Association was constituted in El Reno, O. T., on April 20th and 21st.

The following officers were elected to serve until the annual meeting to be held on the third Tuesday in next November:

President—O. A. Smith, Watonga.

Vice-President—W. L. Perkins, Granite.

Secretary—J. A. Chenoweth, Leger.

Treasurer—S. E. Haggard, El Reno.

Territorial Vice-Presidents—C. P. Hamilton, Mangu, Greer County; A. C. Lucas, Hobart, Kiowa County; C. W. Amspacher, Apache, Caddo County; D. B. Berry, Cordell, Washita County; Walker R. Payne, Clinton, Custer County; N. B. Utt, Elk City, Roger Mills County; H. M. Herms, Taloga, Dewey County; O. N. Minton, Gage, Woodward County; C. O. Greene, Alva, Woods County; J. Bixler, Hitchcock, Blaine County; W. S. Watson, Pond Creek, Grant County; C. B. Cowles, Enid, Garfield County; Frank Banker, Kingfisher, Kingfisher County; C. Kimmell, El Reno, Canadian County; T. J. Griffith, Oklahoma City, Oklahoma County; W. D. Packard, Guthrie, Logan County; J. McCormick, Perry, Noble County; F. A. White, Manchester, Grant County; A. Levick, Ralston, Pawnee County; Wm. McVickery, Blackwell, Kay County; C. V. Liter, Guthrie, Logan County; Carter Tracy, Beaver, Beaver County; J. N. Johnson, Chandler, Lincoln County; Frank C. Woodworth, Maude, Pottawatomie County; J. L. Little, Lexington, Cleveland County.

Advisory Board—J. E. Bonebrake, El Reno; J. B. Young, Ft. Cobb; C. J. Chastian, Cleo; L. L. Collins, Cheyenne; W. M. House, Shawnee.

Directors—W. T. Funderburg, Mangum; J. L. Halstead, Cherokee; A. H. Smith, Arapaho; R. S. Frazer, Stillwater; V. D. Tinkelpaugh, El Reno; O. A. Smith, Watonga; T. J. Griffith, Oklahoma City.

Legislative Committee—C. S. Watson, Pond Creek; G. E. Johnson, Sayer; J. W. Freeborn, El Reno; P. T. Benbow, Lawton; W. P. Packard, Guthrie.

The committee appointed to form the Constitution and By-Laws made a report and submitted a complete Constitution and By-Laws for the consideration of the association.

THE IRON AGE DIRECTORY FOR 1904.

The eighth annual edition of the Iron Age Directory has recently been published. It is a counterpart of the seventh edition, but thoroughly revised to date. This directory is a classified index of all the goods made by the advertisers in that periodical, the information being condensed into the smallest practicable compass. The increasing number of manufacturers and the endless variety of their products made such a volume of reference of the greatest convenience, and, this edition being larger and more complete than any that has preceded it, will be found a valuable addition to the library of the busy dealer and buyer.

OUR NEW ORLEANS LETTER.

(From our Special Correspondent).

An uneasy reaching after more worlds to conquer continues to characterize the condition of the New Orleans Hardware trade. This is fostered and backed up by a continued flow of good business to the markets already in hand, and by an outlook for the coming crop year which augurs a continuation of good markets in the agricultural districts tributary to New Orleans. While this has been the attitude of the dealers, kept alive by the continued development as in transportation circles, Hardware itself has been adding a feature of interest to the situation by undergoing a general up-lift in prices which has materially affected totals of returns while altogether without appreciable effect in the volume of goods handled.

Dealers in New Orleans, and particularly those who handle goods out to Mexico, have been discussing during the recent weeks the effect upon the local market of the new Mexican tariff. The tariff directly affects the handlers of iron and steel goods, and particularly those goods nearer the basic materials. Cuban reciprocity has become altogether a secondary consideration in view of the recent enactments of the nearby Spanish-American republic.

Two other themes have caused comment in the city. The one is the general trend of sentiment among New Orleans business men to favor the establishment of manufactories in New Orleans as the best means to make the city something more than a point upon the route of trade. Among the men who are leading this movement for the establishment of new industries are some of the leading Hardware merchants of the city. The other is the campaign of the Transportation Department of the New Orleans Board of Trade to regulate the rates and schedules of the various railroads leading into the Southeastern territory (Florida, South Carolina, Georgia and North Carolina), which are claimed to discriminate against New Orleans and in favor of the cities of the Atlantic seaboard.

Behind all the situation is the fact that sugar planters, cotton planters, and rice growers are as one in announcing that the season thus far afforded them has been better for the new crop than for many years. This has continued the credit of the farmers, and has given them confidence to use more of their surplus cash and fill out more of the vacancies left by economy in the orders given during the Winter.

WHAT IS BEING SOLD.

What dealers would seem to agree is the marked feature of the jobbing trade at present is the continued demand for Building and Structural Hardware to all points in the New Orleans territory. While the increase in prices since April 1, and particularly since April 15, has materially affected the price of metal roofing, nails, Structural Hardware, etc., and the heavier grades of Builders' Hardware, the country trade would seem not to have been curtailed by the increased prices in any degree whatsoever. Nails have continued to be a leading line, and the numbers of car-loads shipped out to the towns of Central Louisiana and Southern Mississippi are said to be astounding even to the trade itself.

Agricultural implements are credited with holding up more than usually well. This is credited to the more than fair season, and the consequent willingness of the planters to buy where they believed at first they could economize with safety until another year had passed. It is noted that the very latest patterns of implements are being purchased, chiefly of the solid steel make, and with as little wood as is possible to be found. Trace chains as a staple have sold well, and the increase in prices has not affected the demand in the slightest.

A stir in the pine belt of Mississippi, Louisiana and Texas has resulted in a general upward movement in the demand for mill supplies that is unprecedented at this time of year. A number of new saw mills have been established recently, and the habit of the millmen has become more and more to look to New Orleans for supplies and outfitting. A number of heavy orders are now pending with the mill supply firms of the city.

Household Hardware to the country has already begun to move, although the orders for Summer materials have been somewhat delayed this Spring. Wire nettings, screens, refrigerators, etc., are the leading articles.

THE CITY TRADE AND GENERAL OUTLOOK.

The feature of the city trade just now is an unpleasant one, and is the diminution of the ship chandlery business. This is largely controlled by one or two firms, of which Woodward-Wight & Co., also general Hardware dealers, is the leading establishment. The cessation of grain exports through the currency of war prices, and the reduction of cotton movement through the short crop, have combined to greatly curtail the number of ships entering the port, and it would seem that those ships entering the port have deemed it best to be prepared for all contingencies elsewhere.

Another feature scarcely better is the condition of the building trades which have stopped all local demand for Building or Structural Hardware or for tools, etc. The carpenters, lathers, plasterers, painters, sheetmetal workers, and hod carriers are upon a strike, and a general tie-up of the building trades is scheduled for an immediate issue unless the employers accede to the union demands. Over $6,000,000 of scheduled work is waiting for this strike to be settled, while $3,000,000 of contracts in course of operation are tied up now.

Household Hardware is the most popular local line, and the housekeepers of the city are keeping the retailers busy filling orders. Summer goods of all kinds are selling, and selling well.

HOW TO HANDLE IT.

To vehicle, implement and Hardware dealers, developments of the past week in transportation lines have been of peculiar interest. The Louisiana Railway & Navigation Company has completed its arrangements for the erection of its elevators and terminals in New Orleans and for handling its bulk and heavy freight. This has been taken to mean that the road expected to complete connections with its virgin Northwest and Southwest Arkansas territory before the passing of the next Autumn. The completion of the road will allow New Orleans to cut into territory hitherto held by St. Louis and Dallas. Meantime the Frisco, which is to open all Eastern Arkansas and upper Eastern Louisiana, has arranged for additional facilities upon the river front in New Orleans, and is making rapid progress toward entering New Orleans.

The bearing of this upon the lines mentioned is already evident. The big mill supply and wholesale Hardware jobbers are already flooding the territory with their pamphlets and literature, and traveling men are to leave New Orleans within thirty days from A. Baldwin & Co., Stauffer-Eshleman & Co., Fairbanks Agency and John Deere Plow Co., to handle this extra territory and whip it into shape for New Orleans during the coming season.

With these developments toward the North and Northwest, eyes have also been turned toward the South and the export trade. It is reported that the Southern Railway, through the Louisville & Nashville, is to inaugurate a steamship service to South and Central America before the end of the coming season. This steamship line is to handle the business of the New Orleans & Northwestern, the Louisville & Nashville, and the Queen & Crescent. This line will compete directly with the United Fruit Company in taking exports of Hardware, etc., into the Central American and Columbian ports, and with the Mexican-American Steamship Company to Tampico and Vera Cruz.

The first sailing of the new Scandinavian Line will occur during the coming week. It is said that a large consignment of agricultural implements has been obtained from the Harvester Agency, and from the Moline Agency, which is handling some export business for the home office.

Evidence taken before the Interstate Commerce Commis-

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

We present herewith the complete programme of the Fourteenth Annual Convention of the Southern Hardware Jobbers' Association, which will take place at Atlanta, Georgia, commencing Tuesday, May 24, and continuing to Friday, May 27:

Programme.

MORNING SESSION—TUESDAY, MAY 24, 1904.

Convention Hall—Kimball House Ball Room.

Delegates and visitors will please assemble promptly at 9.30 A. M. The manufacturers, their representatives and the ladies are cordially invited to this Session.

Meeting Called to Order by the President.

Prayer:—Rev. H. S. Bradley, D. D., Trinity M. E. Church, South, Atlanta, Ga.

Roll Call.

Chorus—"America."

Address of Welcome by the President.

"Here's Our Hand"—Hon. Evan P. Howell, Mayor, Atlanta, Ga.

Response—J. C. Birge, St. Louis, Mo., President American Hardware Manufacturers' Association.

Address of Welcome to the Manufacturers—W. W. Webber, Webber-Ayers Hardware Co., Ft. Smith, Ark.

Response—S. G. Gilfillan, Belfont Iron Works Co., Ironton, O.

Report of Reception Committee—Irby Bennett, Chairman, Winchester Repeating Arms Co., New Haven, Conn.

Introduction of New Members, Visitors and Guests.

Impromptu Addresses.

Informal Reception of Manufacturers, Jobbers and Their Representatives.

(During this reception each person is requested to register in the Association's Official Register, at which time the Sergeant-at-Arms will distribute, one to each person, the badges prepared for those in attendance at the Convention.)

All delegates and visitors are earnestly requested to remain in the Convention Hall until adjournment.

AFTERNOON SESSION—TUESDAY, MAY 24.

Executive—for jobbers only.

Meeting called to order promptly at 2.30 P. M. in the Breakfast Room of the Kimball House.

Reading of Minutes of 1903 Convention.

Annual Report of the President.

Report of the Secretary-Treasurer.

Report of Transportation Committee.

Report of Press Committee.

Report of Grievance Committee

Report of Manufacturers' Committee.

Report of Membership Committee.

Report of Supply Committee.

Report of Metal Committee.

Report of Executive Committee.—Read by O. B. Barker, Lynchburg, Va.

Appointment of Special Committees.

Communications.

Miscellaneous Business.

Discussion of Executive Committee's Report.

"Our Association. What Shall Be Done to Nurture It?" General discussion opened by R. D. Warren, Benedict, Warren & Davidson Co., Memphis, Tenn.

Each speaker limited to five minutes.

Opening of Question Box.

General discussion.

All delegates are earnestly requested to attend this session and remain in the Convention Hall until adjournment.

EVENING—TUESDAY, MAY 24, 1904.

Theatre Party.

MORNING SESSION—WEDNESDAY, MAY 25, 1904.

Executive—for jobbers only.

Meeting called to order promptly at 9.30 A. M. in the Breakfast Room of the Kimball House.

"The Hardware Jobber. His Worst Enemy."—J. H. Weddington, J. H. Weddington & Co., Charlotte, N. C.

Open discussion. Each speaker limited to five minutes.

"What Our Association Has Done for Its Membership, and What Is Yet to Be Accomplished."—J. D. Moore, Moore & Handley Hardware Co., Birmingham, Ala.

Open discussion. Each speaker limited to five minutes.

Opening of Question Box.

General discussion.

AFTERNOON SESSION—WEDNESDAY, MAY 25, 1904.

Joint Session of Jobbers, Manufacturers and their Representatives, the Southern Hardware Jobbers' Association being the guests of the American Hardware Manufacturers' Association.

Convention Hall, Kimball House.

Meeting called to order promptly at 2.30 P. M.

"Catalogue House Competition."—S. Norvell, Norvell-Shapleigh Hardware Co., St. Louis, Mo.

"The Necessity of a Closer Affiliation of Jobber and Retailer."—W. P. Bogardus, President The National Retail Hardware Dealers' Association, Mt. Vernon, O.

Open discussion. Each speaker limited to five minutes.

"Rebates and Restrictive Prices from Manufacturers of Association Goods vs. Open Market."—From a Jobber's Standpoint.—John Donnan, W. S. Donnan Hardware Co., Richmond, Va.

—As Viewed by the Manufacturers.—Reply by a member of the American Hardware Manufacturers' Association.

Open discussion. Each speaker limited to five minutes.

"Should Not Manufacturers Protect the Jobbers against Radical Declines Brought about by Disagreements in Their Own Associations?"—Discussion opened by J. C. Sproull, Anniston Hardware Co., Anniston, Ala., and also by a member of the American Hardware Manufacturers' Association.

Open discussion. Each speaker limited to five minutes.

Opening of Question Box.

General discussion.

EVENING—WEDNESDAY, MAY 25, 1904.

Smoker—Dining Room, the Kimball House, 8.30 to 12.00. Complimentary to Delegates and Visitors. Tendered by the Reception Committee.

MORNING SESSION—THURSDAY, MAY 26, 1904.

Executive—For jobbers only.

Meeting called to order promptly at 9.30 A. M. in the Breakfast Room, Kimball House.

Discussion of Committee Reports.

"Increased Expense Account and How to Reduce It."—Discussion opened by H. L. Anderson, Anderson Hardware Co., Atlanta, Ga.

Open discussion. Each speaker limited to five minutes.

"Employees Mutual Benefit Associations."—Discussion opened by J. Norman Wills, Odell Hardware Co., Greensboro, N. C.

Open discussion. Each speaker limited to five minutes.

Opening of Question Box.

General discussion.

AFTERNOON SESSION—THURSDAY, MAY 26, 1904.

Open Session.

Convention Hall—Ball Room, Kimball House.

Meeting called to order promptly at 2.30 P. M.

"Suggestions to the Buyer from the Traveling Man"—Frank Guildener, Sargent & Co., New York City.

"The Injustice of Associated Manufacturers Withholding Premiums from Jobbers on Account of the Purchase of Goods Other than Their Manufacture."—Discussion opened by Lee Richardson, Lee Richardson & Co., Vicksburg, Miss

Open discussion. Each speaker limited to five minutes.

Opening of Question Box.

General discussion.

EVENING—THURSDAY, MAY 26.

Banquet at Kimball House, Tendered by the Manufacturers.

MORNING SESSION, FRIDAY, MAY 27, 1904.

Executive—for jobbers only.

Meeting called to order promptly at 9.30 A. M. in the Breakfast Room, Kimball House.

Unfinished Business.

Miscellaneous Business.

General Discussion

Reports of Special Committees.

Election of Officers.

Selection of Place for Next Annual Convention.

Adjournment.

AFTERNOON—FRIDAY, MAY 27, 1904.

Trolley-Ride and Barbecue. Tendered by the Atlanta Jobbers to the visiting Jobbers, the Manufacturers, their Representatives, and the Ladies.

Street cars leave the Kimball House promptly at 11 o'clock A. M.

The programme has been prepared in a manner that will leave nothing to be desired by the delegates for whom it is intended. Every care has been taken that all the information that could be sought for will be found within its pages. In addition to what we present herewith, the full list of officers, committees and membership is included; the hotel rates of all the Atlanta hotels that have been agreed upon; the railroad rates from all points, and is concluded by a short and concise history of the Southern Hardware Jobbers' Association that has been carefully compiled and is so very complete, which will cause the souvenir programme to be preserved indefinitely.

AMERICAN HARDWARE MANUFACTURERS' ASSOCIATION.

OFFICERS, HEADS OF COMMITTEES AND EXECUTIVE COMMITTEE.

President—Julius C. Birge, St. Louis, Mo., St. Louis Shovel Company.

Vice Presidents—F. S. Kretsinger, Cleveland, O., American Fork & Hoe Co.; George W. Corbin, New Britain, Conn., Corbin Cabinet Lock Company; Henry B. Lupton, Pittsburgh, Pa., Oliver Iron & Steel Company.

Secretary-Treasurer—F. D. Mitchell, Philadelphia, Pa., Bourse Building.

Advisory Board—(Composed of former Presidents)—Fayette R. Plumb, Philadelphia, Pa., Fayette R. Plumb, Inc.

Chairmen of Committees: Membership—Edward Ingalls, Newark, N. J., The Atha Tool Company. Reception—Henry B. Lupton, Pittsburgh, Pa., Oliver Iron & Steel Company. Grievance—Oliver Williams, Catasauqua, Pa., Bryden Horse Shoe Company.

Executive Committee—C. W. Asbury, Chairman, Philadelphia, Pa., Enterprise Mfg. Company; Robert Garland, Pittsburgh, Pa., Garland Nut & Rivet Co.; N. A. Gladding, Indianapolis, Ind., E. C. Atkins & Company; W. S. McKinney, Allegheny, Pa., McKinney Manufacturing Co.; George P. Hart, New Britain, Conn., The Stanley Works; Wm. M. Pratt, Greenfield, Mass., Goodell-Pratt Company; E. G. Buckwell, Cleveland, O., Cleveland Twist Drill Company; E. B. Pike, Pike Station, N. H., The Pike Mfg. Company.

STOVES IN HARDWARE STORES.

Some Hardware merchants handle stoves and ranges. If all Hardwaremen knew how easily this line could be taken up and profitably sold, certain it is that more Hardware stores would carry a stock of these goods. If any class of Hardware could be called staple, especially for smaller city and country trade. certainly it would be stoves and ranges. Yet it is rather remarkable that upwards of one-half the Hardware dealers of the East do not handle them.

Stoves and heaters surely come under the general head of Hardware; and the Hardware store is the one where the buyer would naturally look for these goods. Yet there are in many cities and even large towns exclusively stove stores. In some of our Eastern cities it will be found that house-furnishing stores and even dry goods stores are working up a large business in goods that the Hardwaremen ought to control, and one such line is stoves. Let the Hardware merchant remember that every time a house-furnishing or dry goods store in any way enters his field, another wedge has been driven that will help to crack open the safe where the Hardwareman keeps his profits. And by giving these competitors a chance, by himself not fully covering the field, simply means that he is letting competition grow.

Some of the disadvantages to the stove business are quite apparent. The cost of distributing stoves is more expensive than some lighter and higher-priced goods, such as cutlery, tools, etc. Properly handling stoves would probably require at least an extra man. When a sale is made, the job is not considered as finished until the stove is set up—and some times a defective chimney will even then cause the dealer much trouble--and it is necessary for him to prove that the draft and not the stove is in the wrong. Then, too, it may be pointed out that the handling of stoves requires a large investment—that often they must be sold on installments—that no small amount of trouble is brought to the dealer in making his collections, etc. All this is true, but, on the other hand, the large business in stoves comes at a season when the regular Hardware business is dull. The sales made on stove repairs and fixings, of a good established stove trade, will pay the wages of an extra man—and if carefully looked after will show a good profit in addition.

Selling stoves and ranges will bring to the Hardwareman many new customers. When people begin housekeeping, one of the first things to be bought is the range. And to the Hardware store or house-furnishing store that sells that range will follow much other business from that same customer—and often the sale of that first range will result in a lifelong customer being made. The profit on stoves is good, while the profit from the sale of supplies is large. After the trade is once established the business is easily held. Ranges and stoves are always in demand; the goods are staple.

As in adding any new line, it is a good idea to put some one clerk in charge of that end of the business and let him keep thoroughly posted on the line. Get the right man, and the Hardware merchant will find the stove business a profitable adjunct to his regular trade. Care should be taken to get an agency for a well-advertised stove, and one that is high-grade. The best business can be built up on a line that will give entire satisfaction. More clean money can be made by selling the very best stoves, even if the price is somewhat higher than that at which an inferior grade could be sold.

As in every other business, one of the best advertisements a store can have is a pleased customer--this is especially true when a new line is being added—and even more true of a line such as stoves and ranges than of almost any other goods. For this reason it is of utmost importance to sell stoves that will give the best of satisfaction.

The Hardwareman should let the people know that stoves are being sold by him. He must advertise this branch of his business. In addition to the usual advertisement in his local paper, it will be found profitable to mail a small card or circular throughout his locality, announcing the fact that stoves have been added to his stock. Something like this will be found affective:

> The Progressive Hardware Co. takes pleasure in making the announcement that a complete stock of the famous "GOOD BAKER" RANGES has been added to their up-to-date Hardware stock. For Cooking Qualities these Ranges are unequalled. We take pleasure in showing and explaining why.
>
> The Progressive Hardware Co.
>
> "The Hardware Store."

It is a good idea in all the store advertisements to insert a line such as "The Hardware Store" or "Everything in Hardware" that the fact may never be lost sight of that Hardware is the store's business.

It will be found that in many ways the selling and handling of stoves will contribute directly and indirectly to the regular Hardware business. The experience of Hardwaremen who have added stoves and ranges to their business, and have carefully looked into the trade, and pursued some such method as outlined here, is that they could not afford to run their store without having stoves to sell, any more than without nails or screws. They consider stoves as staple Hardware.

Hammernail.

GOOD ADVICE.

President Mellen, of the New York, New Haven & Hartford Railroad, gave a striking address to the workingmen of Hartford. at their invitation, on April 28. He was himself, he said, a workingman, the son of parents who had to work. This was the age of the workingmen. Modern industrial combinations were creating more high positions than men could be found to fill. He had no prejudice against unions, though he would not consent to discrimination between union men and non-unionists. "My advice to you who have families, who have a stake in the world, is to join your unions and make yourselves felt in them. Be always a force for conservatism. Your apathy is the opportunity of the demagogue, the anarchist, the floater, who has nothing to lose. I desire to go on record here in declaring that arbitrary, unreasonable exercise of power by those temporarily in authority is as offensive to me as to any of you. and I am disposed neither to countenance nor condone it." "The trouble with unionism," he said, "is its intolerance. * * * The cry of 'The union or the hospital' has its counterpart in that of the older one of 'The Church or the stake.'" He thought no one interest had done more to promote the trusts than organized labor. It had forced them into existence for protection from exaction. Conservative leaders must replace the hotheads if the unions were to avoid defeat.

"The great progress made by organized labor, to my mind, has been not by securing an increase of wages here and there, but by attracting the attention of such minds to a study of the conditions that have produced the present state of unrest. * * * Cease to be suspicious of the man who has been able to pass you in the struggle of life. * * * The rich man of today can accomplish less than at any time in the history of the world, and the restrictions placed about him are growing greater with every year * * * What is the end to be accomplished by us one and all in the life we lead here? Is it that we shall rob each other like brutes by the exercise of force, as too many seem to think; or shall we as we go along help each other, reason out our difficulties, bear with each other?"

SUNDAY A DAY OF REST IN SPAIN.

The law recently approved making Sunday a day of rest has been published. Manual labor is prohibited. Work on Sunday will be permitted only when absolutely necessary, the hours to conform with the regulations. On no account are women or persons under 18 years of age to be employed on said day. The law will be put in force within six months.—*R. M. Bartleman, Consul, Cadiz, Spain.*

♣

Mrs. Newed—Norah, my husband and I have both noticed that all the neighbors stare at us very hard. I hope you haven't been telling anybody that we are newly married?

Norah (a local simple)—Me tell 'em, mum? Agin your express orders? Why, whinever anybody thried to pump me, I told 'em you wasn't married at all.—*Scraps.*

♣

The girl we all like knows nothing of love, but is willing to learn.—*Life.*

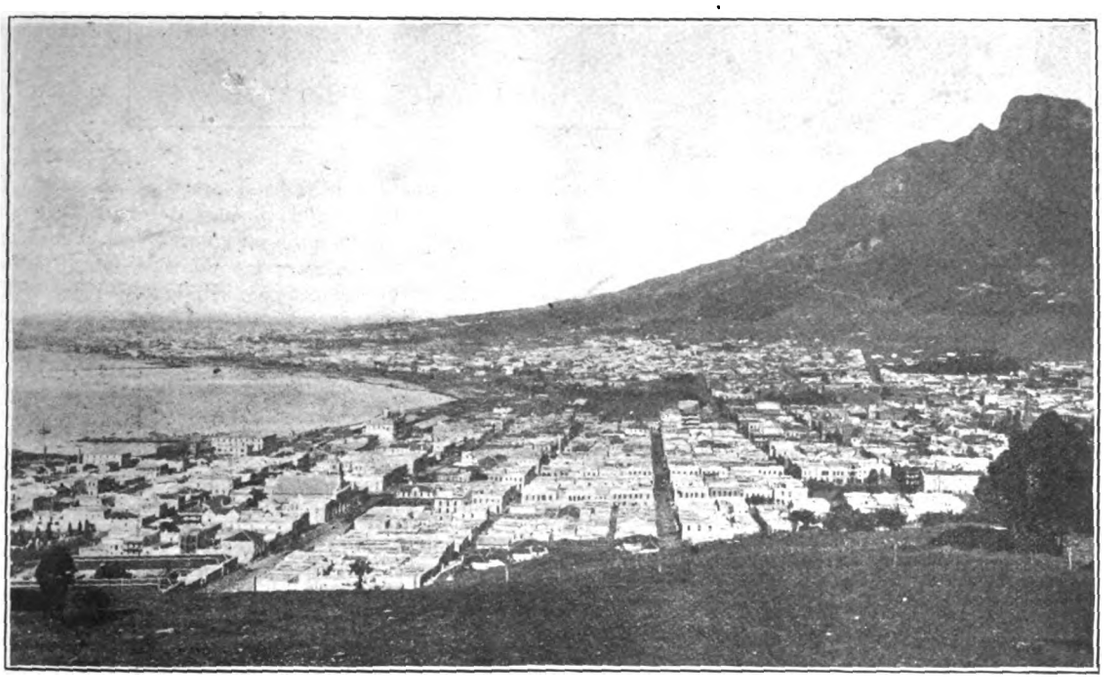
THE IRONMONGERY BUSINESS IN SOUTH AFRICA.

By GEORGE CECIL.

A FINE DEMAND.

Properly worked, the ironmongery trade in South Africa is capable of yielding very large profits, for the demand for Hardware all over the country is immense, whilst the present facilities for supplying it are small. Indeed, the retailers in the big cities, such as Capetown, Johannesburg and Pretoria, are often at their wit's end to satisfy the demands made upon them by their customers. Farming operations are sometimes suspended for weeks together—owing to the inadequate stock of spades and hoes available; similarly, housewives have to do without pots and pans at critical moments, and plumbers and carpenters are obliged to decline urgent work for lack of suitable tools. As may be imagined, all this leads to considerable inconvenience, dislocation of business, wear and tear of temper—and general profanity.



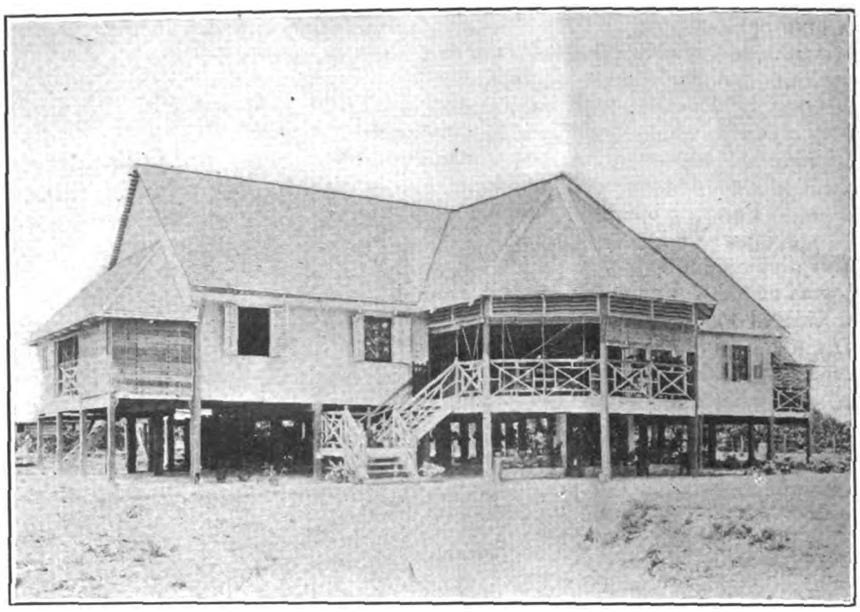
BAD BUSINESS METHODS.

The stupid fashion in which the average South African tradesman conducts his affairs is largely responsible for this unsatisfactory condition of things. Instead of intelligibly anticipating the demands likely to be made upon him—and providing against these before hand, he waits until his stock has become practically exhausted before he begins to think about replenishing it. Then, one fine morning, he wakes up and sends frantic cablegrams to the manufacturers in England and America for fresh supplies. Of course, it takes weeks before these arrive, and when they do put in an appearance it is generally too late for them to be of any use. The stock thus acquired accordingly remains on his hands, and he has eventually to dispose of it at a loss. Another fatuous practice common among the local retailers is to ignore their customers' requirements and send for the wrong sort of goods altogether. Thus, if hammers and nails are urgently required in a certain district, they import at great expense a vast quantity of crow bars and rakes. Even if they do display sufficient intelligence to procure hammers and nails, or whatever it is that is wanted, they purchase an unsuitable description. The fact is, the average Hardwareman in South Africa has a rooted antipathy to taking trouble—he wants to make a fortune without working for it. The British Colonies are the last places in the world where this can be done.

Quite lately the English Board of Trade despatched a special commissioner from London to study the industrial conditions of South Africa. In his report on the subject this matter of commercial apathy was fully discussed. The commissioner, however, paid a high tribute to the American firms doing business in the country. Nearly everyone of these, he observed, conducted their affairs with an intelligence and enterprise infinitely in advance of any such qualities displayed by their competitors of other nationalities. He also stated as his firm conviction that the Hardware trade was capable of much further development, especially in the "up country" districts.

TRADING OBSTACLES.

After the singular business methods already referred to, the chief obstacle in the way of building up a profitable ironmongery trade in South Africa is the non existence of suitable transport. The local railways, for example, are slow, while their spheres of operation are very limited. Their freight charges, too, are extremely heavy, whilst this is also the case with regard to the steamship companies. It is a fact, however, that it costs less to import goods from America than it does from England, as the various British lines catering for the South African market are about a hundred years behind the times; the United States lines, on the other hand, are up-to-date. Instead of seeing that the proper thing to do is to reduce their charges to reasonable dimensions, the English shipowners bitterly complain about "unfair competition;" similarly, the manufacturers bewail the "lack of patriotism" evidenced by the consumers. This, of course, is the merest moonshine, for the colonist naturally sees no reason for spending more money than is necessary. His aim—like that of any other sensible person—is simply to get the best goods at the lowest price, irrespective of whether they have been manufactured in England or America.



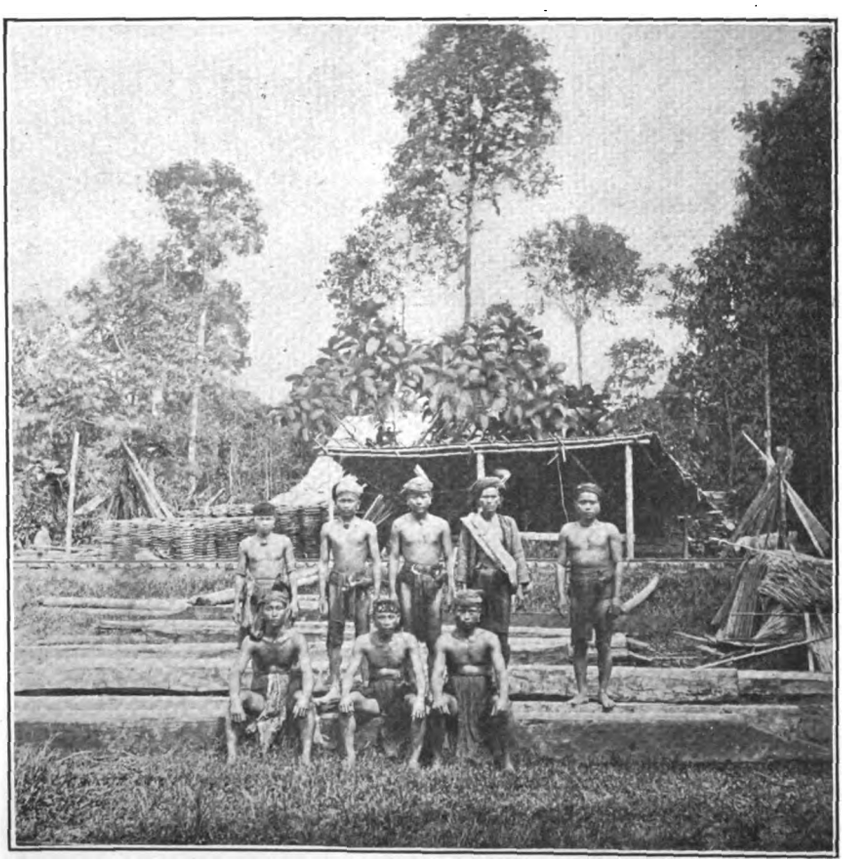
VIEW OF CAPETOWN.

LOCAL MARKETS.

The centre of the ironmongery trade in South Africa is at Capetown, and all the leading stores have their premises in Alderley Street, the principal thoroughfare. It may be added that Alderley Street thinks a great deal of itself. To be candid, however, it would not do more than equal a fifth rate street in a sixth rate American city—the prevailing architecture, for example, would give any man of taste a series of fits. The lighting, too, is disgraceful, and an excursion from one side of the street to the other is apt to land the unwary pedestrian into the middle of an open sewer. Capetown, however, is very proud of it, and thinks that it is unequalled for beauty combined with convenience either in this world or the next. Other thoroughfares favored by local ironmongers are Market Street and Green Point Street. The buildings in which they do their business are for the most part commodious and well appointed.

Digitized by Google

The Capetown Hardware merchant finds many of his best customers in the surburbs. Among the most popular of these is Wynberg, about nine miles away from the city, which is connected with the Metropolis by a fairly efficient railway line. It is worth noting that the Dutch farmers, who live in the neighborhood regard a train as an invention of the Evil One and always travel in cumbersome ox wagons. It is quite a common sight to see a long line of these waiting outside a store, and when they have been loaded up with purchases they start off again to an accompaniment of much whip-cracking, mingled with the oaths of the Kaffir drivers. Sometimes an insecurely fastened collection of pots and pans falls with a vast clatter into the roadway, and considerable delay ensues before they are placed in position once more.



IRONMONGER'S RESIDENCE.

THE TRANSVAAL.

Where commerce is concerned Johannesburg affects to turn up its nose at Capetown, but there is some reason for this uncomplimentary attitude towards the older city, since it undoubtedly does twice as much trade. As a town however, it is a horrible place to live in, being afflicted all the year round with violent sandstorms and every other drawback that makes life in South Africa a purgatory. The residents are confined almost exclusively to people interested in gold mines, though a few miles away from the city there is a large farming community.

ADDITIONAL BUSINESS CENTRES.

Other places in South Africa where the enterprising ironmonger can do a brisk trade are Pretoria, in the Transvaal, Durban, in Natal, and Bloemfontein, in the Orange River Colony. These are all important towns and afford a ready market for the sale of every description of Hardware from frying pans to fire grates. Kimberley, King Williamstown and Port Elizabeth are also worthy of attention, and profitable business is sometimes done with the small "up country" towns of Mafeking and Bulawayo. In trading with the remoter villages and solitary farm houses it is the custom to send round a wagon load of samples for the inspection of the prospective buyers. It is necessary to despatch with it

GROUP OF NATIVES, NOTED AS SHARP BUYERS.

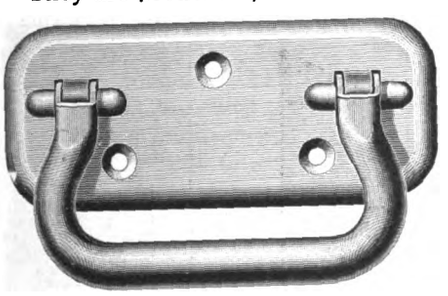
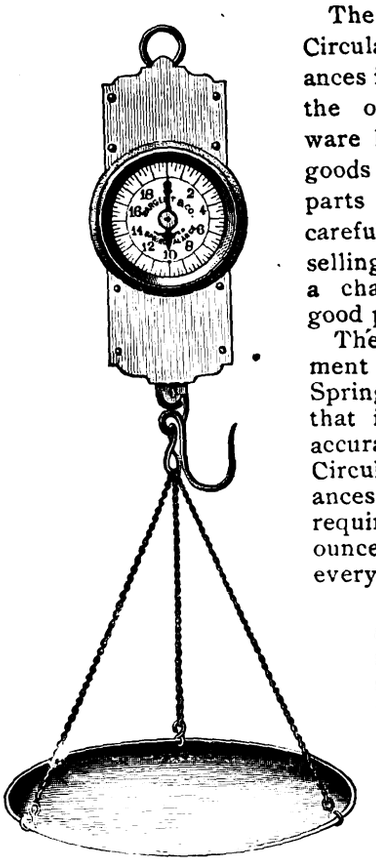
Our EC---Edgewood Design



Is a Particularly Good Seller

It is made in wrought steel and wrought bronze and is a very attractive, low-priced design; the Escutcheons are made in several sizes. Both Oval and Round Knobs can be furnished as well as the other trimmings needed to fit out a building. Your jobber can supply you with this design promptly.



Steel Chest Handles

Order a sample lot and display them; you will find that they sell.
They are profitable, too.

We make three sizes in all the desirable finishes, and also have them ornamented and with difierent styles of plate. They are very strong.

Sargent's Spring Balances

With Enameled Front, Round Pan.

The purchase of Circular Spring Balances is a little out of the ordinary hardware line; they are goods with delicate parts and should be carefully selected. In selling them there is a chance to make good profit.

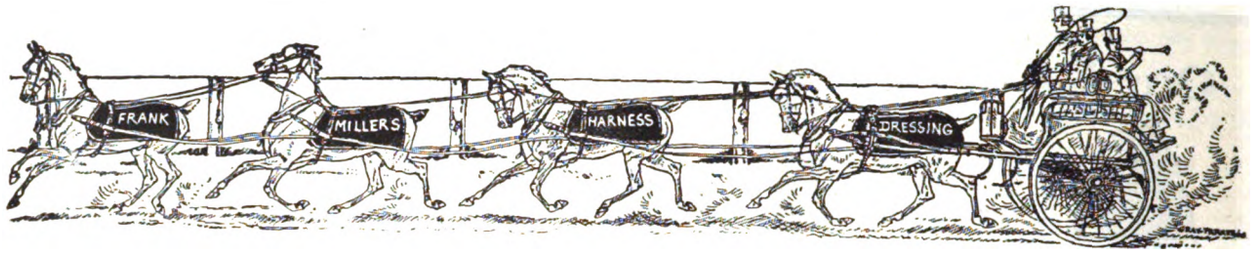
The first requirement of a Circular Spring Balance is that it shall weigh accurately. Sargent's Circular Spring Balances answer this requirement--sixteen ounces to the pound every time.

Again the balance must be strong in its construction so that it will withstand the wear and tear of almost continuous use. Sargent's Balances fill the bill in this respect—they are strong and durable.

Finish goes a long way in these goods and the finish of our balances is first class; they are made in a variety of styles, with brass front and enameled front, round pan and square pan. All are warranted.

We make also Pocket, Round and Straight Balances in various styles, also Scale Beams.

Sargent's Gem Food Chopper



Do not put it on the Top Shelf Now.

'Tis true Summer is almost here, but we advertise the Gem in the magazines all summer, and the busy housekeeper finds much use for it in warm weather as she does in other seasons. The Gem Chopper Cook Book, which so many women are sending for, has numerous receipes which require the use of summer vegetables; it is during the summer that preserving and pickling are done and the Gem is indispensable at that time. So keep it to the front; you will find that it is a steady all-the-year seller.

(*Concluded from page 34*)

a commercial traveller capable of speaking Dutch, for the average farmer's acquaintance with English is usually of a very elementary description.

TRADE TRICKS THAT WON'T WORK.

A common mistake made by Hardware merchants desirous of establishing a trade in South Africa is that the inhabitants of the country districts are little better than lunatics and that they will believe anything that is told them by a pushing salesman. This is not at all the case, for they are in reality exceedingly shrewd business men, given to driving hard bargains, and insisting on being supplied with goods answering to the scheduled description. Accordingly, to attempt to palm off on them anything of a second rate quality is simply a waste of energy. No Dutchman will conclude a transaction until he has looked at least twice at his money and three times at what he proposes to buy.

DELIVERY OF GOODS.

The chief demand in South Africa for ironmongery goods is for farming implements. There is also a ready sale for carpenter's tools, kitchen utensils, locks and bolts, lamp fittings, safes, bells, tin deed boxes and cutlery. All such goods have to be delivered free to the nearest railway station, but from this point to his own address the carriage is paid by the purchaser. The usual practice is for the customer to send his servants and wagons to fetch them from the station. Of course, in the case of customers living in the same town as that in which the store is established, no charge at all is made for forwarding goods. Packing cases, however, have to be returned, or their cost made good.

TRADING SYSTEM.

Ready money is paid almost invariably, for the credit system scarcely obtains at all. This circumstance prevents a tradesman making bad debts and materially assists to keep him on the right side of the Bankruptcy Court. Needless to say the discount that is allowed for prompt settlement appeals favorably to the frugal minded "Africanda." Another business custom—and one recently introduced into the country by American firms—that has gained much favor is that of sending goods on approbation. The reflection that he can inspect an article at his leisure before actually putting down cash for it proves almost irresistable to the average farmer. It gives him, too, a great idea of the integrity of the firm seeking his patronage.

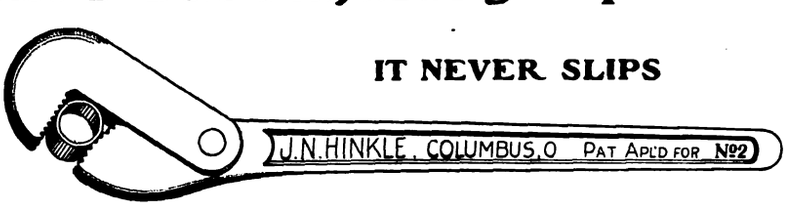
MISTAKES OF ENGLISH FIRMS.

It is not at all improbable that one of the reasons why British firms doing business in South Africa refuse to conform to this practice is because their goods seldom stand the test of detailed examination. In the report of the Board of Trade Commissioner, of which mention has been made, special attention was drawn to this:—cases, it was pointed out, continually occurred of improper descriptions being applied to articles indented for; the accompanying invoices also frequently proved quite incorrect. People who live in the country districts of South Africa have necessarily to depend to a great extent on the probity of the commercial houses they patronize, and they are also obliged to order the majority of their supplies by catalogue. When they find that these are not drawn up with a strict regard for accuracy—and that the discrepancies are always against the customer—they naturally object to dealing with firms that adopt such tactics. They find, however, that the American firms can be fully relied upon, and accordingly give them their patronage.

MILITARY CUSTOMERS.

The Hardware merchants in South Africa find excellent customers in the military authorities, for the various barracks and regimental establishments scattered throughout the country require a large stock of ironmongery every year. The greatest demand is for tin brackets, zinc tubs, door handles, window-fittings, locks and keys, cutlery, and plates and basins of enamelled iron—for soldiers are remarkably destructive of such articles. As a rule tenders are invited for the supply of such goods for a term of three years at a time. They are particularly advertised for in the leading papers and are issued at Capetown under the authority of the General Officer Commanding the Military Forces in South Africa. The main essential in carrying out these contracts satisfactorily is ability to supply first class goods and to deliver them promptly. The business is a very remunerative one, and there is keen competition among the local firms to secure it.

RAILWAY AND MINING CUSTOMERS.



Large orders are also given to ironmongery houses in South Africa by the railway and mining departments. The former of these is controlled by the Government and the latter by private enterprise. Several American firms in the Transvaal and elsewhere have already established a sound connection with this business and are extending it rapidly. When carried out on the proper lines there is a lot of money in this class of trade:—the profits, however, would even be larger were it not for the freight charges generally imposed. Before very long, fortunately, these will be reduced considerably.

WESTERN BRASS MFG. WORKS.

Western Brass Mfg. Works, 63-65 South Canal Street, Chicago, Ill., in their 1904 catalogue exploit their line of brass, bronze and iron Hardware for architects, builders, and makers of store, office, cabinet and saloon fixtures, including arm stair and foot rails with patent lifting or stationary brackets, railings, refrigerator trimmings, latches, hinge-pulls, etc., etc., all of which they manufacture and carry in stock. The catalogue contains 94 pages, is well arranged and described and is profusely illustrated. All of their Hardware can be had in any metal and finishes. All their latches and hinges are made for flush or overlapping doors. Hinges can be had with brass or steel fast pins, or with ball tips and loose pins. The above-mentioned catalogue represents only a few of the goods manufactured by the Western Brass Mfg. Works; other designs and styles can be had on application; also special work of all descriptions; pattern making and experimenting. They state "No order too large for our capacity, none too small for our best attention." The book will be found useful to those interested in this line and may be had upon request.

Hinkle's Self-Adjusting Pipe Wrench

No Small Screws to Break, No Repairs to Make.

(*Continued from page 30*)

sion at its meeting held recently relative to storage charges inflicted by the Southern Railway in South Carolina and Georgia is thought by local dealers to tend toward a cessation of the discrimination against New Orleans which this road has exercised in the so-called Southeast territory.

GREATER NUMBER OF JOBBERS IN THE COUNTRY.

Good crops during the past season, and prospects for a large crop in the season to come, has resulted in a wonderful increase in the number of persons and firms who have qualified themselves to take advantage of jobbers' rates and freight tariffs. The trade of the city is particularly commenting upon this, and upon the increased stocks which are being carried in many of the towns of Louisiana and Mississippi.

These features are peculiarly applicable to the larger towns of the cotton belt. Jackson, Miss., is said to have increased the stocks it is carrying at least 40 per cent. over the stocks carried in 1903. Alexandria, La., and Shreveport, La., and Vicksburg, Miss., are all said to be in this category, while Hattiesburg, Gulfport, McComb, Crowley, Franklin and other towns in the two States are also larger distributors of material than ever before.

This increased trade has benefited New Orleans, save with Jackson, Miss., which has exceptional railroad facilities to St. Louis, Birmingham, Chattanooga, and other centers of the manufacturing interest. As a result she has been able to procure rates which rather discount the advantages which New Orleans has to offer.

THE CAPETOWN EXHIBITION.

There is every indication that the International Industrial Exhibition, promoted by the Traders' Markets and Exhibitions, Ltd., to be opened on Green Point Common, Capetown, South Africa, in November next, will be a great success. Indeed, the space at the disposal of the promoters has been found to be so limited that additional facilities are actually being sought for the convenience of intending exhibitors. British manufacturers will, of course, be well represented, but there appears to be an unexpected demand from Belgium, France and Germany. This latter will be counterbalanced, to some extent, by Colonial requirements, which are not by any means inconsiderable. One of the directors of the Exhibition Syndicate, in fact, is already in Canada in order to arrange business with manufacturers in the Premier Colony. Another director is in charge of the catalogue, which promises to be extremely voluminous. J. W. Jagger, M.L.A., Chairman of the Associated Chambers of Commerce of South Africa, has been elected chairman of the advisory committee in Capetown of the Exhibition, and has consented to act in that capacity.—*British and South African Export Gazette.*

AGRICULTURAL STATION IN MEXICO.

Wm. W. Canada, Consul, Veracruz, Mexico, under date of March 14, 1904, says:

The Mexican Government has conceded to one of the numerous plantation companies on the Isthmus of Tehuantepec the privilege of establishing an experimental agricultural station, to be managed as such stations are conducted in the United States. The parties interested in the enterprise will invest an amount sufficient to cover the cost of erecting the necessary buildings. The Government is then to make an annual appropriation of $10,000 Mexican currency ($4,430,000) for its maintenance for five years, during which time the institution will be under the control of the plantation company. At the expiration of that time the station becomes the property of the Government. Experiments are to be made in all lines of agriculture by the owners of the plantation. Other planters desirous of making use of the facilities offered will be required to pay for the services rendered, until such time as the property becomes a Government institution, when it is to be managed in the interests of and free of charge to the general public. However, the promoters of the scheme will issue and distribute a monthly bulletin gratis to all planters.

A COLONIAL TUBAL CAIN.

Written for HARDWARE.

Joseph Jenks, the first American smithy, was a man of many parts. He cast pots and kettles, made dies for coins, turned out shackles and hatches for pirates, "a fire ingin" for ye town of Boston, promoted the first iron trust, lobbied in the halls of the honorable General Court of Massachusetts, dug bog ore and made it into iron, violated the Puritan law by staying away from church, saved his son's head which was endangered by a charge of treason, served as governor and did divers other things of greater or less import, as well as establishing an industry which is great, varied and prosperous to-day. So Joseph Jenks, despite his commonplace name, was a mighty man.

Of good old English stock Jenks came, and suggestive enough of his calling, he was born and reared as a smith in Hammersmith, ENG. He came to this country in the early part of the 17th century, soon being one of its early settlers, and he settled in Lin, now Lynn, Mass., the Queen Shoe City of the world. He became a most valuable man in the colony, for, as might well be imagined, housewives' pots and kettles and mechanics' tools were as rare in the villages of the new country as is Radium to-day, and Jenks set about to relieve this scarcity. He established his forge on the banks of the Saugus River, whose bogs contained much iron ore, and there began his tasks which brought him fame and fortune, as such prizes were in colonial days. By the crudest methods, he extracted ore from the river mud, and from it he first cast an iron kettle which is still preserved as a priceless relic among his descendants in Lynn to-day.

But plain Joseph Jenks, though he began by casting an humble kettle, was an ambitious and shrewd man, shrewder than the canny Carnegie, the giant Morgan or the erratic Schwab, or other iron masters and kings of finance of to-day. He organized a trust and monopoly that makes their efforts look like a game of Pit. He promoted a "Company of Undertakers," and, in 1645, he obtained from the General Court of Massachusetts such vast grants as the sole privilege of making iron, and the exclusive rights to all iron mines then known or afterwards discovered within the jurisdiction of the Court. Lucky for Massachusetts, no rich deposits of iron ore were discovered in her hills in Jenks' day. Incidentally, Jenks also got for his company exemption from all taxes, assessments and water public charges, and freedom of his workmen from the military services required of all men of that time. Also, he secured six grants of land, each of six miles square, in places which he might select as best adapted to iron working. Other trifling details he also obtained such as rights to waterways, highway and other little necessaries to his business. The franchises which corporations of to-day secure from legislatures are trifles compared with the gift which Jenks won. To obtain his privileges, Jenks represented that his "Company of Undertakers" was a public benefactor, as have trust magnates done likewise since, but the wise legislators of our forefathers' day, with more acuteness than their like of to-day, got a cinch on Jenks' schemes that bound him as a public servant. They require him to agree that he devote his abilities to developing iron workings, and they fixed a limit on his selling prices, that of iron itself being at $100 per ton, a reasonable price for those times. They also required him to provide places for devout worship by his workmen, having the same care for the spiritual welfare of the employees as legislatures have of their bodily welfare to-day. The books of the company were to be open to all people, but the company managed to freeze out the outsiders by requiring that each purchaser of stock pay a proportionate part of the money already invested and of the losses already sustained.

It appears that Jenks set himself to develop iron working as his agreement with the General Court provided. He built a foundry and machine shop on the banks of the Saugus River that was considered as important in colonial days as the U. S. Mint is to-day, according to ancient chroniclers. He first cast some pots and kettles and household utensils, which the Puritan housewives much needed for cooking corn, venison, and their puddings in the old-fashioned open fire places. Then he devoted himself to making tools of which the mechanics were in want. He invented a scythe, which the tillers of the soil considered "a marvelous ingin for cutting hay." He also made valuable edge tools. He devised a "sawemill" to go by water power. In gratitude for his efforts, the General Court provides that he might continue "for fourteen years without disturbance of any other's setting up a like invention, that so his study and costs may not be in vayne or lost." However, the shrewd colonial legislators again got a cinch on the inventor's neck by reserving the right to restrict the export of his product and, also, to moderate his prices, if need be.

Jenks next turned his mind to money-making, not piling up a surplus for his "company of undertakers" or watering stock, but by aiding the colonial government to mint much needed coins. He made the dies of the celebrated Pine Tree shillings, which Capt. Hull minted, tucking one into his own pocket for every ten that he minted. It was of these same shillings that the mint master gave his fair daughter, Betty, her full weight for her dowry, as Hawthorne tells the story. Coining this money was treason to the crown, by the way, but the bold colonists shrewdly made it look like a compliment.

Incidentally, be it understood, Jenks was twice married, he having buried one wife in old England, and found another in the New World. He had three sons and two daughters, and family troubles, like other fathers. His bold son and namesake chanced to remark, perhaps during a heated political argument at the smithy, that "were King Charles in this country I would like to cut off his head and use it for a football." This was treason to the crown, though good Puritanism, and all the talents of Jenks, Sr., were necessary to save the headsman of Charles II from doing to Jenks, Jr., as Jenks, Jr., would have done to the king.

The pretty young wife of Jenks, Jr., also transgressed the law, the Puritan code, by the monstrous crime of "wearing silver lace." The fair Esther was "presented to the Quarterly Court" for her crime, but it is not recorded that she was punished. It also appears that, along in 1651, Jenks then being governor, as well as a captain of industry, had a Baptist whipped thirty stripes, so severely that the poor victim had to rest on his hands and knees for a week, being sorely flayed to touch any part of his body to the bed, and in that humble attitude to consider the wisdom, or the folly, of departing from the legally prescribed faith and belief of the colony.

In 1654, the inventive Jenks made the first fire engine in the country, the selectmen of Boston contracting with him for "an ingin to carry water in case of fire." Tradition also adds its interest to the smithy of Jenks. One day, a strange, low cut, dark looking ship moored off the mouth of the Saugus River, and at night a boat load of pirates came up the Saugus, landed, and left a note demanding that a certain number of shackles, handcuffs and hatchets be left in a secret place, where a liberal quantity of silver would be found in payment for them. The goods were made and delivered and the silver taken in payment. The pirates evidently liked the locality so well that they made their headquarters in the woods nearby, at a place now known as the Pirate's Glen. But the king's officers speedily discovered and captured them, all but one, and hanged them. The one found refuge in Pirate's Dungeon, and lived as a hermit until a landslide swept retribution over him. In recent years, a dreamer, directed by spirits, endeavored to locate the grave of the pirate, and his buried treasure, and tunneled out a great hole in Dungeon Rock, but he only succeeded in creating a public amusement.

But, to return to the stern realities of the first smith's life, he was, on November 25, 1665, summoned to the Quarterly Court, which high tribunal admonished him for his failure to attend public worship. Perhaps Jenks was engaged in plans more vital to his worldly than his spiritual welfare, for two years later he petitioned the General Court for aid in

Digitized by Google

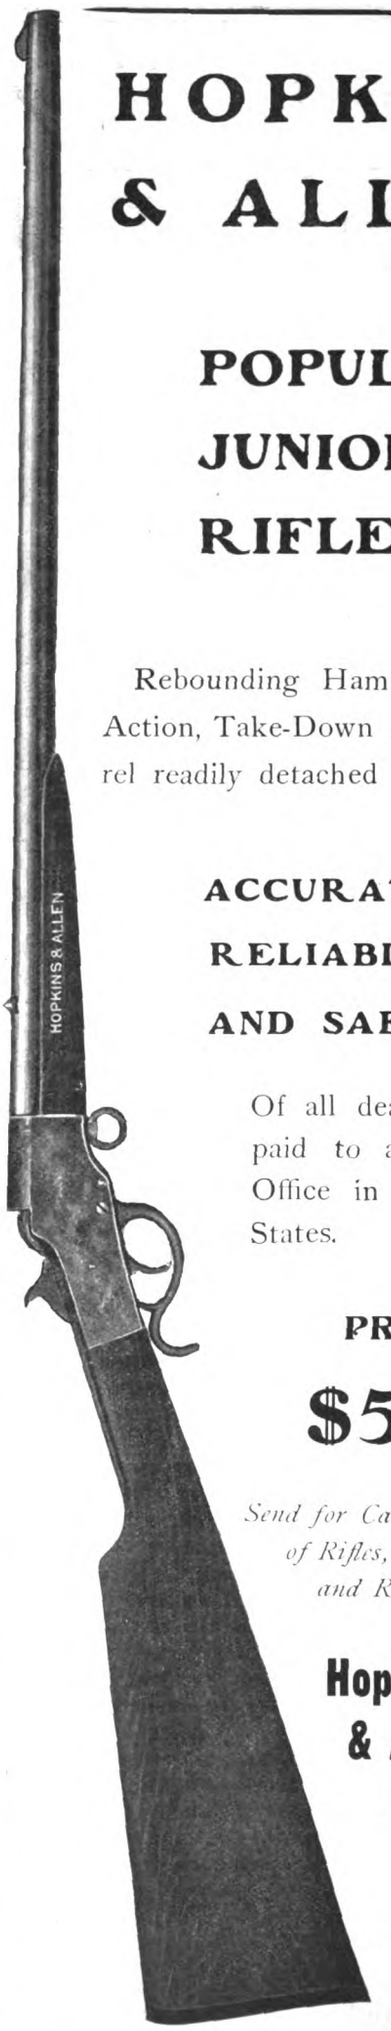
establishing a wire factory, but he was refused the desired assistance. The star of the colonial Carnegie must have been waning at this time, for his proposal to coin money was also rejected, the General Court judging it "meet not to grant his request."

His iron works, started under such auspicious circumstances, also began to decline in value. Like other monopolies, the "Company of Undertakers" evidently thought it owned the earth and all there was in it, for it encroached upon the property and rights of others, and otherwise made itself obnoxious to the public mind. In particular, it allowed the water of its dams to overflow the fields of the farmers. The hardy tillers of the soil would not stand this trespass, and they sued the company, or, not caring to await the law's slow process, they cut the dams in the darkness of the night, and the water flowed from off their lands. The people also began to fear that the company might use up all the woods of the forests in their furnaces.

The company insisted on cash payments, which was contrary to the colonial custom, and the General Court notified the company that, if terms of sale were not made more reasonsable, the people would get their iron in other places by "our corn and staves, etc." (payments were then made in corn, pelts, or other means of barter). It sagely argued, too, "that, if a man live where an ax is worth but 12d, yet it is never cheaper to him who cannot get 12d to buy one." In the opinion of the Court, money was never plentiful enough to supply the occasion, a common sentiment and experience to-day. Law suits against Jenks' company began to pile up so that one sturdy colonist remarked that the company, "instead of drawing out bars of iron for the country's use, hammered out nothing but contention and law suits." Outraged public sentiment became too great an obstacle for the welfare of the company and it died. Its ghost was revived in subsequent years, but in the middle of the 18th century all that Jenks built and dreamed of had disappeared and was buried beneath irregular mounds of bog ore. These mounds may still be seen along the banks of the Saugus to-day. Descendants of Jenks abound, and those who are acquainted with his history hold him a mighty man, even for a smith. Perhaps the trade of to-day may forgive his faults and look up to him as the father and founder of their prosperous industry, for in his life he played many parts. F. A. G.

CATALOGUE SHOULD STATE PRICES.

Paul Nash, Consul-General, Bangkok, Siam, in a recent letter, says:



I have had many complaints from prospective buyers that in the greater part of the catalogues issued by our manufacturers there are no price lists attached, but a note saying that such a list would be sent upon application. This means a delay of three months before an order can be given, and from five to six months more before the merchandise is received here. Under these circumstances it is not surprising that the merchant should prefer to order from catalogues where the prices and discounts are already stated. I am quite sure that if all our manufacturers would do this it would result in more frequent orders from the Far East.

✤

The American Sheet & Tinplate Company and the American Sheet Steel Company, of Pittsburgh, Pa., are issuing a series of Booklets, in the usual artistic style for which these companies are noted in their several publications. They are for the use of builders and dealers, and contain a brief history of Iron, especially in its application to Roofing. The contents embrace, under the head of "How to Construct a Tin Roof," a large amount of technical information regarding black and galvanized iron, steel sheets, roofing tin, etc. These booklets will be sent postpaid to any person interested who will forward his name, occupation and address to W. C. Cronmeyer, Advertising Agent of American Sheet & Tinplate Company, Pittsburgh, Pa.

REVIEW OF THE MARKETS.

WIRE NAILS. There is less eagerness manifested in the Wire Nail market than was expected to open the May demand, although deliveries on contracts already booked keep the mills busy enough to prove satisfactory, the market being exceptionally strong and steady. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.90
Retailers, carload lots	1.95
Retailers, less than carload lots	2.05

New York. The absence of labor disturbances makes the local market feel a greater degree of confidence, and while the demand is not of a hustling character, greater activity is looked forward to. Quotations are as follows:

Single carloads	$2.10
Small lots from store	2.20

CUT NAILS. The market on Cut Nails is not excessively brisk, a fairly light demand keeping quotations well sustained, the mills being kept busy on orders already in hand. On either Steel or Iron Nails, with no discrimination as to locality, quotations are as follows:

Carload lots	$1.75 base
Less than carload lots	1.80

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. The local demand is a normal one, remaining as previously quoted, with quotations as follows:

Carloads on dock	$1.89½
Less than carloads on dock	1.97½
Small lots from store	2.05

BARB WIRE. The mills are experiencing a slight slackening in the demand which enables them to catch up with their back orders. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.20	$2.50
Retailers, carload lots	2.25	2.55
Retailers, less than carload lots	2.35	2.65

SMOOTH FENCE WIRE. The demand has let up to some extent and as the mills have a lot of business booked for future delivery, they are able to catch up on their orders. Quotations are as follows, f.o.b. Pittsburgh, terms, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.80
Retailers, carloads	1.85
Less than carloads	1.95

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BINDER TWINE. The prices announced by the International Harvester Company have been generally adopted throughout the West. Eastern prices are, as a rule, ¼-cent less, caused by the difference in freight between Chicago and New York. It is expected that the demand will be largely confined to Standard Twine, with but little call for Manila. The market is quite firm at prices announced by the Harvester Company, as follows:

	Cents per lb.
Sisal	10¼
Standard	10¼
Standard Manila (550 feet)	11¼
Manila (600 feet)	12¼
Pure Manila (650 feet)	13¼

Five-Ton lots, ¼ cent less; carload lots, ¼ cent less. Kansas City, Minneapolis, Omaha, Council Bluffs, ¼ cent higher. Pacific Coast points, 1 cent higher.

CORDAGE. There is but little change in the market prices of Cordage outside of the fact that any quality of so-called "Manila" Rope can be obtained. The Pure Manila and Sisal Rope holds up well at prices previously quoted. The following quotations represent the market, the usual rebate of ¼-cent per pound being given to carload buyers:

Pure Manila, 7-16-inch and larger	12
⅜ inch	12½
¼ inch and 5-16	13
No. 2 Manila	10@11
Pure Sisal, 7-16 inch and larger	9¼
No. 2 Sisal, 7-16 inch and larger	8¼
⅜ inch	8¾
¼ inch and 5-16 inch	9¼
Lath Yarn, Medium and Coarse	8½
Jute Rope, No. 1	6½
No. 2	6

LINSEED OIL. The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE CLEVELAND TRADE.

"Winter lingers in the lap of Spring," and materially affects trade. We have been treated well so long that it seems like disaster to hear complaints. That wheat is injured in some sections is becoming manifest and has some influence. The United States Steel Co., failing to close its option for steel, has a depressing effect in that line. Unusual sadness is caused in Hardware circles in this city by the death of William Bingham, who was a leader in the trade and a citizen of high repute. Jobbing Hardware houses were closed in his honor during the funeral services. His manly life was an inspiration and his memory will be helpful. In many lines, factories are still unable to supply the demand for goods and this makes sales smaller. Purchasers want prompt shipment, showing that the demand is for use. Most dealers have been too conservative in buying which encourages the hope that if Spring ever comes, the demand will increase. It is a good time to keep up stock, as goods will be wanted in increasing quantities before the Summer months and parties having the goods will get the business. Amid the wreck of trusts, the country still lives and seems to be able to digest them. Notwithstanding the present depression of the steel trade, optimism is better than pessimism to predict the future. Bad crops may affect localities, but diversity of crops and extent of country will prevent disaster. Speculation based on short crops is usually unsafe.

The Lockwood-Taylor Hardware Co.

THE CINCINNATI TRADE.

The month of May opened in splendid shape in every way; the crops generally bid fair to be large, the farmers having planted extensively, Kentucky probably being the only one of the Middle States short on wheat. George W. Davy, financial agent of a big life insurance company, said: "There is less demand for farm loans through Ohio, Indiana, Kentucky, Tennessee and Georgia than I have ever known, but in Illinois, Wisconsin, Minnesota, Kansas, Nebraska, South Dakota and in Northern Missouri the demand for money on farm mortgages is almost unprecedented. Two years ago we loaned $750,000 in Iowa. Last year we loaned $3,000,000 and in Minnesota it ran about the same way." The fruit crop is going to be very heavy. In talking with a large fruit grower, Pope Sanford, about the prospects, he said that when he was a boy an old man said to him to watch the fruit blossoms and he would find without exception that if the blossom came out in the light of the moon the crop would be a fine one. Mr.

Improved Carpenters' Tools.
SOLD BY ALL HARDWARE DEALERS.

Sanford is now 73 years of age, and said he had watched this closely and found it to be true. The National Automatic Alarm Company, through Adam Pope, has just presented for patent a device to notify the office immediately upon the cut off of the water supply to automatic sprinklers. I saw it demonstrated at the Power Building, and the insurance underwriters pronounced it perfect and an actual need. It will reduce the insurance rate enough to make an item to those having automatic sprinklers in their factories. Mr. Berger, of Kruse Hardware Company, says the demand for seasonable goods for immediate consumption remains good, and while they were held back for a time by unseasonable weather they have so far caught up as to bring results up to the present time ahead of the same period for last year.

CINCINNATI PRESS ASSOCIATION.

THE COLUMBUS TRADE.

We have had three good days in succession and are taking heart that Spring has finally come. It has certainly been discouraging and has made trade slow. Merchants got their goods in early, but have not had occasion to replenish stock to any great extent. The certainty of a short wheat crop is having its effect with farmers, and they are ever ready to anticipate a worse calamity than usually results. There will, without doubt, be a small wheat crop as compared with some years; but the right kind of weather is sure to improve conditions considerably. We find some merchants are not very considerate for jobbers or manufacturers when conditions change. They are always ready to place orders for season goods but do not hesitate to cancel all or part of their order. This is proving true on binder twine. Jobbers do not decline to reduce an order to their costumers' requirements, but it is unfair for any dealer to cancel his entire order, as the jobber cannot do so with the manufacturers. If a jobber contracts for a stipulated quantity, he cannot arbitrarily cancel or reduce his contract; but there are some dealers who seem to not consider that they are under any business obligation whatever. If it suits them to take the goods, they take them—but if they see some other make they fancy they want, all that is necessary is to write and say, "Cancel my order," and the jobber must hold the bag. We regret to report that the tinsmiths and metal workers of our city are on a strike. We believed that Columbus would escape the strike fever this year, but it seems we are to be disappointed. The miners' strike in the Eastern part of the State is serious, and the cost of maintaining the strike, according to what are considered authentic reports, is over twenty-five thousand dollars a week. It is easy to understand what an immense loss it is in business. There is certainly a remedy for avoiding strikes, and the person who finds it will be the greatest benefactor the world has ever had. We believe the country is in a fairly prosperous condition, and if capital and labor were on working terms the year's business would be satisfactory.

THE SMITH BROS. HARDWARE CO.,
J. H. SMITH.

THE SAGINAW TRADE.

Trade conditions in Michigan have been greatly improved during the last week, due unquestionably to the bright warm weather. The condition of the country roads is good, and every one seems to have all the business they can attend to, which is certainly very gratifying after the unusually extreme Winter and very backward Spring, which has been accompanied by the severest floods ever known in this locality. This has probably been the most backward Spring ever experienced in this vicinity. During the early Spring months the roads were impassable, a great many of the principal towns were suffering from floods, and the railroads in some sections were out of commission from one to two weeks, and now that conditions are normal again, there is naturally a heavy volume of business.

MORLEY BROTHERS.

THE OMAHA TRADE.

While the outlook for future Spring and Summer business is a very bright one from our standpoint, the present conditions are somewhat harder to describe. Continued cool weather has made Spring business more or less backward, and yet it is hard to tell on just what lines it is so. Some Spring goods, such as screen doors, etc., are much in demand in some sections, while in adjoining sections dealers are inclined to put off orders for these goods. In other lines, such as fencing, Builders' Hardware, etc., the situation in two adjoining sections may be just reversed, so that trade appears to be "spotty" in almost all lines and governed entirely by local conditions. On the whole we have enjoyed a very busy season so far and as weather conditions, as well as other influences, are now all favorable, we are anticipating a season almost up to, if not equal to, the busy ones of 1902 and 1903. Collections, although inclined to be somewhat slow during the earlier part of the year, have improved materially, and building operations are in universal evidence all over our territory. These two indications alone would point to a busy season for the trade at large.

WRIGHT & WILHELMY CO.

THE DAVENPORT TRADE.

We have had two weeks of pleasant weather. The meadows and pastures are looking fine. The sound of the lawn mower is heard early and late throughout the city and orders for these lawn beautifiers are coming in freely. Trade has improved rapidly with the return of good weather. The National political pot is boiling, and people are laying away money to visit the World's Fair at St. Louis. The writer witnessed the opening and felt well repaid. It is simply great, although unfinished.

SICKELS, PRESTON & NUTTING CO.

THE PHILADELPHIA TRADE.

Trade among the local jobbers is reported quiet, and yet it is gratifying to us to say that our sales for April were the heaviest for twenty years, although, of course, the other Spring months did not make an equally satisfactory showing. This was probably due largely to the affect of the prolonged Winter, which has caused Spring shipments to be deferred, and now that Spring has fairly opened dealers are naturally hungry for seasonable goods, and it is simply impossible either to get the goods promptly or to satisfy our customers. There is great complaint on forks, hoes, rakes, window and door screens, scythes, poultry netting, etc., and there is little prospect that the supply of some of these goods will catch up during the season. Of course, all this is extremely vexatious. The retailer naturally feels aggrieved and cannot understand why the jobber does not ship his goods. The jobber on the other hand demands from the manufacturer why his orders have not been shipped as specified, and the manufacturer's only excuse is his inability to turn the goods out fast enough. Much of this confusion and annoyance is due to the increased practice of direct shipments, by which it is made impossible for jobbers to anticipate their customer's wants by carrying a sufficient stock. It seems difficult to prescribe a remedy for this trouble, but there is no doubt that things would be much more satisfactory if such goods could be shipped from jobber's stocks instead of from the factory direct. Collections

are slow. The cold weather has made it difficult for the country retailer to collect his money and jobbers probably have an unusually amount of money on their books, but as soon as the Spring crops begin to move we hope for an improvement in this respect. BIDDLE HARDWARE CO.

THE ST. PAUL TRADE.

With good weather, though rather late, we feel encouraged to the extent that we shall have a fair crop. Our Winter weather was so severe and so long, that all had the feeling it would never let go, but it has, and the sun shines with a good deal of fervor. The market conditions are favorable to a belief that prices will be maintained up to July 1st, and makes us believe that they will be upheld for a longer period.
HACKETT, WALTHER, GATES HARDWARE CO.

EXPORTS AND IMPORTS FOR MARCH.

The anticipated increase in the exports of iron and steel for March have appeared, the gain over February being nearly 32,000 tons. The principal improvement in the exports was in billets and in steel rails, nearly 20,000 for the two. The steel rails, 17,873 tons, went chiefly to Mexico and to Asia and Pacific Ocean islands, other than Japan. Moderate gains are also shown in the exports of wire and nail products. The export movement in pig iron has not acquired any significant proportions. Domestic trade is apparently satisfactory to the Southern furnace interests, who have usually contributed most largely to the exports of pig iron. Following in gross tons are the details of the exports of iron and steel for March, with comparative showings:

	Mar. 1903.	Feb. 1904.	Mar. 1904.
Pig iron	1,532	3,429	3,954
Scrap iron	659	1,443	1,937
Bar iron	3,299	1,686	3,058
Steel bars	913	704	1,093
Iron rails	7	12	584
Steel rails	415	8,465	17,872
Billets	157	26,205	36,908
Hoops and bands	284	393	515
Wire rods	2,748	513	3,034
Iron sheets and plates	117	69	173
Steel sheets and plates	1,437	808	2,724
Tin plates	20	77	501
Structural steel	1,939	2,950	1,843
Wire	10,157	8,041	11,327
Cut nails	554	737	639
Wire nails	2,236	1,786	2,962
Tacks, etc.	147	237	204
Total, gross tons	26,621	57,555	89,329

The imports of iron and steel also show gains, most conspicuously in pig iron, with considerable increase also in tin plates. It is noticeable that imports of railroad bars, or steel rails, have dwindled back to a small tonnage. The figures follow in gross tons:

	Mar. 1903.	Feb. 1904.	Mar. 1904.
Pig iron	59,628	3,841	12,400
Scrap iron	7,327	316	2,498
Bar iron	4,986	706	1,222
Railroad bars	17,880	7,944	1,135
Hoops and bands	219	82	18
Steel billets, blooms and bars.	31,464	1,514	1,145
Sheets and plates	319	1,031	610
Tin plates	3,477	3,213	6,669
Wire rods	1,778	1,699	785
Wire	449	325	513
Total, gross tons	126,527	20,871	26,995

The total value of iron and steel exports for March was $10,633,720, compared with $7,983,547 for March last year. Agricultural implements exported in March were valued at $2,785,715, compared with $2,844,876 for March, 1903.

Exports of merchandise in March aggregated in value $119,813,470, compared with $118,800,255 the previous month and $132,093,964 for March last year. Imports of merchandise were valued at $91,302,235, against $88,821,200 the previous month and $96,230,457 for March last year.

NEW SOUTH WALES NO PLACE FOR AMERICAN WORKMEN.

Hardly a boat arrives here from the United States without bringing some victims of the writer who has pictured New South Wales as "the paradise of the workingman." The unions have by law a monopoly of the work to be done at fixed prices. While some are paid well—mostly employees of Government works—thousands can find nothing or very little to do at any price. No encouragement is given for immigrants who are dependent upon their labor for a living. These facts should be known to Americans.—*Orlando H. Baker, Consul, Sydney.*

♣

SARGENT & COMPANY, New Haven, Conn., and 151 Leonard Street, New York City, have issued a very handsome catalogue under the head of "Screen Hardware" and Spring and Summer goods for the season of 1904, intended for distribution among the trade. It is arranged in the usual excellent style for which their catalogue department is so popular, and is illustrated very thoroughly, giving list prices and graphic descriptions on each article enumerated. Included in the contents are screen door catches, night latches, barrel bolts, chain bolts, wrought butts, spring hinges, screen door sets with hold back spring hinges, door pulls, door buttons, rotary electric ring door bells, bar sash lifts, sash lifts, window spring bolts, reversible shutter bars, hammock hooks, line cleats, pulleys, ornamental letters and figures, garden trowels, ice awls, tack hammers, tack claws, Aiken's patent awls and tools, carpet stretchers, then, last but not least—Sargent's Gem Food Chopper. There are also many other seasonable goods listed in the above catalogue. The book is provided with an extensive index to make reference easy and rapid.

IRON WORKS IN KENT.

Writing in the columns of the *Archaelogia Cantiana*, Vol. 21, issued to the members of the Kent Archaelogical Society, George Payne gives an excellent account of the iron industry in the Weald of Kent. Pliny, Strabo, and others writing at the commencement of the Christian Era refer to the iron works in Kent, and all students of history are familiar with the accounts given by Julius Cæsar of the iron works carried on by the Britons at the time of his celebrated invasion. He recorded the fact that British chariots were fitted with iron plates, and that British warriors used weapons of iron, together with shields and breastplates of the same metal. There were many important towns in Kent where the iron industries were practised during the early period of British history. There were foundries at Cowden, Hawkhurst and Lamberhurst, and forges at Cranbrook, Coudhurst, Borndale, Tonbridge and Biddenden, the principal ironmasters of Kent were the knights and the tichbornes, whose descendants became Baronets. Leonard Gale, of Sevenoaks, a blacksmith removed into Sussex, and became a wealthy man. His son was educated at Oxford, called to the Bar, and in 1710 became Member of Parliament for Grinstead. His advice to his family was, "Get one of the Cowden furnaces, for I do assure you, that if I were 40 years old by God's help I would get a good estate by this employment, for I have within these twenty years cleared nearly £300 per annum out of one of these forges."

Heavy ordnance was also cast in Kent, and many chimney and fire backs were also made. Frequently the backs bore the arms of the owner of the property upon which they were to be used, and the arms of France and England respectively appear to have been used as stock patterns. Fire dogs were also cast with family arms and initials on them, and iron tomb slabs made in the sixteenth century are still commonly seen in the church graveyards in Kent and Sussex. The forges and foundries of Kent and Sussex were chiefly supplied with timber and as this became more difficult to obtain, the decline of the industry of the district rapidly set in. In 1592 Sir William Rowe, a native of Hawkhurst and a member of the Ironmongers' Company, filled the office of Lord Mayor of London, but contemporary records show that at this time the iron trade of the weald had begun to decline. In 1796, two centuries later, the industry was extinct and not one furnace remained.

Songs and poetry are common to every trade, and some of the twentieth century ironmongers set their advertisements in verse; still few have thought it worth their while to address poems to members of the Hardware craft. An anonymous writer in 1771 penned a birthday poem to his friend, who was an ironmonger. It is worth reproducing, especially as the thoughtful reader can trace the affinity of the craftsmen of old to the retailer of to-day, and gather something of the leading lines of ironmongery sold in the eighteenth century from its verses.

"Old Lockman, may thy engine true,
Thy chain of life extend
And add a thousand links thereto,
So prays thy merry friend.

"And mayest thou neither rust nor stain,
Nor canker ever feel
With heart as soft as silken skein
Thy ribs be ribs of steel.

"Loud as a cannon through the land
May thy good name resound,
And the strong hammer of thine hand,
Thy enemies confound.

"Aided by thee my verses flow,
Their tinkle owe to thee,
As iron sharpeneth iron, so
Thy friendship sharpeneth me.

Digitized by Google

"Keen be thy sense like sword that's try'd
Thy wit like point of wrong,
Thy judgment like a saw divide
The right side from the wrong.

"Firm as an anvil mayest thou bear
The strokes of every clime,
Like a hardened file still wear,
The teeth of envious time.

"Round in thyself like polished ball,
Shine always smooth and bright,
When other ironmongers fall,
Mayest thou stand bolt upright.

"And when life's forge will work no more,
Fire gone and metal cold,
At death alchemist's touch, thy ore
Shall all transmit to gold.

"While plough shall turn the fertile mould,
While needle seeks the pole,
While fetters, locks and bars shall hold
Thy love shall nail my soul."

It is said that the first mention of the name iron-monger was made in 1379 when Pole Tax records name one William DeWaehous as an "irenmanger" living at Rotherham. In the British Museum there is a sheet entitled "A Camp Bell or the Ironmongers' Faire Feilde" a record of the installation of Sir P. Campbell as Lord Mayor of London, October 29, 1609. The immortal Samuel Pepys writing December 11, 1663, says he went to the Coffee House and "there had good discourse with an ironmonger."

BREAKING YOUR OWN SON INTO BUSINESS.

Breaking your own son into a steady business gait is a harder job than breaking any broncho I ever saw on the Montana divide. I sympathize with any man who has to take his boy and mother's son into the concern and teach him how the thing is done. I have been there, and after working up a perspiration that kept me hot under the collar most of the time I finally succeeded in bringing some good results. In the light of later experience I feel severely that I would like to tackle the job again if I could begin at chapter one, but of course that is impossible.

I have but one boy and I finally molded him into a merchant. I wish I had two more. I would hitch them up in a harness strapped tight at every quarter, pull the check rein up strong and hold the lines myself all of the time. I would forget for about five years that they belonged to me. I would try and think they belonged to some friend in Norway who had sent them to me to be educated right, and in justice to that friend I would keep them in line every minute of the day and try to know what they were up to nights. I would throw most of the letters I received from mother into the waste basket and forget them soon.

There is no question that every father gets a little daffy when it comes to training his son. He can not get away from the family circle talk and mother's idea that her boy is cut out for something unusual. If he takes him into the business the boy will hurt that business in a dozen ways just as sure as the sun rises. Of course every father will think his son is the exception, and I am making allowances for it.

I can think of a dozen instances right now where some fathers would be better off and so would the sons if the latter had been put to work in other concerns than the one owned by father. My simple rule after much golden experience is that you take the boy into the business with you, see that he is given the whole course from start to finish, just as you would give it to Mrs. Brown's son whom you hired for what work he can do and what trade he can pull.—*Commercial Bulletin.*

The Limit.

"I hear a new trust is to be organized soon."

"Worse than that. I hear it's to be Morganized."—*Philadelphia Ledger.*

We Cannot Emphasize

the fact with too much force, that we stand back of every "NATIONAL" Sweeper that leaves our factory to the limit. Our enviable reputation has been built on a firm foundation—clean, fair dealing business methods—manufacturing a line of carpet sweepers superior in construction and selling features. No inducement could be made great enough that would lead us to jeopardize the position we have striven for and honestly won.

The "NATIONAL" trade mark on carpet sweepers and "QUALITY" are synonomous terms.

National Roller Bearing Sweepers

Equipped with
ROLLER BEARINGS,
are the easiest running.

Equipped with
STEEL HANDLE FERRULE,

THE TEXAS HARDWARE JOBBERS' ASSOCIATION

The annual meeting of the Texas Hardware Jobbers' Association was held in Houston, Texas, headquarters at the Rice Hotel, on the 21st, 22d and 23d of April.

The first session of the meeting was scheduled for 10 o'clock on the morning of the 21st, but on account of the non-arrival of Secretary Robert F. Bell and several of the members, caused by late trains, the morning session was carried over until the afternoon. The delegates and visitors were then taken in charge by Messrs. F. A. Heitman, J. C. Bering and Joseph F. Meyers, the local members who had planned the entertainment features, and escorted to the Elk Club, where the morning was delightfully spent in social intercourse.

After the reunion at the Elks' Club the entire party adjourned to the private dining room of the Rice Hotel, where a sumptuous lunch was served. The affair was informal and, therefore, greatly enjoyed.

Convention Opened.

The afternoon session was called to order promptly at 2 o'clock in the parlors of the Rice Hotel. President Bering called the meeting to order and briefly outlined the afternoon's work. C. B. Carter, secretary-treasurer of the Southern Hardware Jobbers' Association, and T. James Fernley, secretary-treasurer of the National Hardware Jobbers' Association, were in attendance at the convention and were invited to participate in the deliberations of both the executive and open sessions.

The roll was called, showing the houses represented and the names of the delegates.

Secretary Bell then read the minutes of the last annual meeting, after which President Bering read his annual report.

The annual report of the secretary-treasurer was next read by Mr. Bell, in which he fully outlined the work which had been taken up during the past year, and offering suggestions as to the line of work which should be taken up in future.

After a short discussion of some of the suggestions offered, the meeting adjourned until 10 next morning. Immediately after adjournment the entire party, both delegates and visitors, were given a trolley ride over the city, the trip extending over two hours. The visitors were agreeably surprised at the growth and development of Houston and her future prospects.

No set programme had been arranged for the evening's entertainment, but the majority of the delegates and visitors attended the first bi-ennial Texas State Musical Festival, which was held at the Auditorium. The New York Symphony orchestra, Walter Damrosch, director, assisted in the entertainment, and the music was grand.

Thursday's Session.

Thursday morning's session was called to order at 10 o'clock in the parlors of the Rice Hotel.

The session was an executive one, and the lengthy discussions on the matters presented were not given out for publication.

A very interesting paper was read by W. L. Sanford, of Roberts, Sanford & Taylor Co., of Sherman, on the subject "How Can the Manufacturers Assist in Maintaining Prices?"

At 12.30 the meeting adjourned for lunch, which was served in the private dining room.

Thursday Afternoon.

At 2 o'clock the afternoon session was called to order and the following papers were read and discussed:

"Rules as Adopted by the Cleveland Hardware Jobbers."—A paper which had been prepared on this subject by George Trumbull, of Huey & Philip Hardware Co., Dallas, Texas, was read by H. C. Kelly, of the same firm, Mr. Trumbull being unable to attend the meeting.

"Should Not Staple Goods Be Sold on Thirty Days' Time?"—Discussion opened by H. W. Cortes, of Bering-Cortes Hardware Co., Houston.

"System and Its Advantages to the Hardware Business."—Paper read by Charles Nash, of Nash Hardware Co., Fort Worth.

"Taxation on Goods Carried in Storage."—Opened by F. A. Heitmann and discussed informally.

New Officers and Next Meeting.

Sherman was unanimously selected for the next annual convention, the dates to be selected at a subsequent date.

The following officers were elected by acclamation:

J. C. Bering, president, Houston.

Charles Nash, vice-president, Fort Worth.

J. L. Taylor, second vice-president, Sherman.

R. E. Bell, secretary and treasurer, Fort Worth.

The Executive Committee is composed of F. A. Heitmann, of Houston; Ed. S. Hughes, of Abilene; James Maroney, of Dallas, and W. L. Sandford, of Sherman.

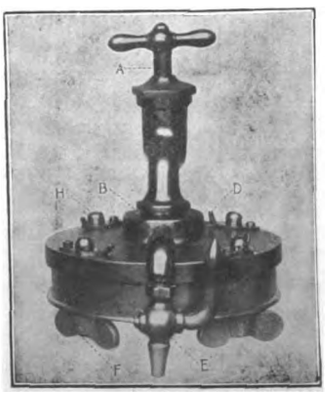
The visitors were enthusiastic in their expressions of appreciation of the entertainment given them in Houston and prepared for them by the local members, who are: Messrs. J. C. Bering, H. W. Cortes, F. A. Heitmann and J. F. Meyer.

The re-election of J. C. Bering as president of the organization is regarded as quite a compliment to that gentleman's ability and perseverance in the work of which he has always been one of the chief promoters.

The presence of T. James Fernley, secretary-treasurer of the National Hardware Association, a man who is high authority upon the commercial status of the country, particularly in the Hardware line, assisted materially towards the success of the meeting. His presence was warmly welcomed by the association.

Excursion Down the Buffalo Bayou.

The excursion down the Buffalo Bayou on Saturday, the 23d of April, was the climax of the entertainment features of the Texas Hardware Jobbers' meeting.



Immediately after the election of officers, the doors were thrown open and the visitors invited to participate in the closing exercises.

An Open Session.

A very interesting address was delivered by Glen Walker, of Fort Worth, on the subject of "Mutual Insurance." Ed. S. Hughes, of Abilene, responded to Mr. Walker's address, indorsing the proposition, and recommending the serious consideration of the proposition.

President Bering then called upon all the visitors for impromptu talks, many of whom responded, showing the deep interest they took in the Texas Hardware Jobbers' Association.

After an hour's social intercourse and the enjoyment of each other's good fellowship, the convention adjourned.

Pure Water

Free from all death-dealing germs is obtained through

Naiad Filter No. 7

Easily attached to any faucet. Has automatic cleaning device and means for drawing unfiltered water.

CONSULAR COMMERCIAL COMMENTS.

AMERICAN MACHINERY IN SYRIA.

(*From United States Consul Ravndal, Beirut, Syria*).

There is no economic movement in Syria more important or more interesting than the introduction of American machinery.

Owing largely to emigration to North and South America, wages in this country have been growing at such a rate that it is no exaggeration to declare an increase of 40 to 50 per cent. during the last fifteen years. Wages are still low, the unskilled laborer receiving an average wage of 25 cents a day. I have no doubt, however, that the age of machinery is dawning upon this country.

Agriculture is the main industry of Syria, but it is in an extremely backward state, the implements commonly in use being the same as those in vogue in the ante-Christian era. Large tracts of land of great fertility lie waste and depopulated, though showing traces of former prosperity and teeming populations. Agricultural and irrigating machinery and railroads will prove strong factors in the redemption of these regions. In the plains of Sharon, Esdraelon, Hauran, Bekaa, etc., modern agricultural machinery has begun to appear, and I am glad to report that most of it is of American make.

Previous to 1902 American plows and reapers were operated in the Haifa neighborhood (upper Sharon) under the auspices of the American and German members of the Temple Colony. In the Bekaa (Cœle-Syria) a Jesuit missionary organization conducted a "model farm," on which was employed a limited variety of French machinery. In certain Jewish colonies modern machinery was experimented with, but as they were subsidized by foreign capitalists work was largely prefunctory. It was not, however, until 1902 that natives of Syria and Palestine began using machinery in tilling the soil and in harvesting the crops. From now on the use of agricultural machinery and modern implements will grow steadily here, and there seems to be no reason to doubt that American manufacturers will control the market.

I do not believe there are more than 75 modern reaping machines (including perhaps 20 self-binders) in this district, which comprises nearly all of Syria and two-thirds of Palestine. There are some 12 up-to-date windmills, 4 or 5 gristmills, 40 olive-oil presses, 125 petroleum engines, 2 steam thrashing machines, 1 well-drilling machine, 3 hydraulic rams, 175 silk-reeling factories, half a dozen licorice-root and tobacco presses, etc. Reapers, thrashing machines, gristmills, and wind engines come from the United States. France furnishes silk-reeling machinery and some olive presses.

Difficulties are experienced here in repairing machinery and securing proper draft animals for heavy work, but these will gradually be eliminated.

For at least eight years to come agricultural machinery and implements will be admitted free of duty into Syria.

Specimens of American cultivators, cornshellers, hayrakes, harrows, mowers, fanning mills, pumps, plows, rollers, and well-drilling machines have appeared in this market, and a fair trade in these articles is sure to grow up. Other American manufactures which would be well received here, if properly introduced, are fencing wire, road machines, refrigerator machinery, garden clippers (for use in the mulberry groves in the silk season), sickles, and wagon umbrellas.

I have personally had considerable to do with organizing things so as to open a way into this country for modern machinery, and have attended the first experiments with our reapers, gristmills, windmills, and thrashing machines. Last year witnessed the arrival of the first steam thrashing machine ever seen in this country. It was installed in Cœle-Syria, where it created a tremendous sensation. Hitherto, all grain has been separated by oxen treading it out or drawing a toothed slab around the thrashing floor. It is a method which renders the grain dirty and causes much waste, besides being extremely laborious. A few weeks ago the second steam thrashing outfit (like it predecessor, made in Richmond, Ind.) was started on its career of highly important pioneer work in the territory around Damascus. I consider the introduction of this one outfit as foreshadowing a complete revolution in the economical conditions of that region.

ORIGIN OF COTTON SEWING THREAD.

(*From United States Consul Halstead, Birmingham, Eng.*)

The following, taken from the Birmingham *Daily Post*, is an interesting story of the origin of cotton sewing thread:

Speaking at a political meeting at Paisley ex-Provost Clark, in the course of his remarks, gave the following very interesting account of the inauguration of the use of cotton sewing thread:

"My father inaugurated, one hundred years ago, the use of cotton sewing thread. Its inauguration came about in this wise: At the beginning of the nineteenth century Paisley was a prosperous weaving community. It required much silk for the manufacture of twine to make heddles, the supply of which silk came from Hamburg. In 1803 Napoleon conquered North Germany and occupied Hamburg. France was then at war with Britain. Napolean, in order to cripple British industries, caused the stock of silk held in Hamburg to be burned, to the consternation of the Paisley weavers. My grandfather, James Clark, manufactured heddle twine and heddles in Paisley, as did also his brother Peter. The supply of their raw material having been destroyed, they were driven to their wits' end as to what was best to do, when the happy thought occurred to my granduncle, Peter Clark, to substitute cotton warp yarn for silk and twist it into thread, in the manner that six-cord sewing thread is made at the present day. Fortunately, his experiment succeeded; heddles continued to be made and supplied, and the weaving industry went on uninterruptedly as before. My father, who at that distant period was my grandfather's assistant, also sold linen thread to ladies for sewing purposes, cotton thread not being then known to them, and as the linen appeared to my father to be rough and uneven, he strongly recommended the smooth cotton thread to his lady customers as a substitute, and once tried it continued to be used. Originally it was sold in hanks of skeins. These the ladies had to wind into little balls, as they do a cut of wool at the present day. Wishing to convenience them my father, on selling a skein of thread, would sit down at a pern wheel and wind the thread on a bobbin, for which he charged a half-penny. This half-penny was refunded when the empty bobbin was returned. These bobbins were made by a wood turner—Robert Paul—whose shop was erected underneath the spot from which I now address you. This is the simple history of the birth of the cotton-thread trade—interesting, and, I venture to say, a wonderful example of what great results may flow from so-called insignificant and trifling beginnings."

EUGENE SEEGER, Consul-General.

SHORTAGE IN FOREIGN POSTAGE.

In a letter of recent date, United States Consul Marshal Halstead, writing from Birmingham, England, states that a lack of knowledge or oversight or carelessness on the part of American correspondents relative to foreign postage frequently entails the unjust burden upon the consuls of paying overdue postage in order to serve those seeking information. Not only does this carelessness frequently occur in corresponding with the consuls and their agents, but extends to correspondence with business houses who are prospective customers. One case is cited where a business firm, whose name was given by the consul to an American manufacturer, received from the manufacturer a letter and pamphlet on which was due 5d. (10 cents) in postage and the dealer demanded that the consul refund the amount to him. The contention is that this carelessness on the part of American correspondents retards instead of facilitates the extension of trade.

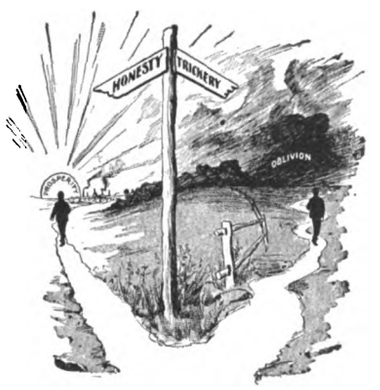
PRACTICAL HINTS ON ADVERTISING.

By Charles Austin Bates.

There doesn't seem to be any hard and fast line separating truth from untruth. They are prone to overlap and get mixed up in the most exasperating way.

In this very indefiniteness of the line between truth and falsehood lies the chief snare to the advertiser, who would be truthful in what he says.

If the line were more distinctly drawn it would be comparatively easy to keep on the truthful side



As it is, the merchant who started out with the determination to be truthful in what he said of his goods, gradually crowds a little nearer and a little nearer to the danger line till his ads are the worst form of exaggeration.

Such an ad is all the worse because there is an element of truth in it. A half truth is worse than an untruth because of its very disguise of genuineness.

A pure falsehood is easily detected, nobody is deceived by it, but it is the half truth—the lie with a little truth in it—that works the most harm. It is far easier to sell a half cotton suit for all wool than it is an all cotton suit. The point is apparent.

I say that adherence to the strict truth in advertising was the best yesterday, is the best today, and will be the best tomorrow.

You are working a grave error to proceed on any other basis. The straight and narrow way to business success is slow but sure, and the sooner you find it the better for you as a business man and the better for those who depend upon your service.

There is another way which seems for a time to be leading rapidly to assured success, but do not be deceived, it leads as surely to business destruction as the rivers lead down to the sea.

Business is an honorable and dignified profession, and its interests and growth are promoted best by unqualified truthfulness at every turn.

* * * * * *

And right along this very same line:—

Did you ever know a clothier, for instance, whom it was a positive pleasure to deal with—one whose every word you could believe, who had sold you clothing for years and had never taken advantage of your ignorance of the clothing business to cheat you?

If you have known such a man I can safely say that he has not only made a place for his clothing on your back as long as you will have need of clothing, but that he has made a place for himself in your respect and esteem.

That man did not give you anything, he did not rob himself to win your trade.

He simply told you the truth about what he had to sell, and by experience you learned that you could believe him.

He advertised his business and he did it well.

* * * * * *

Some enthusiastic advertiser will ask whether he should use no artifice in attracting customers to his store.

It is certainly proper to use any means at your disposal to attract people to your store—any little trick or scheme that will cause the curiosity of the buying public.

But of what advantage will this be if they do not find there something real?

That is my point exactly. A man's curiosity will bring him in to your store and may make him buy once, but if he does not secure something real—if you don't succeed in satisfying some need, he is not likely to respond the next time.

If you get the reputation for having something interesting in your bargain kettle there will be no trouble about having hungry people around when you take the kettle off.

But people don't gather around an empty kettle very many times even though it is well advertised.

It doesn't take a very far-sighted business man to see that every time a customer gets "taken in" he is all the harder to catch the next time.

Get the people in by any means at your disposal, but by all means make their coming really worth while to them.

* * * * * *

But if you really have in your store what people want, it will prove quite enough to tell what is true about it without exaggeration. There is enough about any well selected stock of goods to interest a community of buyers when the qualities and prices are set forth in a straightforward, business-like way.

Use your judgment about just how to tell it, but don't lose sight of the thing to be told, and don't, above all things, let the thing told get lose in the manner of telling it.

I see many ads where this actually occurs. It is enough to say that you might better give your money to the hand organ man than to spend it on such advertising.

* * * * * *

All merchants who started in business with small capital and have succeeded in building up a big business have been liberal advertisers. *The merchants who are doing the biggest business* today are liberal advertisers. These men are unanimous in ascribing a large measure of their success to judicious and continuous advertising. I would advise all who are in the mercantile business and anxious to succeed to profit by the experience of those who have already made their business a success.

RESPECTABLE GAMBLING.

The fact that the professional gambler is to a large extent a social outcast, plying his craft at night and behind steel doors and only then with the purchasable connivance of the authorities, is in itself a warning that not even the stupidest can fail to observe. Stock speculation, on the contrary, hangs out the banner of respectability—which a great many unthinking persons have somehow come to confound with morality—and, under its protection, carries on its traffic night and day, in city streets and village lanes, in parlor and boudoir, in store and in factory—in short, wherever it can find a single human being possessed of this mania for getting something for nothing. Men who would scorn to cross the threshold of a gambling house, gamble openly in stocks and are not ashamed to discuss their ventures in the presence of their children. And with every facility for legalized gambling placed within reach of even the humblest purse, is it to be wondered at that when Wall Street ruins a man, it strips him of everything that he possesses—destroys his business, places a mortgage on his home, eats up the trust funds of which he was custodian, and leaves him naked to the world?

On the other hand professional gambling, by which I mean the kind that is not respectable and exists only through the corruption of the police, seldom does more than relieve a man of whatever money he may have in his pockets and possibly as large a check as the house will accept. That men frequently lose large sums at faro or roulette is undeniable, but it is not often that those games take the roof from a player's head and reduce him and his whole family to beggary. Moreover—and this is something well worth noting—the cheerful loser in a first-class gambling house may refresh himself free of cost during the hours of play and even solace himself, when all is over, with a really fine supper. And if perchance he has set a good example to his fellow-players by losing every cent that he has in his pockets, the house will always allow him a dollar or two for cab

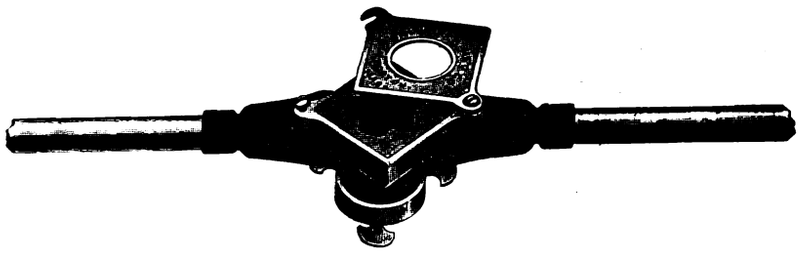
But there is no free supper in Wall Street, no cigars or liquors to be had at the cost of the market while the ticker ticks out its tale of disaster and the tape festoons itself about the basket; and I really don't know what would happen if you were to ask the broker to whom you had lost your entire fortune to lend you the amount of an uptown fare on the Elevated road.—James L. Ford in *Leslie's Monthly.*

FOREIGN CHAMBERS OF COMMERCE.

The growth of co-operation among the mercantile interests of Europe is outlined in a recent issue of Das Handels-Museum, one of the leading German industrial journals, as follows:

Foreign chambers of commerce are of Austro-Hungarian origin, for in 1870 the first Austro-Hungarian chamber of commerce was opened in Constantinople; afterwards similar institutions were opened in Alexandria, Paris and London. In the spring of this year (1903) an Austro-Hungarian chamber of commerce was opened in Melbourne. The English, adopting the example of the Austrians, founded a chamber of commerce in Paris. The Austrians have been far surpassed in number of these institutions by the English, who now have 30 in foreign countries and 100 in their own colonies. The United States have chambers of commerce in Paris, Brussels, London, Berlin, Sydney and

Digitized by Google



Shanghai. The first North American chamber of commerce was founded in the seventies. The development of the French foreign chambers of commerce has been satisfactory. France has 29; 3 are in the Orient—Constantinople, Smyrna, and Alexandria—and the others are found in all parts of the world. It was to aid the growing trade of France with eastern Asia and South America that the French chambers of commerce were founded in those countries. Of the other countries Holland has more than 7, Spain 3, and Italy and Belgium 2 each; Germany has but 1 foreign chamber of commerce (in Brussels). Russia has 2, in Paris and Alexandria. Several cities have a number of foreign chambers of commerce; for instance, London has 1 each for Austria-Hungary, the United States, Belgium, France, the Netherlands, Italy and Spain.

WHERE THE RUBBER COMES FROM.

Some figures have been published purporting to show the total production of rubber in different parts of the world, and according to these the production in the two years from 1900 to 1902 decreased by some 3,500 tons—that is to say, whereas the total output in 1900 was 57,500 tons, that in 1902 was only 54,000 tons. It is very instructive to examine the figures given for the different countries. The two main sources of supply are Brazil, Peru and Bolivia, and East and West Africa and the Congo country. From the first group the total supply in 1900 was 25,000 tons, and from the second 24,000 tons, but whereas in the former case the production has increased, it has appreciably decreased in the case of the latter. Thus, Brazil, Peru and Bolivia, contributed 30,000 tons to the world's supply in 1902 as against 20,000 tons for East and West Africa and the Congo country. A small supply is now being had from the Straits Settlements, but in 1902 the output was only 1,000 tons. In every other case the production shows a decrease.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boonsboro, Md.—Jacob C. Young and son, Clarence, have formed a partnership under the firm name of J. C. Young & Son, for conducting Hardware and general merchandise business, and have taken a room in the Young Building on the Public Square.

Childress, Texas.—Childress Hardware and Implement Company has been incorporated; capital, $16,000. Incorporators: J. H. Crister, S. P. Buster, of Childress, and Charles W. Buster, of Wagoner, I.T.

Clio, Mich.—J. M. and Frank K. Cloud, of Northampton, have purchased a Hardware store here and will conduct the same.

El Reno, O. T.—The Oklahoma Retail Implement and Hardware Comapny has been incorporated. Incorporators: J. A. Chenoweth, of Leger; Wm. Funderburg, of Wagoner; Benbow Horton, of Lawton; A. A. Smith, of Watonga; E. E. Jones, of El Reno; A. Fuhmeg, of Union; J. E. Bonebrake, H. W. Cumpton and J. W. Freebon, of El Reno.

Glouster, Ohio.—The Carpenter Hardware Company has been incorporated. Capital stock $50,000. Incorporators: W. A. Carpenter, S. S. Carpenter, L. F. Carpenter, J. E. Carpenter and F. P. Keintz.

Jennings, La.—The Morse Hardware Company has been incorporated; capital stock $100,000, to take over the business of L. L. Morse & Sons. L. L. Morse is president; Bertha Morse, secretary, and W. D. Morse, treasurer.

Leominster, Mass.—Leominster Hardware Co. has been incorporated. President, M. B. Damon; treasurer, R. D. Gould. Capital $12,000.

Lexington, N. C.—The Peacock Springs Hardware Company has been incorporated with capital stock of $9,900, which may be increased to $50,000. The incorporators are: J. E. Peacock, R. C. Springs and H. H. Springs, all of Lexington.

Malone, N. Y.—H. D. Thompson & Co. has been incorporated; (Hardware); capital $65,000; directors: H. D. Thompson, N. M. Marshall and F. J. Riley, of Malone.

Middletown, N. Y.—C. Knight has opened a new Hardware and plumbing business.

Pine Bluff, Ark.—Fox-Harris Machine and Supply Company has been incorporated. The company will do a wholesale and retail business in heavy Hardware, railroad supplies, etc. Capital stock, $25,000. The following officers have been elected: H. C. Fox, president; J. T. Lloyd, vice-president; W. S. Harris, secretary and treasurer.

Potsdam, N. Y.—Art Adams and Howard Gilbert are building a store which they will soon open with a line of Hardware and farm implements of which Mr. Adams will have charge.

Rural Valley, Pa.—The Johnston-Beyer Hardware Company has been incorporated; capital, $20,000; directors: John J. Johnston, Frank Moore, Samuel E. Amrose, Rural Valley; Samuel S. Burns, Bernardo; Lewis W. Byers Smoke Run.

Changes.

Addington, I. T.—The Thomson Hardware Company, of this place, has disposed of their Hardware store at Temple, O. T., and will build a large brick store building here to accommodate their immense stock.

Anna, Ill.—The Mangold-Moore Implement Hardware and Harness Company has changed the firm name to Mangold-Alden Company.

Ashland, Ky.—The Ashland Hardware Company are building an 80-foot addition to their store.

Ashland, Ohio.—Wiley Hart has been taken as a partner in the Hardware firm of C. W. Hart, and the business will hereafter be conducted under the firm name of Hart & Brothers.

Ashley, Pa.—The Williams Hardware Co. has moved from corner of Fell and Market Streets, to 54 East Side of Public Square.

Bowling Green, Ohio.—The general Hardware store of S. C. Hyter & Son has changed hands, J. C. Fisher & Son being the new proprietors.

Britton, S. D.—F. J. Wisner has traded his stock of Hardware, harness and furniture for an equity in a half section of farm land.

Omaha, Neb.—The Cole-Brelsford stock of Hardware has been sold to the Paddock-Handschy Hardware Co. The stock is that in the store building at 41 Main Street, occupied for several years by the Cole-Brelsford Co. The consideration named in the bill of sale is $9,032.

Herkimer, N. Y.—William N. Prowse fifty years a business man of this village and for the last six years associated with Frank E. Pelton in the Hardware business, has sold his interest to his partner and will retire.

Irvington, N. J.—The Stone-Woolley Company has been incorporated to do a Hardware and lumber business. Capital stock, $50,000. Incorporators: Frederick Stone and George H. Woolley, of Irvington; Henry Stone, of Caldwell, and Henry Perolaman, of Hilton. Frederick Stone is the local agent, with an office in 1100 Clinton Avenue.

Kokomo, Ind.—Coate & Shade have commenced active business at the establishment conducted for several years by J. A. Hutchings in North Main Street, which was recently purchased by Mort. Coate and J. I. Shade. The firm is a strong one financially and in business-getting qualities.

Reading, Pa.—The Consolidated Hardware Company has increased its capital stock from $1,000,000 to $3,000,000 to buy additional plants.

New York, N. Y.—William A. Roche, of 42 Vesey Street, has moved to 52-54 Park Place, where he has a floor space of 55x200 feet. This will give much better facilities for handling his large and increasing business in ignition apparatus, etc.

Racine, Wis.—G. A. Crane sold out automobile, bicycle and sporting goods business to Electrical Construction Co.

Sheboygan, Wis.—Ernest Schuetze, of Manitowoc, will open a store at 617 North Eighth Street.

Sterling, Ill.—H. J. Flock sold out bicycle business to Roy Baer.

Worcester, Mass.—The real estate in Worcester and Leicester owned by Samuel E. Winslow has been formally transferred to Dunbar & Rackemann, Boston attorneys, the amount given in the transaction being $50,000. The transfer papers have been recorded. A stock company will be organized at once, and will take hold of the Samuel Winslow Skate Manufacturing Company, which is known to be a paying venture.

Miscellaneous.

Chicago, Ill.—Frank J. Fanning, formerly of the Fanning Mfg. Co., has been appointed manager of the Chicago branch of the Electric Vehicle Co., of Hartford, Conn., succeeding J. W. Jones, resigned.

Meriden, Conn.—It is announced that the prominent bicycle manufacturers have decided again to engage professional riders for the various circuits, the leader in the movement being Colonel Albert A. Pope. Particular attention will be paid to the racing.

San Francisco, Cal.—The E. D. Dupont Powder Company, of Wilmington, Del., is completing its absorption of the California Vigorite Company at a cost of $370,000, and is also acquiring the three manufacturing fuse companies on this coast. It has already bought the California Powder Works and the Judson Dynamite Company. To complete its absolute monopoly on the coast the Dupont people need the Giant Powder Company, and are now seeking its possession.

So. Milwaukee, Wis.—Stowell Manufacturing & Foundry Company make castings for the automobile trade from customers' patterns, in gray or malleable iron, and are well equipped for both classes of work.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Ansonia, Conn.—Papers have been filed showing the transfer of the real estate, the machinery and the business of the late D. M. Bassett bolt concern in Shelton to the D. M. Bassett Bolt Works, incorporated. The corporation was organized and the transfer was dated March 16, the transfer being made before the death of Mr. Bassett. The capital stock of the new concern is $50,000, and the subscribers are given in the records as D. M. Bassett, Mary S. Bassett and Lillian M. Bassett. The business which has been turned over to this stock company is that carried on in the shop situated on Canal Street.

Bellefontaine, Ohio.—The National Harvester and Implement Company has been incorporated. Capital stock $150,000. Incorporators: Alvin V. Kiser and others.

Boston, Mass.—George C. Bartram is president and William Read is treasurer of the Read Manufacturing Co., capitalized at $50,000, for the manufacture of stoves, heaters and lamps.

Chattanooga, Tenn.—The Gonce Lock and Manufacturing Company is a new company, being the first of its kind in this section of the country, and is the development of a patent which was gotten up by Mr. Gonce. The site of the plant is on the corner of Cleveland Avenue and the Belt railroad track. The work on the building was begun on January 1st, and at the present time practically all of the machinery has been installed and the work is soon to begin in the manufacture of locks and keys. The machinery is all the very latest type and improvement. As the locks to be manufactured are of a new variety and the development of a new patent, the machinery was all bought on a special order. The lock which this company will make is a combination lock, and of this there are two varieties, the door lock and the pad-lock. Every lock has a different combination, and $200 is offered to anyone who, knowing the combination of one, can open another. The locks are used exactly like other locks, except that the combination is employed instead of a key.

Chrisman, Ill.—C. E. Bonner, George W. Fair and D. B. Tucker are the incorporators of the C. E. Bonner Manufacturing Co., capitalized at $30,000, for the manufacture of wrenches and other articles of Hardware.

Columbus, Ohio.—Perry M. Bounds, Frank McCafferty, M. B. Schley, Carl Lewis and F. L. Hogsham are the incorporators of the Bounds Wire Fence Co., capitalized at $25,000.

Columbus, Ohio.—The T. M. Hertenstein Company has been incorporated. Capital stock $50,000, and incorporators: M. Hertenstein, C. Hertenstein, Theodore Aust, Jr., C. D. Aust, M. A. Hertenstein.

Dayton, Ohio.—A. A. Simonds & Son has been incorporated; tool manufacturing. Capital stock, $45,000. Incorporators: Marcella C. Simonds, Caroline S Clements, Hubert R. Simonds, Cora S. Henry, Eugene G. Kennedy.

Denver, Col.—The Denver Stamping and Tool Company has been incorporated. Capital stock, $100,000; Frank C. Goff, Frederick J. Taylor, S. Roy Wright, Denver.

Evart, Mich.—The Evart Tool Company, Ltd., has been incorporated. Capital stock $10,000.

Galesburg, Mich.—Samuel Foster, George Polasky and D. O. Holden are the incorporators of the Standard Windmill & Manufacturing Co., successor to the Standard Manufacturing Co., capitalized at $30,000, to manufacture windmills, tanks and pumps.

Grand Ledge, Mich.—H. R. Streeter has commenced the manufacture of cutlery. A line of corn, butcher and bread knives will be made. L. A. Jones will have charge of the mechanical department, and the firm will employ one traveling representative.

Indianapolis, Ind.—George C. Hitt, Harry S. New, Harmon H. Friedley, John T. Glazier, Charles C. Glazier, Lorenzo D. Glazier and Peter F. Glazier are the incorporators of the Glazier Nozzle & Manufacturing Co., capitalized at $32,000, for the manufacture of gas sprinklers, stoves, ranges, etc.

Indianapolis, Ind.—The Hussey-Binn Shovel Company of Pennsylvania has been incorporated in Indiana. Stock represented $125,000.

Knoxville, Tenn.—James H. McCallum, S. M. Johnston and H. C. Helm are among the incorporators of the Helm-McCallum Manufacturing Co., capitalized at $10,000, for the manufacture of wire, window and door screens.

Knoxville, Tenn.—John Redd, P. Osbourn, D. G. Arwood, J. D. Jett and E. M. Atkinson are the incorporators of the Safety Gasoline Stove & Empire Cooker Co., capitalized at $5,000.

Lock Haven, Pa.—The Pennsylvania Woven Wire Co. is a new concern, capitalized at $125,000.

Moline, Ill.—Southern Moline Plow Company has been incorporated; capital, $50,000; jobbing; incorporators: F. G. Allen, C. R. Stephens, L. C. Blanding.

Newark, N. J.—The Stone-Wooley Company has been incorporated, (Hardware and lumber); capital, $50,000. Incorporators: Frederick Stone, George H. Wooley, Henry Stone and Henry Jeroloman.

New York, N. Y.—R. J. Carter, C. C. Trumpborer and T. L. Freeman are the incorporators of the Home Utensil Co., capitalized at $250,000, for the manufacture of household goods.

Portland, Me.—The Invincible Window Screen Co. has been incorporated. Capital stock $100,000. Howard Davies, president; H. P. Sweetser, treasurer.

Quincy, Ill.—The Quincy Washing Machine Company has been incorporated. The company is capitalized for $7,000. F. T. Brosi, Joseph W. Sharpe and Charles F. Landwehr are the stockholders.

Rochester, N. Y.—George W. Kellogg, William H. Wray and C. F. Wray are the incorporators of the Wray Pump & Register Co., capitalized at $10,000, for the manufacture of pumps.

Walden, N. Y.—Schrade Cutlery Company has been incorporated; capital, $25,000. Directors: George Schrade, J. L. Schrade, A. V. Schrade, New York.

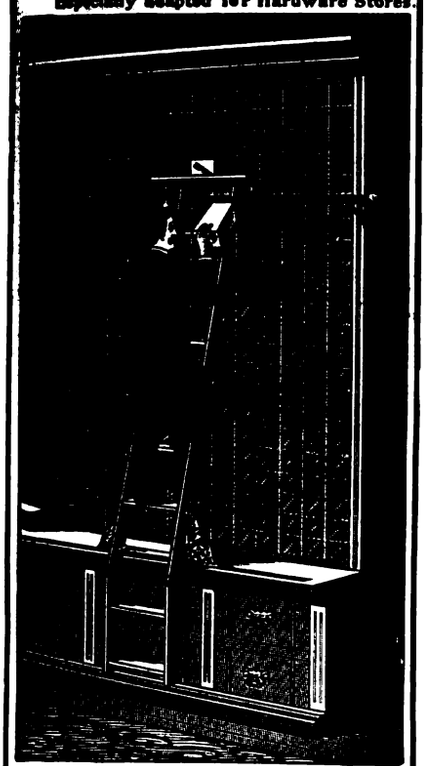
West Toledo, Ohio.—The Conway Stove & Range Company has erected a new factory, 70x50, on property recently purchased in West Toledo. The new concern will manufacture steel ranges and gas stoves. The plant will be in operation the middle of May.

Worcester, Mass.—C. C. Malton is president, Wilson Downs vice-president, George H. Taylor treasurer, and D. W. Smith and W. A. Hampshire are the directors of the Worcester Gas Stove Manufacturing Co., capitalized at $32,000, for the manufacture of gas stoves.

Changes.

Birmingham, Ala.—The Empire Plow Co. has recently installed machinery which equips the factory to make its own plow handles, which few similar concerns in the South are able to turn out.

Des Moines, Iowa.—M. C. Randleman & Sons have sold their washing machine business to the Gee Whizz Washing Machine Co., which will continue the manufacture of the Gee Whizz washing machine. This new company is incorporated with a capital stock of $50,000.



Harvard, Ill.—Hunt, Helm, Ferris & Co., manufacturers of a line of door hangers and similar goods, expect to erect an additional foundry 40x100 feet and a machine shop 40x120 feet.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bangor, Me.—Frank Michaud has opened a bicycle shop on Water Street.

Castleton, Vt.—Warren Allen has opened a bicycle shop in the Brennan Block.

Chatham, Conn.—The Climax Manufacturing company has been incorporated with a capital stock of $25,000 for the purpose of manufacturing bells, toys, bicycle saddles, etc.

Cleveland, Ohio.—The Peerless Company has been incorporated (automobiles). Capital stock $25,000; by F. A. Quail and others.

Cleveland, Ohio.—The Worthington Ball Company (golf balls, etc.), has been incorporated. Capital stock $10,000. Incorporated by George G. Whitcomb and others.

McKeesport, Pa.—Saul Cooper, of New York, has secured a site for a bicycle factory and will employ a number of men and boys.

Plainfield, Conn.—A. C. Edgerton has opened a bicycle repair shop.

Providence, R. I.—The Clegg Photo Supply Company has been incorporated. Capital stock, $12,000.

Riverside, Cal.—Ziegar & Bell have opened a new bicycle store.

Somerset, N. Y.—Robert Spencer has started a bicycle exchange in connection with his harness business.

Changes.

Columbus, Ohio.—Steps are on foot for the consolidation of the Young Repeating Arms Company, of this city, which recently went into the hands of a receiver, and the LeFever and Sons Company, of Syracuse, N. Y. Propositions have been made on both sides. In case the consolidation is brought about the plant will be located in Columbus on North Fourth Street. The plant at Syracuse will be abandoned.

Lowell, Mass.—George H. Bachelder, dealer in bicycles and phonographs, has moved to P. O. Square, where he has better facilities to take care of his trade.

Newfane, N. Y.—Pettit & Pettit, dealers in Hardware, have added to their stock a new line of bicycles and farming implements.

Portland, Ore.—Excavation has begun at Southeast Seventh and Oak Streets for a building for Fred T. Merrill, to be used as an automobile stable. The structure will be of brick, and will occupy a full quarter block. The stock will be on the first floor, while the second story will be used as a hall.

Toledo, Ohio.—The Kirk Mfg. Co. has reduced its capital stock from $150,000 to $15,000; and the Snell Cycle Fittings Co. has reduced its capital stock from $100,000 to $50,000. The above were some time ago absorbed by the organization of the Consolidated Mfg. Co.

Embarrassments.

Lowell, Mass.—It was announced here that H. B. Shattuck & Son, Hardware, bicycle and automobile dealers of Boston, Providence and this city, had decided to go into bankruptcy. The firm, which has been in difficulties for some time, has liabilities of $400,000.

Providence, R. I.—The first meeting of the creditors of W. Fred Hazelton, doing business as Dawson & Hazelton, sporting goods, was held in the office of Chester E. Barrows, Referee in Bankruptcy, on April 18th, and Rhodes V. Eldred was chosen trustee of the estate. Ralph T. Barnefield, of Pawtucket, Irving O. Hunt and Otto P. Robinson, of this city, were appointed appraisers.

Miscellaneous.

Chicago, Ill.—Burley Ayres, one of the first cyclists in this country, is now president of a motorcycle club in Chicago. The sport of operating power-driven, two-wheelers is booming in Chicago faster than anywhere else in the country.

Hartford, Conn.—Nothing indicates more clearly the boom in cycling than the fact that one of the big factories here has received during the past month an average of 250 applications a day for catalogues. In one day 1,300 letters were received asking for illustrated books of 1904 model bicycles. The Western branch of this firm has averaged 800 applications a day, and a new department has been organized to handle the business.

Hartford, Conn.—Part of the success attained by Colonel Albert A. Pope in the business world, and particularly in the manufacture of bicycles and automobiles, may be attributed to his enforcement of the old saying made famous by the Three Guardsmen—"One for all and all for one." Signs bearing these words are placed conspicuously in Colonel Pope's factories throughout the country, and it is believed to account for the loyalty of the thousands of men in his employ.

Providence, R. I.—President George L. Cooke, of the League of American Wheelmen, has appointed Wednesday, June 29, as League Day, when all of the State divisions will be supposed to hold some kind of a celebration. The Rhode Island division will elect its officers that day, and will probably have an outing also.

The Buffalo Cycle Trade Association completed its organization at a meeting held in the Iroquois Hotel on Tuesday evening last, when the following officers were elected for the ensuing year: President, Thomas Keenan; vice-president, J. A. Worthington; secretary, D. H. Lewis; treasurer, E. C. Bull; executive committee, John Henry, A. J. Nabinger, J. A. Cramer, P. W. Eigner and Charles Haberer.

HARDWARE DEALERS RECORD (Continued)

Changes.

Roseville, Ohio.—S. P. Zehrung, who for the past 10 or 12 years has conducted a Hardware store, has closed a deal whereby A. M. Leach, of Millersport, takes over the store. Mr. Leach will take charge of the property at once.

St. Paul, Minn.—Farwell, Ozmun, Kirk & Co. will build a five-story Hardware warehouse in Spokane, Wash., and make that city its Western distributing point, notwithstanding the railroad boycott and the condition of rates. The firm will build also a new central store and warehouse at St. Paul on the Milwaukee tracks. Mr. Kirk stated that the rates would justify the firm in handling a long list of goods at Spokane.

Temple, Tex.—The T. L. Hollingsworth stock of Hardware that has been in the hands of a receiver for the last ten months, was, on April 16th, sold at private sale to Fox & Mills, of Lampasas, and the stock will be moved there and consolidated.

Vandalia, Ill.—James S. Evans has recently purchased the Hardware stock of L. E. Morey, and will continue to conduct the business at the same stand, carrying a full and complete line of Hardware. Mr. Evans was for a number of years associated with M. F. Houston in the same line of business, and is thoroughly conversant with all the minor details connected with the business. He has associated with him his two sons, Bert and Charles.

Vincent, Ohio.—Hayes Bros. have disposed of their stock of Hardware and the new firm is known as Turner & Tresch.

Watertown, N. Y.—The Hardware store in the Burdick Block, on Franklin Street, conducted by Joseph W. Poole and J. Sterling Sill, have taken in a new partner, Byron G. Bents, a young man who spent two years with the firm before accepting a position with a wholesale Hardware house. While Mr. Sill retains his interest in the firm, his personal attention will be given to other business, leaving to the younger men the sole management. The firm name has been changed to Pool, Bents & Co., and they will continue to carry a full line of shelf and Builders' Hardware, with several new lines of specialties for the household the farm and general trade.

Yarmouth, Me.—Charles Russell, of the firm of Griffin & Russell, dealers in Hardware has sold out his interest in the business to Mr. Rogers.

EVERY dealer should handle the Genuine Buckeye Pruner, because he can carefully push it to his best trade, in preference to any other pruner made.

Because it has stood the test of actual use for over 30 years.

Because it is the strongest made---the blades being hand-forged.

Because no other made cuts so easily.

It operates just opposite from other pruners. Grasp the limb with the hook, and cut towards you. It's quicker and easier than the other way.

Size 25—inch.

One dozen in a case.

A $2 Advertising Course

Learn to Earn $20 to $100 Weekly.

I am making a remarkable offer to business men who want to improve their own advertising, and to those who want to learn a congenial and very profitable profession, but are not convinced of their ability to succeed at it, or who are not sure which course to take.

Send me $2 and I will give you four weeks' trial instruction. That will show you just how good my course is, and how valuable it may be to you.

If you decide to continue, and I believe you will, the $2 will be credited to your account.

I **wouldn't** make this offer unless I honestly meant to help you.

I **couldn't** make it unless I really did do for my students the things I promise.

I am a specialist in advertising.

For seventeen years I have been building business for some of the largest advertisers in the world. Regal Shoes, Heinz Pickles, Studebaker Wagons, Jenkinson Stogies, R & G Corsets, and a host of others have been numbered among my clients.

My course is practical not only because it is based on my wide experience, but also because it is backed up by an actual advertising business.

Look up the rating of the Bates Advertising Company, and then send $2. Anyway send stamp for my handsome 66-page prospectus.

CHARLES AUSTIN BATES,

28 Spruce St., N. Y. City.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Wear and Tear

in Horse Nails has been reduced to a minimum in

The New Putnam Horse Nails.

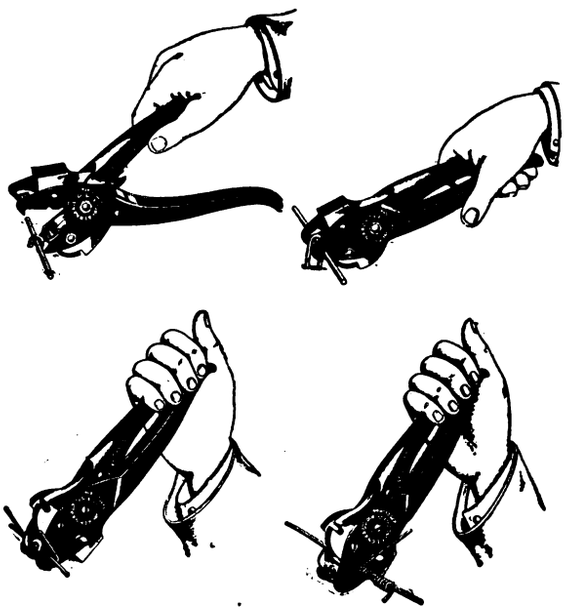
WHY? Because they are made by a newly patented process which increases the natural strength of the iron.

The Highest Test

for tensil strength, elongation and elastic limit was stood by The New Putnam Horse Nails.

Wherever tried they have given entire satisfaction.

They will sell and stay sold. **We have a Special offer.** Write us.

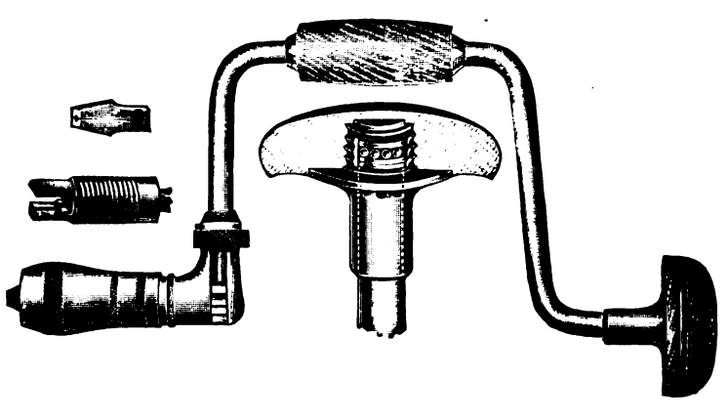


Putnam Nail Co.
Neponset, Boston, Mass.

Six Tools in One:

Staple Puller, Wire Splicer, Plier, Cutter and Hammer
are to be found in

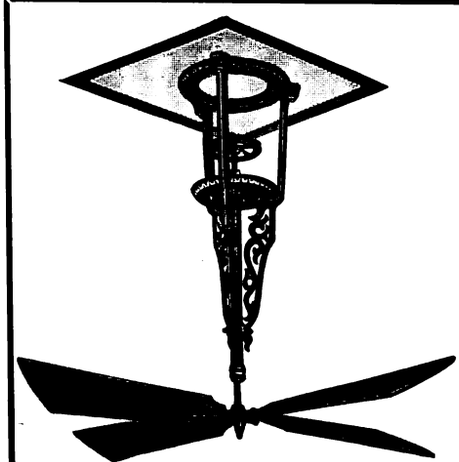
Schollhorn's New Model



"Elm City" Staple Pulling Plier.

The most convenient, durable and powerful pliers on the market to-day. Does the best work rapidly and accurately

The **Wm. Schollhorn Company**
New Haven, Conn.



JUST OUT — Note the Graceful Lines

We have spared no expense to make this new line the best ever. Finest finish and workmanship throughout.

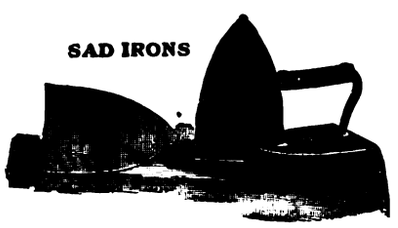
BLACKLOCK FOUNDRY · SOUTH PITTSBURG, TENN. ·

The Trade Mark that stands for reliable goods, good finish and prompt shipments.

REVERSIBLE



Shoe Lasts and Stands.

Made of Cast Iron.

MADE RIGHT TO SELL RIGHT

SAD IRONS

In this line we are leaders.

Our goods stand the hardest usage.

Our assortment is large.

We have the largest and best equipped factory in the south for the manufacture of Sad Irons, Country and Stove Hollow Ware. Ground and Unground. Sugar Kettles, English Pots, Cast Iron Shoe Lasts and Stands, Kitchen and Corner Sinks, Grates, &c.

Shall we send you our catalogue?

BLACKLOCK FOUNDRY
South Pittsburg, Tenn.

Improved Natural Stone Germ Proof Water Filters

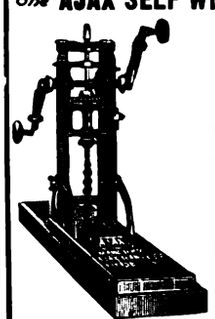
Every Filter guaranteed perfect and absolutely germ-proof.

Display Card with every shipment.

Send for prices and discounts.

We manufacture Sanitary Stone ware of every description.

Fulper Pottery Co. Flemington, N. J



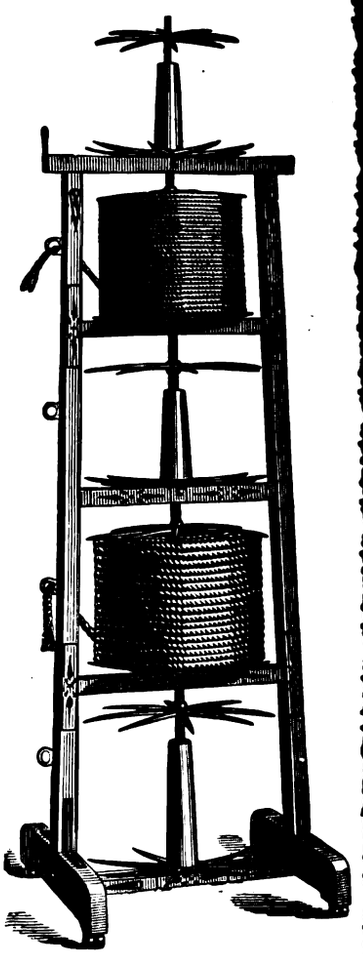
SKEET METAL STAMPING, BLANKING, FORMING COMBINATION AND DOUBLE ACTION DIES made to order.

Our ability is the product of 25 years of experience. All work guaranteed.

HUNT & DORMAN MFG. CO.
15-31 Bright St., Cleveland, Ohio.

The AJAX SELF WITHDRAWING WOOD BORING MACHINE

does not require a special auger; will bore to any depth; strong and durable—all important parts of malleable iron. Sold by the whole sale hardware trade.



AJAX MFG. CO.,
Pittsburgh, Pa.

Manufacturers of the Ajax and Phillips Wood Boring Machines, Standard and IXL Saw Gummers, Collins Self Feed and Dudgeon Style Tube Expanders, Cutters, Swages, etc.

Unbelievers

are being converted as fast as we can get a whack at them to use our

Patent Rope Reel

EVERY HARDWARE MAN, handling rope, needs it.

No recoiling necessary. Rope is placed upon spools in the shape the coils come. Made of best material, nicely finished and varnished.

The Udell Works
Indianapolis, Ind.

Do you handle OHIO WATER TIGHT STEEL HODS?

We have created a demand for these goods that must be supplied, and you should be getting your share of this trade.

They are absolutely WATER TIGHT, the back end being folded like the corner of a dripping pan. No slitting or piecing.

They are light, yet strong and durable. We use a good iron paint, drab in color, which makes them very attractive and if placed where masons can see them, will sell themselves.

The adjustable malleable iron fork and socket, admits of the replacing of a broken handle or taking up shrinkage in a few moments.

Made exactly as represented in cut.

Write to-day for prices. Orders filled promptly.

The GEAUGA MANUFACTURING CO.

Painesville, Ohio.

Gillette Clippers

30 years on the market

1000 pounds strain can be placed on their bearings, which are Drawn Steel Bushings.

1600 Revolutions per minute is the speed of the cutters.

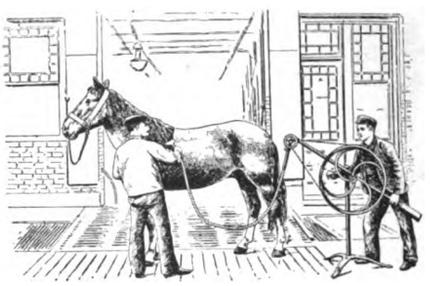
They will cut the hair as fast as you can push the knife.

Over 40,000

In use all over the world.

We warrant every machine we manufacture for Five Years from the date of its purchase.

This guarantee does not include the Cutters which are tempered very hard to ensure best clipping.



Send for Catalogue and Prices.
When writing mention HARDWARE.

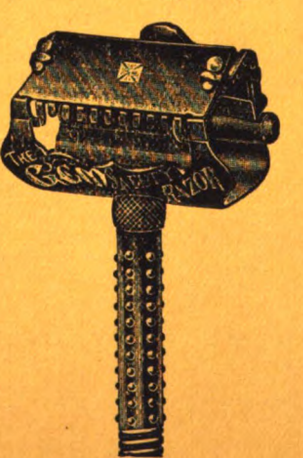
The Gem "Takes The Palm"



Is the daily verdict of millions of men in all parts of the world who are using the Gem Safety Razor. The same verdict is rendered by a host of Hardwaremen who have been handling the Gem for years, at a profit.

Every Gem is well made, simple, durable and easily adjusted.

No better Safety Razor made than the Gem—at any price.

Without question the Gem excels all other Safety Razors in being the most sightly, substantial and sanitary.

To see a Gem is to want it—to use it is to recommend it to others.

The **Gem Safety Razor**

If you want to get ahead of "the other fellow," this year, and get the "Lion's Share" of Safety Razor profits—handle the Gem. Display it well—it will sell itself.

If you want our Silent Salesman Display Case—or our Catalogue—or our Rock Bottom Prices—or all three—you only need ask. Mention HARDWARE.

Let's get acquainted.

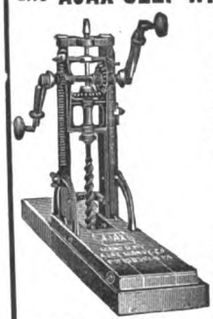
THE inventor of the Turntable Apple Parer made a parer in 1856, and, when it was about completed, he found that he was infringing upon the rights of another. As no compromise settlement could be made, he was obliged to commence anew, and the result was the Turntable Apple Parer, which was made in a very small way in 1857. The trade rapidly increased on this machine until 1864, when it is said there were over 14,000 dozen made and marketed in this country. Though the population was less than half what it is now, the sale of this machine was limited only by the ability of its manufacturers to produce them. In 1868 the Goodell Company purchased all the rights in this parer that then belonged to Mr. John H. Lockey, of Leominster, Mass., and continued the manufacture of this machine without much change for many years. Large quantities of them have been sold by us. The only complaint that could be made of this machine was that the peelings fell upon the turntable gear and sometimes clogged it. In 1898 we decided to make the same machine, only turned wrong side up, so that the peelings, instead of falling upon the gearing would fall entirely free from it. This machine was completed in that year, and is called the '98 Turntable Parer. It has a remarkably nice doffer which pushes off the apple when it is pared, and the working of the machine is unapproached in its simplicity, perfect work, durability and easy operation. The demand for these machines since it was improved in 1898 has been rapidly increasing until to-day it is the leading apple parer in the markets of the world.



We are the oldest and largest manufacturers of parers in this country or any other, and we are well acquainted with the wants of the public in this respect; and we commend this machine unhesitatingly as being decidedly the simplest, most convenient, easiest of operation, most durable, and perfect apple parer ever produced.

"For Those Who Want the Best"

DOUBLE FALCON WRENCH

An inch and three-quarter off-set to allow work close to the wall or ceiling. Each one has two jaws, right and left hand. Made on an improved principle over the alligator wrench. Fixed and flaring jaws, the combination of the grasping jaw and serrated face. with the bearing jaw with straight bearing face. Grasps and releases a pipe with ease and certainty, the curved outline of the pipe finding a tangential bearing in all parts of the opening. The curved jaw first engages the pipe, and then the straight jaw slips under the pipe until jammed tightly into the opening between the jaws, the action being entirely automatic. A forging of the finest tool steel, teeth accurately milled, hardened in the best possible manner, polished and finished with cyanide.

THE BEST
IS
NONE TOO GOOD

FOR MOST PEOPLE

More Hardwaremen throughout the land are handling

Feasel Polishes

either Paste or Liquid, than any other brand of Polish, just because it is

The Best In The World

The most exacting tests have proved this.

Want more proof? Send us an order and see for yourself. It will sell quickly and customers will come for more.

We also manufacture Copper, Iron and Steel, Furniture (perfumed) Gold and Silver Polishes.

Floor Oil (perfumed) and Disinfectant (liquid).

The H. L. Feasel Co.

277 Broadway

New York

U. S. A.

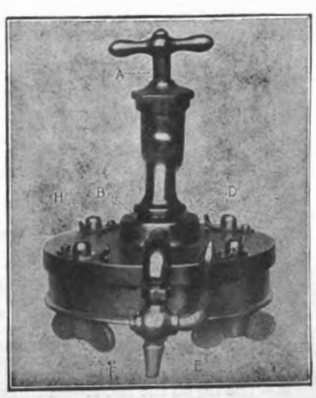
75 Years' Experience

In the manufacture of Edge Tools has taught us that mechanics everywhere are willing to pay a fair price for

The BEST EDGE TOOLS-- WHITE'S--

If you have never handled them, send us a trial order. We are positive you or your customer will want nothing better. Our name helps sell them. Write us. Mention HARDWARE.

L. & I. J. White Co.
BUFFALO, N. Y.



MAKE MORE **MONEY**

Rural Routes are going in all around you. You can get this business with the **SIGNAL MAIL BOX**

It is the original box for Rural Routes with special endorsements of Postmaster General. The best made, the best liked, the easiest sold and the best advertised.

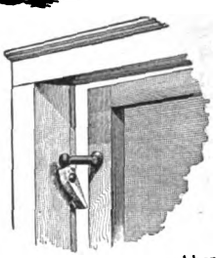
MF Roofing Tin

It has held during the last sixty years the **Most Favored** and leading place in the race for superiority in Roofing Materials

The BEST METAL CORNICES are made of

American Sheet & Tin Plate Co. Apollo Best Bloom Trade Mark Registered Pittsburgh

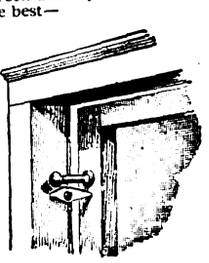
Apollo Best Bloom Galvanized Sheets



The trade mark signifies the highest standard of reliability. The easy working qualities of the Metal make it the favorite of the Metal Worker. When in need of galvanized sheets for construction work, don't be satisfied with substitutes, insist on the genuine.

Our Products are for sale by all Metal Houses

American Sheet & Tin Plate Company
PITTSBURGH, PA.



A Timely Tip

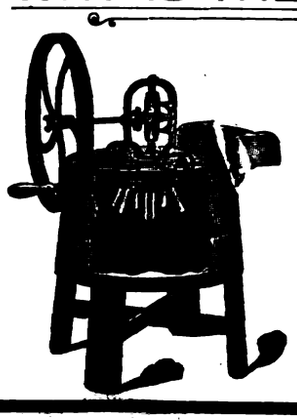
Door closing tips up rubber bumper.

Stop that slamming, banging screen door by using none but the best—

Rebounds slightly.

The Dime Screen Door Check.

It causes the Screen Door to close noiselessly.



Silently closes.

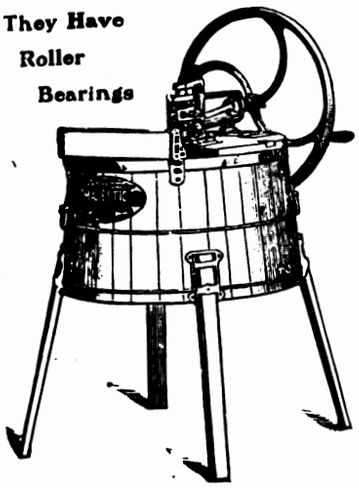
Hardware Dealers!

NOW is a good time to put in a stock of them. Send at once for circular and prices.
Mention HARDWARE.

Caldwell Mfg. Co.
Rochester, N. Y.

WHY IS THE

O. K. THE BEST ROTARY WASHING MACHINE?



—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing the friction and thus making machine so light running and almost noiseless.
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, no escape of steam.

Manufactured by H. F. BRAMMER MFG. CO.,
DAVENPORT, IOWA.

"White Lily Washers wash lily white."

PERFECTION

in the manufacture of Washing Machines is best attained by long experience—we have been at it for 27 years—the use of the best materials, and the employment of skilled workmen.

The Blackstone Rotary Washer

enjoys that distinction. The best is none too good for the Blackstone Rotary. That's why it's name is a synonym for quality among Hardware men.

It gives double pleasure: It sells and stays sold. It lives up to its reputation on wash-day. The Blackstone Rotary does it's work perfectly. Write us for catalogue and prices. Mention HARDWARE.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

A $2 Advertising Course

Learn to Earn $20 to $100 Weekly.

I am making a remarkable offer to business men who want to improve their own advertising, and to those who want to learn a congenial and very profitable profession, but are not convinced of their ability to succeed at it, or who are not sure which course to take.

Send me $2 and I will give you four weeks' trial instruction. That will show you just how good my course is, and how valuable it may be to you.

If you decide to continue, and I believe you will, the $2 will be credited to your account.

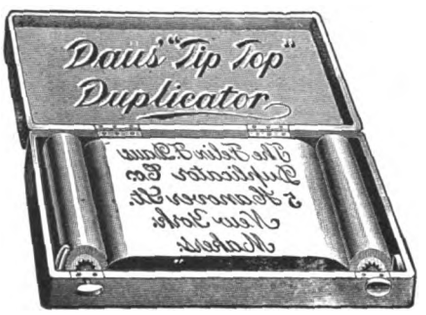
I **wouldn't** make this offer unless I honestly meant to help you.

I **couldn't** make it unless I really did do for my students the things I promise.

I am a specialist in advertising.

For seventeen years I have been building business for some of the largest advertisers in the world. Regal Shoes, Heinz Pickles, Studebaker Wagons, Jenkinson Stogies, R & G Corsets, and a host of others have been numbered among my clients.

My course is practical not only because it is based on my wide experience, but also because it is backed up by an actual advertising business.



Look up the rating of the Bates Advertising Company, and then send $2. Anyway send stamp for my handsome 66-page prospectus.

CHARLES AUSTIN BATES,

28 Spruce St., N. Y. City.

It's "Tip-Top"

¶ With **Daus's "Tip-Top"** Duplicator you can make from 50-100 pen or typewritten copies from one original. A ten days' trial—no deposit required—will convince you of its merits. Shall we send it?

¶ It's simple in construction. Requires neither press, washing nor inking. Thousands used. $5 net buys the complete No. 1. Send for circular. Mention HARDWARE.

HARDWARE

The officers of the Retail Hardware, Implement and Vehicle Association, of Oklahoma and Indian Territory, elected unanimously on report of the Nominating Committee are as follows:

President, A. L. Severance, of Durant, I. T.; first vice-president, Geo. W. Mobry, of Tulsa, I. T.; second vice-president, W. J. Pettee, Oklahoma City; secretary, W. G. Johnston, Oklahoma City; treasurer, S. F. Frazee, Vinita, I. T.

Members of Executive Committee: A. D. Acers, of Norman, Okla.; N. B. Utt, of Elk City, Okla.; T. J. Griffith, of Oklahoma City; Fred. Parkinson, of Wagoner, I. T.; J. M. McNabb, of Wewoka, I. T.

Delegates to National Implement and Hardware Convention: E. C. Stretch, of Vinita, I. T.; W. G. Johnson, of Oklahoma City.

✤

The Waterbury Brass Goods Corporation, recently incorporated with a capital stock of $500,000, have perfected temporary organization by the election of the following officers: President, C. S. Dikeman; secretary, J. H. Woodward; treasurer, Charles L. Holmes; directors, these officers and W. W. Magee and Robert F. Griggs. The company are not yet prepared to announce their manufacturing plans. The personnel of the temporary officers gives an indication that the company will be closely affiliated with the American Brass Company and their allied interests.

✤

The Meriden Cutlery Company, manufacturers of Fine Table Cutlery and Carving Sets, Meriden, Conn., have just removed their New York branch from 88 Chambers street to 10 Warren street, where they have larger and more convenient accommodations for displaying the large line of Table Cutlery they produce, and also have more room for carrying stock from which to fill rush orders.

✤

On and after May 20th, 1904, the general buying as well as the payment of accounts of the Dunham, Carrigan & Hayden Company, will be handled from San Francisco instead of through their New York office. C. W. Gause, the general managing buyer, will be transferred to San Francisco. The New York office will still be continued under the management of Wm. L. Carrigan in order to attend to emergency and special business. Attention is called to the fact that all instructions regarding shipping and billing will accompany the orders sent from San Francisco.

TRADING STAMPS MUST NOW HAVE A SPECIFIED VALUE.

The bill prepared by the Merchants' Association to regulate the issuance of trading stamps in this State was signed by Governor Odell on May 9, and has now become a law. This measure was most bitterly contested by the trading stamp companies. A number of hearings thereon were held before the legislative committees and before the Governor, at which hearings representatives from the commercial organizations and merchants in all lines of trade in all parts of the State appeared in favor of the bill. The Merchants' Association of New York conducted a campaign to promote the passage of the measure, by making a direct canvass of the merchants throughout the State. The law goes into effect June 1st, 1904. Its main provisions are:

That trading stamps must bear on their face the redeemable value, expressed in cents or fractions thereof.

That all concerns issuing trading stamps must redeem them at their full face value, either in cash or merchandise, at the option of the holder, whenever presented in quantities amounting to five cents or over.

The law further provides that failure to comply with its terms constitutes a misdemeanor.

ON ADVERTISING TRADE MARKS.

"Trade Marks and Brands" is the title of a handsomely printed and very interesting book which came from the George Ethridge Company, No. 33 Union Square, New York. This book is 11 x 14 in size, with a striking red cover, and is beautifully printed on buff deckle edge paper. It is devoted to an interesting and very important matter—the intrinsic value of a trade mark as an asset, and the necessity for advertising it and keeping it before the public in every possible way. The book points out the fact that nearly everything is now sold by name and brands, and that the manufacturer who wants to get to the front and stay there must educate the public up to the point where his goods will be asked for by their trade name. The subject is treated exhaustively, and the methods for exploiting trade marks fully discussed. The Ethridge Company sends it free, but only to manufacturers who write for it on their business stationery.

The following quotation from the text of the pamphlet will convey an excellent idea of the intelligent manner in which its main argument is presented:

"In order to achieve success the public demand must exist. The need for the goods must be present, though perhaps latent. If, however, the goods are what they should be, and meet a public want of sufficient magnitude, and can be manufactured and sold at a reasonable profit there is absolutely no limit to the success a manufacturer may achieve, provided he is broad-minded and energetic enough, not only to stamp his trade mark upon his goods, but to stamp it indelibly on the minds of those who might buy his goods.

"The trouble with the average manufacturer is either that he is too timid to push his proposition to the limit, or else, that he is satisfied to be a moderate success and to sit back and be comfortable with what he has acquired. If it were not unkind to do so, it would be possible to name a great many manufacturers who have, by advertising their brand, built up a good business, and then leaned back in their chairs and were content with the steadily decreasing volume of trade which the impetus they originally gave their business continued to bring in. Such men stop before they really arrive."

WILLIAM ROCHE.

William Roche, 52-54 Park Place, New York City, has distributed among the trade the fourth edition of an interesting envelope size pamphlet of 36 pages containing much that will be found of interest to Battery users and others. This combined pamphlet and catalogue has been prepared by Mr. Roche in compliance with numerous requests in the hope that it will perhaps be the means of imparting information to his friends on some matters with which everyone using the electric spark in gas engine work should be familiar, and at the same time the opportunity is availed of to draw renewed attention to the merits of the "New Standard" dry battery and some of their other specialties. This valuable little book may be had upon request to address as above.

"BLACK KID" STOVE POLISH.

The Nickel Plate Stove Polish Company, Chicago, Ills., are the manufacturers of the Black Kid Stove Polish which has already achieved considerable popularity and is sold to the dealers on terms so unique they never fail in making a sale to introduce it. It is rather out of the ordinary for a firm to suggest that under any circumstances customers need not pay for their goods if they are not the best on the market or the best they have ever used. Yet this is the rule in marketing the "Black Kid". The manufacturers state they have yet to have the first can returned under the rule, and that their business under these winning methods has been increasing monthly on this special brand two or three hundred per cent.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

Trade in general is in somewhat of a healthy condition. The traveling salesmen alone are able to make a commendable show of business A number of good buyers, usually in the market at this time of the year are conspicuous by their absence. Strictly Summer goods are waiting for a spell of weather warm enough to breathe the approach of Summer. Notwithstanding the demand is lessened by the inactivity of retail buyers, the jobbers are still hopeful of the season being prolonged only, and not shortened materially.

The demand may be deemed a steady one for all seasonable goods that are considered indispensable to a Spring stock, and on these goods the demand is far ahead of the supply and manufacturers find it difficult to satisfy customers so that few sales may be lost by them.

Dealers in Builders' Hardware report active conditions under an excellent enquiry for the future. The hesitating nature of the stock market turns the thought of many speculatively inclined toward the real estate market and unimproved property is made marketable and consequently profitable.

Goods, the productive facilities of which have been largely promoted under the few good years just ended, are made comparative footballs by some portions of the trade, fearing the possibility of a slump following any accumulation of factory stock.

The several organizations among manufacturers of similar goods, have a strength sufficiently vigorous to hold their own and permit no changes even of trifling importance.

The agricultural prospects on which so much of the hopes of the future depend, seem in almost every state favorable in character. Of course where vivid imaginations have figured on phenominal possibilities, there may probably be a tinge of disappointment at any climatic setback, but generally the hopefu'ness is abundantly visible, and the belief in equalling last year's trade is sufficiently strong.

A great deal of the pessimistic feeling, about which we hear occasionally, comes from that old fashioned branch of the Hardware business which is found in stores that are without modern improvements, or up to-date facilities, and where convenient fixtures have not yet supplanted obstructive ability to market a modern stock of goods made still more unattractive by unharmonious surroundings. The civilizing process of making the modern store attractive by new goods, new methods, new surroundings and a new love for the vocation by the active participant, eventuates in producing a belief in future prosperous conditions that is only possible to successful men who are optimistic.

The general trend of business is scarcely aggressive enough to meet advanced views regarding trade. Some manufacturers of goods that are late in moving, largely seem to be accumulating stock. This, of course, makes in these few cases prompt shipments more easy of accomplishment. Should this feeling become more widely extended, there will be a let-up in the gait of productive energy.

The Export trade, however, shows an eager absorption of the manufacturers' production. Those who cater to the wants of foreign buyers find a satisfactory demand and progressive enquiry for the future.

OUR SUPREMACY IN DOMESTIC EXPORTS.

It is quite apparent that the United States is to head the list of nations as an exporter of domestic products in the fiscal year which ends with the coming month. The contest for supremacy as an exporter of domestic products has been for several years between the United Kingdom and the United States. Until a comparatively recent date the United Kingdom stood at the head of the list. During the past few years, however, the United States has on several occasions exceeded slightly the figures of the United Kingdom, and the latest statements of exports make it evident that in the fiscal year 1904 the United States will be considerably in the lead. The figures of domestic exports of the United Kingdom for the nine months ending with March, 1904, were $1,073,538,366, and of the United States $1,149,330,670, the total domestic exportation of the United States for the nine months in question being thus 76 million dollars in excess of that of the United Kingdom.

These figures, it will be observed, end with March. For the month of April the figures of the United States, as announced by the Department of Commerce and Labor, through its Bureau of Statistics, are $107,535,655, against $107,692,056 of domestic exports in April, 1903. While the figures of the United Kingdom have not yet been received, it is apparent that no sufficient change could possibly occur in the two months to reduce the certainty that the total exportation of domestic products from the United States in the fiscal year ending June 30 next will exceed that of the United Kingdom or any other country.

A further study of the exports of the United States compared with those of other principal countries shows that not only is the United States the largest exporter of domestic products, but that its exports have grown with greater rapidity than those of any other country. The Department of Commerce and Labor, through its Bureau of Statistics, publishes a table showing the total domestic exports of the leading nations in the years ending December 31 from 1893 to 1903, and

Digitized by Google

a study of this table shows the relative growth of those countries in their exportation of domestic merchandise.

This table shows that the domestic exports of the United States grew from 854 millions in 1893 to 1,457 millions in 1903, an increase of 603 millions, or 70 per cent.; those of the United Kingdom, from 1,062 million dollars in 1893 to 1,415 millions in 1903, an increase of 353 millions, or 33 per cent.; those of Germany, from 735 millions in 1893 to 1,185 millions in 1903, an increase of 450 millions, or 60 per cent.; and those of France, from 624 millions in 1893 to 804 millions in 1903, an increase of 180 millions, or about 30 per cent. Austria-Hungary showed a growth in domestic exports of from 327 millions in 1893 to 428 millions in 1903; British India, from 310 millions in 1893 to 408 millions in 1903; and Russia, from 378 millions in 1891 to 392 millions in 1901. Argentina and Japan show, respectively, a large percentage of increase in their domestic exports; those of Argentina, from 90 million dollars in 1893 to 213 millions in 1903, which is by far her largest figures of exports; and those of Japan, from 56 millions in 1893 to 142 millions in 1903.

In the matter of excess of exports over imports the United States stands in marked contrast with the other countries of the world. Her excess of exports over imports in 1903 was 462 million dollars; the next largest excess of exports being British India, 152 millions; Argentina, 87 millions; Russia, 87 millions; Austria-Hungary, 48 millions; Chile, 19 millions; Australia, 15 millions; Mexico, 13 millions; and Egypt, 11 millions. In excess of imports over exports the United Kingdom is of course by far the most marked example, the excess of imports over exports being 1,226 million dollars, against an excess of exports of 462 million dollars for the United States. Germany shows an excess of imports over exports amounting to 238 million dollars; Netherlands, 134 millions; Belgium, 99 millions; France, 92 millions; China, 72 millions; Denmark, 65 millions; and Switzerland, 59 millions.

THE ATLANTA CONVENTIONS.

The interest created by the present Convention of the Southern Hardware Jobbers Association gives an abundant evidence that the meeting is certainly one of the most important in the history of this organization. A fuller attendance of delegates than ever before, and a more general attendance of Manufacturers at the twin Convention held at the same time by the leading makers of Hardware products, show an influence for harmonious action at the present time that dominates the Convention and greatly increases its power for the good of the industry.

There are a number of unsettled propositions to be brought within the scope of its deliberations on subjects which have antagonized conflicting interests, and which will receive such intelligent treatment at the hands of those present, as to guarantee the successful consummation of the plans for future benefit to all concerned, that will make the present convention forever memorable.

The catalogue house question which so closely affects the integral interests of every Hardware dealer in the country, will receive the exhaustive treatment such a far reaching subject unquestionably demands. The best reasoners within the limits of organized influence will ventilate their views thoroughly and conscientiously, and every point of conflicting importance that imperil the advantages to be gained by close affiliation of trade interests will be canvassed strenuously in order to devise some perfect action, some plan of resolute endeavor that will eliminate the demoralizing competition now so prevalent in the methods adopted by the catalogue house programmes, that of killing local success in many lines by a concentration of large capital in a business so destructive of all commercial principle.

Selfish and arbitrary as such methods are, so destructive of every pure principle underlying commercial intercourse, it has still obtained a foothold that nothing short of concentrated effort, wisely devised plans of harmonious energy, and a strong manifestation of the belief that justice demands intelligent treatment of such issues; only these can avail, and under the existing opportunities for plain speaking on a subject so vast afforded by a convention so fully attended, can the dealers throughout the country look for any hope and encouragement to make arrangements that may be expected to accomplish the results anticipated.

There are a number of minor details as to business transactions, that a Convention holding in its membership the master minds of this dignified industry can safely be relied upon to test the conditions in the alembic of reason, with the certain accomplishment of results founded on honesty of purpose, integrity of principle, the brotherhood of unselfish competition, and the love and hope of a commercial existence.

NATIONAL HARDWARE ASSOCIATION.

The Executive Committee of the National Hardware Association of the United States held their semi-annual meeting at Boston on Tuesday and Wednesday, May 10 and 11, with headquarters at Hotel Westminster. There was a very full attendance of the Executive Committee and the Advisory Board, with the executive officers. Much of the time was given to making up the arrangements for the next annual convention, which will occur at Atlantic City in November, it being the custom of the committee to devote the Spring meeting to this matter, as it requires a good deal of working out of general detail. A committee was appointed to act with a similar committee from the National Retail Hardware Dealers' Association for the consideration and adoption of measures designed to mitigate the abuses introduced in the trade by the competition of catalogue houses. A telegram of sympathy was sent to Merchant & Co., Philadelphia, one of the members of the association, in view of the death of Clark Merchant, whose character was referred to in terms of sympathetic condolence. Tuesday afternoon the members were the guests of the New England Hardware and Iron Association at an outing at the Brookline Country Club.

Those present at the meeting were: President, Samuel A Bigelow, of Bigelow & Dowse Company, Boston; first vice-president, John C. Koch, John Pritzlaff Hardware Company, Milwaukee; secretary-treasurer, T. James Fernley, Philadelphia; Executive Committee: P. E. Strauss, Fitz, Dana & Co., Boston; J. D. Moore, Moore & Handley Hardware Company, Birmingham, Ala.; W. S. Wright, Wright & Wilhelmy Company, Omaha, Neb.; Frederic Barker, Barker, Rose & Clinton Company, Elmira, N. Y.; Advisory Board: William W. Supplee, Supplee Hardware Company, Philadelphia; H. H. Bishop, McIntosh Hardware Corporation, Cleveland, Ohio; R. A. Kirk, Farwell, Ozmun, Kirk & Co., St. Paul, Minn. The absentees were: Second Vice-President Brace Hayden, Dunham, Carrigan & Hayden Company, San Francisco; R. M. Dudley, Gray & Dudley Hardware Company, Nashville, Tenn., of the Executive Committee, and John Bindley, Bindley Hardware Company, Pittsburgh, Pa., of the Advisory Board.

The visitors, while enjoying a very pleasant sojourn in Boston, had the opportunity to see a good deal of the city, the local members and others of the trade acting as their hosts. The committee went to New Britain from Boston, where the visitors were given a most cordial reception. A luncheon and reception in their honor was served at the New Britain Club from 1 to 3 o'clock Thursday afternoon, at which Mayor Bassett, President A. H. Abbe, of the New Britain Business Men's Association, and other prominent citizens received with the manufacturers. The remainder of the afternoon was occupied in visiting the various Hardware manufacturing establishments of the city. At 5 o'clock the visitors were taken to the Farmington Country Club, where a dinner was given in their honor. Vice-President Charles M. Jarvis, of the American Hardware Corporation, acted as toast master. Charles E. Mitchell, of New Britain, former United States Patent Commissioner, delivered an address of welcome, and Samuel A. Bigelow, of the Bigelow & Dowse Company, Boston, president of the National Association, responded for the visitors. Other speakers were: Governor Chamberlain, of Connecticut; John C. Koch, of the John Pritzlaff Hardware Company, of Milwaukee, vice-president of the association; ex-Mayor George W. Corbin; S. Norvell, of the Norvell-Shapleigh Hardware Company, St. Louis; T. James Fernley, secretary of the National Association, and Howard S. Hart, of the Russell & Erwin Mfg. Company. The visitors passed the night at the Country Club, and devoted Friday to a further inspection of the manufacturing plants of the city.

CATALOGUE HOUSE COMPETITION.

Hibbard, Spencer & Bartlett Co., Chicago, Ill., participating to this extent in the discussion anent catalogue house competition, are mailing to the trade the letter which follows, in the course of which they make a number of timely suggestions to retailers, indicating methods for successfully combating the influence which such houses apparently exert. It is well worth perusal:

Through the columns of *The Iron Age* one of our neighbors opened a discussion upon the catalogue house question which has attracted the attention of manufacturers, resulting in criticisms of jobbers and retailers.

As the catalogue house idea originated in Chicago, and as the firms doing a large business are located in this city, the discussion is evidently intended to apply to the Chicago houses in particular, and the manufacturers' criticisms to the jobbers who are so located as to readily supply these houses with goods. We think every manufacturer and jobber in this country should declare himself upon this question, which is of such vital importance to the vast body of retailers. As for ourselves, we do not and will not sell these houses any goods.

In this connection we wish to call the attention of retailers to some methods which have been successfully employed by retail merchants in counteracting the local effects of catalogues:

1. Keeping a larger and better assortment of goods.
2. Displaying them in a more attractive manner.
3. Notifying consumers that any articles which the catalogue houses list and are prepared to ship will be delivered to them at same price (freight or express charges added), of the same quality and on the same cash terms as advertised in the catalogues.
4. Not quietly permitting customers to send their ready cash in payment for profitable goods to catalogue houses, and giving them long time credit upon the staples and unprofitable goods they wish to purchase near home.
5. Selling at fair profits, as nearly as possible for cash, and putting the same energy and push into business that the catalogue houses display.

We believe that the competition which looks so serious can be profitably met by the retail merchants. The jobbers will certainly assist.

THE NATIONAL CYCLE TRADE ASSOCIATION.

The National Cycle Trade Association will hold their third annual meeting in New York City on June 22d. Proper committees for the successful transaction of a large amount of important business are now in preparation, and there is every reason to believe that a very pleasant gathering of the members and those interested in cycle advancement may be anticipated.

DEATH OF SPENCER A. JENNINGS.

The Tin Plate and Metal trades of New York City suffered a serious loss in the death of Spencer A. Jennings, of the long established and highly esteemed house of Bruce & Cook. Mr. Jennings died at his home, Glen Cove, L. I., on Thursday, May 12th, after a long illness. He was born in Illinois, March 11th, 1850, his mother being a sister of John C. Cook, who for many years was an important factor in the house of which Mr. Jennings has been such an able and industrious member. For a number of years he resided in Illinois, and was a student at the Northwestern College at Plainfield, but completed his studies at Islip, N. Y., the family having removed to New York. Since 1871 he has been connected with the firm of Bruce & Cook, devoting his especial attention to the large buyers of the house, who will feel a sad regret on learning of his death. Mr. Jennings was a member of the Riding and Driving Club and the Union League Club, the Hamilton and the Fulton Clubs, and was one of the founders of the Lincoln Club of Brooklyn. He was possessed of a warm heart that indulged in philanthropic work without publicity, and his inflexible integrity crowned his industrious life with the love and esteem of all who knew him. He was married in 1885 to Miss Ellen E. Buchanan, of Illinois, who, with three daughters, survive him.

THE AMERICAN FORK &

The American Fork & Hoe Company, Cle[illegible], being the distributors of a very handsome publication, being catalogue "B," having an attractive cover of bright red with black lettering. To accommodate their many friends from whom they have been constantly receiving inquiries regarding special hand garden tools, they have issued this special catalogue, and invite to it the careful attention of the trade. Illustrated therein will be found many tools having a large and ready sale and which will pay a handsome profit. They request correspondence from parties in the market for anything in the way of hand garden or farming tools. They claim to be the largest manufacturers in the world of this class of goods. The book is finely illustrated and will be forwarded upon request of the above concern.

AMERICAN TRADE OPPORTUNITIES IN NANTES.

(From United States Consul Ridgely, Nantes, France.)

AMERICAN MANUFACTURES IN NANTES.

American typewriters, cash registers, sewing machines, egg beaters and meat choppers are sold currently in Nantes for the reason that the manufacturers exporting those products are represented by active agents who speak the language and drum the country just as commercial travelers do in the United States. Various articles of American hardware, introduced in a "gingerly" fashion by German, English, and French importing houses at Hamburg, Liverpool, and Havre, are also seen here in a small way, but there is no active demand for any article of American manufacture other than those above mentioned. The Germans are imitating our ice boxes, ice-cream freezers, and meat choppers, and are selling those articles here in considerable quantities. American washing machines are also appearing, but are not yet popular. The wash boats on the rivers Loire, Erdre, and Sevre employ thousands of women who wash by hand in the old-fashioned way, earning 40 sents for twelve hours' work, and the introduction of patent washing machines is not relished by this class of laboring people.

AGRICULTURAL IMPLEMENTS AND MACHINERY.

The land in Brittany is so completely divided up into small parcels belonging to separate owners that there are few large fields of grain or of any other one product. As a consequence, even though the country is of an agricultural character, there is relatively little demand for improved reapers and mowers and similar modern agricultural implements of an expensive character. There is no question as to whether or not American agricultural machinery will ever be as much in demand here as it is in other parts of France. Meanwhile threshing machines and many varieties of light agricultural implements, some of them modeled on American styles, are being manufactured here, and this industry is one of the few that have had better than an average year up to date. If any American exporters of agricultural machinery and implements are represented in Nantes I am not aware of that fact.

AMERICAN OIL STOVES.

One article of American manufacture that is rapidly becoming popular and current in France is the coal-oil stove. Several varieties of these stoves are sold here, and the demand for them this year is already double that of 1902. The heating stove is the article almost solely in demand and the grades most sold in Nantes range in price (retail) from 50 francs to 100 francs ($9.65 to $19.30).

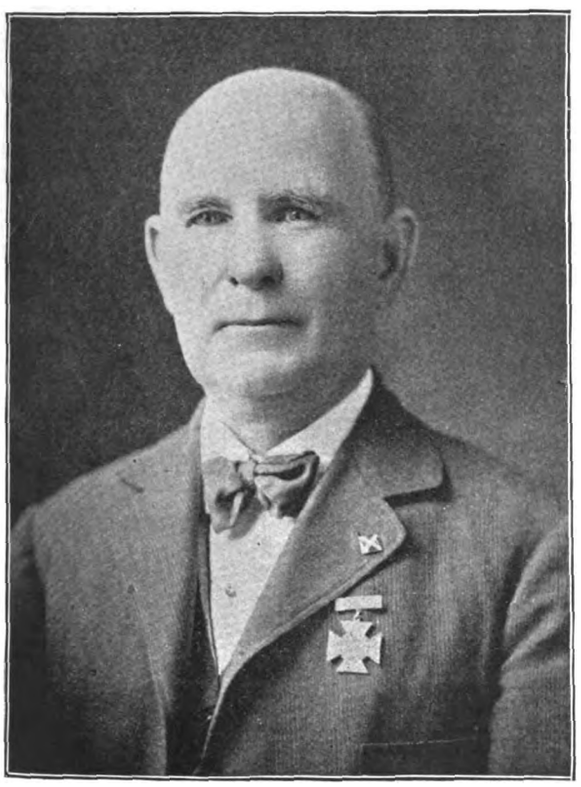
THE GRIFFIN MANUFACTURING COMPANY, Erie, Pa., are sending out a very attractive envelope size catalogue regarding Hinges of their manufacture. It is a high grade little book of 47 pages, being finely printed on heavy coated paper and is profusely illustrated. Included in the contents are hasps and staples, folding brackets, shelf brackets, drawer pulls, sash lifts, barrel bolts, steel door hangers, standard steel track, roller bearing door hangers and flexible door hangers, wrought washers, etc., each accompanied by illustrations, descriptions and list prices. Catalogue may be had upon request to address as above. All list prices and discount sheets issued by them previous to this one are withdrawn.

THE SOUTHERN HARDWARE JOBBERS' ASS'N.

FOURTEENTH ANNUAL CONVENTION.

OFFICERS.
1903-1904.

President—W. M. Crumley, Beck & Gregg Hardware Co., Atlanta, Ga.



First Vice-President—John Donnan, W. S. Donnan Hardware Co., Richmond, Va.

Second Vice-President—E. A. Peden, Peden Iron & Steel Co., Houston, Tex.

Secretary-Treasurer—C. B. Carter, Knoxville, Tenn.

Executive Committee—O. B. Barker, Barker-Jennings Hardware Co., Lynchburg, Va.; Chas. H. Ireland, Odell Hardware Co., Greensboro, N. C.; Bruce Keener, C. M. McClung & Co., Knoxville, Tenn.; F. B. Dunlop, Speer Hardware Co., Ft. Smith, Ark.

Advisory Board—Composed of Ex-Presidents—W. E. Newill, King Hardware Co., Atlanta, Ga.; G. W. Barnett, G. W. Barnett Hardware Co., Montgomery, Ala.; J. J. Mandlebaum, Fones Bros. Hardware Co., Little Rock, Ark.; O. B. Barker, Barker-Jennings Hardware Co., Lynchburg, Va.; J. D. Moore, Moore & Tanley Hardware Co., Birmingham, Ala.; F. A. Heitmann, F. W. Heitmann Co., Houston, Texas.

W. M. CRUMLEY, PRESIDENT.

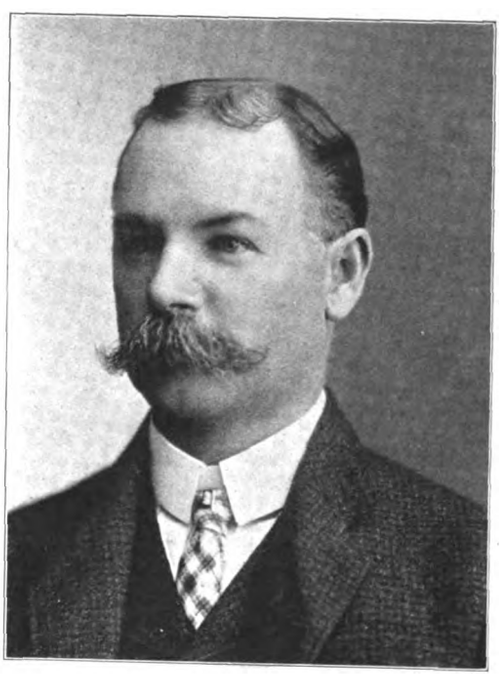
STANDING COMMITTEES—1903-1904.

Supply Committee—W. H. Kettig, Milner & Kettig Co., Birmingham, Ala.; W. D. Krenson, J. D. Weed & Co., Savannah, Ga.; Thos. W. Fritts, Tom Fritts Hardware Co., Chattanooga, Tenn.

Metal Committee—Geo. R. Vaughan, Barney-Cavanaugh Hardware Co., Mobile, Ala.; Bruce Keener, C. M. McClung & Co., Knoxville, Tenn.; J. H. Fall, J. H. Fall & Co., Nashville, Tenn.

Transportation Committee—W. E. Newill, King Hardware Co., Atlanta, Ga.; Chas. H. Watkins, Watkins-Cottrell Co., Richmond, Va.; F. A. Heitmann, F. W. Heitmann Co., Houston Texas.

Press Committee—F. P. May, F. P. May & Co., Washington, D. C.; A. B. Palmer, Palmer Hardware Co., Savannah, Ga.; S. E. Clarkson, Armstrong Hardware Co., Oklahoma City, Okla.



Manufacturers' Committee—Frank S. Gray, The S. B. Hubbard Co., Jacksonville, Fla.; J. C. Bering, Bering-Cortes Hardware Co., Houston, Texas; H. H. Mayberry, Gray-Dudley Hardware Co., Birmingham, Ala.

Grievance Committee—James Moroney, Moroney Hardware Co., Dallas, Texas; W. D. Mounger, Baker & McDowell Hardware Co., Natchez, Miss.; P. G. Wall, Knight & Wall Co., Tampa, Fla.

Membership Committee—Joseph Orgill, Orgill Bros. & Co., Memphis Tenn.; R. F. Bell, Wm. Henry & R. E. Bell Hardware Co., Ft Worth, Texas; C. A. Cunningham, Cunningham Hardware Co., Mobile, Ala.; H. M. Wortham, Dunlap Hardware Co., Macon, Ga.; F. W. Powers, Mitchell, Powers & Co., Bristol, Tenn.

RECEPTION COMMITTEE.

Irby Bennett, Chairman....Winchester Repeating Arms Co.
R. N. Barber.....Smith Hemenway Co.
W. H. Bennett.....Reading Hardware Co.

"HARDWARE'S" SPECIAL TRAIN.

Eastern manufacturers with their wives and children, to the number of nearly a hundred accepted the invitation of HARDWARE and made up a very congenial party, which left New York on Sunday, May 22nd, bound for the "Metropolis of the South."

Four Pullman's, the Lycomedes, Tremont, Pleiades and observation car, Sybaris, left Jersey City at 4.50 P. M., attached to the regular Southwestern Limited. The party was joined by a number of delegations at Philadelphia and Baltimore, and at Washington by a large number from Pittsburg and other points and by the private car "Sunset" chartered by the Reading Hardware Company. The five Pullmans, with diner and buffet car were then made up in a special train, all "Hardware" but one car, and completed the run in good time. On board were the following:

"SIMONIDES."

Robert Garland, Garland Nut & Rivet Co., Pittsburg, Pa.; Mrs. Robt. Garland, Miss Alice Garland, Fred. S. Merrick, Standard Horseshoe Co., New Brighton, Pa.; James C. Deane, Goodell-Pratt Co., Greenfield, Mass.; J. H. Towne, A. W. Clark, Yale & Towne Mfg. Co., New York; Archibald Paull Mitchell, Hardware Publishing Co., New York; B. A. Hawley, Russell-Erwin Mfg. Co., New Britain, Conn.; Chas. Glover, C. A. Earl, Corbin Screw Corp., New Britain, Conn.

PRIVATE CAR "RAINBOW."

Reading Hardware Co.:—John E. Harbster, President; Samuel Y. Riegner, Treasurer; G. N. Jacobi, Gen'l Sales Manager; B. Luerrsen, Advertising Manager; C. S. Packard, New York Manager; T. B. Hendrickson, Philadelphia Manager; J. C. McDonald, Trav. Agt. So. Ter'y.; W. H. Bennett, Chicago Manager. Amphion Male Quartette; Apollo Mandolin Orchestra.

"SYBARIS."

C. B. Parsons, J. W. Ryan, P. & F. Corbin, New Britain, Conn.; Corbin Cabinet Lock Co., Geo. W. Corbin, C. H. Baldwin, Wm. Taylor, W. C. Reitz, Pittsburg Steel Co., Pittsburg, Pa.; Daniel Stern, "American Artisan" Chicago; Joseph McCaffrey, McCaffrey File Co., Philadelphia, Pa.; J. S. Bonbright, Supply Hardware Co., Philadelphia.

"TREMONT."

H. D. Harvey, National Supply Co., Baltimore, Md.; Mrs. H. D. Harvey, Harold Le Roy Harvey, J. A. Fopiano, Max Klaas, New York; L. H. Vogel, W. I. Sherwood, Wm. Vogel & Bros., Brooklyn, N. Y.; W. H. Cole, T. D. Halliwell, Tower & Lyon Co., New York; Mrs. T. D. Halliwell; F. J. Schollhorn, The Wm. Schollhorn Co., New Haven, Conn.; T. H. Keller, Peters Cartridge Co., New York; W. G. Yantis, F. Norvall, Norvall-Shapleigh Co.; T. James Fernley, Secy.-Treas. National Hardware Association; Jos. M. Hottel, G. & H. Barnett, Philadelphia; S. H. Jacobs, Troy Nickel Works, Albany, N. Y.

CAR 1 "PLEIADES."

L. F. Thurber, White Mountain Freezer Co., Nashua, N. H.; J. D. Bethel, Hopkins & Allen Arms Co., Norwich, Conn., Mrs. J. D. Bethel; Wallace L. Pond, Nicholson File Co., Providence, R. I.; D. H. Goodell, R. C. Goodell, Goodell Company, Antrim, N. H.; F. E. Muzzy, J. Stevens A. & T. Co., Chicopee Falls, Mass.; C. F. Carrier, Cronk & Carrier Co., Elmira, N. Y.; F. I. Johnson, Iver Johnson's A. & C. Co., Fitchburg, Mass.; C. K. Simonds, Simonds Mfg. Co., Fitchburg, Mass.; A. Eugene Bolles, Hardware Publishing Co., New York; F. D. Mitchell, Secy.-Treas. A. H. M. A., Philadelphia; G. P. Kelley, Official Stenographer; A. C. Albrecht, North Bros. Mfg. Co., Philadelphia; Harry Mayer, Mayer & Co., Philadelphia; Fayette R. Plumb, Fayette R. Plumb, Inc., Philadelphia.

"General Melancholy" was strictly out of it and if any one on board was afflicted with moroseness, there was only one place on the train where the afflicted one could enjoy the pleasures of such an attack, and that was in the baggage car out of sight behind the trunks.

Havanas for the men and "Huyler's" for the ladies and children were distributed and Harbster's musicians kept every body happy with coon songs and mandolin melody, liquid refreshments were served, while the train comedian, a certain portly gentleman from the city of Brotherly Love left "smiles that wouldn't come off" from one end of the train to the other.

The party arrived at their destination on time and were received by the Reading Hardware Co.'s Band with all the honors.

FOURTEENTH ANNUAL CONVENTION.

The fourteenth annual convention of the Southern Hardware Jobbers' Association was held in the beautiful Metropolis of the South, Atlanta, Ga., on the four days, Tuesday, May 24th, to Friday, May 27th, and it proved to be one of the most successful gatherings in its history. With congenial surroundings, fraternal welcomes gladly extended on every hand, the delegates were made to feel that true Southern hospitality which is a synonym for an honest sympathetic welcome that appeals to the heart. The presence of so many handsome ladies, the wives, sisters and daughters of the delegates, with faces wreathed in the happy expression of enjoyable content, certainly formed not the least of the attractions of this noted convention. More magnificent weather could not have been asked for and every hour of the convention continuance brought its own duty and added its own pleasure.

MEMBER'S BADGE.

KIMBALL HOUSE.

The headquarters of the Southern Hardware Jobbers were at the Kimball House in the ball room, attached to which the convention proceedings were held. The delegates and visitors, of which it was estimated there were quite a large number present, were all invited to assemble promptly at 9.30 A. M., which, as the ladies were to accompany them where possible, was accordingly done.

Tuesday Morning's Session.

The meeting was called to order by President Crumley, and after a prayer by the Rev. H. S. Bradley, D.D., the pastor of Trinity M. E. Church, South, the proceeding of calling the roll followed. There were delegates present. The en-

Digitized by Google

tire convention then joined in singing the National Anthem, "America," which was entered into with commendable spirit.

In a few brief remarks, President Crumley welcomed the visitors to Atlanta, the president being followed by the Hon. Evan P. Howell, Mayor of Atlanta, who gave a civic welcome to the beautiful city over which he holds the reins, taking for his text, "Here's Our Hand," he eloquently expressed the pleasure felt in seeing so representative a body of Hardwaremen.

The Mayor's address was happily responded to by J. C. Birge, president of American Hardware Manufacturers' Association, in a felicitous speech.

Hon. Evan P. Howell, mayor of atlanta.

ADDRESS OF WELCOME TO THE MANUFACTURERS.

BY W. W. WEBBER.

On behalf of the Southern Hardware Jobbers I welcome you to this convention. This, doubtless, is a work of supererogation because you must have noticed since your arrival here that you are thrice welcome. You can know from the pressure of the hand, or a glance when we meet, that we are proud to have you with us and with regret will we see you take your leave. We welcome you not purely as men with whom we have business relations, and we are not glad you are here simply because we hope to get a five or ten per cent. better discount, but we welcome you here because we want to know you and love you, understand and appreciate you, and 'tis a happy coincidence that we meet each other in the Empire City of the South, where 39 years ago our fathers met in one of the sanguinary struggles of a war that depleted your section and impoverished ours, while it challenged the admiration of all mankind, and today I know you join with us in thanks to the Prince of Peace for the beneficient conditions that make this meeting possible. Gatherings such as this will ultimately make the whole world kin, and this being so our social and business relations will become more extensive and confidential. And, too, we hope that your visit here may disclose to you

THE TRIUMPHS AND POSSIBILITIES OF THE SOUTH.

Her fields and forests, her sublime climate, her beautiful women and chivalrous men cannot be excelled by any other spot on God's green footstool. We are enamored of ourselves and our country and of any one who reciprocates howsoever faintly. Did you ever analyze the word "welcome?" What does it mean? It means when said to me that I am to be at ease in any home or hamlet, city or country, State or nation that gives me a welcome. It means that I have the confidence and esteem, respect and approbation of the man, community or body extending it and when we say to you "welcome" we mean to convey all that can be made out of the word. We mean to say that we welcome you as men who by their industry and foresight keep abreast of the time in all improvements and appliances, who originate and initiate into the market some of the things that go to lighten the burden of the human race, and make life the easier to live.

From among you, and antedating you, was Eli Whitney, whose genius, more than that of any other man, has helped

TO PLACE THIS COUNTRY IN THE FOREMOST RANK OF NATIONS.

It was not his fortune nor his lay to write his name among the orators and statesmen of his time, but it is written in every community of the South in characters more enduring than bronze. The wizard of Menlo Park will not go down in history as a man upon whose words audiences have eagerly hung, but the network of wires and lights that "shine like gems of purest ray serene" will be his enduring monument. And I do not forget that the greatest friend that the women of this, and all countries ever knew had his habitation among you. But for his genius the laces and flounces, forbelows and whatnot, the yokes and girdles, bodices and belts that amaze us with their beauty today would have been well nigh impossible. The ladies should erect a monument to Elias Howe—the great liberator of the gentler sex. Your inventors and manufacturers have by dint of energy and attention to detail evolved many useful and necessary articles, the absence of which would seriously interfere with our daily routine; hence

WE WELCOME TO OUR MIDST THOSE WHO HAVE CONTRIBUTED SO MUCH TO OUR COMFORT.

This is a day when we should all feel a deep interest in our country and her destiny, and should all join in a concentrated effort to capture the world's commerce for our fields, forests and factories.

To the South of us beyond the land of the Montezumas, and down among those people who for years have turned to us as the Helianthus to the sun, who have patterned their Governor after ours we are to create a water-way cutting the continent in twain and when the waters meet they will sing a song of victory that will reverberate round the world proclaiming us the most phenomenal people of all the ages.

The time and place of this meeting are peculiarly auspicious. We are met in a city that was the first to feel the impetus of manufacturers in the South, was the first to brush away the dark and lowering clouds that followed in the wake of a civil war, was the first to rise Phœnix-like from the ashes and gird on her armor and go forth to do battle for our country's commerce. Others have taken inspiration from her noble example until now all over our beautiful Southland

CAN BE HEARD THE RING OF THE HAMMER AND THE HUM OF THE LOOM.

When we contemplate the risen South, the new South, our patriotism expands and in our enthusiasm we exclaim "My country! may she always be right, but right or wrong, my country."

The time is the month of May, when all nature is a smile, when we have with us the hyacinth and honeysuckle, the pomgranate and the magnolia, when the Great and Good Giver of all things has vouchsafed to us the flowers of the field and the birds of the forest. "When every prospect pleases and only man is vile," when

ALL BICKERINGS AND ANIMOSITIES SHOULD BE BURIED.

when 'Peace on earth, good will toward men" should be emblazoned on the banners of us all. Hence, my friends, we welcome you, and in concluding I voice the belief that in no part of this union from Niagara's grand and beautiful falls from whence the rainbow stretches to our sea-girt Southern shore, from the deep Atlantic whose billows break against the shores of our Eastern States to the broad Pacific where the breezes whisper sweet murmurings to the tide as she goes out beneath the setting sun, from the glittering emporium of stately New England to the mining camps on the Sierra Nevadas, in all the length and breadth of this land could you find a more genuine welcome than we extend to you and yours.

S. G. Gilfillan, of the Belfont Iron Works Co., Ironton, Ohio, responded to the Address of Welcome in the following address:

RESPONSE BY S. G. GILFILLAN.

WELCOME! WELCOME! WELCOME!

The word welcome is at all times a delightful word to hear.

Digitized by Google

It at once makes you feel at home and you are glad you came, but especially under the present auspicious circumstances it is doubly gratifying to all whom I represent. When the welcome comes from the lips of an eloquent Southern gentleman in a delightful Southern city and is guaranteed by that most hospitable of all organizations, the Southern Hardware Jobbers' Association, each member thereof being noted for his friendly greeting and hearty handshake. A genuine Southern welcome, such as we receive here, has an effect on me that can only be described by using the definition that was once given for love, viz: "Love is an itching of the heart that you can't scratch." likewise

A SOUTHERN WELCOME IS SOMETHING THAT YOU CAN'T MATCH.

When I look around me and see the smiling faces of some of my very best and most distinguished friends, who are regular Chauncey Depews when it comes to speaking either before or

S. G. GILFILLAN.

after dinner, methinks I hear them say, "Why did the committee ask 'Gil' to speak?" and thus I am reminded of the visit made to Mt. Vernon by two of our distinguished citizens, viz., Admiral Dewey and General Miles, who are the best of friends, but they do not mind "knocking" each other good-naturedly. They went down to Mt. Vernon together on some holiday when naturally there were hundreds of visitors to the old home and burial place of the "Father of His Country." General Miles seemed much impressed. He silently contemplated the crowd for a few moments, and then said with feeling: "What, I wonder, would Washington say if he were suddenly to appear here in the flesh?" "Do you mean just at this moment?" asked the Admiral, with a suspicious twinkle in his eye. "Yes, certainly," answered Miles, a trifle annoyed that his companion had failed to catch the inspiration of his thought. "I really don't know," said the Admiral whose twinkle by this time had become actually malicious, "unless he asked how you ever succeeded in getting the job he used to hold."

In representing your guests and in responding to your welcome, I want to first speak for the ladies, God bless and protect them! for we could not (and we would not if we could) live without them. Their presence lends to these conventions a personality that is both pleasing and profitable, from whatever standpoint it may be viewed. The ladies are first in love, first in peace, and I almost said first in war, but that would not be true. In our city we have a gentleman who appears to have a patent right (and he has reserved all privileges) to respond to the toast, "The Ladies," and not long ago at a banquet he was asked to respond to the toast, "Our City," but when the time came he arose to his feet and said: "The Ladies, God bless them," but just at this point one of his friends called his attention to the fact that he was on the wrong subject; and yet that was not nearly so bad as the effort made by the Chicago gentleman (who must have been in about the same mental condition that I am just now). He was supposed to make an address on the necessity of night schools, but after looking at his audience for awhile, his memory took flight, although his tongue still wagged, and it said: "There is no getting away from the fact that we have more badly dressed women here in Chicago than in any other city in this part of the country," and he is still alive. I therefore, on behalf of the ladies, who are here as your guests, thank you most sincerely for your kind greetings and your cordial welcome.

* * * *

And I now again express thanks on behalf of the salesmen for the hearty welcome that you have given them and for the pleasures that they are sure to have and which they appreciate fully.

And now

A WORD OR TWO FOR THE EDITORS AND REPORTERS,

who always grace these occasions with their happy smiles and who really need no one to represent them as they are at home wherever you put them and amply able to take care of themselves when it comes to speech making, and still I know that they are proud to be your guests at this time and appreciate your hearty welcome and will enjoy your hospitality with vim, vigor and victory.

And now on behalf of another great organization, that of the American Hardware Manufacturers' Association, who certainly show their appreciation of the privilege of being your guests when they call their meeting at the same time and place so as to enjoy meeting you socially, both before and after dinner, and by spending the greater part of their time with you prove beyond a doubt that you are the magnet that draws them to this beautiful city of the Southland; and why should we not meet together, both in business and social sessions, our interests are mutual, "United we stand, divided we fall," and this is an opportune time and place for both business and pleasure. I am fully assured that the business sessions of both conventions will be profitable to all who attend them, but what of the joint social sessions, will we say: "Watchman, tell us of the night?" no, but on the contrary, let us keep that *sub rosa* and have a jolly good social time, but not forgetting or neglecting the most important thing of all, that of solidifying to a greater degree than ever before the very pleasant business and social relations that now exist between the jobbers and the manufacturers. I therefore assure you that the manufacturers appreciate the sincere welcome given them and still believe in reciprocity.

Before closing I wish to ask one question, and that is, What is the matter with T. James Fernley?

Irby Bennett, chairman of Reception Committee, then made his annual report, which proved an extremely interesting document.

Then followed the introduction of new members, and the visitors and guests, a number of impromptu speeches were made and in which was included an informal reception of manufacturers, jobbers and their representatives, concluding with the entering of names of delegates and others in the Registry Book, under the auspices of the sergeant-at-arms, H. H. Beers.

The Tuesday Afternoon Session

was Executive and intended for Jobbers only. The meeting was called to order promptly at 2.30 in the breakfast room of the Kimball House, and following the reading of the minutes of the 1903 convention.

President W. M. Crumley then delivered his annual address:

PRESIDENT'S ANNUAL ADDRESS.

Gentlemen—

I congratulate you on this, your fourteenth annual convention, and the large attendance of our own members, and also of the Manufacturers' Association, which is a proof of the wisdom of holding our meetings within our own borders. It was said in opposition to this, that the manufacturers would not attend if we did not hold our meetings in the North. This evidently was a mistake, as proved by the unusually large attendance of these gentlemen.

Digitized by Google

ASSOCIATION PROGRESS.

I am glad to report to you that your Association is in a most prosperous condition, possibly more so than ever before since its organization.

NEW MEMBERS.

We have had many new members added to our roll and are in condition to accomplish more good with the manufacturers than ever before. In fact, I believe we will be granted almost anything in reason that we may ask of them. They recognize our strength and we have proved to them that we will not be unreasonable in our demands upon them and they have about come to know that we are necessary to their welfare.

OUR OWN MEMBERS.

I regret to state that I have heard from so few of you during the year, nor have you taken advantage of your committee by writing them about any of your troubles. It may be, however, that I should congratulate you that all things have moved so smoothly with you that you had no need for their help. I hope this is the explanation, but during the coming year, if you should have trouble, do not fail to refer same to the proper committee, for you will find them ready and willing to serve you.

OTHER ASSOCIATIONS.

We are in close touch with the other great Associations of the country and we are ready to work hand in hand with them, and they with us, for our interests are mutual and when our rights are attacked, we will stand together as one man. But the best and greatest benefit our Association has accomplished is yet to be mentioned. It is this:

The improved condition in our own ranks. You can all recall the time when you thought your competitor was the meanest man on earth and you would scarcely speak to him when you met. How different now. If you have any complaint to make, you do not hesitate to go to him in his own office and talk it over with him and you have found him just as clever a fellow as you are yourself. This is brought about, either by your local or the general Association where you meet, and not only shake hands but do so cordially.

LOCAL ASSOCIATIONS.

Let me urge you, if you have no local Association, to form one without delay. You will find it a great profit maker.

ASSOCIATION WORK.

Let me beg of you to be present at each of our meetings. There are many things to be discussed that are of vital importance to you and you will not be doing yourself nor the Association justice, if you do not attend and join in the debate on these matters.

FUTURE OF OUR COUNTRY.

The commercial and industrial prosperity of the South had just begun. It is our inning and we are at the bat. Are you all ready and prepared to take advantage of this flood-tide of prosperity that is coming our way?

AGRICULTURE.

The South has just begun to wake up to her advantages, as an agricultural and manufacturing section, and immigration and capital are looking this way. When our large farms are divided up into small ones and the crops diversified, as they are beginning to do, we will have a larger prosperity.

OUR MANUFACTURES.

But while there are great opportunities in the improvement and progress of our agriculture, our advantages as a manufacturing country, must not nor will not be overlooked, with our climate, cheap coal and iron and great timber belts, manufacturers are sure to come and that soon, for they will not be slow to see the opportunity. Let us encourage them to come among us and build, and above all, let us keep pace with their growth and grow with them.

I wish to thank you for the uniform courtesy which has been extended to me, not only by each member of the Association, but especially by your other officers. Let me commend to you our secretary, C. B. Carter, who has been ready and willing to lend his help during the present year.

To my successor I wish to tender my entire allegiance.

This was followed by the reports of the secretary, treasurer and Transportation Committee, the Press Committee, Grievance Committee, Manufacturers' Committee, Membership Committee, Supply Committee and Metal Committee.

The chairman of the Executive Committee, O. B. Barker, then read his report, which was followed by a discussion in which a number of the conventioners participated.

O. B. BARKER, OF EXECUTIVE COMMITTEE.

Next in order was the discussion upon the subject of

OUR ASSOCIATION—WHAT SHALL BE DONE TO NURTURE IT?"

which was opened by R. D. Warren, of Benedict, Warren & Davidson Co., Memphis, Tenn., with the following remarks:

Van Doren said, "A brother, assisted by a brother, is a fortified city." "A three-fold cord is not quickly broken," says

R. D. WARREN.

the preacher. Our Lord Himself recognized the strength of fellowship and communion; so He sent out His disciples, not alone, but by twos, each increasing the force of the other.

In our business life, we have found that

"When one alone seeks his best to know,
His skill is weaker, his thoughts are slow."

As with individuals so with firms and corporations recognizing this great need, the one for the the other, the "Southern Hardware Jobbers' Association" was established not on the idea of combination, but

Digitized by Google

ON THE SOLID FOUNDATION OF THE PRINCIPLE OF CO-OPERATION. When we can convince the Hardware jobber as an individual that we need him, or better still that he needs this Association, it is an assured success. Let him but see his needs and, American-like, he will go after it. This idea was very concisely illustrated by an artist recently. Uncle Sam was represented, calmly stroking his beard, and wearing an elegant Panama hat marked $50,000,000. A foot note said, "Came high, but he had to have it." So, we have but to make the jobber see that as an Association we are indispensable to his greatest success, and he becomes at once an important factor in our own.

To make our claim good, these association meetings must be intensely interesting from opening to adjournment, with the vital question of the hour—the *live* issues—the methods of today compared to the plans of yesterday. Not only should these meetings be interesting and entertaining, but so helpful that each man goes home filled with enthusiasm to carry into the drudgery of the old routine a new idea, a better plan, and so broadened in his views, that he takes back to his local association these new ideas that others may also incorporate them.

The efficiency of this association will be limited, in a large measure, by the co-operation of the individual members. To interest these, and reach those who are not members and

KEEP THEM AWAKE TO THEIR OPPORTUNITIES AND PRIVILEGES,

is the one live question ever before the active management of all association work, and will, I am impressed, be best effected by the organization of local associations at every jobbing point.

From experience in other association work, I believe that more tact will be needed in the organization and successful operation of this branch than any other part of association work. Much careful thought should be expended on this line, all of which will return an hundred-fold in good to this Association. Could not a part of the time of one of our officers, maybe of our secretary and treasurer, be well employed in visiting the local associations, strengthening those struggling for an existence, and encouraging those more firmly established? Besides organizing new local associations where none now exist he could be of incalculable value to old ones in bringing to them new ideas gathered from other associations, and perchance removing the small misunderstandings, often of a personal nature, which occasionally mar the harmony of local work.

In conclusion,

WE MUST MAKE THE JOBBER SEE THE NEED OF THE ASSOCIATION. How best this may be accomplished, you will have an opportunity to discuss. Our interest in this association will be intensified in proportion to the interest manifested in local work. Therefore, we should see to the organization and perpetuity of local associations.

Right business principles are fixed and unchangeable, but plans and methods vary with the man and the times. "The old order changeth, giving place to new." So, in these annual meetings we can exchange ideas as to plans and methods some of which may revolutionize the methods of a few, modify the plans of many, and quicken the business interest of all.

The subject is now open for discussion.

Tuesday Evening

was devoted to a complimentary concert by the Philharmonic Band, of Reading, Pa., under the auspices of the Reading Hardware Company.

Wednesday Morning Session

was an executive one, for Jobbers only. The meeting was called to order promptly at 9.30 A. M. in the breakfast room. J. H. Weddington, of J. H. Weddington & Co., Charlotte, N. C., delivered an address on

"THE HARDWARE JOBBER—HIS WORST ENEMY"

after which an open discussion was had, participated in by a number of the members.

J. D. Moore, of the Moore & Handley Hardware Company, Birmingham, Ala., then followed with an address on

WHAT OUR ASSOCIATION HAS DONE FOR ITS MEMBERSHIP AND WHAT IS YET TO BE ACCOMPLISHED

to which subject also considerable discussion was given.

Wednesday Afternoon Session

was a joint session of jobbers, manufacturers and their representatives, the Southern Hardware Jobbers' Association being the guests of the American Hardware Manufacturers' Association. The meeting was held in the convention hall and was called to order promptly at 2.30. The first address was delivered by S. Norvell, of the Norvell-Shapleigh Hardware Co., St. Louis, Mo., upon

CATALOGUE HOUSE COMPETITION.

He was followed by N. P. Bogardus, president of the National Retail Hardware Dealers' Association, Mt., Vernon, Ohio, with an address on

THE NECESSITY OF A CLOSER AFFILIATION OF JOBBER AND RETAILER

which necessitated considerable discussion. John Donnan, of W. S. Donnan Hardware Co., Richmond, Va., delivered an address on

REBATES AND RESTRICTIVE PRICES FROM MANUFACTURERS OF ASSOCIATION GOODS VS. OPEN MARKET —FROM A JOBBER'S STANDPOINT.

This was replied to in an address by a member of the American Hardware Manufacturers' Association to show how this subject is

VIEWED BY THE MANUFACTURERS.

The discussion which was next on programme,

SHOULD NOT MANUFACTURERS PROTECT THE JOBBERS AGAINST RADICAL DECLINES BROUGHT ABOUT BY DISAGREEMENTS IN THEIR OWN ASSOCIATIONS

was opened by J. C. Sproull, of the Anniston Hardware Co., Anniston, Ala., in the following remarks:

When I received a letter from the Secretary of our Association telling me that I had been selected to open the dis-

J. C. SPROULL.

cussion on a subject at the meeting I knew that a big mistake had been made, but feeling that personally I had done so little for the cause. I had no heart to decline, and I replied "all right," I would do my best. The subject assigned me, which was "Should Not Manufacturers Protect the Jobbers Against Radical Declines Brought About by Disagreements in Their Own Associations?" is so full of interest to us all, and having had the subject so recently up with a manufacturer on this line, I felt that I was called upon to say something.

It is almost impossible to discuss this subject intelligently without taking some of the so-called associations as examples, and in doing this I want to disclaim anything personal to the associations or the men who manage them, but simply to use them as examples for the edification of both the Manufacturers and Jobbers in future. Associations are formed especially for the purpose of putting up prices and thus of put-

Digitized by Google

ting money in the pockets of the Manufacturers on such lines of goods as are demoralized; and are generally brought about

BECAUSE THESE GOODS HAVE GOTTEN INTO A RUT

of unprofitableness out of which it seems hard to get them except in this way.

This seems reasonable enough, and we all agree that it is the best thing to do because we all want to see the Manufacturers make money. The Jobber is not taken into the confidence of the Manufacturer until after the act has been perfected, and the price put up; and for this reason is not permitted to share in any of the profits of the advance unless he happens to have a large stock of goods on hand, so up to this point the Jobber is not a partner in the advance and stands no chance of sharing in the profits. When the Association is perfected, the price well in hand, and the Manufacturers meet for their second monthly period some member who is conservative gets up and says that this is a good thing, let us be moderate, and satisfied with a good profit and keep the ball rolling. Another member says that this is all right but boys! we have been without a profit for so long that this is our chance to get even with the game. After discussing the matter the majority decides with this progressive member and when a vote is taken it is always for another advance. The Jobber is promptly told that the market is well in hand and another advance will be made at the next meeting and he is thus forced to get on the band wagon or get left, and

SO HE IS LOADED UP WITH GOODS AT TWICE THEIR VALUE

What is the result?. The greed of these fellows who have voted advance in season and out of season, with reason and without reason begins to bear fruit which ripens almost within a day, and "something is doing." Possibly the profits that they are making have become noised abroad by some confiding stock holder, and they wake up as did the Shovel combine to find that factories are going up in a thousand small towns, or perhaps some factory is not satisfied with the allotment given them in such enormous profits, and in bluffing for a larger share of the game, he gets "called" and the jig is up, so the confiding Jobber is the fellow who loses the money.

This you will all recognize as a fair picture of the nail trust and the shovel combine, both of which flourished under the same head in recent years with the result that the Jobber had to lose a dollar a keg on nails, and more than two dollars a dozen on shovels. And so the subject which we wish to discuss, shall we be protected against radical declines is upon us, and who, be he Jobber or Manufacturer, can recall the workings of these associations and say with truth that it is right that such protection should not be accorded the Jobber. There is certainly no harm in associations, but on the other hand there is much good in them provided radical men are not allowed to control and radical advances made without reason. This is the rock on which they all have been wrecked and all that are to come will be broken without any exception if they continue to commit this blunder, and why

SHOULD THE JOBBER SUFFER FOR THE FAULTS OF OTHERS WHEN THEY DO NOT SHARE IN THE PROFITS?

and are thus made to stand all the loss brought on by the greed of a few. Gentlemen, this is all wrong, these associations should be welcomed by the Jobber and they should be our friends, created to better the conditions not only of making goods but of distributing them through the Jobbers and should protect us against all the declines, especially where they are radical.

I had a discussion a short while ago with a maker of fruit jars which will illustrate the point I am trying to make. All of us who sell jars know that the price has been fixed in December and that the jars have been offered us at a price for January delivery and an advance for each month if taken later. This proposition is made to induce the Jobber to put his money in these goods at a time of the year when he does not need them, and when he has to take the chance of the fruit being killed and thus of having to carry the jars for another year, but as we are promised by the makers

THAT A CERTAIN ADVANCE WILL TAKE PLACE EACH MONTH

we feel impelled to buy the jars in January. This year the advance did not take place and the parties who took no risk of buying them early and who did not put a dollar in them are offered the leading size of jars for 25c. a gross less money than those who bought early under this promise. The maker of these jars wrote me that we should stand this loss when we asked him to let us charge the reduction to the factory. The market was fixed by the Association and they told us it would be advanced monthly and yet when they fail to do this they think we should suffer and not them. All buyers understand that the proper time to buy goods in quantity is when they are low and we are all rapidly learning that

THE TIME TO LET THEM ALONE IS WHEN THEY ARE CONTROLLED BY A POOL

who are trying to rob the public because they can, and offer no protection to the jobber to whom the goods are sold. What confidence can we repose in such schemes under such conditions?

My mind goes back to the days when no such associations existed and I recall a certain maker of horse and mule shoes from whom we bought all of our shoes, we had no contract with them for protection against declines and the market was an open one. And yet when shoes went down they invariably wrote us for a list of our stock and gave us a credit for the decline on same. This factory almost controlled the Southern market; in a few years they got rich, big rich, and today that brand of shoes still has the call in all this country. What conclusion are we to draw from this? Simply

THAT IT PAYS TO DO BUSINESS THAT WAY.

And thus the jobber is not afraid to carry a stock of such goods though they know that they are controlled by a pool because they could feel that their interests were identical with that of the Association, and that they would be encouraged to carry the stock and push the business, thus working a benefit not only to the jobber but to the manufacturer as well.

What I have said is not of course intended to cover this subject but is suggestive only, as you will all recall other instances along this line where we have suffered loss by the breaking down of top-heavy combinations, and it is doubtless sincerely hoped that a discussion of this matter may lead to better conditions in the future.

Which was replied to by a member of the American Hardware Manufacturers' Association, and a general discussion then ensued.

The Question Box was then opened, which also was subject to considerable discussion by members present.

Wednesday Evening

was devoted to a smoker in the dining room of the Kimball House from 8:30 to 12, which was tendered by the Reception Committee as complimentary to the delegates and visitors.

As we go to press at too early a date to give the continuation of the convention proceedings, we reserve the balance of our report for our next issue. Among the addresses to be delivered at a later date of which we have been favored with advance copies are the following:

INCREASED EXPENSE ACCOUNT AND HOW TO REDUCE IT.

Opening the discussion by H. L. Anderson, of the Anderson Hardware Company, Atlanta, Ga.

Mr. President and Gentlemen of the Southern Hardware Jobbers' Association—"Increased Expense Account and How to Reduce Them." It seems from the wording of my subject that they intend to have our expense account increase any way, and then try to devise some plan as to how it shall be reduced, rather than how to keep it from increasing; but as they have given me an expense account that has already increased, I shall try to find some plan to meet it; for if the business is well managed and the expense account has increased any way, it seems that

THE BEST THING TO DO IS TO LET THE EXPENSE ACCOUNT ALONE

and turn your attention to securing revenues to pay them with. If a concern has a note to meet, it does not try to shave the note or have it extended, but goes to work on delinquent debtors pushing them up, so as to have the funds on hand when the note becomes due. The fact that expense accounts will and do increase, should spur the jobbers to provide funds with which to meet them, and leave a nice surplus at the end of his fiscal year, despite increased expense accounts.

Digitized by Google

We all realize the importance of turning away from staples, and turning to goods that pay a profit (if we expect that our fiscal year shall end with profits of the right side of our loss and gain account and in doing this it does not necessarily mean that we shall do an increased volume over the past year, but does often mean that it will be more profitable if we reduce it, as I dare say most of us are guilty of doing more business on our capital than we should.

Would it not be better for our interest accounts, if we sold $2,000 that paid a profit of 25 per cent, than $5,000 at 10 per cent. and 15 per cent? It certainly takes less to discount your bills, and should take less labor and insurance. Besides when your friend breaks in on you (you notice that I say friend) as the friend you have carried is most likely to lay down on you and cause you a loss. It is a fact that

THE HARDWARE JOBBERS ARE THE HARDEST WORKED PEOPLE IN TRADE

today, and we should have backbone enough to say that we will not waste the best years of our lives and earn only a living out of our business; but rather take the stand that *it is our right* and we *will* make our business earn at least 8 per cent. to 10 per cent. on the amount of business done, and not 8 per cent. to 10 per cent. on the amount of capital invested.

The only way we can do this is to stop the increase in staples and push goods that pay a profit. Look at any of the catalogue houses and you do not see staples pushed yet we as a class do push them, and even send our men out on salaries and traveling expenses to sell what? *profit paying goods?* no, staples. The staples in any business should not run over 10 to 15 per cent., and when they get to 20 per cent., it is time to call a halt and do so in no uncertain terms, both to your buyer as well as your traveling men, and we should see to it that the staples sold should pay as much profit as it takes to do the business, and it is a useless waste of time to attend these meetings, and then go home and say we cannot make our men get a profit. The fault is not with your men, but it is where it should and does belong, with the head of the house. If you gentlemen, will take this stand, you will not only have a profitable business, but will

FEEL LIKE NEW MEN WITH STRENGTH AND ENERGY

to carry on your success.

If you will pardon a personal illustration, one of our salesmen sent in an order for a certain line of goods at a cut price, and when I spoke to him about it his reply was that he did not cut the price, that the order was only submitted. I told him that we did did not even want him to submit a cut price. First, we did not want to be tempted, and besides if we allowed it once he would continue the practice. Too often we give our men a fixed price on Shelf Hardware, and allow them to fix their staple prices, or rather allow your competitor to do it for you, and in that case your competitor should and ought to make you sell them at cost. Give your men your own price on staples, and do not let others fix them; then you have put a stop to the increase in staples, and your Scovil Hoes, Nails, Barbed Wire, etc., will last longer and give you more time to think, and get up goods that will give you a just return on your business and capital.

It will pay every house here to check every price on orders sent in from your men on the road, and let your men know and understand that

GOODS SOLD AT A CUT PRICE WILL NOT BE ALLOWED TO PASS.

It may and will cause a row, but it will put money in your pocket, and you will soon reach the point that your price cutting will stop.

All of you will no doubt remember the time when freight rates were cut indiscriminately, but the heads of these roads got together, and said it must stop, and if it did not they would get men that would stop it, and it stopped. Our business is just as vital to us as the railroad man's.

Take the item of insurance. This has increased. The insurance men put up the price of insurance, they took the stand that insurance was too cheap. Let us take the stand that we are selling our goods too cheap, and see that we earn a better profit. Annually your men come to you and ask for an increase, and this has been going on for years. Yet we sit idly by and allow our expenses to increase without demanding and getting our share in increased profits, for clearly, gentlemen, if expenses increase profits ought to and should increase at the same ratio.

On the programme was a paper by Frank Guildener, of Sargent & Co., New York, on

"SUGGESTIONS TO THE BUYER FROM THE TRAVELING MAN"

which was as follows:

Mr. President, and Gentlemen of the Southern Jobbers' Hardware Association—I have been prevailed upon to make a short speech in regard to a Suggestion to the Buyer From a Traveling Man.

Now, gentlemen, I have requested all my friends to remain away from this meeting until I get through with what I have to say, this being my first attempt as an orator I was afraid some of my friends might fire something at my head in the shape of a flat iron.

Having traveled around this country for the past 30 years, and meeting with all kind of buyers, would say treat the traveling men kindly and always have a welcome hand for him.

FRANK GUILDENER.

Many times he being hundred miles from home, wife and children, providing the necessities of life down-hearted and low-spirited, he walks into a large Hardware house to see the buyer. The buyer often treats him as if he was a stranger, too busy to talk to him. Now, gentlemen, suppose he represents a large axe manufacturer who had plenty of axes on hand and could deliver them at once without any delay and his price was just $1 per dozen less than the big Axe Trust Parks Association; why, gentlemen, you would treat him with all the courtesy you know how. Some of you would offer him a "Robert Burns" cigar, some of you would take him to lunch and a few of you—only a few—would say, "Let's walk down the street and take a smile together." Therefore, treat the traveling men kindly and all alike, it does not matter whom he represents.

Then again he walks into a large Hardware house in the South to see the buyer. The first thing that meets his eyes is a large card on the door. This card reads: "Traveling Men's Reception Room." Oh! how his heart flutters—I mean the new traveling men, not the old ones; he imagines when he stands there reading this sign, that he is to see inside a large round table with five chairs all around it, and a box of cigars in the middle, when he enters he is disappointed. He sees another sign: "We object to the use of tobacco in the office in any form."

Then he has to sit down in this reception room and wait for hours for the buyer and often has fallen asleep. When he wakes up he says: "Oh my, won't I make that buyer pay for this if he buys anything from me." So I say get close to the

SIXTH CONVENTION.

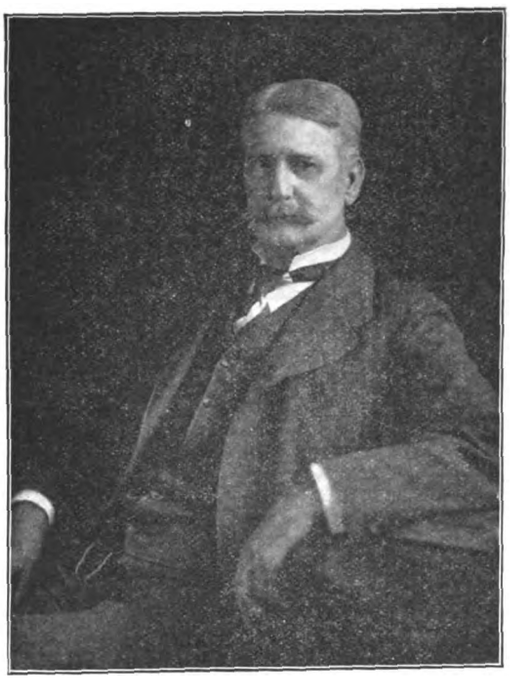
The sixth convention of the American Hardware Manufacturers' Association was held at Atlanta, Ga., on the same dates at the convention of the Southern Hardware Jobbers' Association to which these proceedings were held in conjunction. The headquarters of the Association were at Hotel Piedmont.



Wednesday Morning Session.

The formal opening session of the convention was an Executive one, open to members only, and which was opened by roll call, after which the president, J. C. Birge, delivered his annual address as follows:

PRESIDENT'S ANNUAL ADDRESS.

To the Members of the American Hardware Manufacturers' Association, Gentlemen:

At our last meeting, which was held at Atlantic City, many matters of importance were presented and considered, a review of which was subsequently mailed to all members, therefore reference to these matters at the present time would seem unnecessary.

J. C. BIRGE, PRESIDENT.

We come together today with the hope that our present session may be pleasant and profitable. While the Executive Committee has outlined some matters of a general nature, having reference to National legislation and which you may deem it proper to consider briefly, nevertheless, we have endeavored to make clear their wish that members take the initiative in the introduction of new business.

HENRY B. LUPTON, VICE-PRESIDENT.

It is the judgment of your committee that our

DELIBERATIONS SHOULD BE CHIEFLY EXECUTIVE,

that each may feel inclined to speak with freedom from a business standpoint. So far as our regular work is concerned, we have no prepared papers, nor pre-appointed speakers. For this occasion we must rely upon an open parliament. When it is found that they have nothing to say concerning the business which is before the meeting, or have no new business to present, a motion to adjourn will certainly be in order.

Before proceeding with any reference to the matters which may be introduced, it seems proper to pause one moment at the threshold of our convention.

Since our last meeting, death has removed from our membership, Henry William Oliver, Chairman of the Board of Directors of the Oliver Iron & Steel Co. While the well-

Digitized by Google

known organization of which he was the presiding officer has generally been represented in our councils by another able officer, nevertheless, his personality has been manifested in the generous policy and able representation, which the company has enjoyed. Mr. Oliver's sphere of influence was not confined even to the great organization, which bears his name. He was an inventor and a constructor. His directing hand was seen in the building of railroads, in the development of important mining and other material interests of our country, and always on a broad and beneficient scale.

He was prominent in the affairs of city, State and nation. He represented that type of men who produce and create values as distinguished from those whose profit is the re-

F. D. MITCHELL, SECRETARY-TREASURER.

sult of a loss to others. When such men fall, it is like the fall of a Giant Oak by the wayside, whose spreading branches and verdant foliage have sheltered the multitudes who have found rest and refreshment at its feet.

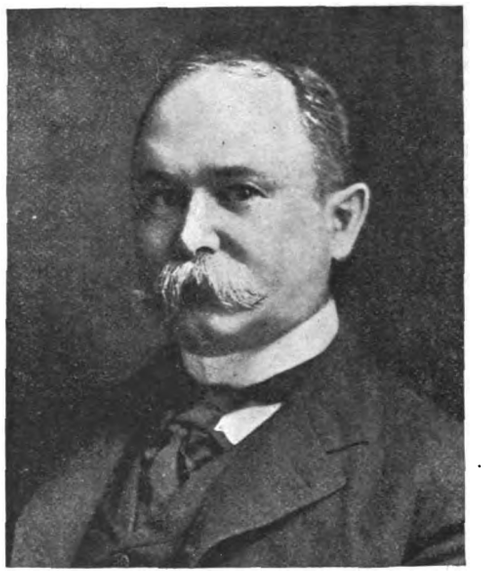
The career of Mr. Oliver affords a fitting text for what is doubtless the most important question which now confronts the manufacturer, and all other men who as principals or subordinates are laboring in any capacity. I refer to the labor situation. Your Board authorizes me to offer it as worthy of consideration.

Mr. Oliver was born in Ireland in comparative poverty. Coming to America as a child, he began at the bottom of the ladder to make his own way into the world, recognizing the bountiful opportunities which this productive country, far above any other land, affords for an intelligent, honorable, industrious man.

Whatever may be the assertions of many demagogues, the greater number of which are non-producers,

THE MANUFACTURERS ARE THE BEST FRIENDS WHICH THE WORKINGMAN HAS TODAY.

Every successful manufacturer is a hard workingman, and the greater number of you began your career as laborers in some humble department. The manufacturer knows the laborer's troubles, and more than any other man, knows that the only avenue to success and prosperity is through steady every-day industry and perseverance. The success and contentment of manufacturer and employee are linked together. The decline or fall of the manufacturer is the employee's misfortune.



There are unpatriotic men, who, knowing little of the dignity of labor, but who under the pretext of elevating labor, without laboring for themselves, would drive the fatal dart into the industries of the country; would take from the laborer every opportunity for his own development above mediocre, by limiting his productiveness, removing every incentive to his highest success by making promotion impossible, and depriving him of freedom to pursue such a vocation as he might choose, or for which he might be fitted, the avenues for learning many of the trades being closed, except to the few. The leaders being chiefly foreigners, our American boys are almost precluded from admission to the trades.

But few artisans in these days, and for well-known reasons are enabled to become trained in the all-round duties of management. In some cases it is a punishable crime for a workman to do the slightest service not in the line of his narrow trade.

THIS CONDITION DOES NOT DEVELOP BROAD AND UNSELFISH MEN.

In short, the free all-round handicraft of the workman of 40 years ago is a thing of the past.

We recognize the mutual dependence of employer and employee. We know that wrongs have existed and always will exist, but conditions are being established which destroy the

FAYETTE R. PLUMB, OF ADVISORY BOARD.

productiveness of American industries, crippling them in their power to continue in foreign trade. If continued long, it will leave the manufacturer to be the slaves of politicians and socialists, and leave the much greater body of men who would work, to be helpless, sinking into idleness, many to become paupers and criminals.

Without referring further to the general labor situation with which you all are familiar, it seems proper to refer to two bills which have been introduced in our house of Congress, and which seem worthy of consideration. First, the so-called Grosvenor bill, introduced Dec. 10th, 1903, entitled "a bill to limit the meaning of the word 'conspiracy' and the use of restraining orders and injunctions" in certain cases, the scope of which you well understand. Action on this bill is postponed until next December, as the result of the arguments of employer addressed to the House Judiciary Committee.

Another bill is the so-called 8-hour bill, introduced by Mr. Hitt, which may have a bearing on the freedom of any manufacturer who produces any materials for the use of the government. It restricts the right of men so employed to work more than 8 hours per day, even in emergencies. The bill, if passed, would doubtless be followed by similar State legislation, applying to all work. The question involved would seem to be not so much the number of hours which from health, educational or moral considerations the average man should work in a day, but it denies the right to any man to do so, even in those emergencies, calling upon special effort, a condition which frequently exists in the personal experience of every employer, who, through effort, has adapted himself in his hours of labor to existing conditions. The farmer, manufacturer and professional man, whose labors are frequently at times very exacting, though not embraced within the scope of this bill, do indicate what active men of those types are compelled to do by virtue of necessity, and through their ambition to succeed. The 8-hour bill has been referred to the department of labor for an official report on its possible effects, and will come up again next Winter, and if interested in the bill, we should afford the department all information possible. Some suggestions as to what information might be of value are given in our recent circular to the members.

Digitized by Google

In the circulars which have been sent to you, reference has been made to our Bureau of Forestry and the National Irrigation act. The American market having been found to be the most desirable field for placing the output of America's products, it would appear to be a wise course for our National Government to carry into effect a permanent policy, through which the remaining

PUBLIC LANDS SHOULD BE DISPOSED OF TO NONE BUT ACTUAL SETTLERS

and home builders on such lands. Further, that the waters of the streams in the semi-arid States and Territories, which are now running to waste, or in an unsystematic manner are being but partially used, should hereafter be directed through the comprehensive irrigation works, contemplated by the National Irrigation act. These Irrigation systems, if built by the National Government as rapidly as actual settlers will take up the land in small tracts will doubtless repay the government for the cost of the works, and add to our productive population many thrifty, rural communities, much needed in America and in some degree remove occasion for idleness. These people would become large producers and consumers of our manufactured products, because many of the so-called arid lands of our country are as fertile as the valley of the Nile. Further, the supply of timber of various kinds is a matter of vital concern to the manufacturing interests of this country, not alone because of its use in the production of many of our goods, but because the existence of timber is all there is that gives value to the axe, the saw or chisel and many other articles which you produce, but it directly or indirectly enters into the economics of life in innumerable ways from the wood pulp, which is the foundation of our morning papers, the material which to some extent enters in many of your products to the tooth-pick and matches which supply a lesser demand. In your generation most of the mighty forests which once covered some of our Northern States sources of incalculable wealth have been leveled by the axe and saw. Fires have destroyed vast areas of priceless timber, not sparing the younger growth and have left behind them unsightly deserts of blackened stumps, sable monuments of American improvidence and vandalism. Little is being done to provide for coming needs. We have drawn upon our National account of timber and have made no deposits. It seems as if we should approve and urge the carrying out of the recommendation of the President of the United States concerning the Bureau of Forestry now organized in the agricultural department and in the future use our influence vigorously for better conditions.

Our Association at its annual convention in New Orleans in 1902 in joint session with the National Association, adopted resolutions bearing upon these questions. President Roosevelt and Secretary of Agriculture Wilson have indicated by their reports the importance of these measures. The opposition to the carrying out of these plans seems to arise from the influence of some strong organizations, which seek to control lands bordering on streams, also the sources of water supply.

Many of our prominent members have from time to time urged attention to the increasing use by jobbers of special brands, which it is claimed involve some added cost and inconvenience to the manufacturers and loss of prestige, especially on goods of the better qualities. The extra cost and inconvenience appears to be greater on the smaller or rush orders. While the manufacturer may not wish directly to reach the consumer, nevertheless, it is urged that the manufacturer on his choicest products loses his individuality and the consumer who knew him once, soon knows him no more. The Executive Committee has offered no recommendations on this matter, recognizing the position of the jobbers, but the question may be considered if it is the wish of the convention.

On the other hand, there is a class of merchants well known as catalogue houses who do sell manufacturers' brands of goods very largely, but who, it is stated, are interfering very materially with the trade of our customers, the jobbers, and with the retailers, with whom our relations should be friendly.

At a meeting of a few members of our committee in March last, the question of catalogue houses was presented for consideration, but was believed too difficult for us to handle. Somewhat later a vigorous communication, written by an eminent jobber, Mr. Norvell, of St. Louis, appeared in the *Iron Age* and almost simultaneously some other jobbers of prominence gave the matter considerable attention. Believing that it would be your desire, and on instruction of our Executive Committee I was authorized to invite E. C. Simmens, president of the Simmons Hardware Co., of St. Louis, and Wm. R. Belknap, president of the Belknap Hardware & Manufacturing Co., of Louisville, Ky., to become our guests and present any matter of interest which they desired to introduce. This seemed especially fitting, as Mr. Norvell has been invited to present his subject to the Southern Jobbers.

It is a great honor and pleasure to have in attendance at this convention

THE HIGHEST OFFICIAL REPRESENTATIVE OF THESE THREE GREAT HOUSES,

and that it is with the approval and concurrence of the officers of the Southern Hardware Jobbers' Association. Mr. Bogardus, the honored president of the Retail Hardware Association, is also a guest. There are two or three other large houses not represented in either of the National Jobbing Associations of our country, and are quite sure that it would be your pleasure on some future occasion to receive them and listen to any words of suggestion which they may offer for our mutual advantage.

While

THE QUESTION OF CATALOGUE HOUSES AT THE PRESENT TIME

seems to be quite prominent with the jobbers and retailers, it may not be one upon which definite unanimous action can be taken without further deliberation than can be given to it at this brief session. The claim by a prominent journal that the mail order business in one city amounts to $50,000,000 annually demonstrates that the problem is not a simple one. Nevertheless the information and suggestions that these able gentlemen will give us will certainly be educating, and will be received in the kind spirit in which they are sure to be given.

Previous to the adjournment of this morning's session, it may be well to make some definite arrangements with reference to a more correct organization of the various committees under the classification of lives of manufacture as provided at Atlantic City.

The arrangement of lists which have been sent out by our secretary was simply tentative. The chairman of the Executive Committee is respectfully asked, if possible, to plan meetings for the more complete and more proper organization of these committees, and it would seem possible to do this at a time which will not deprive our members of the privilege of attending the joint meetings with the Hardware jobbers.

Then followed the reports of the secretary-treasurer and the Executive, Membership and Grievance Committees in regular order. Other matters of an executive character were given close attention.

The programme for Wednesday afternoon, which was arranged for the Southern Jobbers' Convention, was accepted for a joint meeting by the Manufacturers' Association, and as will be noted by reference to report of the Jobbers' meeting embodied in the proceedings, the reading of a number of papers in which both conventions were deeply interested. The proceedings to a considerable extent were of a purely executive character, and were freely discussed by members of both conventions in a very harmonious and fraternal manner—when in joint assembly.

AGRICULTURAL EXPOSITION IN RUSSIA.

According to Les Annales Diplomatiques et Consulaires, Paris, February 10, 1904, an agricultural exposition is to be held in Kief, Russia, during August and September, 1904. It is to have an industrial department or division for the exhibition of machines for refineries, distilleries, breweries, soap factories, brick kilns, starch factories, factories for making farinaceous foods, and another division for industries that aid agriculture; rope walks, tanneries, factories for extracting vegetable and mineral oils, glue and paste mills, etc. Agricultural machines, seeds, and everything pertaining to agriculture will be admitted free. The exposition is under the direction of the Agricultural Society of Kief.

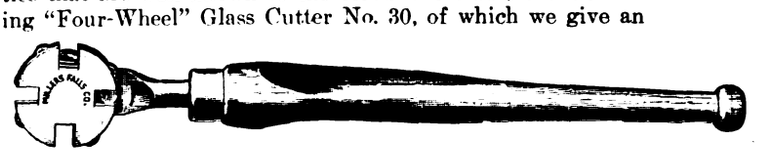
NEW GOODS AND SPECIALTIES.

THE "FOUR LEAF CLOVER" CREAM SEPARATOR.

The Plymouth Manufacturing Co., Plymouth, Ohio, are the manufacturers of the Four Leaf Clover Cream Separator of which we give an illustration. On account of its novel and original features, it is claimed to possess a number of advantages springing from its unique construction that should claim the attention of those handling this salable line of specialties, among which may be mentioned:

Owing to the peculiar construction of the milk receptacle, it is surrounded by water in such a manner as to divide the milk



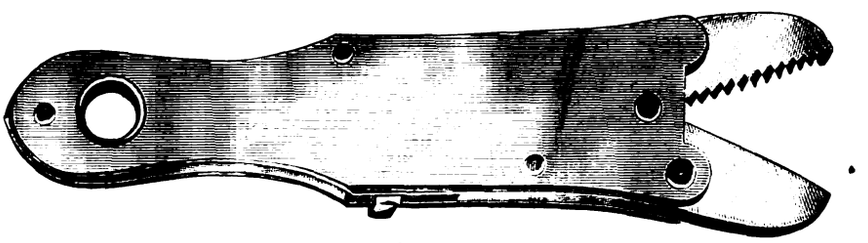
THE "FOUR-LEAF CLOVER" CREAM SEPARATOR.

up into practically four parts. At no point is the milk over 2¼ *inches from the water.* This secures the greatest possible cooling surface and the quickest cooling conditions. There is a large water space *under* the milk as well as at the sides; thus the cream is started from the *bottom.* The inner can or milk receptacle is almost instantly removable by simply unscrewing the milk faucet, thus securing ease in cleansing and airing. It has no rubber gaskets to risk tainting the milk. It needs no water in the winter time; cold air answering the same purpose, by leaving the water faucet open. It has a cold air space over the whole can through which a direct draft carries out all odors and impurities in the milk through the ventilator on top. It has an improved milk faucet which can be instantly locked so that children cannot turn it.

It is manufactured from the best material possible and is decorated with a design of taste that makes it an excellent seller.

REVOLVING FOUR-WHEEL GLASS CUTTER

Millers Falls Company, Millers Falls, Conn., and 26 Warren Street, New York, have added to a large line of specialties that are well known to the Hardware trade, the Revolving "Four-Wheel" Glass Cutter No. 30, of which we give an



REVOLVING FOUR-WHEEL GLASS CUTTER.

illustration. As indicated by the cut herewith, this tool is provided with four cutters set in a revolving head. This head is hung on a pivot which in its construction is made stationary by a milled edge thumb nut at the points where the cutters are in proper position for work. The milled slots in the circular head are for the purpose of breaking the glass, when the cutting has been accomplished. The handle of the tool is cocobola wood, and the general appearance of the cutter is a very attractive one.

CRONK'S ADJUSTABLE ALLIGATOR WRENCH.

The Cronk & Carrier Manufacturing Company, Elmira, N. Y., are the manufacturers of some of the best selling novelties in the class of Hardware Sundries, sold by the trade. Among these, the illustration below shows a patented Adjustable Alligator Wrench which gains popularity wherever introduced. The distinguishing feature of this wrench is the device by which is effected an instantaneous adjustment, which may be accomplished by simply moving the mechanism with thumb or finger. It is made in three sizes, 6, 8 and 10-

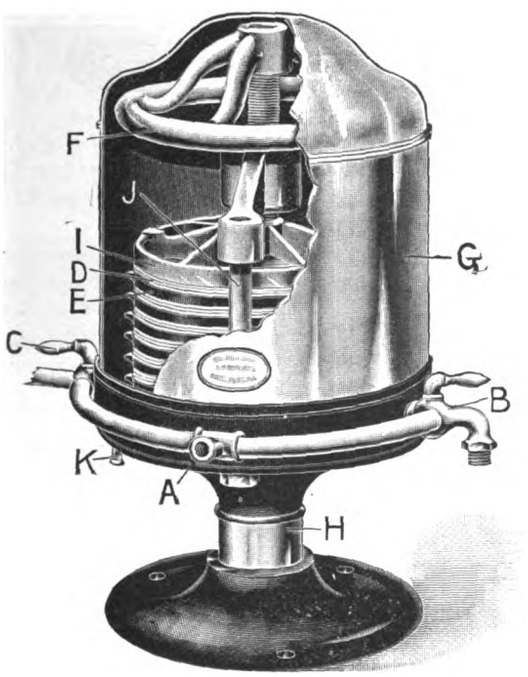
CRONK'S ADJUSTABLE ALLIGATOR WRENCH.

inch, opening respectively ½ to 1 inch, ½ to 1½ inch and ½ to 1½ inches. It is quite attractive in appearance, the surfaces being polished and nickeled.

THE ALPINE WATER COOLER.

Manning, Bowman & Co., Meriden, Conn., are the manufacturers of the Alpine Water Cooler now being placed on the market, which is made in two sizes, and is especially designed for use in the home or office. It is constructed with a crystal glass water reservoir, porcelain lined cold water reservoir and separate ice chamber. It is so constructed that the ice cannot come in contact with the water. The outer shell is double walled and packed with a non-heat conducting ma-

THE ALPINE WATER COOLER.



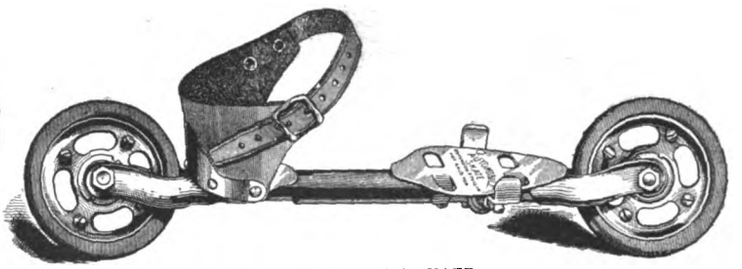
terial which will keep ice for a much longer time than ordinary water coolers. The finish is nickel plate or silver plate. The quality in every case is guaranteed. When necessary, the opening in glass reservoir may be partially stopped with a cork containing a small hole through the center, or can be used without a cork. When the water is drawn from the faucet (causing the water in cold reservoir to be lowered), it immediately refills with water from glass reservoir, and there-

Digitized by Google

fore is automatically kept full until all the water in glass reservoir is used. They are made in two sizes, 5 and 8 quarts. The capacity given includes the contents of both the reservoirs.

THE NAIAD FILTER NO. 6.

The Naiad Filter Co., Boston, Mass., are manufacturing a germ-proof Filter under this name, which is adapted to situations where a large amount of highly refined water is regularly required, or where a large amount is required at particular seasons and only a moderate amount at other times. These Filters, it is claimed, are not mere strainers, but are positive purifiers. The piping is of non-corroding metal, and

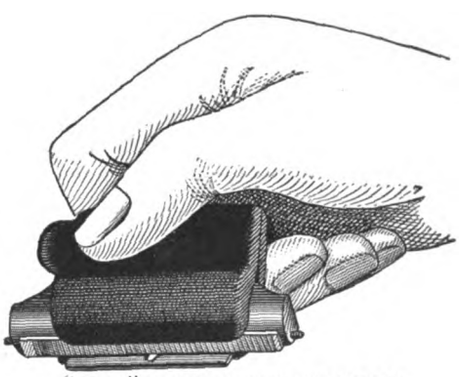


THE NAIAD FILTER NO. 6.

the filtering chambers are of vulcanite, or hard rubber; there is consequently no possible metallic contamination of the water while undergoing filteration. Where there is a large amount of suspended matter in the water, an automatic cleaning device is provided, which effectively restores the filter to action when prematurely clogged. Its large capacity is due, not to the employment of a medium through which the water courses as through a sieve, (it uses the regular six-inch Naiad Tablet), but to the presentation of a large filtering surface. This large filtering surface is obtained by combining in a single press sets of Tablets, each having all the functions of an independent filter. By the simple operation of increasing or diminishing the number of these sets, the capacity of the filter is modified to suit the requirements. The No. 6, like all the Naiad filters, is constructed in full recognition of what is now a cardinal principle in scientific filtration, viz., that the filtering medium, whatever its nature, must admit of frequent renewal—not superficial scouring—but absolute renewal, to be effective and safe. In the No. 6, as in the other forms of the Naiad Filters, this can be effected with ease, in the briefest possible time, and at a trifling cost. With every shift of Tablets there is practically a new filter, as safe and efficient as the day it was installed.

AUTOMOBILE CYCLE SKATE.

The Cycle Skate and Sporting Goods Company, 123 Liberty Street, New York, are placing upon the market the automobile ball bearing skate of which we present an illustration. It is made of materials that are strong and yet light in weight, many of the parts being stamped from sheet steel. It is capable of being adjusted to various lengths from 10 to 12 inches inclusive, its length over all being equal to that of many ice racing or hockey skates—18 inches. Various parts of the tubing are reinforced where extra strains occur in order to give a homogeneous strength. An important feature of this construction is the make-up of the wheels, which have well-made solid rubber tires, with inner lugs through which pass the four screws with hexagon nuts to clamp the two flanged centers carrying the ball-bearing cones and cups, in which are used high-grade steel balls. The rubber tires are 3x4 inches outside diameter, and made by one of the best-known rubber companies. The skate can be used equally well for sidewalk, asphalt or rink skating and touring along country

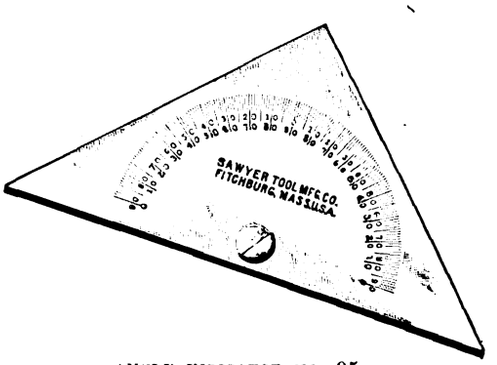


AUTOMOBILE CYCLE SKATE.

roads. The company state that a record of a mile in two minutes and 50 seconds has been made with this skate. All the metal parts are polished and nickel plated. The company also make a similar skate for boys and girls, with flat steel extension plate which is quickly adjustable to different sized feet, this feature being comparatively new. The skate with rigid foot plate has been on the market for some time.

"ACME" LAWN MOWER SHARPENER.

A. E. Faber, Jr., Plainfield, N. J., is the manufacturer of the Acme Lawn Mower Sharpener, of which we present an illustration, which cleverly depicts its appearance, portability



"ACME" LAWN MOWER SHARPENER.

and utility. It is very simply constructed, and by the use of a file, which forms part of its equipment, it requires but a few minutes to put a Mower in perfect order, without the necessity of taking the Mower apart to accomplish the result. The work may be done on the lawn, no machine shop being essential to its success. It can be made very useful for such household purposes as sharpening scissors, knives or skates with equal facility.

SAWYER TOOL MFG. CO.'S SPECIALTIES.

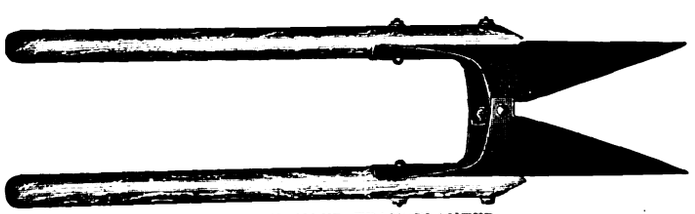
The Sawyer Tool Mfg. Co., Fitchburg, Mass., are the manufacturers of a number of useful tools which form the con-

ANGLE INDICATOR NO. 95.

tents of their latest catalogue, one of which, the Angle Indicator, No. 95, we give an illustration herewith. This tool is

Digitized by Google

made from a steel plate by especially constructed and perfected machinery. It is designed to be used in connection with a rule or any bevel, although the Sawyer Universal Bevel No. 90 is recommended. By its aid one can quickly and accurately transfer any angle within the scope of the tool. The edges are ground to 45 degrees and 90 degrees, which

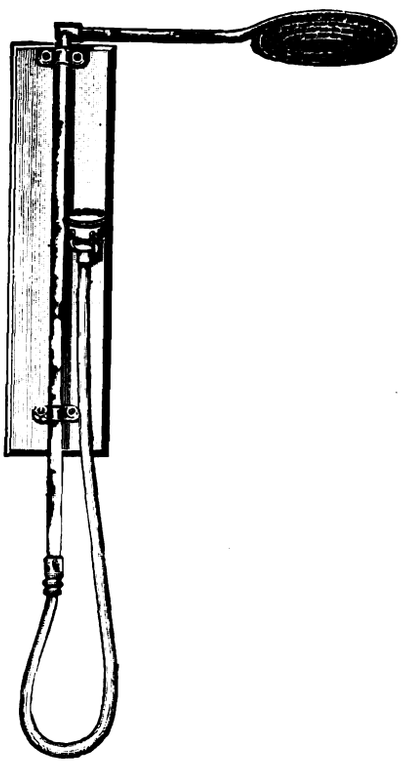


SAWYER STEEL CLAMP NO. 12.

gives to the tool the additional value of a square and mitre. We also give an illustration of the Sawyer Steel Clamp No. 12. These clamps are made from steel and case hardened. They are rigidly strong where strength is requisite, and are built with a view to constant and continued use. The screws have a ball and socket bearing upon the jaws, which eliminates all unnecessary strain from the threads. They are made in three sizes, 2, 3 and 4-inch length of jaws, with opening of 1¼, 2 and 2¾ inches respectively.

THE KOHLER TRANSPLANTER.

A new Transplanter is being placed before the Hardware trade by F. E. Kohler & Co., Canton, Ohio, which has proved quite a popular addition to their line of tools of this character. This transplanting tool which is shown in the accompanying cut is so constructed that when the handles are spread the blades form a closed pocket, from which no earth can



THE KOHLER TRANSPLANTER.

escape, no matter how sandy, so that all the soil about the roots is retained. The tool is provided with stops at the hinged joints, so that the handles cannot close beyond the vertical position shown in the illustration, avoiding all danger of injuring the tops of the plants. The tool measures over all, 22½ inches, with the points of the blades 4¼ inches apart, and weighs 2½ pounds.

STERNAU'S NEW BATH SHOWER.

S. Sternau & Co., 204 Church Street, New York, who are large manufacturers of toilet and bath room accessories, are placing upon the market a new and popular device, of which we give an illustration, to be used in connection with an ordinary bath which, being quite moderate in price, had been welcomed by the trade. The apparatus consists of an upright pipe with straps to attach it to the wall of the bathroom. This pipe, at the proper height, bends upwards and is curled around in several concentric coils. The lower side of these coils is pierced to divide the water into the necessary thin streams. At the lower end connection is made with the faucet by means of a rubber tube terminating in the well-known Sternau Holdfast combination metal and rubber bulb that can be attached to any faucet or detached when not in use. The metal parts are made of brass tubing nickel plated to make the apparatus more complete. It may be had with one Holdfast bulb or two Siamese to the rubber tube for use in connection with bath tubs having the old-fashioned double faucet feed for hot and cold water.

STERNAU'S NEW BATH SHOWER.

It is claimed the new apparatus does away with all the disadvantages complained of in the case of detachable shower contrivances which must be held above the head. The new arrangement leaves the hands free, and is but little more costly than the movable showers. Each shower is packed separately in a very attractive box for display purposes.

THE NIAGARA COMBINED PICKET PIN AND SWIVEL

The Metal Stamping Company, Niagara Falls, N. Y., are placing on the market a useful device under the above title, which deserves a ready sale. The Picket Pin is made stiff and strong, and yet exceedingly light, considering its strength. It makes a perfect turn, the swivel being an excellent one and connected by a practical hinge joint. The mode of construction is such all parts work with great freedom, and cannot rust tight or get out of working order. The pin readily penetrates all ordinary soils by hand alone, requiring no mallet. It enters the ground clear to the swivel, leaving nothing visible to impede the freedom of adjustment, or for rope, lariat or chain to wind around. It is claimed no other pin has so firm a hold on the soil, for no matter which way the animal pulls it presents a broad surface to the ground, and even in soft soil will stick and hold fast. In pulling out, the swivel turns straight up, in which position the pin may be readily drawn out.

J. STEVENS ARMS & TOOL CO.'S NEW CATALOGUE.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., have just published their latest catalogue No. 51, which consists of a pamphlet of 136 pages, handsomely gotten up and chock full of information in regard to the many new additions to their line since issuing the catalogue which this supercedes. This latest book of reference to their complete line of firearms and accessories will be received by their patrons with unqualified approval of the manner of arrangement of contents and the text of same. The catalogue embodies all the recent notable additions to their extensive line of firearms and accessories in Single and Double Barrel Hammer and Hammerless Shot Gun styles, including the popular Stevens "Little Krag" No. 65 in which a slight change has recently been made in construction, which eliminates the self-locking feature, believing it had a tendency to make the rifle dangerous. The rifle now is cocked by drawing back the hammer, which is made with a large knurled head; when the rifle is cocked it is locked so that it is impossible to open it until the hammer falls or is let down. They are now supplying this rifle with rear peep or open rear, and open front sights, although rear peep and open front sights are regular, and will

be supplied unless otherwise ordered. We give an idea of the handsome appearance of this catalogue by reproducing the attractive cover designs which, on the catalogue, are in five colors. The front cover design is from a painting by that famous sportsman artist, A. B. Frost, of New York City, whose spirited hunting scene, exemplifying high art, is a tribute to the enterprise of the Stevens Company in securing such a fine specimen of this celebrated artist's excellent work. This exceedingly attractive catalogue will be forwarded by mail to any of our readers who will enclose four cents to pay for postage, and will mention HARDWARE when requesting the same.

SAWYER TOOL MANUFACTURING COMPANY.

Sawyer Tool Manufacturing Company, Fitchburg, Mass., an illustrated price list exploiting their line of fine tools and Hardware specialties, which prices supercede all previous editions. In this, their catalogue "G", they state that one of the most difficult things which they have accomplished is the matter of properly hardening square blades and rules. This has passed the experimental stage now with them, and they are today producing only hardened and tempered work in this line. Several new tools of exceptional merit are to be found in their catalogue and all goods are well illustrated, giving dimension and prices. Included in the contents are a variety of gauges, levels, inside micrometers, punches, rules, screw drivers, straight edges, squares, etc., etc. The Company make the following guarantee on each tool of their manufacture: "We warrant this tool to be accurate. Any tool made by us, found to be defective, will be cheerfully replaced upon receipt of the same at our factory."

LANCASTER MACHINE & KNIFE WORKS.

Lancaster Machine & Knife Works, Lancaster, N. Y., are the authors of a neat publication being their 1904 price list and catalogue No. 14. It is well printed on coated paper and presents a very fine appearance. They have added to their already extensive line, a full line of the old popular Barber pattern ratchet brace, and claim to be able at the present time to offer the trade as complete a line of braces as has ever been placed on the American market. Owing to increased demand for their tools, they have made extensive additions to their factory. Describing their Lancaster ratchets they claim the following points of superiority: the sweep is made from finished cold drawn steel; the sweep on the 6 and 8 inch brace is made of 7-16 inch round steel, on the 10 and 12 inch of 15-32 inch, and on the 14 inch is $\frac{1}{2}$ inch in diameter; the chuck has a hardened steel washer between the sockets; the jaws bring the bit to an exact center and are not depended upon to hold the tool entirely as the interior of the socket is so constructed as to securely hold all sizes of bits, thus giving a perfect center and extra strength. They also claim that the quality of material, workmanship and beauty of finish is unsurpassed.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Attachment—Bank Account May Be Reached.

QUESTION: A certain New Jersey corporation having an office in New York City is indebted to me in the sum of $1,000, which they refuse to pay. The claim arises from their failure to perform a contract, by which failure I lost $1,000. I have recently discovered that they have a considerable sum of money on deposit in one of the banks of this city, and should like to know whether I can attach this money in the bank, or how I can reach it.

REPLY: An attachment can only be obtained in certain cases. One of these instances is where the plaintiff demands judgment for a sum of money only upon a contract, express or implied, other than a breach of contract to marry. Your action would fall within the class of cases indicated. Our statute, however, places many other restrictions upon the obtaining of an attachment. An attachment can be obtained against a non-resident of the State or a foreign corporation upon the ground of non-residence, and certain other grounds are specified by statute. If, therefore, you are a resident of the State and your debtor is a foreign corporation you would be entitled to an attachment on the cause of action described, and if obtained you would be able to reach the defendant's money in the bank. If, however, the attachment was set aside for some technical fault in the papers you could not hold the money in the bank. The law affecting attachments is extremely difficult and technical, and the utmost care must be taken by the attorney in the preparation of his papers. Probably at least half of the attachments obtained in this State are set aside upon legal technicalities.

Principal Responsible for Acts of Agents.

QUESTION: An agent for a large retail house, and who has been buying goods from me for this house for some years, came to me and, while giving me his usual order for one line of goods, said that the house he represented was about to take up a new line of goods and that in addition to his usual order, he wished to order a new line of goods. I was very glad to hear this, and, of course, at once filled his order, which was quite large, which was unusual, for the agent generally made comparatively small purchases from me. After I had filled the order, shipped the goods and sent my bill to the house, I received a letter from them, stating that they had never authorized the agent to make these purchases and refused to pay for them. Kindly inform me whether I can insist upon this sale or not?

REPLY: Upon the facts before us that the regular agent of a certain house ordered an unusually large order of goods and also gave an order for a class of goods which the house had never bought before. So long as this agent acted within the scope of his apparent authority you had a right to accept his order, and if in reality the principal did not authorize the order of these goods you are not obliged to lose a good sale on this account. A principal is responsible for the acts of his agents, so long as these acts are committed within the apparent scope of his duty. He holds his agent out to the world as being authorized to act for him, and if the agents

JAP-A-LAC

"WEARS LIKE IRON"

JAP-A-LAC, the new wood finish, has grown in popular estimation until to-day it is the recognized superior of all wood finishes.

We have had unbounded confidence in **JAP-A-LAC** and have backed up this faith by the expenditure of vast sums of money to make it a household word in every corner of the land.

We are still spending money for this purpose and shall continue doing so.

Watch the leading magazines and exclusive women's publications and see what we are doing.

Start with the April issues of the *Ladies' Home Journal, Delineator, Designer, New Idea, Woman's Home Companion, Ladies' World, McCall's, Everybody's* and *Good Housekeeping* and many other publications, and try to realize the millions upon millions of people who each month read at least a portion of the "Story of **JAP-A-LAC.**"

Never before was a varnish product so thoroughly known. It insures millions of sales for **JAP-A-LAC,** and you will have your share of the demand.

Won't it pay you to place your order now and be ready to supply your customers' wants?

We have a specially alluring proposition for dealers and will gladly furnish information regarding it upon request.

The GLIDDEN VARNISH CO.

MAKERS OF HIGH GRADE VARNISHES

No. 44 Williamson Bldg., Cleveland, O.

exceed his authority, but there is nothing to put one on his guard or to indicate that the agent is exceeding his authority, one has the right to presume that the agent has authority to act, and the principal must bear the loss, if any there be.

Foreman a Fellow Servant—Master Not Responsible to Servants for His Negligence.

QUESTION: Some time ago, my son, a boy of fifteen years of age, obtained employment in a large factory in New York State. He was directly under the foreman, who, on occasions when the factory was short of hands, would take hold and help in the work. On one occasion the foreman was working a machine, and, although my son was standing right next to him with his back to the foreman, engaged in his work, the foreman suddenly started his machine without the slightest warning and my boy was injured for life. Can my boy recover damages against his employer for this injury?

REPLY: To answer your question it is necessary to determine whether or not the foreman whose negligence caused the injury to your boy was a fellow-servant with your son. As a matter of law a master is not liable in damages to a servant injured through the negligence of a fellow-servant. If, therefore, this foreman must, as a matter of law, be considered as the co-servant of your son, neither you nor your son would have any cause of action against the master. It was held in the case of Neubauer vs. the N. Y., etc., R.R. Co., 101 N. Y. 607, that a foreman is a co-servant with the workman over whom he acts as foreman. Unless, therefore, you can show that this foreman was an incompetent man and that the master employed or retained him knowing him to be incompetent for the position, we are of the opinion that your son has no cause of action against his employer.

He Knew Better.

The Highwayman—If you move you're a dead man.

The Professor—That's foolish talk. If I move it will be proof that I'm alive.

THE KELLY FOUNDRY & MACHINE COMPANY.

The Kelly Foundry & Machine Company, Goshen, Ind., manufacturers of galvanized steel tanks, tank heaters, low wagon wheels, feed cookers, etc., have placed before the trade an attractive catalogue in which they illustrate, describe and price the goods above referred to. This catalogue is considerably larger than previous editions, owing to the addition of many new styles and sizes of steel tanks to their former very complete line. Recognizing a demand for a cheaper grade of steel tanks than the "Goshen," they illustrate in this catalogue their Tiger Steel tanks which they will manufacture in addition to their other high grade line. This price list cancels all former ones not in accord with it, and is subject to market changes. In the construction of their tanks, they use the best grade galvanized steel. Every tank is guaranteed to be built in a workmanlike manner. The weights of steel tanks as given in the above catalogue, they state, are in almost every instance secured by actually weighing a tank of the dimensions specified, and are guaranteed to be approximately correct. They state: "We have aimed to make this a standard book of reference for prospective buyers. Our lists have been revised to date, making this a very valuable catalogue for the Hardware, windmill and implement trades." With the above they are sending out a supplement containing the new steel tank price list adopted on December 17th, 1902, and on which all prices made by them since January 1st, 1903, are based.

✤

O'Rourke (who is being lowered down a well)—Hold on, Oi want to come up agin.

Finnegan—An' what phor?

O'Rourke—None av your dom bizness. If you don't stop littin' me down, Begobs, Oi'll cut th' rope.

REVIEW OF THE MARKETS.

WIRE NAILS: The favorable weather of the past ten days which gives the appearance of steadiness so that one can figure ahead for a week or so, has improved the demand for Wire Nails, although requisitions on old contracts have furnished the bulk of the business. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carload lots	$1.90
Retailers, carload lots	1.95
Retailers, less than carload lots	2.05

New York. There is a fair demand which with the fine weather around us is apt to foster and encourage still livlier conditions. Quotations remain as previously quoted.

Single carloads	$2.10
Small lots from store	2.20

CUT NAILS: At the meeting of the Cut Nail Association last week, conservative views prevailed, and no change was made in current prices. Trade is steady and business normal. Quotations are as follows: On either Steel or Iron Nails, with no discrimination as to locality:

Carload lots	$1.75 base
Less than carload lots	1.80

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. The local demand is a normal one, with quotations well maintained as follows:

Carloads on dock	$1.89½
Less than carloads on dock	1.97½
Small lots from store	2.05

BARB WIRE: The mills are nearly caught up on their requisitions on Spring orders for all regular brands, although plenty of business is still booked. Broken assortments are being heard from in several quarters and furnish most of the current demand. Prices as previously quoted are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.20	$2.50
Retailers, carload lots	2.25	2.55
Retailers, less than carload lots	2.35	2.65

SMOOTH FENCE WIRE: There is still considerable business being done in this line, new orders occasionally adding strength to the output, but early contracts are still promising the business for the future. Quotations are as follows, f.o.b. Pittsburgh, terms, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.80
Retailers, carloads	1.85
Less than carloads	1.95

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BRASS COCKS: On March 7th the manufacturers of the line of Brass Cocks that is handled by the Hardware trade adopted a uniform list, which is welcomed by the trade as establishing a complete list from which a liberal discount can be taken. The list at present in force is subject to a discount of 70 and 10 to 75 per cent.

BINDER TWINE: Prices are reported as being well sustained with not an unusual amount of business being done, but prices are reported as being well maintained as announced by the International Harvester Company, as follows:

	Cents per lb.
Sisal	10¼
Standard	10¼
Standard Manila (550 feet)	11¼
Manila (600 feet)	12¼
Pure Manila (650 feet)	13¼

Five-ton lots, ⅛-cent less; carload lots, ¼-cent less. Kansas City, Minneapolis, Omaha, Council Bluffs, ¼ cent higher. Pacific Coast points, 1 cent higher.

CORDAGE: The market for rope products has been a slow moving one with no changes of note. Considerable business is being done as far as bulk is concerned, at prices represented by the following:

	Cents. per lb.
Pure Manila, 7-16-inch and larger	12
⅜ inch	12½
¼ inch and 5-16	13
No. 2 Manila	10@11
Pure Sisal, 7-16 inch and larger	9¼
No. 2 Sisal, 7-16 inch and larger	8¼
⅜ inch	8¾
¼ inch and 5-16 inch	9¼
Lath Yarn, Medium and Coarse	8½
Jute Rope, No. 1	6½
No. 2	6

LINSEED OIL. The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels....41 cents per gallon.
In lots of 5 barrels or more.....40 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

The deferred Spring is having a marked effect in keeping up the belated demand for Agricultural Tools of all kinds, including Forks, Hoes, Rakes, Lawn Mowers, Wire Netting, Window Screens, etc., and on some of these goods there is a positive scarcity so that it is impossible to fill orders promptly. Under such circumstances jobbers are put in a most unsatisfactory relation with their customers, as it is difficult for the dealer to understand why he cannot get seasonable goods, and yet the most strenuous efforts on the part of the jobbers to get supplies have in many cases met with very little result. This activity is not confined to Spring goods, but it is making a large demand for lines of regular Hardware, so that trade is keeping up in fair volume, and while some complaint is occasionally heard the immediate situation can be described as atisfactory. It is difficult to foretell the future, and it would be interesting to know whether trade is likely to improve or decline. Prophets are to be found for both theories, but we were gratified to learn a day or two ago that a careful canvas made of the entire country by one of our greatest manufacturers showed a very hopeful and optimistic feeling. It is one of the peculiarities of the times the business conditions of the last ten years have changed so largely that the experience of previous years no longer carries the same weight. The large corporations which have entered the business in the last decade now exercise considerable influence upon trade conditions, and while not powerful enough to change the immutable lines of trade they can so accelerate or retard the operation of these laws, as to throw the most astute calculations into error. We can only hope that this vast power will be used wisely and that its holders may realize that in all the prosperity of these corporations is bound up with the permanent prosperity of the general public, and the two must stand or fall together. Collections are easier. The country is beginning to feel the effect of crops of small fruits. Farmers are now getting some revenue and accounts which have been carried throughout the Winter are now in many cases being discharged and wiped off the books.

THE CINCINNATI TRADE.

The condition of the weather, the thermometer giving as low as 35 degrees, does not tend to make the month of May an ideal one for business, though the Hardware jobbers state the month is progressing satisfactorily in anticipation of warmer weather later in the month. Building and improvement go on unabated and several new concerns have lately been added to Cincinnati industries. The H. Zering Truck Manufacturing Company received an order for an equipment of factory trucks for an Austrian Gun Stock Company which has received quite a large order from the Japanese Government, and a still larger one from the Chinese Government for Gun Stocks, which the Cincinnati people claim will keep the Austrian factory busy for the next four years. The Zering Company has just completed a shipment of rubber tired dish trucks to the new hotel at Victoria Falls, South Africa. The Pickering Hardware Company is still maintaining the special weekly sales, this week being the 28th and comprises garden hose and lawn mowers at reduced prices. Nine hundred thousand dollars will be expended for improvements in the public schools, hot water heating being one of the items, and $400,000 to be used for a manual training school. The Business Men's Club excursion to St. Louis to boom Cincinnati Day promises to be a lively one *en route*. Louisville Commercial Club states everything is in readiness to give a rousing reception in that city and Owensboro, Ky., where it is scheduled for a three hours' stop when the Cincinnati folks will be entertained with an old-fashioned Kentucky barbecue. Evansville and Indianapolis, Ind., and Springfield and Decatur, Ill., also promise special entertainment.

THE CLEVELAND TRADE.

The difficulty of getting good timber for handles has greatly increased. To houses whose pride has been to furnish the trade high-grade handles, and tools containing only such, it presents a difficult problem. Forks, Hoes, Picks, Shovels, Rakes and Axes are greatly increased in value by high-grade handles, and it is impossible to get a quality that is equal to what was best a few years since. Second growth hickory and ash are not obtainable in sufficient quantity to supply the demand. It would certainly be profitable to raise this kind of timber by cultivation, as what remains of it is being purchased to hold out of the market on speculation. Had the original settlements in this country been made on the Pacific Coast, it would have saved the woods that went into potash, until their value was appreciated. We have not appreciated the value of timber as those who succeed us will. Concord Wagons, and Vermont Snaths, have a reputation all their own, on account of the excellent timber. Factory handles that moved South have not found their anticipations met in the Southern timber. Clay uplands seem to furnish the only satisfactory quality to satisfy the good Hardware trade, as tools are largely judged by the quality of their handles. Trade is good, if compared with any but boom years, but in the rush of business the last two years expenses were increased and are too high for profitable business, but with a return to normal conditions, this can be corrected. The influence of organization has been helpful in improving business methods. The expense account is more carefully scrutinized and compared with profit, so that invoices are less surprising and the amount of sales is not the only measure of success. THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

The first half of May was characterized by warm dry weather which brought out a good Spring business. Sales were up to the same period of 1903 which was very good. The delayed business of the first months of this year will hardly be made up, however. There is a general slowing down of business throughout the country this year which makes itself felt in mercantile as well as manufacturing lines, but there is nothing radically wrong with the situation, and if we have good crops in the west and south, the Fall should see a new forward movement. Pittsburgh is to be represented at the St. Louis Exposition by a topographical map of large size showing the valleys of the Ohio, Monongahela and Allegheny rivers for some fifteen miles radius from the center. The map is made to scale and will be worth careful examination by those who are interested in the wonderful manufacturing development of this city. Of course it was not possible to show in full the coal and coke industry extending further up the valleys.

LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

Winter seems to have a sure grip on Spring and won't let go. We have had one week of sunshine this month so far, and that is all. We haven't seen the sun for a week, but we still believe there is one up in the sky some place, and it will shine after a while. We fear there will be a hot old time when it does shine. We hardly know what to say about trade; so far it is not up to last year, but nearly every dealer believes the backward Spring is the cause. Conditions seem favorable with a few exceptions. The wheat crop is not up to average but is improving every day. It is problematical as to how long the coal strike in the eastern part of our State will last; it looks gloomy at present, but we believe it will not last long. We have a small strike in our city at present, sheet metal workers and their employers are at loggerheads; so far they have not tied up any buildings of importance. If we can avoid labor troubles the building record in Columbus will exceed any year within our knowledge. Our water works dam has not been started yet; one day the dam is enjoined, and the next day the enjoiner is "dammed." If the river could be dammed as easily as those who are responsible for damming the river, the dam would have been completed long ago. It looks as though each fellow who has authority to act is afraid the "other fellow" will get a bigger "rake off" than he. With all the monkey business going on damfino whether anything will be done. THE SMITH BROS. HARDWARE CO.,

J. H. SMITH.

THE CHICAGO TRADE.

A waiting policy has been adhered to by the trade generally during the past several months. The season for Spring crops has been backward, weather cool and unseasonable. Farmers busy in the fields whenever opportunity presented itself, hence trade in all retail centres has been quiet, and in comparison with last year, business not quite so large. We notice, however, that every time we are blessed with three or four bright Spring days, that orders come in large quantities and of increased volume. We therefore have confidence in the future and hope and expect to be quite busy from this time forward. The first half of May averages good, prices are fairly steady and our agents are doing exceptionally well in seasonable goods. The late advance in Picks and Mattocks was not unexpected and we understand that July 1st will bring about higher prices for Axes and Hatchets, Bench Axes, etc., but we doubt the wisdom of the manufacturers in their efforts to boost prices on edge tools above present prices. Our opinion is that retailers and jobbers are paying as much for these goods as they should.

WELLS & NELLEGAR CO.

THE DAVENPORT TRADE.

If fruit blossoms indicate what the harvest will be, we will certainly have an abundance of fruit this season. Home grown garden vegetables are in the market, strawberries in bloom and Spring chickens will soon be ripe enough to pick. Wild ducks have gone to the far North, but golf balls are flying. Summer birds, street organists and base ball players are here, indicating the approach of Summer; in fact we have had already one circus. With these conditions there can be little doubt that the long drawn out, never to be forgotten, health destroying, business busting, horribly annoying Winter has finally passed into eternity and we hope never to return. Trade is gradually getting better and there is no known reason why the present season will not be prosperous and satisfactory.

SICKELS, PRESTON & NUTTING CO.

THE ST. PAUL TRADE.

The spring weather we should have had a month ago is just arriving, and while it is rather late we are rejoicing in the fact that it has come. Owing to the unseasonable weather we have experienced, we have not had the usual amount of business, nor do we think our first six months will show an in-

Digitized by Google

crease over last year, so we are hoping for the last six months to help us out. This will depend on the crop results: these are not first class and we cannot guess at the final result. Prices are steady with a promise of their continuing so through the year. A little flurry now and then makes business less monotonous, and does neither good nor harm.

HACKETT, WALTHER, GATES HARDWARE CO.

SOUTHERN HARDWARE JOBBERS CONVENTION—Concluded.

traveling man, and if he has a 10 per cent. up one sleeve or a 5 per cent. up the other sleeve or even a 2½ per cent. up his boot leg, I am sure he will be too glad to give it to you. Again, gentlemen, do not keep him waiting in your stores if you do not want anything in his line; you yourselves have traveling men on the road and no doubt you have found fault with them because they took so long to make a trip, and yet this poor salesman was held back by some small slow buyer.

I can look around this room and see Merchants, yes Hardware merchants who are rated up near the millions at least, that is what the Big Books tell us, Bradstreets and Dunns, and I suppose you all pay Bradstreet and Dunns to tell the truth. Who has assisted you in making this large amount and got you this rating? Why, your traveling men! This you all know and have to admit you never made it retailing goods.

The large and well known Hardware manufacturers of Sargent & Company, whom I have the pleasure to represent, once sent me to New Orleans, I called on a gentleman who was hard of hearing, he was reading the morning paper, I walked in and said:

"Good morning Sir," I am representing Sargent & Company.

This man being hard of hearing did not hear me, after a short time he looked up and said:

"Are you selling goods?" I said "yes sir," "Well we do not want any goods sir."

"Well sir, I did not ask you to buy any goods sir," this man has not heard me yet what I said. I started to walk out when his clerk heard we say I represented Sargent & Company. This clerk walked over to me and said:

"Oh! come back, the old man is hard of hearing, we buy all our goods from Sargent & Company."

We went back in the store, and the clerk got down this way—and hollowed in that old man's ear loud enough to be heard for a square, "This is Sargent & Co.'s man."

The old man looked up and said:

"Oh good morning sir," I want to say right here in less than ten minutes he had asked me to go out and take a drink with him which you all know I refused.

Now had I represented a small house he would not have paid any attention to me; so I say gentlemen treat the traveling men all alike whether he represents Parks Trust large manufacturers or small ones. It seems to me I never take a trip south, but some buyer will say after calling on him in the morning and going back in the afternoon that he "has not had time to look up an order, when are you going out of town," etc. Now wake up you old slow buyer, take my advice and hire yourselves out to Bruce Keener, Oscar Barker or Frank Gray, and after you have been with them one week, and see how they give the traveling men attention, you will return home and never again say "I am too busy to look up an order," for people of this class do more work in one week, than you slow buyers will do in a month.

Again do not write sarcastic letters to your traveling men, you lose more by doing this, than you lose on your failures; write them encouraging letters, a kind letter to a traveling man makes him feel as if he could sell the Devil a four-prong manure fork when his order called for a six prong one. Have your traveling men on the road so contented that they will say as I do, it is a holiday for me to work for my firm.

Thursday Morning Session.

J. Norman Wills, of Odell Hardware Co., Greensboro, N. C., opened the discussion on the subject of

EMPLOYEES' MUTUAL BENEFIT ASSOCIATIONS

with the following remarks:

Most of the fraternal orders in existence have the mutual benefit feature, providing for the payment of a stipulated sum of money in case of the illness or death of a member. Organizations having this object in view are found also among the employees of some of the large manufacturing concerns, but we may regard it as a question whether such an organization is practicable among the comparatively small number of men employed by the average Hardware jobber, and, if practicable, whether it is desirable and should be encouraged by the employer.

My experience with an organization of this character, providing, however, for "sick" benefits only, leads me to answer these questions in the affirmative. The plan of operation of such an association is very simple. In this case monthly dues of 25 cents have been found to afford a sufficient revenue to pay all claims. The indemnity is fixed at five dollars a week, and the period for which one may receive such benefit is limited to twelve consecutive weeks. One of the officers of the employing company has acted as president of the association. The vice-president, secretary, treasurer and special committee of three, which investigates all claims, are from the employees.

It is not probable that such an association will be formed among the employees of any concern except at the instance and with the encouragement of the employers. In the case to which I have referred the employers contributed one hundred dollars to the relief fund as capital with which to begin business. This amount remains in the treasury intact.

But for what reasons may it be regarded as desirable to have such an association among the employees of a Hardware jobbing concern? And why should the employer encourage it?

THE LABOR TROUBLES OF THIS COUNTRY ARE DUE LARGELY TO A LACK OF CONFIDENCE

between employer and employed. They do not as a rule arise out of questions of wages. Any movement which may serve to demonstrate to the employee that his employer has a genuine interest in his welfare, which interest, by the way, must really exist, is good business policy, and it is more—it is good humanitarianism, good christianity.

Whatever may be the rule in regard to lost time, as a general thing an employer does not feel that he can afford to pay a man his salary while he is away from his duties, whatever may be the cause of such absence. On the other hand, there are cases in which no considerate employer can fail to extend some help. If by encouraging such an association as we have described

WE PLACE OUR MEN IN A POSITION TO HELP THEMSELVES,

at least in a degree, we have, I believe, acted wisely.

Employees are often reminded that they must take an interest in the business if they hope to succeed—that the interests of employer and employee are mutual. It might be well to remind the employer that he should take an active interest in the welfare of his employees. The mutual interest idea works in both directions.

It may be well to introduce social features into the association to such an extent as may be feasible. I believe that the organization can be so conducted as to increase the pride of the men in the house and their loyalty to the concern. There is no house which does not feel gratified to know that

ITS MEN TAKE A GENUINE PRIDE IN THE BUSINESS

and feel that it is to their credit for it to be known that they are connected with that particular establishment. The cultivation of a spirit similar to that which exists among students is I believe something to be desired and encouraged.

Beneath the whole scheme should lie the broad principle of the brotherhood of man and the commonsense idea that he helps one best who enables him to help himself.

Grave Fillers.

"Sir," said the man whose knees shook when the train entered a tunnel, "do you know the most dangerous thing on a railroad train?"

"Yes," responded the gay drummer, "the cigar the train boy sells."—*Chicago News.*

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN., U. S. A.
Improved Carpenters' Tools.
SOLD BY ALL HARDWARE DEALERS.

THE FIFTIETH ANNIVERSARY.

The Packard Hardware Co., of Greenville, Pa., celebrated the fiftieth anniversary of the founding of the firm on the 9th inst., by a dinner which they tendered to their employees and a number of invited guests at the Hotel Spier. There were nearly fifty who enjoyed the festivities, which was the happiest occasion in the history of the house. John R. Packard, who was a joint founder of the firm with the late Dr. Packard, officiated in the position of toast master. After the menu had been happily disposed of—the card for which was adorned by characteristic illustrations of the Hardware guild—a number of speeches of an interesting and reminiscent character were made the feature of the occasion and the flow of wit and happy *camaraderie* will linger in the memory of the participants for years. The Packard Hardware Company was incorporated in 1892 with J. R. Packard, president; G. B. Chase, treasurer, and John B. Chase, secretary. The capital stock is $125,000.

WM. H. HART'S HALF CENTURY WITH THE STANLEY WORKS.

William H. Hart, president of the Stanley Works, New Britain, Conn., was the recipient of many tributes of esteem and affection on Monday, 16th inst., when he completed 50 years of service with this old and widely known manufacturing house. Mr. Hart began his connection with the company May 16, 1854, when he was elected secretary and treasurer of the corporation, which was formed in 1852 by Frederick T. Stanley, who five years previously had begun making Wrought Bolts, Hinges and Door and Chest Handles. Mr. Hart continued to fill this office until February 14, 1885, when he was chosen president and treasurer.

The Stanley Works plant closed for the day by vote of the directors. From 9 to 11 o'clock the directors held a reception for the employees and nearly 1200 men embraced the opportunity to be present. The office was handsomely decorated for the occasion, a portrait of the president having a conspicuous position. From 11 to 12 o'clock there was a reception for the stockholders. Edgar Reed, president of the Reed & Prince Mfg. Company, Worcester, Mass., made a congratulatory address, paying high tribute to Mr. Hart, who responded with a brief speech in which he referred to the enviable position held by the Stanley Works in the world's markets as the largest producers anywhere of Wrought Butts and Hinges and the high quality of their product. Mr. Hart referred feelingly to Frederick T. Stanley, testifying also to the loyal support of present associates occupying responsible official positions, naming many of them, as well as the late Peter McCartee, for over 40 years the efficient manager of their New York branch.

In the evening the directors gave a reception at Mr. Hart's residence. The Board of Directors, comprising Abiram Chamberlain, Governor of Connecticut; C. P. Goss, of Waterbury; L. H. Pease, George P. Hart, E. N. Stanley and E. E. Moore, of New Britain, with Mr. Hart, received the guests, and during the evening Governor Chamberlain, on behalf of the corporation, presented Mr. Hart with a magnificent hall clock made by Tiffany & Co. Many telegrams of congratulations were received during the evening from business and personal friends all over the country, indicating the very high esteem in which Mr. Hart is universally held, among them the following from the National Hardware Association: "The National Hardware Association extend hearty congratulations on this your fiftieth anniversary as treasurer of the Stanley Works. Samuel A. Bigelow, President."

Mr. Hart also received other tokens commemorative of the occasion. A beautiful sterling silver loving cup was the gift of the employees. One of its three faces contains the trademark of the Stanley Works. Another space shows a Ball Bearing Butt, while the third contains an appropriate inscription. The rolling mill employees presented a gold headed cane; the office a silver fruit dish and platter, and the shipping department a design in roses, with the dates "1854-1904." Patrick B. Smith, a night watchman, gave Mr. Hart a bouquet of 50 roses, in memory of a shamrock which Mr. Hart brought him from Ireland 20 years ago.

Mr. Hart is president of the Young Men's Christian Association Board of Directors, a charter member of the New Britain Club, a prominent member of the South Church and a director of the New Britain General Hospital. He is interested in other manufacturing enterprises, and is a director of the New Britain National Bank.—*The Iron Age.*

AGRICULTURAL MACHINERY IN EGYPT.

(From United States Consul Langer, Solingen, Germany.)

It is a notable fact that Egypt is greatly increasing its production of cotton and corn, and when these are harvested the soil is again cultivated for the growing of wheat, barley, clover, etc.

To do this properly, Egypt has found it necessary to have various kinds of farm machinery, which, however, must be imported. In 1903 the imports of steam engines amounted to $441,000; steam boilers and steam-machine parts, $545,000; and other machinery and machine parts, $720,000.

Of these, England has thus far furnished the greatest part. In addition to selling at reasonable prices the machinery is of durable and simple construction, so that the unskilled laborer of Egypt can readily operate it.

For irrigation purposes, locomobiles and steam engines are also furnished by France and Belgium.

Of late years steam engines are being replaced by petroleum motors, which are more profitable because they are smaller and more saving in fuel. Although alcohol is very cheap in Egypt, spirit motors have been found to be too expensive, as experiments showed at the last agricultural exhibition held at Cairo.

Motors of from 10 to 20 horsepower are continually used for irrigation pumps, mills, and the tobacco industry.

Switzerland has succeeded in working up a trade in 40 to 100 horsepower gas motors, and while they are somewhat high in price they show a saving of 50 to 60 per cent in fuel, are well built, and readily operated.

To obtain at least some of this Egyptian trade Germany has just lately tried to introduce a motor that is cheaper than any of its rivals; but it is claimed that accidents are very liable to happen, as, for instance, the slightest carelessness may cause an explosion of the pressed-air chamber.

German manufacturers, to successfully introduce motors into Egypt, are endeavoring to post themselves as to the real requirements. They desire to be reasonable in price and terms of payment and to furnish a machine that is durable, but still simple enough to need no skilled mechanic to operate it, so that the native laborer can handle it successfully.—JOSEPH J. LANGER, *Consul.*

A Boston Conclusion.

"That Miss Goggles, of Boston, is a walking encyclopedia."

"But she doesn't know as much as she did. She has just had her appendix removed."—*Life.*

OUR BRITISH LETTER.

(*By our Special Correspondent.*)

London, May 14th, 1904.

THE I. F. A. CONFERENCE AT BIRMINGHAM.

The Annual Conference of the Ironmongers' Federated Association which has just taken place in Birmingham marks another epoch in the history of ironmongers' associations in Great Britain. The I. F. A. is to be congratulated upon the appointment of W. J. Bacon, J. P., the Mayor of Poole, to the presidential chair of the Federation for the ensuing year. He is the "Grand Old Man" of association work in Great Britain, and has taken deep interest in the movement since its inauguration in 1894, when the ironmongers' association formed at Swansea opened up a new era in the life of the retail Hardware traders of this country. The President gave a stirring address at the opening of the proceedings in Birmingham, and set forth the objects of association and the benefits to be gained by such fraternal gatherings, and clearly laid down the different evils with which ironmongers have to contend in this country, assuring those present that it was his intention to make the association "go". Before the close of the present year he felt confident that the number of associations would be more than double and a large number of ironmongers who are still outside the pale of association work would have joined the movement. Deputations from the leading ironmongers' associations in Great Britain were present at the Conference which met at the Grand Hotel, Birmingham.

After the technicalities had been disposed of and the various reports rendered the real business of the Conference commenced. The report of R. H. Smith, the general secretary of the association, contained allusions to parliamentary matters, examinations, the formation of new associations, and other questions which had engaged the attention of the Federation during the previous year. He also referred to price maintenance, which is an important matter to retail ironmongers, many of whom are assailed by large price-cutting houses. The proposal of the postmaster-general to introduce a "cash-on-delivery postal parcel scheme is still under consideration, and is being strongly opposed by the retail traders' associations in Great Britain. Municipal trading is also an important measure and was dealt with in the general report. The banquet held upon the first day of the Conference was an enthusiastic one, and an excellent feeling prevailed not only among the ironmongers present, but also among the manufacturers who were on that occasion the guests of the evening. The president was supported by the Lord Mayor of Birmingham and several of the members of the Federation who are this year serving their local boroughs as chief magistrates and town councilmen. "The City and Trade of Birmingham" was a toast well received, and J. N. Greenall, a former president of the I. F. A., in proposing the toast of "The Birmingham and District Local Association" made an excellent speech, touching upon many of the important questions which are being dealt with by the federation movement. He spoke of the importance of social gatherings, and of the harmony which now prevails among ironmongers largely in consequence of these social functions. He referred to American associations of hardwaremen contending that in the States greater headway had been made during the time they have been in existence than has been accomplished in this country. The trade have presented a united front against the inroads of catalogue houses and large stores, and have been successful in defeating many of their efforts to capture the trade legitimately belonging to the retail hardwareman. This question of cutting prices by large stores is now receiving the attention of the federation and local associations. At the second day's Conference the questions of price examinations held in Manchester a few months ago was also brought up, and the excellent results of the first examination of assistants held in this country gave great encouragement towards the furtherance and extension of the examination scheme. It was decided to hold the next examination of assistants in London.

Papers dealing very exhaustively with such questions as the cultivation of price maintenance, mutual fire insurance, early and Sunday closing, municipal trading, and collective buying were read, and many interesting discussions took place on all these subjects. The third day of Conference was largely devoted to social functions, and at the invitation of Messrs. Kynoch, Ltd., the members of the association, and those friends who attended the Conference were afforded opportunities of visiting the firm's extensive works at Witton and Holford and partaking of their hospitality. Briefly it may be stated that the Birmingham Conference was a success in every way, and was so far encouraging that aggressive movements have already been decided upon by the central board of the I. F. A. An assistant secretary is to be appointed to help Secretary Smith in his work, and to give special attention to association work in London and in the southern counties of England.

IRONMONGERS AND MUNICIPAL TRADING.

The influence of associations has already been felt upon municipal trading, and the active oppositions on behalf of the different local associations has been the means of introducing several important clauses into Bills before Parliament referring to local government which have restricted the power of corporations as regards municipal trading. This combined action has also been the means of securing electric wiring, the supply of electric fittings, gas fitting, and the sale of gas stoves and cookers, as well as the retention of many branches of retail trade assailed by municipal trading. Thus ironmongers by combined action have been able to better their position all round, and to break some of the monopolies which have for some time past affected their business and curtailed their output.

Among the chief events during the last few weeks the May meeting of the Iron and Steel Institute has been held at Westminster, and some interesting papers read dealing with questions affecting the interest of the iron and steel industries in this country. The Bessemer gold medal for 1904 was presented to R. A. Hadfield of Sheffield on the 5th inst., and the annual dinner of the Institute held on the 6th inst., the chair being occupied by Mr. Carnegie.

An influential gathering of engineers took place at the Institution of Civil Engineers a few weeks ago when the question of standardising screw threads received attention. There is a tendency on the part of all engineering societies, as also among scientists to push forward the introduction of the metric system into this country, and to adopt the more modern form of weights and measurements. The Lufkin Rule Co., of Saginaw, Michigan, who have a London depot have recently circulated among their clients a very useful and capital advertisement in the form of a steel rule, one decimeter in length, one millemeter thick, one centimeter wide, upon which several items of useful information are given.

PRICE MAINTENANCE.

James Lancaster Pollitt, of Bissell Carpet Sweeper fame, is an enterprising representative well worthy of the position he holds for the noted American firm. In one of the Hardware trade journals circulating in this country he has recently contributed an excellent article on price maintenance, throwing much light on its present positions. His pen has oftentimes been wielded in defence of the maintenance of prices by manufacturers of specialties and proprietary articles. He backs up his principles by advertising "Bissell's Cyco-bearings under the title of Mechanism which gave the power to produce price maintenance" and declares that no other sweeper has the brushing power of a Cyco-bearing pattern, that no other will yield the retail price so readily, hence price maintenance and its ready-made profit. James Pollitt considers that manufacturers who uphold the policy of price maintenance are dodging stealthily into the field as hardy skirmishers, whereas live associations could make them roll up in strong battalions".

Digitized by Google

He urges ironmongers' associations to support price maintenance firms, he considers that the signal of the trade should be a united voice. He affirms that intelligent protection on the one hand and grateful discrimination on the other, have made price maintenance the most hopeful expectancy of the twentieth century ironmonger. He refers to price maintenance in the drug trade, and mentions that in the patent medicine business no less than 147 manufacturers of these specialties own and sell under the conditions of price maintenance no less than 465 preparations of pills, soaps and specifics of all sorts. James Pollitt is undoubtedly the champion of price maintenance in this country and has found it a successful policy to adopt in the interests of his firm as well as the trade at large.

A NOVEL FORM OF IRONMONGERS' COMBINATION.

Gas companies in Great Britain have largely monopolized the sale of gas cookers and heating and boiling stoves, and in some places gas fittings. This is especially so in the large towns. In London only one gas company appears to be willing to share the plunder with ironmongers, and it is pleasing to record that seven enterprising ironmongers, few of whom belong to any association, have agreed to join with the local gas company at Hornsey in conducting several gas exhibitions, which are now being held simultaneously in three different centres. There is nothing novel in such exhibitions, but still it is somewhat unusual for unassociated ironmongers to agree in a scheme whereby they may be mutually benefited, and in common with the company supplying gas take steps whereby an increase of business in the sale and hire of gas cookers and fittings may be brought about. The enterprising seven, among whom is J. H. Dunn, who is the treasurer of the London Ironmongers' Association, have distributed some twenty thousand tickets throughout the neighborhood. They have organized capital exhibitions, and show the various uses of gas appliances as well as demonstrating in a practical manner the superiority of gas cooking. There is every reason to believe that their efforts will be attended with success.

AGRICULTURAL SHOWS.

Among recent agricultural exhibitions the Dublin and Belfast shows held in Ireland have opened up the sesaon in the United Kingdom. Agricultural implement agents are making great preparations for the display of implements and machinery at the Bath and West Society's show, which is to be held at Swansea at the end of the present month. It is 12 years since the show was held in southwest Wales. The exhibition will be opened by the Mayor of Swansea, who with a local committee, is taking a strong interest in the undertaking. I understand that American manufacturers will be well represented, and that more than one of the branches of the International Harvester Company of America will have important stands. It is surprising how strong a hold American harvesting machinery has with the farmers of Great Britain. This is doubtless due to the general excellence of the implements manufactured, to their strength and lightness, and to the excellent manner in which each separate machine has been adapted to the requirements of British farmers.

WESTERN NEW YORK TRADE NOTES.

The long-hoped-for Spring activity in retail trade is slowly making itself manifest to the Hardware merchants of Western New York. Spring work is about a month behind, owing to the continual cold weather. In many of the Western New York towns much new building is being planned, and no doubt when weather conditions become favorable there will be a large amount of building.

In referring to this end of the Hardware trade, one of the Rochester jobbers said: "During January and up to early March our sales to the country trade were smaller than a year ago. We were taking fewer orders for later shipments than usual, and the orders for immediate shipment were very small. Collections, also, were very poor. We well understood that this was caused by the fact that the country merchant was not moving his stock, and knew that it was almost impossible for the farmer to get to the markets to make purchases." Continuing, this jobber said that now was coming the usual demand for farm supplies and building materials.

The Clark Paint, Oil and Hardware Co., located at 131 State Street, Rochester, carry on a large retail trade in Hardware, and make a special bid for business in paints and oils and painters' supplies. This concern find that paints and oils are a very important line to carry in connection with Builders' Hardware, and feel that no Hardware stock is complete without this line.

In manufacturing an extensive line of heavy sheet iron work, the Dumond, Babcock & Kingston Co. are very busy. A. M. Dumond is president and R. Kingston is secretary and treasurer. This concern are also making an attractive line of galvanized iron cornices, in which department a large trade has been built up.

Every carriage maker and dealer in carriage Hardware of Western and Central New York knows of Sidney B. Roby Co., of Rochester, which firm are also large dealers in Heavy Hardware and blacksmiths' supplies.

One of the successful jobbing houses of Western New York is Mathews & Boucher, of Rochester. For many years Mathews & Boucher have been leaders in builders' and general Hardware; confining themselves closely to the regular Hardware lines this firm have succeeded in building up a large strong business in the wholesale trade.

Another large Hardware firm of Rochester is Weaver, Palmer & Richmond. A specialty of housefurnishing goods, and agricultural tools, is made by this concern, who also carry a very attractive line of cutlery. G. D. Palmer is president, S. J. Weaver is vice-president and secretary, while Lee Richmond is treasurer.

J. A. and Jas. H. Casey constitute the firm of Casey Bros., who are large handlers of Heavy Hardware, iron and steel, also carrying a very complete stock of blacksmith's and carriage makers' supplies.

Inasmuch as there has been much discussion of late, not only in the trade papers but also by the members of the different associations as to the expansion and broadening of the Hardware store, it may be of interest to note what one of the members of a certain Hardware jobbing firm in New York State has to say on this subject: "Some years ago I thought we, as jobbers, ought to carry everything that any of our customers sold. Gradually I began to add new lines—I knew our trade well and bought in quantities that enabled me to get the rock bottom prices—and was able to sell the goods to my trade. But I found that there was no end to the variety of stuff sold by the small Hardware dealer in New York and Pennsylvania. And I also found, in many cases, that I was 'stuck' with a stock of goods that only a very few of my customers handled or could be induced to handle. And that when the next year came my old stock was out of date. If I did not buy the quantity, I found I could not buy any cheaper than did my customer, and after giving the 'wholesale Hardware department store' business a thorough trial, I decided to hold myself down to Hardware and find that by concentrating my efforts upon this line I've been able to do a more satisfactory and better paying business."

An exceedingly well arranged and attractive store in Auburn is that of the F. W. Herron Hardware Co. A novel feature is that of having large display windows on the second floor while stoves and housefurnishing goods are well displayed. The store is bright and light, and arrangement of stock is exceedingly good.

In addition to a general line of Hardware Everts Bros. & Pomeroy, of Auburn, are large dealers in sash, doors and blinds, and carry a large stock of stoves. The business in furnaces and heaters done by this concern is extensive, many contracts being taken in other towns of Central New York.

Another progressive Hardwareman of Auburn is T. A. Cameron, who makes a special bid for fine retail trade.

H. J. Rich, of Auburn, is recognized as one of the best posted Hardware retailers of his city, and carries a complete stock of general Hardware and tools.

All the Hardwaremen seen by your correspondent seem to feel that the outlook is good for Summer business, and those who do a plumbing business are having more trade than can be cared for in this department. HAMMERNAIL.

Unselfish.

"Sir!" she cried when he kissed her, "you forget yourself."

"Oh, no," he said, "I got half of it all right. The other half was your share."—*Philadelphia Ledger.*

RECENT TRADE PUBLICATIONS.

Chicago Flexible Shaft Company, Chicago, Ills., have issued a very high grade pamphlet catalogue containing 31 pages of information regarding their hand and horse power sheep shearing machines. Their factories, they announce, are equipped with the latest and best automatic labor and money-saving machinery. Last year they greatly increased and improved their facilities to meet the demands of their yearly increasing output. Their Stewart patent new "1904 model" sheep shearing machine consists of a large wheel, the face and side of which are turned perfectly true. On the face of the wheel, teeth are generated on an automatic machine that insures absolute accuracy. This gear is enclosed in a stationary frame and drives a hardened steel cut pinion to which is connected the universal joint flexible shaft. The cogs used in the connection are turned from the solid bars; teeth are then milled perfectly and hardened file hard. To these cogs are connected solid steel spindles running in tubular sheaths which are connected together by joints. The pinion shaft is fitted with a small turned balance wheel, which, running at a high speed, makes the machine run perfectly steady at all times. Every machine is supplied with the improved shear which they illustrate in the above catalogue. It will do just as much work and as fast on the hand power machine as when driven by power. All parts are interchangeable. Write for catalogue which also illustrates and describes the other specialties manufactured by this Company.

Berger Brothers, 237 Arch street, Philadelphia, Pa., manufacturers of Tinners and Roofers Supplies have issued a 1904 catalogue and price list, which is a substantial book of 128 pages fully illustrating the line of goods made and handled by them. They announce to the trade that they have the largest plant of tinners' and roofers' supplies in the country, also a most complete factory for the manufacture of pipe and gutter, etc., and have lately erected a five story warehouse which adjoins their store, and places them in a very enviable position. With these exceptional facilities, and their usual prompt attention, they state it is their hope to be able to retain the good will of the trade, and intend producing the best goods at the right prices. A copy of the above mentioned catalogue will be forwarded upon application to the Berger Brothers Company.

The Philadelphia Lawn Mower Company, 3101-3109 Chestnut street, Philadelphia, Pa., have issued their 1904 annual illustrated catalogue and price list of their Philadelphia Lawn Mowers. This is their 35th annual, and cancels all former prices. The Company guarantee all their mowers to do good work and to be as represented. They are made of best material and by superior workmen. The book is illustrated throughout, having several illustrations in colors. Included in the contents are high and low wheel mowers, hand and horse mowers, etc., lawn sprinklers, horse sweepers, etc. The book gives general instructions for ordering parts and for repairing mowers, which information will be found very valuable for those who have use for these machines. The catalogue, which is in large pamphlet form, will be sent upon application.

Schoverling, Daly & Gales, 302-304 Broadway, New York City, general sporting goods dealers, have recently placed in the hands of their patrons their new 1904 catalogue of Spring and Summer goods, including their line of Daly Guns. They state it is their intention, commencing with this catalogue, to issue yearly a general catalogue containing description of all goods they carry in stock. In addition, they will issue every Spring, separate catalogues of Spring and Summer goods, bicycles and bicycle sundries and fishing tackle. The above firm are sole agents in the U. S. for the Walsrode Powder and Sauer Mauser Rifles and also agents for C. S. Shattuck; Smith & Wesson; Harrington & Richardson; Marlin Fire Arms Co.; Forehand Arms Co.; Luger Automatic Pistols; Ideal Mfg. Co.; Parker Bros.; L. C. Smith; Lefever Arms Co.; Ithaca Gun Co.; and the Mauser Magazine Rifles. The above company issue a separate fishing tackle catalogue which they will also send upon request to those interested.

H. A. Rogers, 19 John street, New York, have sent us one of their very handsome 1904 price lists of gauge glasses, gauge glass cutters and gauge glass washers. Mr. Rogers is the sole agent in the United States for the justly celebrated Moncrieff Scotch gauge glass, the sales of which, it is reported, are increasing each succeeding year. Every style of gauge-glass can be supplied by Mr. Rogers and are illustrated in their new price list just issued. Engineers will be interested in the Perfected gauge glass washer which is also shown. This washer is put up one dozen in a box and should appeal to the merchant and engineer as a handy package, either for shelf or the tool chest. Copies of the price list may be obtained upon request.

Eugene E. Nice, Philadelphia, Pa., has issued an attractive catalogue, being catalogue "C" and containing 108 pages. It is a high-grade book throughout, finely printed on excellent paper, and exceedingly well illustrated. Embraced in the contents of the book is a full line of brushes, mixed paints, varnishes, enamels, stains, etc. He states: "The Nice ready mixed paints are made only from the very best and purest materials, having earned an enviable reputation for purity of color, covering and general wearing qualities." One gallon of this paint will cover 500 to 600 square feet, one coat, according to the condition of the work. List prices are given throughout the book. He states that for 25 years he has been studying the wants of the painter in the line of brushes, and have constantly been getting nearer perfection, and the line he presents in the catalogue covers, he claims, the very finest varnish and paint brushes it is possible to put together, and from these down to the good but low-priced goods for general trade, each brush representing the very best value in its respective class.

The H. H. Mayhew Company, Shelburne Falls,, Mass., in their catalogue "Number Eleven," have produced a book worthy of the house it represents. It is a high grade catalogue, finely printed on excellent paper and illustrated throughout, exploiting as it does, their line of tools. All of the illustrations are accompanied by list prices. A very complete line of glass cutters is manufactured by the Mayhew Company, which is intended to provide a more perfect and durable tool than has heretofore been placed on the market. They call especial attention to the novel feature of the No. 1 and No. 2, lying in the turret-like holder for the six cutters which may be revolved on, or clamped to the frame, by the screw at the center. This arrangement enables the operator to place any of the cutters in position for use instantly, or if desired, the turret may be removed and the cutters be replaced with new in a minute's time. The turret is sunk within a circular recess, which protects all of the cutters not in position for use. The cutters are carefully hardened and ground by special processes. Write to above address for their catalogue, which describes entire line.

The William Schollhorn Company, New Haven, Conn., under date of January, 1904, distributed to the trade a catalogue and price list of their pliers, nippers, punches, etc., which, they state, is intended to cancel all former lists and prices. The book is well illustrated and is finely printed on coated paper. A new device manufactured by the company is their "Excelsior" spring dividers. This new device of adjustment makes this tool practically a "spring divider" and adaptable for fine adjustments and a desirable tool for every mechanic and draftsman. The fastening on this divider is an especial feature, the points being made of Stubb's steel wire, tempered and inserted two inches into each leg, which, they claim, produces the best point, whether used on metal or wood. It is furnished nickel plated. Send for above-mentioned catalogue, in which will be found many other specialties of their make, fully described, illustrated and priced.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washin ton, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED APRIL 19, 1904.

361,278. SAW SETTING DEVICE, Jas. M. Flower, Walnut Ridge, Ark.

361,283. CARPET STRETCHER, Manuel F. Gutierrez, Altoona, Pa.

361,489. COFFEE POT, Harry B. Cornish and John B. Moore, Blue Earth City, Minn.

361,505. FOLDING PORTABLE TENT, Clinton Gray, Elmira, N. Y.

361.554. BOLT CUTTER, Joseph R. Smith, Brockville, Ontario, Canada.

PATENTS ISSUED APRIL 19, 1904.

757,497. CLOTHES DRIER, Per A. Ringnell, Salem, O.

757,613. NUT WRENCH, William E. Gilliland, Coatsburg, Ill.

PATENTS EXPIRED MAY 3, 1904.

362,072. AIR VALVE FOR OIL CANS, Loretto H. Foss, Portland, Me.

362,085. LIFTING JACK, Edward Huber, Marion, Ohio.

362,105. COFFEE POT, William W. Newcomb, Bradfordsville, Ky.

362,152. FASTENER FOR MEETING RAILS OF SASHES, Daniel M. Ferren, Taunton, Mass.

362,336. RAZOR, Peter Wahl, North Vernon, Ind.

PATENTS ISSUED MAY 3, 1904.

758,632. SASH STOP AND LOCK, Walter Edmond, Louden, N. J.

758,679. SASH LOCK, Abner J. McGehee, Jackson, Tenn.

758,698. PLANE, Albert F. Schade, New Britain, Conn.

758,699. RAZOR STROPPING MACHINE, August W. Scheuber, Hoboken, N. J.

758,803. COMBINED SCRUBBER AND MOP, John A. Zerbe, Lebanon, Pa.

758,948. PLANE, Harvey M. Wood, Denver, Colo.

PATENTS EXPIRED MAY 10, 1904.

362,516. EDGE TRIMMING LAWN MOWER, Daniel C. Kenyon, Wyoming, R. I.

362,535. LAWN MOWER, Jessie F. Powell, Eureka, Kans.

362,572. SHEARS, Frederick Clauss, Elizabeth, N. J.

362,604. ASH OR GARBAGE CAN, Charles M. Brion, Worcester, Mass.

362,668. SASH FASTENER, Remsen Schenck, New York, N. Y.

362,776. LANTERN, Thomas Parish, Newark, N. J.

PATENTS ISSUED MAY 10, 1904.

759,393. DEVICE FOR WEEDING AND THINNING OUT PLANTS, Benjamin J. Otto, Waukau, Wis.

759,408. CASTER, William A. Tonini, Grandview, Ind.

759,556. HAMMER, Phillipp Scholtes, Mount Oliver, Pa.

759,621. DOOR CHECK, Robert A. Lackey, Oakpark, Ill.

759,626. DEVICE FOR HONING AND STROPPING RAZORS, George W. Mosby, New York, N. Y.

Safety Latch and Lock . . .

Strongest, Simplest and Safest Door Fastener on the market.

Gives Positive Protection Against Tramps, Peddlers, Etc.

Permits door to be left open at night for ventilation.
Best for Homes, Hotels and Boarding Houses.

Send for Circular.

THE ACME PATTERN & MFG. CO.

Milwaukee, Wisconsin.

OUR SPECIAL

4th of July Goods

Catalogue has a two-color cover that looks like this

Of course, you may choose to buy your supply elsewhere but—better get this catalogue anyway so you'll know what the "yellow label" goods (the best, mind you) CAN be bought for from us—three houses, you know, and we buy and sell FIVE (5) times as many 4th of July Goods as the next largest jobber.

Our June Drummer

ask for that too—there are reasons—some very special—why you'll be interested in it. Our say-so, we know. But, risk a postal card on our word for it, this once.

It's different—our monthly is. The "Resultful Plans" and the "Solutions of Store Problems," alone, will pay for your cent and the trouble of writing—several times over. As for the goods—the prices (guaranteed net prices) will do the talking for them. The June Drummer is No. CC 504.

BUTLER BROTHERS

Wholesalers of Everything—By Catalogue Only

NEW YORK CHICAGO ST. LOUIS

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, etc.

Bedford, Pa.—Messrs. Piper and Stapleton have opened a large furniture and Hardware store on Railroad Avenue.

Bloomington, Ill.—G. L. Lighthall has opened a Hardware store.

Derry, N. H.—Everett E. Griffin has opened a Hardware store in Young's Block.

Gillum, Ill.—F. L. Marcellus has completed the addition to his store and will put in a general line of merchandise and Hardware.

Hazen Station, Pa.—M. W. Grier has opened a new Hardware store.

Joplin, Mo.—J. B. Mallory has opened a new Hardware store in West Main Street.

Los Angeles, Cal.—The Whittier Hardware Company has been incorporated. Directors: L. Butman, J. E. Davis, D. C. Andrews, A. U. Tomlinson, C. E. Cook. Capital stock, $40,000.

Reedsburg, Wis.—August Siefert Hardware Company has been incorporated; capital stock, $25,000; incorporators: August Siefert, Louis J. Fisher, Albert H. Fisher and A. G. Schultz.

Scottsburg, Ind.—The People's Hardware Company has been incorporated; capital, $50,000; directors: J. H. Friedley, Sarah F. Rice and William F. Rice.

St. Joseph, Mo.—The St. Joseph Hardware and Plumbing Company has been incorporated. Capital stock, $3,000. The stockholders are: L. E. Lacy, A. F. Lacy, D. M. Lacy.

West Point, Miss.—West Point Hardware Company has been incorporated with a capital stock of $900,000. J. W. Jameson, Harry Robertson and R. P. Duke, incorporators.

Changes.

Albuquerque, N. M.—J. C. Flournoy, who for some time past has been the representative of the Simmons Hardware Company, of St. Louis, is to resign and take the position of manager of the Albuquerque Hardware Company on July 1.

Allegheny, Pa.—The firm of Rhein & Fortenbacher which has been in business for the past 31 years on Ohio Street, has been dissolved. Mr. Rhein retiring on account of his advanced age. The business will be continued by J. Fortenbacher & Son.

Ambridge, Pa.—The Luce Hardware & Supply Co. has succeeded to the business of Brenholtz Bros.

Batavia, N. Y.—E. E. Peck, whose Hardware stock was damaged by fire, has removed to his old stand on State Street. When repairs are completed Mr. Peck will occupy Nos. 1 and 3 State Street with a stock of new goods and he will have full lines of Hardware, stoves, plumbing goods and electrical supplies.

Bloomington, Ill.—E. C. Buck has purchased of D. C. Smitson his Hardware store and tinshop on North Street. Mr. Buck takes possession at once.

Brunswick, Me.—The Hardware firm of Ridley & Eaton has been dissolved. Charles O. Eaton, the junior partner, has purchased the interest of George B. Ridley. Mr. Eaton proposes to form a stock company, to be probably known as the Eaton Hardware Company.

Calcutta, Ohio.—E. M. Gonzales has bought the store of Frank Lyons.

Carthage, Mo.—A. M. Drake, who a year ago sold his interest in the Hardware business to C. S. Bahney, has bought out Mr. Bahney and the firm is now composed of A. M. Drake & Son, as it was before the former transaction.

Champaign, Ill.—W. H. McKibben, of Alton, has purchased the Chenoweth Hardware store.

Columbus, Ohio.—The Tallmadge Hardware Company has again opened at its old location, but in a splendid new structure, the Brunson office building. This has displaced the building burned in April, 1903, and as the building is modern in every respect, so is the store room of the Tallmadge Company. The stock room was constructed along lines suggested by the Tallmadge Company and is thoroughly up-to-date. The new stock of Hardware similarly is in keeping with the times.

Hartford, Conn.—The Way Hardware corporation are about to vacate their store at 866 Main Street and will dispose of their stock of Hardware at auction. The stock is an immense one and includes everything that properly comes under the head of Hardware.

Honedale, Ohio.—Miller & Patton have bought out the Hardware department of J. W. Scott, and will run it as a separate store.

Houghton, Mich.—W. R. Daskam, Hardware dealer, located in the Dee post office building, announces that he has decided to retire from business in Houghton and will at once sell out his present stock. He expects to dispose of it within 60 days. Mr. Daskam gives as his reason for retiring from the Houghton field that he has something better in view, an opening which he is compelled to take advantage of. He says that he has enjoyed a good business during his five years' residence in Houghton, and that he has been as successful as he had expected when entering the field. Mr. Daskam will sell his stock at retail or will dispose of the whole stock and business at once.

Houston, Texas.—The Brown Hardware Company has purchased the bulk of the paint stock of the Palace drug store of this city and will add this line to the Hardware stock of Sims & Dold, which they have recently purchased.

Jeanette, Pa.—Schumaker, Ringer & Foster have bought out the Hardware store of W. A. Scott.

Lebanon, Pa.—William P. Gamber has purchased the interest of Thomas Failer in the Hardware store of Gamber & Failer, 43 North Ninth Street, and has taken possession. Mr. Gamber will continue the business at the old stand.

Linton, N. D.—Mott & Marsh, a Hardware firm, will dissolve partnership by mutual consent.

Little Rock, Ark.—D. F. S. Galloway has purchased the interest of W. H. Ellis of the firm of Gowdy & Ellis, 601 Main Street, thereby changing the style of the firm to Gowdy & Galloway. The new firm proposes to conduct a strictly up-to-date Hardware store.

Marquette, Mich.—The Kelly Hardware Company has moved to the Adams Block on South Front Street.

Masontown, Pa.—W. S. Honsaker has bought the Hardware store of Rolley & Co.

Moosic, Pa.—John Harkness has bought out the Hardware store formerly owned by John Coons.

New Castle, Pa.—Wirsing Bros. & Hainer have just completed remodeling the interior of their store. They now have an establishment, complete in every detail, and one which will compare favorably with any Hardware store in Western Pennsylvania.

New Rochelle, N. Y.—S. E. T. Harding, who up to the present date managed the New Rochelle Hardware Store, located on Lawton Street, has removed to 206 Main Street, where he has consolidated with the "Bargain Store." The New Rochelle Hardware Company opened their new store May 1st with a full line of Hardware oils and paints.

Saunemin, Ill.—M. L. Paddock has sold his Hardware and implement stock to Eggenberger & Co., of Emington, who have taken possession.

Shelburn, Ind.—De Lashmutt, Mills & De Lashmutt is the new firm that will succeed J. P. Siner in the Hardware business.

South Kaukauna, Wis.—The Hardware store conducted by Butler Bros., in the Kuehn Block, has been sold to Rube Whittier, Sr., and Adolph Nommensen, possession to be given at once. The store will be restocked and a large line of staple Hardware will be carried by the new firm.

Stella, Neb.—G. F. Leming has sold his Hardware business to Sidney Timerman, who takes possession at once.

Vanderbilt, Pa.—F. E. Oglevee has succeeded the old firm of Oglevee & Bute.

Youngstown, Ohio.—The Morris Hardware Company has increased its capital stock from $200,000 to $350,000.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Beaver Falls, Pa.—The Keystone Wire Matting Company has been incorporated. Capital stock $25,000.

Chicago, Ill.—Klahre Manufacturing Company has been incorporated; capital, $2,400; manufacturing tools; incorporators: C. C. Reckitt, Gustav Klahre, T. R. Ferris.

Grand Rapids, Mich.—H. Leonard & Sons has been incorporated. Capital stock $200,000. Incorporators are: President, F. E. Leonard; vice-president, H. C. Leonard; treasurer, C. H. Leonard. E. B. Cutler, who has been connected with the company for some time, will buy stock in the corporation and will be chosen secretary.

Grand Rapids, Mich.—The Grand Rapids Refrigerator Company has been incorporated. The company is capitalized at $150,000, all of which is paid in cash. Officers have been elected as follows: President, C. I. Leonard; vice-president, F. E. Leonard; treasurer, H. C. Leonard; secretary, F. A. Harvey.

Harvard, Ill.—The Adjustable Wrench and Specialty Manufacturing Company has been incorporated; capital, $100,000; manufacturing Hardware; incorporators: P. M. Knippenberg, F. W. Hahn, L. J. Husson.

Lancaster, Pa.—The Safe Padlock and Hardware Company has been incorporated. Capital stock, $75,000. The stockholders and directors are: D. F. Buchmiller, Lloyd B. Hershey and Jacob B. Amwake. Mr. Hershey is the treasurer.

Lestershire, N. Y.—The Lestershire Tinware Company has been incorporated with a capital stock of $10,000. The directors are: J. W. Lilley and J. M. Kennedy, of Lestershire, and A. L. Dickinson, of Binghamton. The company will make and sell tinware.

Newark, N. J.—The Newark Brush Company has been incorporated; capital, $125,000. Incorporators: Edward E. Gnichtel, Frederick W. Gnichtel, and G. A. Schwedes.

Omaha, Neb.—The Valley Machine Company is incorporated by George E. Fisher, C. F. Aney, N. J. Strong, E. D. Fisher, W. F. Schmaedocke, H. G. Fisher and T. G. Bristow for the purpose of conducting a wholesale and retail implement business at Underwood, this county. The capital stock is placed at $25,000. This company absorbs the machine and implement business of Fisher & Aney.

Oshkosh, Wis.—The Oshkosh Hardware Manufacturing Company has been incorporated; capital stock, $150,000. Incorporators: Edgar P. Sawyer, Charles W. Radford, John Challoner, James H. Wall and George Hilton.

Palmyra, N. Y.—The Barren sanitary water cooler, an invention of George Barren, has been purchased by Rochester and Buffalo capitalists, who will at once begin manufacturing on a large scale. The plant is located at the corner of Market and Canal Streets in this city, and is already equipped and ready for business.

San Diego, Cal.—William E. Smythe is president of the Hudson Tool Company, recently incorporated under California laws, with an authorized capital of $200,000. The company has valuable patents covering a variety of wrenches, including one for automobile uses. The company has as yet made no decision as to its location, which will probably be in the East. It has taken out a number of patents in foreign countries. The company's charter provides for home offices in San Diego and Los Angeles, and it may be possible to establish a factory on this coast as well as in the East.

Sidney, Ohio.—The Sidney Tool Company has been incorporated with a capital stock of $25,000. Incorporators: J. O. Amos, E. J. Griffis, W. H. Wagner, I. H. Thedieck, W. B. McCabe and G. H. Dickas.

South Bend, Ind.—Albert P. Sibley, E. E. Sibley, O. W. Sibley, William Holland and Cyrus S. Workinger have incorporated the Sibley Machine Tool Company, with a capital stock of $70,000.

Washington, D. C.—Hydro Carbon Oil Burner Company has been incorporated; $200,000; by James R. Porter, Eugene Schooley, and J. L. Cohencious.

Changes.

Alexandria, Ind.—The Kelley ax plant will begin preparations for removal of machinery on July 1. The company will locate at Charleston, W. Va.

Anderson, Ind.—Improvements that will largely increase the capacity of the local plant of the Nicholson File Company are approaching completion, which will make the local works the largest west of Pittsburg for manufacturing files. The file plant for many years located at Beaver Falls, Pa., is being consolidated with the works here.

Anniston, Ala.—The City Hardware Company has leased the building on the alley nearly in the rear of their store, and will operate a harness factory on a large scale there. An electric motor to furnish the power has been ordered and all the machinery is expected to be in and the factory in operation by the first of June. The harness will be put on the wholesale market and drummers will cover a wide section of country exclusively for this industry.

Baltimore, Md.—Plans have been completed for another large building to be erected at the new plant of the William J. Hooper Manufacturing Company, makers of nets and twines. Part of the plant is well under way, and the new building, which will be used as a tar house, will be of brick construction, containing two stories. It will be 30 feet wide by 123 feet in length. The new tar house will cost $20,000.

Charleroi, Pa.—The Hussey-Binn Shovel Company has about completed its additions to its plant, which will give added capacity to the works and place the company on a better footing than ever. The additions include a rolling mill and stamping mill, and the capacity of the works will be so much enlarged that additional men will have to be employed.

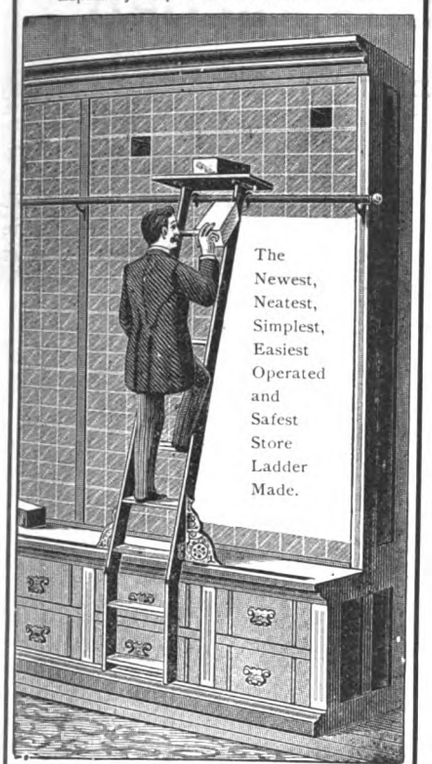
Dwight, Ill.—The plant of the Adjustable Wrench and Specialty Mfg. Co. has been removed to Harvard. R. A. Gefke has purchased an interest in the business.

Erie, Pa.—The Eriez Stove Company will build a new factory on the south side of Twentieth between Holland and German Streets. It will be a two-story frame building, and will cost $2,500.

Lebanon, Pa.—Will S. Ritchie has sold his washing machine business to Frank E. Day, of Greencastle. Mr. Day will manufacture the machines in his factory at Greencastle, and expects to push their sale. The sale of the business includes the transfer of the patents on the machine.

Los Angeles, Cal.—Arrangements have been perfected by the California Moline Plow Company to improve the lot lately purchased on the south side of First Street, between Central Avenue and San Pedro Street. The lot is 50 by 208 feet in size, and the building will be arranged for warehouse and salesroom.

New Castle, Ind.—A deal has been closed whereby New Castle secures the nail factory of the Chicago Steel Manufacturing Company. The plant will be constructed in proximity to the plant of the Indiana rolling mill, and will use steel from the latter in the manufacture of nails. The plant will have ten thousand feet of floor space and will employ one hundred hands the year round.



New York, N. Y.—Stransky & Co., importers of enameled ware, have moved from 9-11 Murray Street to 29-31 Cliff Street.

STOVE POLISH
if not the best you ever used.

If we did not have absolute confiden e in the Polish we certainly could not afford to give this guarantee. The only Turpentine polish on the market. Put up in 5 lb. cans.

Ask for Booklet and Prices.

NICKLE PLATE STOVE POLISH CO.,
CHICAGO, U. S. A.

The good points of the GEM are worth considering

Here they are:

It is nicely tinned—will not rust. It chops—does not tear, mash, squeeze, grind. It chops meat, both raw and cooked. It chops fruits, vegetables and all other foods. It is easy to operate. It is easy to adjust. It is easy to clean. It is easy to take apart and put together. There are few parts. Nothing to get out of order. It has four cutters for cutting in pieces of various sizes. The cutters are made of steel; they cannot break. The cutters are self-sharpening. Three sizes of choppers are made. Nut-Butter Cutter packed with family sizes. The two larger sizes can be used with sausage stuffer attachment.

The COMBINATION OF THESE FEATURES MAKES
Sargent's Gem Food Chopper

a household utensil that no woman can afford to be without; housekeepers everywhere are recognizing the value of the Gem and using it in their kitchens. How about those in your vicinity? **Sell the Gem to them; it will pay you.** If you haven't seen the Gem-Chopper Cook Book we would be glad to send you a copy.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Angola, N. Y.—The Emblem Mfg. Co. has been incorporated for the manufacture of Emblem bicycles Capital stock, $40,000. The incorporators are: W. G. Schack, and others, formerly connected with the Day Mfg. Co.

Glenville, Ohio.—W. C. Nichols has opened a shop at 3440 St. Clair Street for general repairing of bicycles, stoves, etc.

Cleveland, Ohio.—Berg Automobile Co. have sold their entire business to a new corporation, composed of the principals of the Worthington Automobile Co., but who will continue the business under the old name.

Cleveland, Ohio.—Owing to the demand for White touring cars in the district around Orange, N. J., the White Sewing Machine Co. has opened a branch at 19 Railroad Place, Brick Church, in charge of Benjamin F. Adams.

Colorado Springs, Col.—Colorado Springs Auto Company has been sold to G. J. and O. M. Schwabach.

Rochester, Minn.—The Conly Camera Company, doing business in Spring Valley, will move its plant to this city by July 1. The large building on West College Street has been purchased for the concern. Forty persons will be employed in the factory.

Minneapolis, Minn.—Haynes Automobile Company have removed to 44 South Seventh Street.

Nazareth, Pa.—Wm. Friebely has sold his bicycle business to Lewis Wunderly.

New York, N. Y.—Owing to increased business, the Auto. Supply Company have removed from Broadway and Fiftieth Street to 1662 Broadway.

Passaic, N. J.—George de W. Brown has purchased the building at the corner of Howe Avenue and Prospect Street, where he has opened a modern garage. He has been established 10 years and was formerly located at 271 Main Avenue and 178 Prospect Street. He has the agencies for the Autocar, Cadillac, and Oldsmobile.

Philadelphia, Pa.—Aukland Cycle and Auto Co. have removed to 310 Jackson Boulevard. Chicago, Ill.

Changes.

Bath, N. Y.—The Reliance Motor Cycle Company has purchased the business of the Empire State Cycle Company.

Boston, Mass.—A. J. Coburn, agent for the Cameron car, has removed from 147 Columbus Avenue to Park Square Auto Station.

Boston, Mass.—Boston Automobile Exchange have moved from 73 Scotia Street to 173-175-177 Berkeley Street.

Boston, Mass.—Columbia Lubricants Co. has removed from 66 Stanhope Street to 59 Long Wharf.

Brockton, Mass.—Brockton Auto Co. have sold out to the United Auto Co.

Buffalo, N. Y.—W. C. Jaynes Auto. Company have removed to their new garage on Main Street.

Caribou, Me.—The firm of Irving & Ricker have secured the agency of the Rambler automobile, which they will handle at their place of business on Sweden Street. They will also handle the National, Stevens-Duryea, and Peerless gasoline automobiles.

Chicago, Ill.—C. A. Coey & Co., 5311-13 Cottage Grove Avenue are adding automobile supplies to their business and are laying in a complete line.

Chicago, Ill.—Dan Canary Automobile Co. will move from 521 Wabash Avenue to the corner of Wabash Avenue and Hubbard Court.

Miscellaneous.

Milwaukee, Wis.—Fifteen Milwaukee Cycle dealers on May 8th formed a temporary organization in the office of the Milwaukee Cycle Supply Company, and a trade organization probably will be effected soon. Temporary officers were elected as follows: President, August Mueller; secretary, F. J. Huennekens. It was decided to run a fourteen mile road race on June 19, as one of the means to arouse interest in cycling. No definite plans have yet been made to further the objects of the association.

Philadelphia, Pa.—Wm. Sauter, of Edward K. Tryon, Jr., & Co., has been elected a member of the Executive Committee of the National Cycle Trade Association, succeeding Geo. W. Nock, who recently resigned.

New York, N. Y.—A. Schrader's Sons, Nos. 50-52 Rose Street, manufacturers of the Schrader Universal tire valve, has been incorporated, with $400,000 capital stock. The directors are: George H. F. Schrader, Charles K. Cole and Mrs. Charles Schweinhert.

Springfield, Mass.—C. M. Decker has opened a bicycle and repair shop on Steuben Street.

Syracuse, N. Y.—E. C. Davis has opened a branch bicycle repair shop at Waterloo.

Wallingford, Conn.—The Barber-Ennever Company has been incorporated. Capital stock, $3,000. The corporation will deal in sporting goods, etc. Daniel L. Barber, Edwin J. Ennever and Emma J. Barber, all of Wallingford, are the incorporators named.

Washington, D. C.—Automobile Storage and Repair Company has been incorporated. F. B. and Ed. L. Weston will continue with the new concern.

Washington, D. C.—The Anglo-American Arms and Ammunition Company has been incorporated. Incorporators: D. S. Fletcher, N. A. Smith and E. J. Dimmick.

HARDWARE MANUFACTURERS' RECORD (Continued)

Changes.

Condersport, Pa.—G. H. Doane has again become the sole owner of the Hardware business of Doane & Barnes, he buying the interest which has been owned by W. J. Barnes for a few years back.

Reading, Pa.—The Consolidated Hardware Company, recently formed here with a capital of $3,000,000, has purchased the National Brass and Iron Works, buying its preferred stock of $350,000 and wiping out the common stock of $200,000. The Consolidated had previously bought control in the Reading Hardware Works, the Keystone Hardware Works, and the Reading Machine and Screw Works, employing all together 1800 hands; and it is reaching out for others.

Reading, Pa.—The Mt. Penn Stove Works will erect a three-story warehouse on 3d Street between L. V. R. R. and Greenwich Street.

Wichita, Kan.—The Reversible Self-Sharpening Plow-share Company will soon install a plant here for the manufacture of their shares. The backers of the company are Wichita business men. The plant will cost $16,000.

York City, Pa.—Constantly increasing trade has necessitated the New York Wire Cloth Company again to have its mammoth plant in the East end enlarged. The new building will be about 60x 25 feet. The most important of the improvements will be made on the western end of the plant. One section of the one-story "L" shape building will be enlarged to twice its present capacity. The remodeled structure when completed, will be about 113x52 feet and will be two-stories in height.

Springfield, Ohio.—The Bettendorf Metal Wheel Company has commenced upon extensive improvements to its plant so as to secure additional room and facilities for taking care of its increased business.

St. Louis, Mo.—The St. Louis Screw Company has increased its capital stock from $60,000 to $200,000.

Swanton, O.—The Pilliod Lumber Company has put in a new handle factory at the mill and is now making from two to three thousand handles a day.

Toledo, Ohio.—The Ohio Steel Wheelbarrow Company will build a one-story brick factory on its property, between Depot Street and Swan Creek. The structure will be 100x40 feet. J. F. Zahm is president, and G. C. Cone secretary of the company.

Salesman Wanted

EXPERIENCED SALESMAN in Builders' Hardware and Mechanic's Tools. Must have the best of references. Address with full particulars J. W. C. Care of HARDWARE.

THE YANKEES IN JAPAN.

The Japanese are now among our best customers. They had practically no foreign trade a generation ago, but they now buy and sell to the extent of a half billion dollars a year. Their purchases of foreign goods amount to 280 millions, and one-seventh of them come from the United States. British India sells Japan as much as we do, and Great Britain more. Germany and China rank about even, but both are far behind the United States.

During a visit to Tokyo some years ago in a talk with the premier, Count Ito, about the chances of American enterprises there, he said that the trade with the United States would increase and suggested that Americans should establish factories in Japan to supply the Chinese market. He said that property would be safer there than in China and the labor could be handled much better. As an evidence of the growth of manufacturing he said that twenty years ago the Japanese spinning was all done on old-fashioned wheels and by hand. It is now performed with the best of modern machinery.

Japan has now sixty cotton mills in which seventy thousand hands are employed. There are more than fifty thousand women at work in the factories. A large number of machine shops have been established and all sorts of work is done in iron and steel.

The Japanese are growing rich. They have banks everywhere with heavy deposits. One of their statisticians estimates the present wealth of the country at about $8,000,000, which is an enormous sum for an Asiatic land of that size.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

No. 31 Torch
$2.50 net.

ONE OF THE 46 KINDS..

The **No. 31 Torch** has proved to be the best all around cold weather torch on the market. The recent cold weather has demonstrated that its generating power was ample to enable it to do good work even in the Klondike in 40 degrees below zero weather. It produces a pure blue flame which is intensely hot, and will soon save the user its cost in the saving of gasoline alone. It is guaranteed to be the best in cold weather and the best in hot weather. Your money back if you are not pleased. Jobbers sell at factory price. Catalog is free.

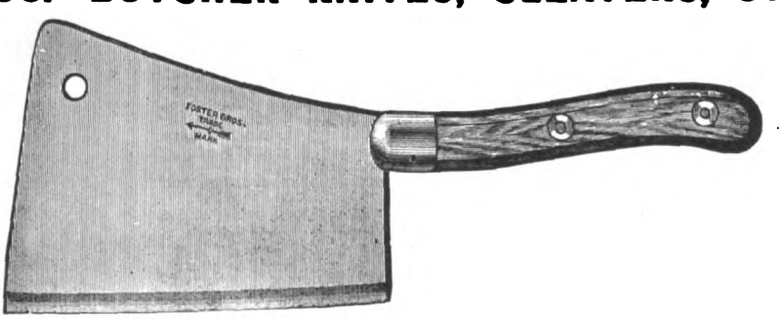
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

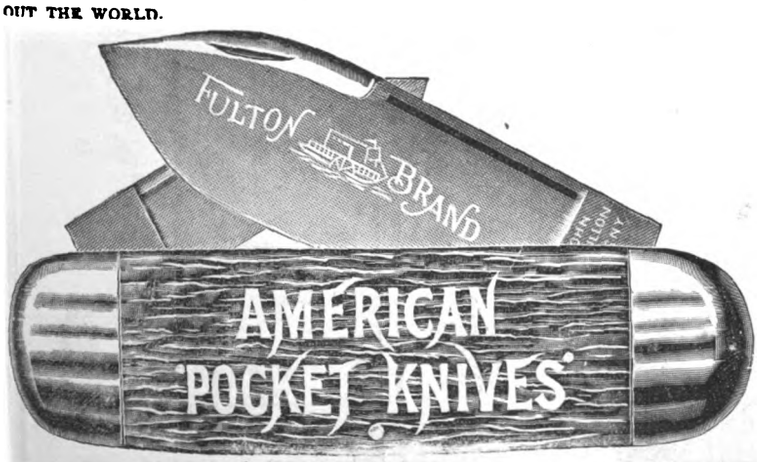


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

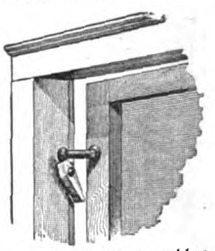
WHY IS THE

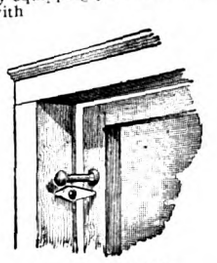
O. K. THE BEST ROTARY WASHING MACHINE?



—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing the friction and thus making machine so light running and almost noiseless.
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
4.—This washer is made by **experienced mechanics**, and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, **no escape of steam.**

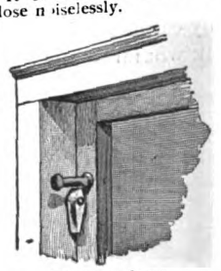
Manufactured by H. F. BRAMMER MFG. CO.,
DAVENPORT, IOWA.



Why Be Annoyed

by slamming, banging screen doors?

Door closing tips up rubber bumper.

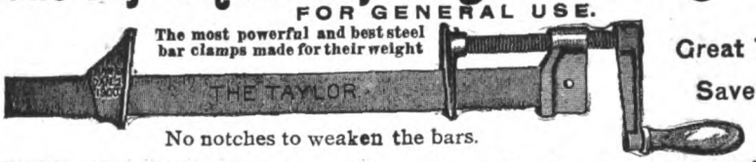


Be comfortable. Stop the noise by equipping your screen doors with

Rebounds slightly.

***The* Dime Screen Door Check.**

It causes the Screen Door to close noiselessly.



Silently closes.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent*; enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—If you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

"For Those Who Want the Best"

DOUBLE FALCON WRENCH

An inch and three-quarter off-set to allow work close to the wall or ceiling. Each one has two jaws, right and left hand. Made on an improved principle over the alligator wrench. Fixed and flaring jaws, the combination of the grasping jaw and serrated face, with the bearing jaw with straight bearing face. Grasps and releases a pipe with ease and certainty, the curved outline of the pipe finding a tangential bearing in all parts of the opening. The curved jaw first engages the pipe, and then the straight jaw slips under the pipe until jammed tightly into the opening between the jaws, the action being entirely automatic. A forging of the finest tool steel, teeth accurately milled, hardened in the best possible manner, polished and finished with cyanide.

HARDWARE

The American Wooden Ware Co., of Toledo, Ohio, was one of the first exhibits to become installed at the St. Louis Exposition. It occcupies an elegible space at the Southern wall of the Palace of Forestry, Fish and Game. Embraced in its excellent display will be found such of their specialties as churns, washing machines, pails and a line of general woodenware.

✤

Wyeth Hardware & Manufacturing Co., of St. Joseph, Mo. urge their patrons when visiting the St. Louis Exposition to come and make their headquarters at their office in the Northwest corner of the Transportation Building, where they have a writing desk, easy chairs, toilet and lavatory closets and other conveniences that the sightseer will appreciate. Three men will be at the booth for the purpose of directing them to the finest display of gold fish; the most interesting entertainments on the Pike, and the best place in the world to buy saddlery goods. They claim to have the largest and most complete exhibit of harness, collars, riding saddles, gig saddles, whips, hand stamped leather chaparejos, scabbards, rifle and pistol holsters, saddle pockets, cuffs, etc., shown at the World's Fair as the product of one factory.

✤

On exhibition in Block 7A, Manufacturers' Building, World's Fair, St. Louis, the National Cutlery Company, of Philadelphia, have a very complete line of cutlery, including scissors, shears, snips, etc., and particularly their handsome line of tailor's shears.

✤

SCHOVERLING, DALY & GALES, 302-4 Broadway, New York City, have issued a four-page folder being a trade list of goods for Monday, July 4th, and all other celebrations. It illustrates and exploits their Flobert, New Century and Hamilton rifles; Liberty single action, Young American double action; H. & R. Automatic, H. & R. Premier and H. & R. Hammerless pistols, also their watch charm and blank cartridge pistols and several other goods of their manufacture, all of which are accompanied by list prices. The above folder also lists many goods not illustrated. Send for one.

✤

The large establishment of Weed & Co., Buqalo, N. Y., was damaged by fire on the morning of the 28th ult. to the extent of nearly $30,000, fully covered by insurance. Through the especially efficient work of the fire department the flames were confined to the basement.

HOW TO INCREASE AMERICAN TRADE IN INDIA.

(*From United States Consul-General Patterson, Calcutta, India.*)

The exports of merchandise from India amount to about $400,000 000 annually, and the United States gets a large share of this —about $30,000,000, or over 7 per cent. The imports of manufactured goods amount to about $250,000,000 annually.

In previous reports, during the seven years I have been here, in urging this as an important market, I have recommended the establishment of a museum of samples, or samples of our manufactures, in Calcutta, by a combination of manufacturers, with spacious sample rooms, to be known as "The American Samples and Sales Rooms," where would be exhibited the samples of all of our manufactures adapted to this country, to be under the charge of competent, energetic men, who would be authorized to make sales from samples, and where the goods received might be compared with the samples, if necessary. In this way the confidence of the native merchants—who are naturally suspicious of foreigners and hesitate to give orders to commercial travelers, who take their samples away with them, so they have no samples to compare their purchase with, if not satisfactory—would be secured, and when their confidence is once gained there is no difficulty in holding their trade.

There should be samples of cotton goods of all kinds adapted to this country; machinery, hardware, and agricultural implemens, such as are required here; railway material; electrical fans and other electrical goods; automobiles, for which there is quite a large and growing demand; vehicles such as are used here; bicycles; clocks and watches, especially the cheaper qualities; toys of all kinds; and hundreds of other things which will naturally suggest themselves.

The New York Export and Import Company has had a branch here for several years, something on the line above indicated, and is doing a very satisfactory business, but it is not on a large enough scale to control the trade we should have.

It should not be forgotten that Calcutta is the largest distributing point for manufactured goods in India, and that there are nearly 200,000,000 people tributary to and dependent upon this market for their supplies, both by river and rail.

This great market has been practically ignored by our manufacturers and merchants, but there are evidences that the Pacific coast, at least, is beginnig to make business connections here. A steamship—the first from SanFrancisco—arrived here a few days ago and is now loading with jute manufactures and other Indian products for that port, and I am informed that other ships will follow.

If our manufacturers and merchants desire this large trade, they must engage actively in competition for it by having traveling salesmen in the field with their samples, or, which would be better, by establishing such sample-sales rooms as I have indicated, with traveling salesmen in the field.

COAL BRIQUETTING AT THE ST. LOUIS EXPOSITION.

From May to November, 1904, William Johnson & Sons, Ltd., of Leeds, England, will exhibit a complete briquette plant in full operation, at the Universal Exposition of St. Louis. Coal companies and mine owners will have an opportunity of having either coal or ores tested, and of inspecting the entire procedure of briquetting with a view of the great benefit derived therefrom. It will be demonstrated how the enormous waste of Western bituminous semi-anthracite and lignite, where generally from 30 per cent. to 50 per cent. is entirely worthless, can be utilized, and turned into marketable smokeless fuel that will equal anthracite in heating quality. As such briquettes are weatherproof for years it is advantageous for Western railroads to store sufficient quantities for emergency, near every station, anywhere in the open air. Superior is also the cleanliness and convenience in handling, loading and shipping, as briquettes only require three-fourths of the space of lump coal, which for railroads, steamships and large works means a great economy. No coal bins or sheds are necessary. Briquettes may be manufactured weighing from 1 to 25 pounds each.

A VALUABLE PAMPHLET.

"The South's Supremacy in Cotton Growing" is the title of a large pamphlet just issued by the *Manufacturers' Record* of Baltimore, in which every phase of the cotton industry and the possibility of the South's maintaining the world's supremacy is discussed by Edward Atkinson, of Boston; J. C. Hardy, president of the Mississippi Agricultural and Mechanical College; Hon. Charles W. Dabney, of Tennessee; D. F. Houston, President of the Texas Agricultural and Mechanical College; Andrew M. Soule, of the Tennessee Experiment Station; J. G. Lee, Commissioner of the Louisiana Board of Agriculture; J. S. Newman, Professor South Carolina Experiment Station; John M. Parker, a leading cotton planter of New Orleans; and more than fifty others, including farmers, merchants, bankers and operators of cotton oil mills and cotton mills. The aim of the *Manufacturers' Record* in securing this broad, general discussion of the possibilities of cotton growing as affected by the selection of seed, treatment of soil and labor supply has been to present to the world a full survey from every point of view of this great question now commanding such world-wide attention. This pamphlet also contains the statistics of cotton production, consumption and average price for the last seventy years, with other data bearing on the consumption of cotton in this country and Europe. The dominant note throughout the discussion is that, despite the deterioration of seed, which is admitted by a large number of writers and the shortage in labor supply, the South will be able gradually to meet these conditions and to increase its production of cotton sufficient to enable it to retain the world's supremacy.

This timely publication is of great value to everyone interested in cotton or in the material interests of the South. The price is 25 cts. per copy.

OBITUARY.

It will be learned with regret that Thomas Rowland Western, cashier of the Manufacturers' Advertising Bureau, New York, of which Benjamin R. Western, his father, is the proprietor, died suddenly on Sunday, May 22, after an illness of only a few days. Mr. Western was of a genial and accommodating disposition and will be missed by many admiring friends.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

The Conventions recently held at Atlanta of the Southern Hardware Jobbers' Association and the American Hardware Manufacturers' Association were well organized affairs, and are estimated to be of more general good to the well being of the Hardware industry than could have been previously anticipated. On a subject like that of the Catalogue House question the utmost unanimity prevailed as to the importance of handling it and discussing it intelligently; it had reached such importance as to imperil the integrity of the Retail Dealer particularly, and also that of the jobbing interests consequent upon the continued usefulness of the Retailer. In the object to be attained the invitations that had been extended to those independent large jobbers were well thought out and were productive of the greatest assistance to the movement. The wise and useful addresses founded on experience, delivered by Mr. Norvell and Mr. Simmons gave evidence of much thought having been given to the matter referred to, and are worthy of the close perusal of every one in any way connected with the industry, who desires its legitimate trade usefulness perpetuated. It was a remarkable fact to notice how conservatively the question was discussed, how unanimous were the sentiments of all who participated in the proceedings, and how unity of action in the future could be expected from the entire trade under the leadership of those master spirits of our business who are familiar with its many difficulties of harmonizing conflicting interests and can see clearly how it may be accomplished.

The outlook for trade from now on through the season, would seem to be a good and fairly encouraging one; still the general lines are neglected to some extent, while seasonable goods, strictly so, form the current demand quite largely, which includes wire cloth, lawn mowers, garden tools, garden hose and the many items which are so essential for the proper development of the vacation season.

The crop conditions are reported as being quite favorable and in consequence already are very sanguine views entertained regarding Fall trade, with the hope expressed that nothing will give a set back to the hopes of the dealers that this Presidential year will pass with nothing of an unfavorable character to develop changed conditions.

The reduction in the working force of so many large bodies of men connected with formerly active enterprises, railroads and textile industries, affect to a perceptable extent the usual distributions, etc., of Hardware products in their several localities. Many of these changed conditions are local and temporary in their influence on business, and may not extend beyond the summer months when a relaxed demand is customary and usually anticipated.

Crop conditions, notwithstanding the abnormal lateness of the planting season and similar drawbacks, are reported as being of the most promising character, and are naturally more important to consider than any other influence that could affect the business of the last six months of the year. The weather having been fine everywhere for growing crops, there is but little hesitation among cautious buyers of preparing their orders for a trade that promises to be of a desired fullness as to amount and of the usual requirements as to goods.

Vacations are now being planned by the employers and their staff of employees who await with great expectancy the two weeks usually allotted for rest and recuperation. Opportunity is given during the next two months for the overhauling of manufacturing plants of every kind and will be availed of by a number who will experience less reluctance than usual in taking a short time off. The summer season gives indication in its present lack of strenuous urgency of becoming normal in its conditions of activity. Manufacturers find less pressure for ceaseless productiveness than was the case a year ago, most of the buyers being non-speculative in their views, as to demand and supply.

COMMERCE WITH OUR NON-CONTIGUOUS TERRITORY.

Commerce between the United States and its non-contiguous territory shows a slight increase in the present year as compared with last year. For the full fiscal year it seems likely to aggregate a hundred million dollars. For the nine months ending with March, 1904, the total of merchandise is $66,781,218, and of domestic gold received from Alaska, $5,806,501, making the total $72,587,719. The total of merchandise, $66,781,218, exceeds by about $2,000,000 that for the corresponding period of last year, in which the total was $64,843,085. Of this grand total of commerce with the non-contiguous territory of the United States, shipments thereto aggregate $25,806,621 and shipments from those territories to the United States aggregate $40,974,597.

Both the shipments to the non-contiguous territory and the merchandise received from that territory show a slight increase

Digitized by Google

as compared with that of last year. The total value of shipments to the non-contiguous territory in the nine months ending with March, 1904, was $25,806,621, and in the corresponding period of last year, $24,555,845. The total value of merchandise received from the non-contiguous territory in the nine months ending with March, 1904, was $40,974,597, and in the corresponding period of last year, $40,287,240. The value of the domestic gold received from Alaska in the nine months ending with March, 1904, was $5,806,561.

In the case of the Philippines, the commerce is at present much more largely with countries other than the United States than is the case with any other of the non-contiguous territories of the United States. This is due in part to the custom which has long prevailed in those islands of purchasing from Spain and other European countries, and from Hong Kong and China, whose proximity gives to their trade a marked advantage over that of distant countries, while the presence of a considerable Chinese population accounts in part for the large imports from China. Another cause of the more rapid growth in the trade relations of the United States with the other non-contiguous territories than in that with the Philippines is doubtless found in the fact that in all other cases no customs duties are collected on merchandise coming into the United States from those territories or into those territories from the United States, while in the case of the Philippines a reduction of only 25 per cent has been made in the rates of duty on merchandise from those islands entering the United States, and no reduction on merchandise from the United States entering those islands, as the treaty with Spain provides that merchandise from that country shall be admitted to the Philippines on the same terms as that from the United States during a period of ten years from the exchange of ratifications of that treaty, a term which does not expire until April, 1909. The figures for the nine months ending with March, 1904, are not at hand, but for the corresponding period of 1903 exports from the Philippines to countries other than the United States amounted to $13,497,039, as compared with imports into the islands from the United States valued at $9,235,372 during the same period. Of the merchandise valued at $13,497,039 sent from the Philippines to foreign countries, $5,944,858 went to the United Kingdom, chiefly hemp; $2,673,656 to France; $1,762,543 to Hong Kong; $709,632 to Japan; $660,306 to the Dutch East Indies, and $565,829 to Spain.

The imports into the Philippines from other countries than the United States during the nine months ending with March, 1903, amounted to $21,168,801, while shipments from the United States to the Philippines in that period were $2,903,692. Of this total of $21,168,801 imported from countries other than the United States, $4,169,090 was from the French East Indies, $3,727,702 from China, $1,400,128 from the British East Indies, $682,236 from Hong Kong, $523,578 from Japan, $482,122 from British Australasia, $363,236 from Siam, $2,191,533 from Spain, $4,068,889 from the United Kingdom, and $1,535,962 from Germany.

TENTH ANNIVERSARY OF THE HARDWARE CLUB OF NEW YORK.

The Hardware Club of New York, R. R. Williams, of *The Iron Age*, president, celebrated the tenth anniversary of its existence on Wednesday, June 1st, in a very entertaining and agreeable manner, which was appreciated by its 700 members. The beautifully furnished rooms were appropriately decorated with our National Colors, accompanied by floral tributes distributed effectively in a manner that made the club's many art treasures look doubly attractive. Refreshments were served the members accompanied by a souvenir *menu*, giving the names of those composing the Board of Governors when the club was organized and those now in office. The members were courteously received by the Governors in their official capacity on the present occasion, who were congratulated on every hand by the continued prosperity which had resulted from their careful management and conservative government of the club's resources.

DEATH OF N. M. FITZGERALD.

N. M. Fitzgerald, for fifteen years the Editor of *Hub* and *Harness*, of New York, died on Monday morning last at the Hotel Marquette, his city residence, of apoplexy, in his 74th year. He was one of the best known editors connected with the trade journalism of this important industry, of inflexible integrity and honesty of purpose, possessing the courage of his convictions. He will be missed from the ranks as one whose fidelity to his papers' interests was limited only by his ability to advance them.

HEIGHT OF BUILDINGS IN MARSEILLES.

The building regulations provide that the height of buildings in Marseilles, on streets more than 32 feet wide, shall not be more than double the width of the street, with a maximum of 81 feet 3 inches

TRADE ABOUT AND BEYOND BOSTON.

(From our Traveling Correspondent.)

As compared with conditions and amount of business being done, there is little change in the situation about Boston, with conditions a year ago. Then there were no small number of men out of employment, as there are to-day. Only a year or two ago they were on strike, while to-day in many cases they are unemployed because there is no work for them. Small buildings and general repair work is, however, keeping a very steady demand for builders' supplies.

Many of the manufacturers throughout New England have for some time past somewhat reduced outputs, and in many mills there has been a general reduction of the force. All this is not having a good effect on the business life of New England and the hardware dealers have felt a little less demand for mill and factory supplies, and all dealers are feeling somewhat the effects of lessened business activity.

Of all New England the State of Maine is at the present time probably less affected by any business depression. Down in Maine the Spring business has opened with great activity and the outlook is very good for a healthy summer business.

Trade in Lynn, Mass., has been somewhat affected by the local depression in the shoe manufacturing business, but conditions are now better than through the winter or early spring.

W. Henry Hutchinson has recently made some improvements in the arrangement of his Hardware store, which is one of the most attractive and up-to-date stores in the city.

Another of Lynn's largest stores is that of the Brockway-Smith Co., who are large handlers of builders' supplies, besides hardware, paints and oils.

Down in Lewiston, Me., a large business is done by Geo. A. Whitney & Co., who are pushing more each year into the wholesale end of the hardware business. This firm reported business as better than last year, and seemed to think that the outlook was good for summer trade.

The stove and heater business is large all through Maine, and one of Lewiston's progressive stove stores is that conducted by T. L. Pratt. As coal stoves took the place of those burning wood, so furnaces are gradually replacing parlor stoves, and the live stove dealer is the one who is adding steam and hot water heaters to his business.

H. H. Crie & Co., of Rockland, Me., have recently entered the field as jobbers and carry a complete line of builders' and shelf hardware. A fine retail business is also carried on in Rockland, by Crie & Co.

A. D. Ward, of Augusta, carries a large stock of general hardware and makes a specialty of stoves and ranges. This latter line is found to be profitable and an active department of the business that responds quickly to advertising.

Another firm doing a large stove business in Augusta is Taber, Carey & Reid.

Among the old established hardware dealers of Maine, Jas. Elms, of Auburn, should be mentioned. A very attractive store and close attention to customers' wants brings Mr. Elms into the class of leading dealers.

One of the most attractive stores in Gardiner is the hardware store of the Vannah Co., where everything in Hardware and tools can be found. The trade during the past winter in ice tools and winter goods, including lumbering supplies, was the largest in many years, and in all parts of Maine the stocks in these lines are very low, many dealers being completely sold out.

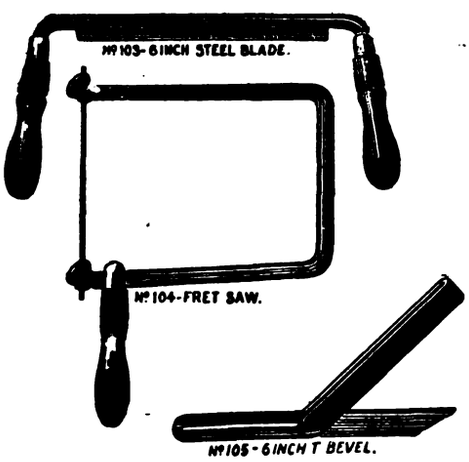
Kelly & Wheeler, of Gardiner, carry a large line of general hardware and reported business good.

The Edwards & Walker Co., of Portland, Me., are large jobbers of general hardware and work the states of Maine and New Hampshire closely, not only in hardware, but with kindred lines, such as blacksmiths' and wagon makers' supplies, sporting goods and heavy hardware. This concern have recently added two new departments and travel from six to ten men on the road, depending on the season.

Another up-to-date Hardware jobbing house of Maine is Rice & Miller, of Bangor. For some years past this firm have been enlarging their business, and now carry as large a stock of general hardware as can be found in any city the size of Bangor. Quite a specialty is made of blinds, doors and mantles—of this latter line it would be difficult to find a more complete stock, outside the very largest centers.

The Dana Hardware Co., of Boston, reported business in a good condition and said that the outlook was good for summer trade. Spring trade had been somewhat backward, but was coming along in good shape.

Baldwin, Robbins & Co., of Pearl street, Boston, who are one of the progressive jobbing houses of New England, seemed to be

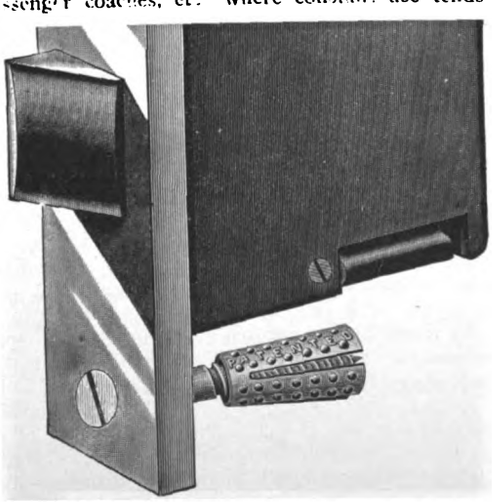


Digitized by Google

sending out an unusually large amount of hardware one day last week, no less than six cartloads having left their storehouse within twenty minutes. Most of the business of this firm is done in New England, although no small amount of their goods go into N. Y. State.

In referring to trade conditions one prominent hardware man said: "Much is being said by the railroads about lack of freight business, and two or three of the great trunk lines have been laying off men, but I notice it still takes from two to three weeks to get freight from Pittsburg, and the slowness in which freight is being delivered by the railroad would indicate that they still have more than they can handle It would be better for us all if the railroads, instead of saying so much about poor business, would put a little more effort into handling that which they are getting." HAMMERNAIL.

SOME NEW SPECIALTIES.



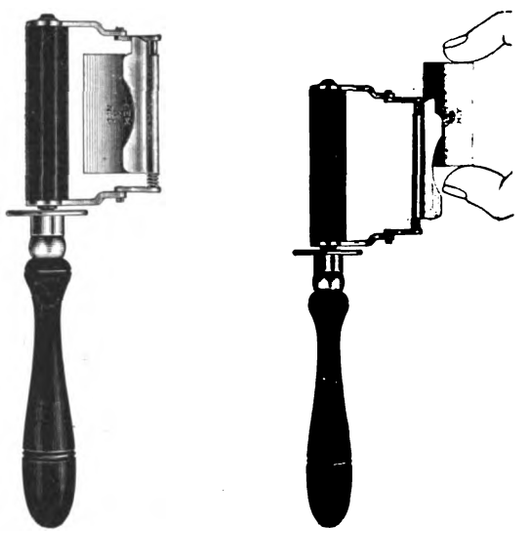
The Oozer Manufacturing Company, 136 Railroad Avenue, Jersey City, have recently added to their line of specialties several little novelties that are designed to sell at ten cents each, which promise popularity. We present miniature illustrations of the

devices, which convey some idea of their undoubted utility, consisting as they do of a T Bevel, Draw Shave and Fret Saw. The handles of the latter two are black enamel, the blades are of the best steel for the purpose for which they are intended, while the Bevel is nickel plated.

SOMETHING NEW IN EXPANSION BOLTS.

The New Jersey Foundry and Machine Co., of 9 Murray street, New York, have just issued a four-page circular descriptive of their new one-part Diamond expansion shield For years the impression has been that expansion bolts were only intended for use in masonry, but it is stated by the manufacturers that the Diamond one part expansion shield will hold equally well in wood and will not work loose. For fastening down chairs and desks in school rooms, stools in stores, opera chairs, locks on doors of passenger coaches, etc where constant use tends to loosen

the screws, the adantages of this shield are at once apparent. With this shield it is only necessary to bore a hole with an ordinary bit insert the shield and run in the screw the same as in wood. The shield is made with four prongs, which insures a uniform grip in all directions. The Diamond one part expansion shield is made in standard sizes from ⅛ inch to 5-16 inch diameter, to fit wood screws from No. 5 to No. 18 inclusive. Any kind, make or length of wood screw can be used. The New Jersey Foundry & Machine Co., who manufacture these shields, carry all sizes of the one-part shield in stock, and also of the Diamond two-part expansion shield up to 2 inches diameter.



GEM SAFETY RAZOR IMPROVEMENTS.

The Gem Cutlery Company, of 34 Reade Street, New York, has just placed upon the market their new Gem Safety Razor "Rigid Model" Frame, shown in accompanying illustration. The superiority of this new frame over former models, it is claimed, consists in its perfect rigidity and in the absence of the usual spring, hinges and push buttons, thereby making perfect and quick cleaning possible. Of course, the Gem's unique adjustable clips are retained in the new model. In the new Gem "Rigid Model" Frame the claim is made that all possible danger of get-

NEW FRAME FOR GEM SAFETY RAZOR.

ting out of order is wholly eliminated. It is so constructed that greater ease and comfort is insured in shaving than with any other frame heretofore manufactured, adding greatly to the delights of self-shaving. They have also put upon the market their new Single Roller Gem Stropping Machine, which we illustrate. It has only one single hard rubber roller in the center, above

SINGLE ROLL STROPPING MACHINE. METHOD OF INSERTING BLADES.

which is placed the blade holder which latter reverses itself at each turn of the machine. None of its parts can possibly get out of order, nor is it possible to cut the strap. The blade holder works on a spring which can be brought down and reversed so that the blade can be inserted with the utmost ease. All the metal parts of the New Single Roller Gem Stropping Machine are constructed of German silver. The handle is made of genuine ebony and may be detached from the machine and used on the Gem Razor Frame, if desired.

HIGH GRADE SASH CHAINS.

The Smith & Egge Mfg. Co., Bridgeport, Conn., have been manufacturers of sash chain for over twenty years and were one of the few pioneers in that branch of the architect's requirements; they have always made a high grade chain that gave universal satisfaction. Their "Giant" and "Red Metal" sash chains have been for years specified by the leading architects everywhere, being held as a standard in point of quality, these chains being made from a special combination which cannot be surpassed for tensile strength and anti-friction qualities so essential in a high-grade chain from which so much work is expected.

RECENT TRADE PUBLICATIONS.

THE WICKWIRE BROTHERS, Cortland, N. Y., are the authors of a catalogue containing exhaustive information on the subject of Wire Cloth, giving illustrations of their different styles and grades. This company also manufacture other wire goods, such as meal sieves, coal sieves, corn poppers, blued and tinned dish covers, wire bird's nests, etc., etc., all of which they can furnish in large quantities at short notice. They claim to have the best possible facilities for the manufacture of all the classes of goods they turn out, their plant consisting of the following separate and independent departments, yet all operated in connection: rod mill, wire mill, weaving of wire cloth, painting plant, tinning plant, wood working and shipping department. They solicit the correspondence of manufacturers as well as jobbers for all kinds of wire clothes, nettings and the line of wire goods illustrated in the above-mentioned catalogue.

BEALL BROTHERS, Alton, Ills., are distributing a catalogue relative to their Miners' Tools and Supplies. They claim to be the largest manufacturers of this line of goods in the United States, making as they do about nine different patterns of coal drills, including the old wooden post machine, and can furnish machines complete, and parts for most all the different drills made in the United States. They use the best grade materials in their tools and warrant every article sent out. The book is thoroughly illustrated and contains two fine engravings of the Beall Brothers Mining Tool factory and of the Beall Shovel Co.'s factory. The Beall Shovel Co. have issued a catalogue of their line of high grade steel Shovels, Spades and Scoops. In this book they have attempted to give complete price lists as well as illustrations and dimensions of the line of Plain Back (Antrim) and Hollow Back (Cleveland) shovels, spades and scoops which they manufacture. Their experience of nearly half a century has enabled them to put on the market a high grade steel tool which they claim is unsurpassed in finish and quality. They solicit business, guaranteeing every article which they make.

THE BLACK SILK STOVE POLISH WORKS, Sterling, Ill., are the distributors of a unique envelope size pamphlet exploiting their stove polish, the most popular brand of which is the "Black Silk," although they make the "White Silk" metal polish for cleaning and polishing brass, copper, zinc, tin, nickel and silver signs, railings, harness trimmings, show cases, etc., and they claim it will not get hard and gummy as paste polish, and will polish as easily in cold weather as in warm. The "Black Silk" is a high grade stove polish, uniform in quality, that when once used will speak for itself. Samples, prices and full information will be furnished upon application to above address. The manufacturers make special announcement of the fact that they do not sell to department stores or mail order houses.

THE COATES CLIPPER MFG. CO., Worcester, Mass., have issued a 16-page pamphlet, which they designate as their Bulletin No. 17, intended to instruct on the subject of Flexible Transmission by the use of Coates hardened steel ball-bearing flexible shaft. In this new Coates shaft a transmission of 75 horse power has been developed and the shaft, owing to its ball and socket link construction, is extremely flexible. It is made up of a series of universal hardened steel joints, shaped like a ball, which allows of a high rate of speed without heat; if it breaks, it is only necessary to insert a new shell and the flexible shaft is still as good as new and just as flexible. An evident advantage of the Coates flexible shaft is the fact that it will transmit as much power when run backward as it does when run forward. Also included in the contents of their Bulletin are Coates Drill Presses, Die Sinkers' Engines, House Gear Breast Drills, Screw Polishing Equipment, Portable Hammers, etc., etc.

JOSEPH DIXON CRUCIBLE COMPANY, Jersey City, N. J., have issued another of their neat envelope-size pamphlets exploiting their Graphite Pipe Joint Compound which is, as they describe it, a valuable graphite product widely useful to pipe fitters, engineers, machinists, contractors, manufacturers, plumbers, boiler and engine makers, etc. Dixon's graphite compound is not a cement; it is a lubricant, and a material that is steam and gas proof and of world-wide reputation, and its use insures satisfaction to all parties concerned. It is wholly unaffected by climatic influences, acids and alkalies and forms no chemical combinations with other substances, nor undergoes any changes whatever upon exposure, whether alone or in combination with other things. Because no chemicals will affect it, it protects whatever metals it covers from rust or corrosion of any sort, and when the time comes for separating the parts a very little effort will suffice.

THE J. STEVENS ARMS & TOOL CO., Chicopee Falls, Mass., are the authors of a most attractive pamphlet of 28 pages, of which their Stevens-Duryea two cylinder, opposed type gasoline automobile is the theme. They state that in designing the "Stevens-Duryea" carriage it has been their purpose to produce an automobile which will fulfill the following conditions: To make it as free as possible from noise and vibration; to make the combustion of gasoline so perfect there will be no disagreeable odor; to produce a powerful and steady hill climber and speedy on the roads, and, most important of all, to secure endurance and reliability. The above-mentioned book is finely illustrated and contains a detailed description of their machine, and will be found very interesting reading for one interested in automobiles either to sell or to manipulate. The weight of the engine is 160 pounds, fly wheel 78 pounds, weight of car complete 1350 pounds.

THE PLYMOUTH MFG. CO., Plymouth, Ohio, are distributing to the trade a neat little pamphlet containing 21 pages, designed to interest those handling Cream Separators. It exploits two which they manufacture under the name of the "Four-Leaf Clover" and "Ideal" cream separators. The "Four-Leaf Clover" Plymouth cream separator consists of two cans; an outer can, which is perfectly round and contains the water, and an inner can, shaped like a 4-leaf clover, which is the milk receptacle, doing away with the center tube, and at the same time the "Four-Leaf Clover" arrangement actually increases the water space or cooling surface 25 per cent., and no point in the milk is more than two inches away from the water. The book describes and illustrates the good points of several of their separators, and also includes faucets, butter workers, dairy thermometers, scales, butter moulds, ladles, spades, barrel churns, steam cookers, etc., etc., and can be had upon request.

OTWAY COOPER, Urbana, Ohio, has issued an envelope size catalogue and price list which is his No. 2, and shows his regular line of rope horse goods. Included in the contents are the adjustable "Cooper" and "Woodstock" halters, cattle ties, horse ties, halter leads, the "Red Bird," "Red Rover," "Glessner" and "A.M.G." Puller halters, Columbia cattle ties, the Atlas braided hitching cord, Union ties, common rope halters, sewed web halters, etc. The manufacturer states it as his experience that the line in this catalogue covers most of his customers; however, he stands prepared to make up any special goods upon receipt of requirements, having facilities for the manufacture of fine goods, and always pays particular attention to prompt shipments.

SPECIFICATIONS FOR TIN ROOFING.

The subject of proper roofing material is of interest to every builder and property owner. A circular letter has recently been sent to architects and roofers by W. C. Cronemeyer, of the American Sheet and Tin Plate Company, Frick Building, Pittsburg, Pa., wherein he said:

"That good terne plate (roofing tin), on account of its light weight, strength and pliability, its water and fire-proof qualities and its neat appearance, is the ideal roofing material, is generally admitted, but to make a good tin roof two very essential requirements must be met—namely, good roofing tin and good workmanship. To supply the former our company have spared no efforts, and the success achieved is eminently satisfying. We have made arrangements that the M. F. Old Style and the U. S. Eagle New Method terne plates (universally acknowledged to be the best roofing plates produced in this or any other country) are now carried in stock by nearly all first-class wholesale metal houses in this country. No roofer can now make the excuse of not being able to obtain these brands; if his wholesale supply house is, for one reason or another, unable to supply him, let him write us direct, and we will see that he gets a supply. Although the demand for these grades of plates is growing daily, we always endeavor to keep a good supply in our warehouses.

"To send the second requirement—*i.e.*, good workmanship—with our products is, to our great regret, not feasible; but having been asked very frequently by architects and others to furnish reliable specifications or instructions in regard to tin roofing, we have concluded to do the next best thing—namely, to get specifications of old experienced tin roofers, and distribute the same among the architects and others whose duty it is to see that building work is done well and properly. We are hopeful that our efforts in this direction will be appreciated by the many house builders who prefer a tin roof to any other if they can be assured that the right material will be put on in the right manner.

"The enclosed specifications were kindly written for us by John McIlroy, senior partner of J. D. McIlroy & Sons, 114 Smithfield Street, Pittsburg. The firm of J. D. McIlroy & Sons was established in 1858, and John McIlroy received his training as a metal worker from his father forty to forty-five years ago, and has been in the business ever since, therefore his experience is of special value. We would yet call special attention to Mr. McIlroy's instructions regarding painting. Bad paint has oftener been the cause of early decay of tin roofs than either climatic or atmospheric conditions, or the ingredients of the roofing material. For the good of householders, the metal roofing trade and the manufacturer, every architect, every roofer boss or journeyman should take extra good care that good material and good workmanship are not spoiled by cheap paint."

The specifications furnished by Mr. McIlroy are as follows:

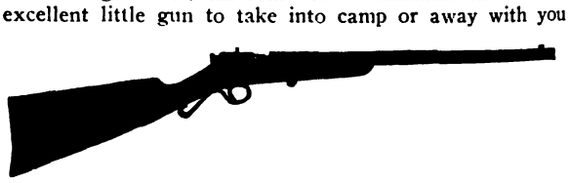
Flat Seam Roof—First: Use tin of good quality; see that the tin is square; notch corners 1 inch; turn ½ inch edge; use 7 nails or cleats to the sheet; hammer smooth with mallet; flux with rosin, using plenty rosin; solder with hot soldering copper, soldering on top of seam and soak the solder well into seam; use on IC tin 5 pounds of ½x½ solder, on IX tin 6 to 7 pounds per square. See that the rosin is well cleaned off after the roof is finished; then give the roof one coat of paint made of pure English venetian red or pure oxide of iron and pure boiled linseed oil and a little turpentine; in thirty to ninety days a second coat of the same paint, or good graphite, using in each case only linseed oil for a thinner; in one year a third coat, after that you will be required to paint only once in every three or four years. We take no stock in painting under side of flat seam roof. If the sheeting boards are not tongued and grooved, there should first be put on a layer of dry felt paper to exclude the air from cracks and joints and to prevent nail heads from coming in contact with tin roof. If the sheeting boards are old and dry 20x28-inch plates are preferable; if the sheeting boards are wet and green, 14x20-inch plates are preferable; 20x28-inch sheets will give you an average measurement on roofs of 385 feet per case, 112 sheets 20x28 inches. Average measurement on roof 14x20, 112 shets 187 feet to box.

Standing Seam Roof—Have the tin square; notch corners for seams a little to ease the bending of the several layers; allow ½ inch for cross seams; solder well; put tin in straight rolls 20 inches wide, use 1¼ and 1½-inch tongs for side or standing seams; cleat every 12 inches, 2 nails to cleat; be sure to have your seams perfect; never put a standing seam roof on where you have less than 1½ inch fall to the foot; paint the same as flat seam roof. In standing seam roofs always put a layer of dry felt paper on roof before laying tin; it will exclude the air from seams and will prevent nail heads in sheeting from coming in contact with the tin. You will have an average of 352 feet per box of 112 sheets, 20x28-inch tin. If the above directions are followed you will have no trouble, provided a good quality of tin is used. We can show roofs now which have been exposed thirty-five to forty-five years and are still intact.

THE PRODUCTION OF MICA IN 1902.

The variations in use, production and importation of mica are stated in a report on the production of that mineral in 1902 by Dr. Joseph A. Holmes for the United States Geological Survey.

The total quantity of mica produced in the United States in that year, as reported to the survey, was as follows: Plate mica, 373,266 pounds, valued at $83,843; scrap mica, 1,028 tons, of 2,000 pounds, valued at $13,081; and mica rough as mined, or unmanufactured, 372 tons, valued at $21,925, making a total value of $118,849.



The increase in the production of plate mica during the last three years is due to the increasing quantity of small sized mica disks and rectangular sheets that have been cut for electrical purposes. Some of the small, clear pieces obtained in cutting up the large sheets are now split very thin, rearranged and cemented closely together, forming large sheets called micanite, which are then cut into the shapes and sizes desired. For some purposes these sheets of micanite answer as well as the natural sheets and have the advantage of being much cheaper. In recent years scrap mica has been manufactured into a covering for boiler tubes and steam pipes, to take the place of the more expensive asbestos coverings. Waste mica not available for other purposes is used in the manufacture of wall papers and lubricants. During 1902, there was, however, a large falling off in the production of scrap mica, which in 1902 amounted to 1,150 tons of 2,000 pounds, valued at $14,606, as against 2,171 short tons, valued at $19,719 in 1901.

The tables which show the great increase in the importation of mica during 1902 are significant. This increase, valued at $131,278, is larger than the total value of the product of mica in the United States during 1902. It illustrates the increasing demand in this country, but also suggests the interesting fact that mica can be mined in India and landed in this country at a lower price than it can be mined in some places in the United States. Canada is also a large contributor to our mica supply.

Although mica is widely distributed in the United States, actual mining has been limited, during the last few years, to North Carolina, New Hampshire, South Dakota, New Mexico, Idaho, Virgina and Colorado. Some development work has also been carried on in California, Nevada, Maine, Alabama and Georgia. In several of these states good deposits of mica are known to exist that are not now available on account of their distance from railroads or other means of transportation.

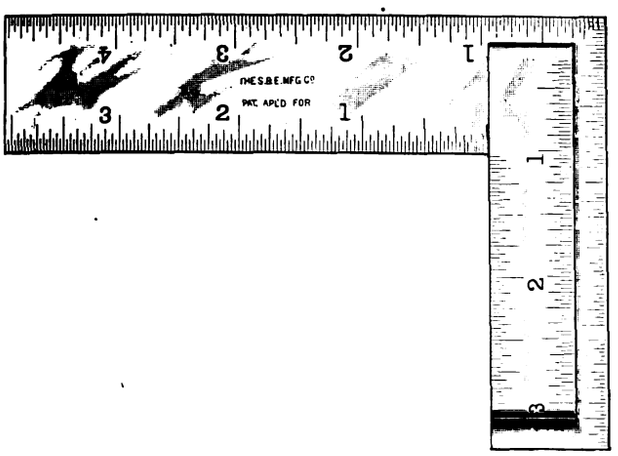
NEW 22 CAL. RIFLE.

The Savage 22 caliber Junior Single Shot Rifle has just been placed on the market by the Savage Arms Company, Utica, N.Y. It shoots the C. B., short, long and long rifle cartridges and, as with all Savage Rifles, has some new mechanical features. It is an excellent little gun to take into camp or away with you on

NEW 22 CAL. RIFLE.

your vacation as a companion piece to your big game ride. It will adjust handily into your pack and will be found well worth the price for which it sells—namely, $4. It is claimed to be the same "Savage Quality" throughout.

THE BRYAN MANUFACTURING COMPANY.



The Bryan Manufacturing Company, Bryan, Ohio, have issued a unique envelope size folder of 12 pages illustrated and exploiting their Champion Barrows. It is arranged so as to make very interesting reading, all under the head of "We Know How." These people have had thirty-eight years experience in making Barrows as a leading line of goods, and it would seem right to assume that they do know how. They claim to have the largest and best equipped factory for the manufacture of Barrows in America, the most improved machinery and the most experienced designers, and the only concern in the country who are exclusive Barrow makers. They state that their prices as well as their goods will be found satisfactory, which they prove by pointing to the fact that all large corporations use Champion Barrows. The above folder will be sent upon request.

NEW GOODS AND SPECIALTIES.

IDEAL COMBINATION TRY SQUARE.

Smith & Egge Mfg. Co., Bridgeport, Conn., are placing upon the market through the Hardware and Supply trade the Ideal Combination Try Square, which is shown herewith. It is graduated to thirty-seconds of an inch on all edges of both sides; therefore, the carpenter, mechanic or pattern maker is enabled to take measurements in any position the square is placed, permitting him to secure bevel cuts, a feature referred

IDEAL COMBINATION TRY SQUARE.

to as peculiar to this square. It is light in construction, made of a special tempered steel to resist rough and severe usage, yet retaining its trueness and shape. The square is made with 4 and 6-inch blades, the length of the blade being measured from the inner edges of the beam to the end of the blade. The width of the blades of both sizes of squares is 1 3-16 inches. The square is designed to meet the requirements of those who wish a popular priced, accurate tool of this description, and will be found a salable addition to this branch of the stock.

HOME COMPANION TOOL SETS.

We show herewith illustrations of the Home Companion Tool Sets, manufactured by the Goodell-Pratt Company, Greenfield, Mass., being among their more recent specialties. These Sets comprise assortments of useful tools, put up in polished hardwood cases conveniently arranged and particularly adapted for home, office or workshop use, or, in fact, in any place where odd jobs have to be done. The No. 700 set, illustrated in Fig. 1, contains two ratchet screw drivers, one with 6-inch blade, and the other with 1½-inch blade; one auto-

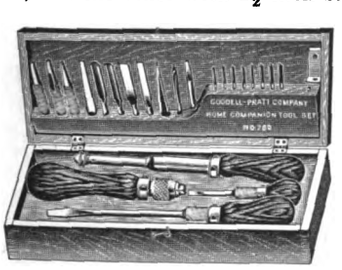

FIG. 1.—HOME COMPANION TOOL SET NO. 700.

matic drill with cocobola handle; one set of eight drills for same, ranging in size from 1-16 to 11-64 inch; one Universal tool handle; one set of tools for same, comprising two gouges, two chisels, one reamer, one saw, one gimlet, one screw driver; one nail set, one prick punch, one drive punch. The size of the box is 13 x 5 x 3 inches, and the weight is 3½ pounds. The No. 710 set, shown in Fig. 2, is somewhat larger, and has a more extended assortment of tools. It contains one ratchet screw driver, 6 inches; one ratchet screw driver, 1½ inches; one hand shave, one hack saw frame, full polished and nickel plated; six coarse teeth blades for same, three fine teeth blades for same, two extra fine teeth blades for same; one polished bone saw, one glass cutter, one cocobolo handle automatic drill equipped with eight drill points from 1-16 to 11-64 inch; one

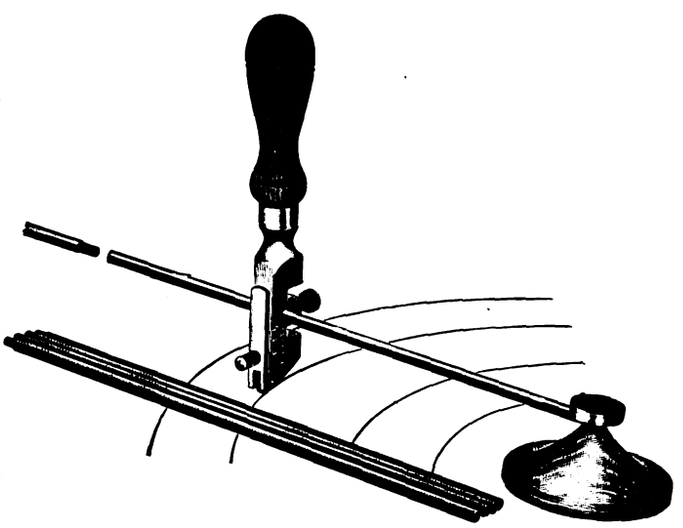

FIG. 2.—HOME COMPANION TOOL SET NO. 710.

Universal tool handle for holding one gouge,, two chisels, one screw driver, two brad awls, one gimlet, one reamer, one saw; one nail set, one prick punch, one drive puenh, one solid punch, one oil stone. The size of box is 16 x 8 x 3 inches, and the weight is 6 pounds. These tools are exceptionally well made and are furnished to the trade in convenient, nicely finished cases in which the tools are held in place by nickel plated clips.

THE INTERCHANGEABLE CIRCLE GLASS CUTTER.

Fletcher, Terry & Co., Forestville, Conn., are placing on the market through the Hardware trade the Interchangeable Circle Glass Cutter of which we present an illustration. It is provided with Cocobola handle and base, the base having soft rubber on bottom to prevent from any slipping on glass when in use. Attention is called by the makers to the extension rods which form part of its equipment, by the use of which circles of any size can be cut, which does away with previous methods not so convenient, of providing a rod for the size of circle desired to be cut. The metal parts of this useful tool are finely

INTERCHANGEABLE CIRCLE GLASS CUTTER.

nickle plated, giving it an attractive appearance. This cutter is calculated to cut circles from 2½ to 60 inches in diameter. In addition to the above 12 extra cutting wheels and pins are included.

Digitized by Google

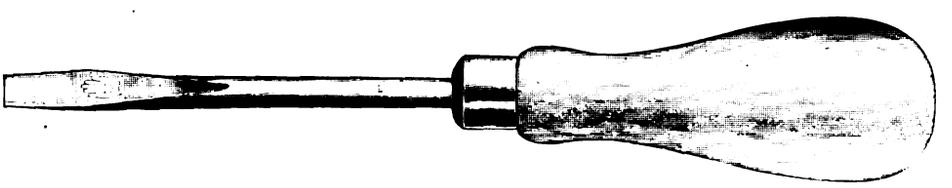
FULPER POTTERY SPECIALTIES.

The Fulper Pottery Co., Flemington, N. J., who are well known manufacturers of the Natural Stone germ proof filter which we have illustrated in this department of our paper,

CHICKEN PAN WITH COVER.

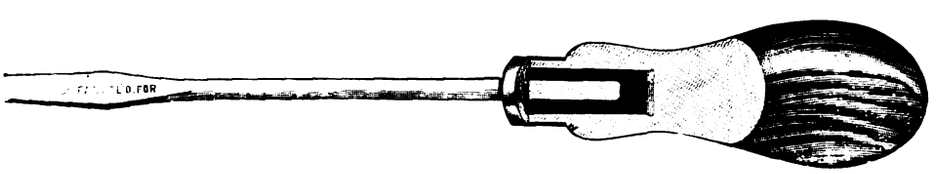
SOUP TUREEN.

are also makers of a large assortment of regular stoneware in the Pottery line, many of which are being sold in addition to a housekeeping section of the up-to-date Hardware store. We present in the course of this article a few cuts from their complete catalogue of these goods, showing the Soup tureens,



CASSEROLE.

Chicken pans with covers, and Casseroles which are among the specialties exploited. The company include in their large assortment such goods as snuff jars, calla lily pots, marmites, quail pans, stew pans, water monkeys, water jars, bread bakers, egg toasters, dog founts, etc., etc.



THE DUCHARMES & COMPANY'S SCREW DRIVERS.

Among the high-grade Screw Drivers which form a portion of the production of The Ducharmes & Co., Shelburne Falls, Mass., one of the most popular is the "Hand D" No. 5, an

"HAND D" SCREW DRIVER NO. 5.

illustration of which we give herewith. The "Hand D" in common with all Screw Drivers made by this company, is made from the best screw driver steel, tempered expressly for

ELECTRICIAN SCREW DRIVER NO. I.

the purpose, every blade is highly finished, hand forged and tested to break a screw head. After being driven into the handle they are riveted with a wire pin, making it impossible for the blade to work loose. The handles are made from well-seasoned rock maple, specially stained and highly polished with shellac. We also illustrate the Electrician No. 1 Screw Driver, which is a new invention adapted for the special line of electrical work by being perfectly insulated. A line of request will bring catalogue and other information of complete line of their goods.

"SOLID COMFORT" SWING AND STAND.

The Sistersville Novelty Company, Sistersville, W. Va., are makers of the Solid Comfort All Steel Swing and Stand, an illustration of which we give below. It really is two swings in one, adjustable to any angle, and may be used with an equal amount of comfort for either reading or sleeping,

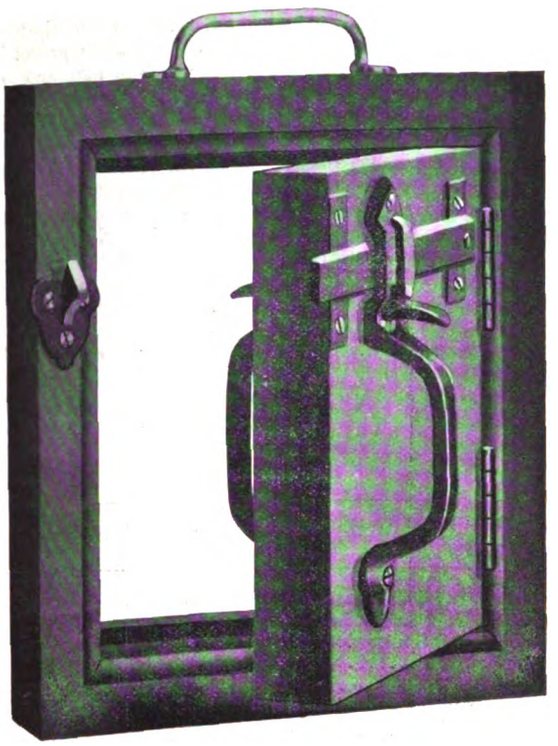
"SOLID COMFORT" SWING AND STAND.

and also has the advantage of being portable, it being possible to move it from place to place with no trouble, and may be left out doors the year round without sustaining any damage. It is made of high carbon steel tubing throughout with the exception of the seat which is of heavy fancy stripped canvas. The canvas can be replaced by any person. It is constructed upon simple mechanical principles, with no intricate parts, and the manufacturers state, will not get out of order and requires no care or attention. Being made entirely of steel the life of the swing is practically indefinite. While seated in the swing the occupant needs only to turn a screw to obtain any position desired for comfort. The swing occupies but one-third the space of a hammock, and weighs only twenty-seven pounds.

THE GEM THREAD CUTTER.

H. C. Cook Company, Ansonia, Conn., are placing on the market one of the latest novelties they have patented, and which would seem to appeal at once to a large circle of possible customers. It is the Gem Thread Cutter, illustrated herewith, and being made of the finest steel, extremely ornamental in appearance and handsomely nickel plated, is designed to be sold at a moderate price and will be voted by all who buy it a very practical article for universal use. It can

GEM THREAD CUTTER.



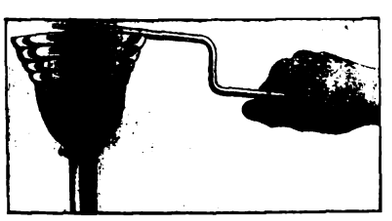
be affixed to the dress of the lady using it, and being always in place, with one motion cuts the thread, whether it is strongest linen or finest silk. They are sold to the trade mounted on attractive cards holding one dozen each, and will be sent by mail postpaid by the manufacturers when so ordered.

THE PERFECTION DOOR LATCH.

Wm. W. Scofield, 347 West Main Street, Waterbury, Conn., is the maker of the Perfection Door Latch, here illustrated, which is a new device in its line, that commends it to the at-

Digitized by Google

tention of the trade. It is made from malleable and wrought iron, making it virtually unbreakable with the customary usage. Both sides of the door are provided with the same

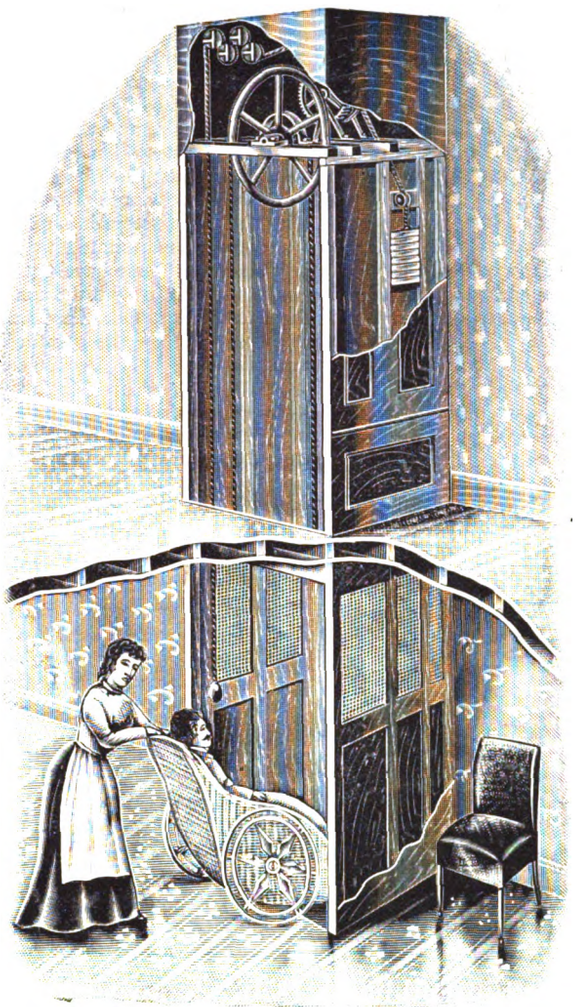


THE PERFECTION DOOR LATCH.

kind of handle and thumb action, thus doing away with the objectionable hook of the ordinary thumb latch. The latch is adapted for doors from 1½ to 3½ inches thick, making it suitable for factory doors or on fire doors with brick jambs. So confident is the manufacturer of the merit of his product that he will send one on approval to any dealer who desires to add them to his stock.

THE DOUBLE FALCON WRENCH.

The Applied Device Company, Springfield, Mass., are introducing through the Hardware and Electrical Supply trades the New Special Wrench which we illustrate herewith and which is known as the Double Falcon Wrench. This is designed to be a wrench for the electrical fixture man, which has an inch and three-quarters off-set to allow work close to the wall or ceiling. Each one has two jaws, right and left hand. With two of these the workman can hold a nipple with one hand and take off a cap with the other without bruising his



DOUBLE FALCON WRENCH.

knuckles or soiling the ceiling. It will be noted the jaws are made on an improved principal over the ordinary alligator wrench. It has fixed and flaring jaws, the combination of the grasping jaw and serrated face with the bearing jaw having the straight bearing face. It both grasps and releases a pipe with ease and certainty, the curved outline of the pipe finding a tangential bearing in all parts of the opening. The curved jaw first engages the pipe, and then the straight jaw slips under or around the pipe until jammed tightly into the opening between the jaws, the action being entirely automatic. The wrench can be used with any pipe from 5-16 to 1 and 1-16 inch. This improved tool is forged from the finest tool steel, the teeth accurately milled, hardened perfectly and handsomely polished and finished.

A SPECIAL INVALID LIFT.

The Storm Manufacturing Company, Newark, N. J., are the makers of the Special Invalid Lift which we illustrate in this article. This very desirable addition to dwellings where proper care and attention are needed to be given to the afflicted, has been demanded in common with other conveniences in household economy so necessary for perfect com-

A SPECIAL INVALID LIFT.

fort. The machinery for this special Invalid Lift is their Improved Humphrey Hand Elevator. The car is built of hard wood, handsomely paneled and finished with brass grille work and makes the most complete, easiest working and safest Invalid Lift that could be desired. This machine is equipped with two cables, or with safety attachment as desired. Directions are furnished for erecting, or prices will be quoted for them to be erected in any part of the country.

STARRETT'S HUB GAUGE NO. 430.

Among the large number of special tools and appliances manufactured by the L. S. Starrett Company, Athol, Mass., we present an illustration of the Hub Gauge No. 430. This Gauge is used for measuring the length of pulley hubs, wagon

STARRETT'S HUB GAUGE NO. 430.

wheel hubs, thickness of iron plate through holes, etc. The gauge will measure all lengths to 7½ inches and can be inserted through a ⅝-inch hole.

A REMARKABLE STATEMENT.

A remarkable statement, and one which I think would be generally regarded as almost incredible if emanating from a less trustworthy source, has been made by Ernest R. Pearce, of the well-known Transvaal building firm of Pearce Bros., who is of opinion that South African stocks of Builders' Hardware and house fitments are not up-to-date, and, what is more, that "it is impossible to erect a building complete with modern fitments with goods obtained in South Africa." This it will be conceded constitutes a grave reflection upon the enterprise of Colonial merchant houses, and upon the discretion of Home buyers. It is a well-known fact that since the war the standard of urban domestic architecture throughout South Africa has risen to a level almost, if not quite, as high as the European, while the fitments demanded have been of a corresponding grade, and the only inference possible to draw from Mr. Pearce's assertion is that goods of the better type, of which considerable quantities have undoubtedly been shipped, have had to be obtained by special importation. At a period of changing Colonial taste and custom it is quite feasible that merchants and storekeepers have hesitated to venture upon too bold a policy, and that buyers at Home have not always managed to keep themselves completely *au fait* with the conditions of this particular section of the market; but I am confident that the publication of the fact that there exists a waiting trade in the most modern of building accessories will be quite sufficient to arouse the commercial instincts of business men on both sides of the water. In the meantime, Mr. Pearce's advice to manufacturers to keep samples or stocks of their latest productions actually on the spot, and to get into touch with prospective customers by the combined methods of judicious advertising and efficient representation by means of agents and travellers who thoroughly know their business, will not be wasted.

WHAT SOUTH AFRICA BOUGHT IN 1903.

Evidence of the commercial soundness of South Africa seems to be inexhaustible. Month after month fresh material is to hand, showing either the immensity of the volume of the trade or its marvellous progress; and as the returns for 1903 gradually come to hand, we become overwhelmed with the fact that, in spite of all that has been said by the detractors of the sunny Southern land for many months past as to the instability of South Africa as a commercial entity in the world, and in spite of a certain amount of actual depression caused primarily by labor troubles, last year was beyond all that went before in respect of the necessity and, what is a still greater guarantee of prosperity, the ability to buy freely.

HUGE DIMENSIONS AND PROGRESS OF THE TRADE.

South Africa's purchases from the world's emporiums during 1903 were valued at £52,618,211, an amount in excess of that for 1902 by £5,450,630, or equal to 11.5 per cent., and showing, of course, a still more enormous advance on the figures of any previous year. For instance, in 1901, the amount was only £31,571,729, and in 1897, which showed the highest commercial pinnacle before the war, the volume was no more than £26,779,009, or a little beyond half that for last year. In 1895 the total was but £16,983,357, the highest up to that time—being, however, less than a third of the sum now before us. In a period of eight years, therefore, South African purchases have, in the face of a series of misfortunes—including, successively, rinderpest, trade depression, a three years' war, drought, and partial industrial paralysis through labor shortage—actually swollen to three times their former volume, a record which it is not too much to say has never been achieved by any other country in the world. It is with the details of this wonderful trade that we are concerned in the present article.

THE SHARES OF THE PORTS.

We may first notice that the broad total of £52,618,211, representing the aggregate imports of the country through all its ports, may be represented as follows:

IMPORTS THROUGH	1902	1903	Increase
	£	£	£
Cape Colony	32,109,605	33,761,831	1,652,226
Natal	13,317,445	15,065,454	1,748,009
Delagoa Bay	1,279,766	3,290,926	2,011,160
Beira	460,765	500,000*	39,235
Total	47,167,581	52,618,211	5,450,630

*Approximate, based on 11 months' returns.

It will be seen that nearly two-thirds of this great trade is transacted through the Cape Colony, but were the full details before us it would be seen how gradually but surely the premi Colony has suffered reduction of its proportionate share. L year that share comprised 64.1 per cent. of the total trade; in t previous year it was 68.1 per cent.; ten years ago it was as mu as 81.9 per cent. On the other hand, the other participants ha sequentially increased their shares. Thus, Natal's proportion 1903 was 28.6 per cent., against 28.2 per cent. in 1902, and 16.1 p cent. in 1893; and that of Delagoa Bay has advanced during t ten years from 2 to over 6 per cent. Beira's participation is s in the embryo stage, the earliest figures available being those f 1895, since when it has risen from 0.8 per cent. to 1 per cent.

HARDWARE, CUTLERY, AND IRONMONGERY.

Hardware, cutlery, and ironmongery were imported into t Cape Colony to a total of £2,250,691, and into Natal to £829,2 increases over the amounts for the previous year of £578,399 a £318,814 respectively; but very few indications are given of t lines of goods included. The figures for agricultural implemer are shown both for the Cape Colony and Natal, the former, was to be expected, appropriating nearly three-fourths of the i ports. The records as to brass and copper, and tin, zinc, and sp ter goods are for Natal only; and the remainder, to the extent over £2,500,000, gathered under the term "unenumerated," i clude, presumably ordinary household ironmongery and cutle as also the larger portion of builders' tools and Hardware.

HARDWARE, CUTLERY AND IRONMONGERY	1902	1903	Increase	Decrea
	£	£	£	£
Agricultural Implements	228,602	482,226	253 624	...
Brass and Copper Goods.	16,545	21,766	5,221	...
Tin, Zinc and Spelter...	33,249	25,683	...	7,5
Unenumerated.....	1,904,359	2,550,293	645,934	...
Total.....	2,182,755	3,079,968	904,779	7,5

Natal's imports of bedsteads are given under "Household Requ ites," and those of nails, bolts, and rivets under "Builders' Ma rials," in the tables which follow.

BUILDERS' MATERIALS.

Last year's boom in builders' materials is very clearly in cated in the unbroken series of increases in the eight items we a able to enumerate in the subjoined table:

BUILDERS' MATERIALS	1902	1903	Increas
	£	£	£
Cement.....	159,334	224,799	65,4
Glass, window.....	16,606	28,412	11,8
Lead, builders' and others.....	25,838	37,742	11,9
Nails, Bolts, etc.....	20,925	40,705	19,7
Paints, Varnishes, etc.....	158,382	238,148	79,7
Pipes, iron and earthen.....	211,394	240,810	29,4
Wood, unwrought.....	633,082	952,626	319,5
" wrought, not furniture..	603,959	1,110,492	506,5
Total.....	1,829,520	2,873,734	1,044,21

The mines are, of course, responsible for a large portion of t heavy landings of wood shown above.—*British & South Afric Export Gazette.*

ABOUT CHINESE NAMES.

Geographical Prefixes and Suffixes Have a Definite Meaning the Far East.

A few definitions of Chinese geographical prefixes and suffix may be of service in elucidating the nomenclature of current w news, says the *Boston Transcript*. First, prefixes: Ta, as in Tal means great, and siao, as in Siao-Ping-Thou, means small. Pei pe, nan, tung and si are, respectively, north, south, east and we Thus the Pei-Ho is the North River, etc. Shang and hai a upper and lower. Pai, hei and whang are white, black and yello Suffixes are more numerous and familiar. Kiang, ho tchuan, u muren and tchu each and all mean river. Thus Yalu Kiang a Liao Ho are simply Yalu River and Liao River. Shui, kc thsuan, khi, gol and ussu are unfamiliar terms, meaning a bro or small river. Hu, nor and omo mean lake, as in the well kno Lob Nor and Kosso Gol. Po, tse and tien mean a small lake swamp, or a town situated near such a place. Hai means se thus Whang-Hai is the Yellow Sea, Tung-Hai is the Eastern S and Nan-Hai is the Southern Sea. Tao and sometimes Sh means island, but shan more often means a mountain range. Li is a pass over a mountain range.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED MAY 17, 1904.

362,931. SASH FASTENER, Alexander P. Butts, Brockport, N. Y.

362,937. DOOR HANGER, James Charlton, Houston, Tex.

362,940. CEMENT COATED NAIL, Ira Copeland, Brockton, Mass.

362,948. DINNER BUCKET, Brenton K. Galbreth, Salem, O.

362,964. WEATHER STRIP, George Hull, West Superior, Wis., and Henry Kirk, Minneapolis, Minn.

362,969. WEDGE FOR TOOL HANDLES, George P. Morill, Canterbury, N. H.

363,041. PIPE VISE, James H. Baker and George F. Shevlin, Saratoga Springs, N. Y.

363,070. TAPE MEASURE CASE, William Keuffel, Hoboken, N. J.

363,213. HAND OR JACK PLANE, Lester A. Dearth, Laconia, N. H.

PATENTS ISSUED MAY 17, 1904.

759,847. SASH HOLDER, Joseph M. Bailey, Otto, Tex.

759,908. CAN OPENER, Curtis E. Overs, Ashland, Ohio.

759,912. CASTER, Peter B. Peterson, Morris, Ill.

760,028. FISHING TACKLE, William W. Shulean, Isanti, Minn.

760,069. FUNNEL, Marcus Hunter, Brooklyn, N. Y.

PATENTS EXPIRED MAY 24, 1904

363,361. DOOR SPRING. William H. Brown, Worcester, Mass.

363,364. LANTERN-FRAME. George M. Clark, J. Bennett Wallace and John H. Kindler, Chicago, Ill.

363,515. TUBULAR LANTERN. John S. Gall, Rochester, N. Y.

363,548. AWNING. Henry W. Schweckendiek, Baltimore, Md.

363,601. CLOTHES-LINE HOOK. Luke Coyne, New Haven, Conn.

363,694. TOILET-PAPER HOLDER. Julius H. Sperry, Brooklyn, N. Y.

363,771. SIGNAL-LANTERN. Axel A. Strom, Austin, assignor to Pettinbone, Mulliken & Company, Chicago, Ill.

PATENTS ISSUED MAY 24, 1904.

760,434. RECEPTACLE FOR ASHES OR GARBAGE. Mary A. Donohoe, New York, N. Y.

760,467. DUST-PAN. Conrad Michaud, New York, N. Y.

760,942. WASHING-MACHINE. Alvin N. Woodard, Mansfield, Ohio.

760,979. LANTERN HOOK. Bryce P. Gibbs, Ada, Ind. Ter.

PATENTS EXPIRED MAY 31, 1904.

363,803. DOOR-HANGER. Charles E. Clarke, Clay Center, Ohio.

363,908. MOP. James W. Oulton, Cambridge, Mass.

363,927. DOOR-CHECK. George S. White, Danbury, Conn.

363,931. COFFEE-POT. James F. Wood, Woodyard, Ohio.

363,951. GUN-CLEANER. William E. Forster, Lawrencetown, Nova Scotia, Canada.

364,069. SAD-IRON HEATER. Joseph H. Watson, Savannah, Ga.

364,039. HANDLE FOR SHOVELS. John Pfeifer, Phila., Pa.

PATENTS ISSUED MAY 31, 1904.

761,127. CARPET STRETCHER. William Andres, Jonesville, Ind.

761,272. COMBINATION TOOL. August Wagniere and George W. Van Alstyne, Los Angeles, Cal.

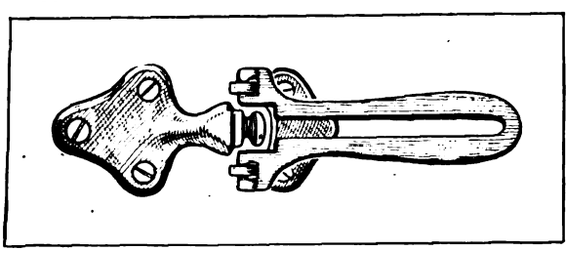
761,279. SPIRIT-LEVEL AND PLUMB. Severn Winberg, Galesburg, Ill.

761,391. SCREW-DRIVER. Olof Ohlson, Newton, Mass.

NATIONAL'S WORLD'S FAIR EXHIBIT.

The National Sweeper Company, Marion, Ind., have made elaborate preparations for exhibiting their product at the Louisiana Purchase Exposition in the Manufacturer's Building, Block 12A, St. Louis. The booth, the general design, and all its equipments are by far the most beautiful, the most original carpet sweeper exhibit ever shown to the public. This company has spared no time, money nor brains to make this an exhibit that will linger long in the minds of their patrons and friends who can possibly get to St. Louis and pay them a visit. There are two reasons for wanting you to see the National Sweeper Company's exhibit.

First, provision has been made for your entertainment and enlightenment and will consist of comfortable chairs, upon which you can rest, desks, stationery and postage for correspondence, current magazines, World's Fair guides, R. R. schedules, etc., and demonstrators who will be glad to have the opportunity of showing you the valuable patented features found only on the "National" line. The inference is, the National Sweeper Company extends to you a most cordial invitation to visit them and requests you to make their booth your headquarters while in St. Louis.



Second, Along with the regular line of carpet sweepers that have long since become established and which are so well known to the trade for their efficiency and saleability, will be shown this company's latest models—the Louis XV, Hepplewhite, Sheraton and Mission Sweepers. These designs are, without a doubt, the finest line of carpet sweepers ever built and ever placed on exhibition. The significance of these names in furniture is well known—the popularity of these styles is a definite quantity.

"National" ingenuity and cleverness has evolved the idea of making the application of the furniture art to carpet sweepers. How successfully the experts have accomplished this application to sweepers is at once obvious when you have seen the originals. Each Sweeper, except the Mission, is constructed of the choicest imported veneers and the design of each is typical with its name throughout. Further details of these newest carpet sweeper creations will be furnished in succeeding issues of this publication. By all means see the "National" exhibit at St. Louis if you go. Your conception of carpet sweeper building will be clearer than ever before, you will have the opportunity of judging the relative merits of the various lines manufactured today, in such a tangible way that you will be well repaid.

Remember the "National Way," Manufacturers Building, Block No. 12A.

THE SAFETY LATCH AND BOLT.

The Acme Pattern and Manufacturing Company, Milwaukee, Wis., are placing upon the market the Safety Latch and Bolt, which we illustrate herewith. It is a new device designed to be used as a protector from the objectionable characters of all kinds, such as tramps, peddlers, sneak thieves, etc., and which, when applied to the door ensures a feeling of safety as if the

door were securely locked and bolted. Other uses are suggested by its availability, and it is claimed to possess advantages not usually found in similar appliances: Guests of hotels, where this latch and lock form part of the equipment, would be apt to ap-

preciate the convenience it affords them by enabling the bell-boy to place a pitcher of water, mail, or package in the room without exposing themselves if only partly dressed. It gives a feeling of safety to women in answering the door bell, as it permits the opening of the door but four inches unless it is desired to admit the visitor. Applied to the door of the room it enables mothers to keep the baby from slipping out of the room while it is being ventilated. It enables doors to be safely left open at night in order to secure perfect ventilation. The Safety Latch and Lock is extremely simple in construction, is easily operated and a great improvement over the old-fashioned hook and chain formerly relied upon for similar purposes. It is quite ornamental in appearance, being finished in oxydized copper. Further information can be obtained by addressing the manufacturers as above.

THE ATLANTA CONVENTIONS.

CONCLUDING REPORT.

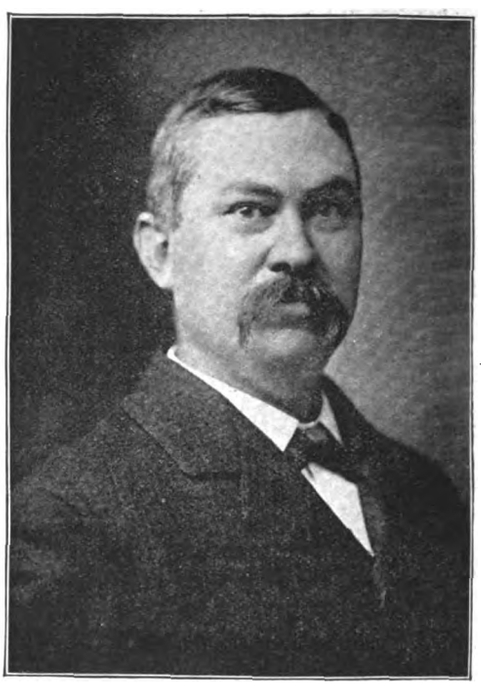
The Atlanta Convention is now a matter of history. The event itself is a thing of the past, but it will be a long time before it is forgotten. Compared with previous conventions it stands at the head, both because of the larger number of delegates and visitors in attendance and because of the great enthusiasm and good weather was perfect and the visitors entered heartily into the full enjoyment of the wide open hospitality for which Atlanta is famous.

Both the Associations, although mingling at times as though they were one organization, at the joint meeting on Wednesday afternoon participated most fully into the work which it was set out should be accomplished by their assembled wisdom; and when the giants of the assembly, E. C. Simmons and A. C. Douglass, of the Simmons Hardware Company; S. Norvell and W. L. Yantis of the Norvell-Shapleigh Hardware Co.; and W. R. Belknap, of the Belknap Hardware Mfg. Co., made their appearance in the Convention Hall long continued plaudits showed the appreciation of the delegates in having these leaders with them to lend them

J. D. MOORE, EX-PRESIDENT.

by their strength and wisdom the energy required to bring the several important subjects that they were prepared to foster and encourage, to a successful issue. George H. Sargent was also present, and upon being invited to a seat on the platform beside his confreres in the distribution of American Hardware, he was received by the assembled throng with all the affectionate respect and esteem with which he is regarded by the trade generally.

It was the intention to make this convention take an aggressive stand on the Catalogue house question, and discuss it thoroughly, with the hope that there would be no doubt as to the attitude of the jobbing trade and the associate manufacturers when their influence is needed to present the arguments in a masterly manner. This topic really dominated the convention proceedings. Responding to invitations from President Crumley to S. Norvell and also from the Manufacturers' Association to E. C. Simmons and W. R. Belknap to present addresses to both associations, giving their views in regard to this all-absorbing subject, we present in this issue enough of the masterly addresses made by these leaders in our industry to show how thoroughly they had canvassed the subject matter which was here so intelligently digested in their addresses. The presence of W. P. Bogardus, of the National Retail Hardware Dealers' Association, who ably participated in the speeches, showed that the interests of the Retailers were looked after, assisted as he was by M. L. Corey, secretary of the National Association, and Pres. E. M. Bush, of the Indiana State Association of Retailers. The able presentation of the subject by these leaders was so exhaustive in the addresses presented, it was considered as covering the matter so thoroughly as to make further discussion of a more general character needless.



THE ACTION OF THE JOBBERS.

At an executive session of the Jobbers' Association the subject was considered in its various bearings, and the following resolution adopted:

Whereas, We have heard with pleasure and profit the splendid addresses of S. Norvell and others relative to the subject of catalogue houses and the evils arising therefrom; and

Whereas, This matter has not attained the proportions in our Southern territory that it has in some others, yet, appreciating that matters of such far reaching influence which affect one portion of the trade, should appeal to the craft as a whole, and, in addition thereto, that these matters may sooner than we think be upon us for vigorous action, and in order that we may carry out the idea and spirit of co-operation and federation which render our efforts more effective in obtaining our wishes from those we desire to impress; now, therefore

Be it resolved, That we appoint R. M. Dudley, of Nashville,

COL. R. M. DUDLEY.

Tenn., as the representative from this association to act in concert with the representatives of other organizations hereafter to be appointed, and that he be instructed to act in behalf of this association in conjunction with the others in the contemplated meeting.

Mr. Dudley will be recognized as especially qualified to act with the other committees, and may be relied upon to do at least his full share in deciding upon conservative and practicable measures in combating the evils under consideration.

The Southern Jobbers, in deciding to appoint a committee to confer with the Manufacturers regarding the time and place of the next meeting, showed good diplomacy. Heretofore both the National Hardware Association and the Southern Hardware Jobbers' Association have agreed upon the time and place of their meetings without feeling the necessity for conference with the American Hardware Manufacturers' Association, who made their meetings contemporaneous.

A committee of the Southern Hardware Jobbers' Association to confer with the Manufacturers' Association was appointed, consisting of the following gentlemen, representing, it will be seen, the various sections of the South: John Donnan, of Richmond, Va.; F. B. Dunlop, of Fort Smith, Ark., and F. A. Heitmann, of Houston, Texas. This committee subsequently met with the following committee of the Manufacturers' Association: C. W. Asbury, F. R. Plumb and H. B. Lupton. Of this joint committee F. R. Plumb was chosen chairman, and the matter of determining the time and place of the next meeting of the Southern Associa-

Digitized by Google

tion is in their hands. The selection of a locality which will be satisfactory to both associations in their diverse membership and interests can thus be conveniently and wisely made. The courtesy shown by the Southern jobbers in taking this considerate action was greatly appreciated by the manufacturers.

The convention of the Southern Jobbers was made representative of the jobbing interests of the South to a greater degree than ever before, arising from the fact of the participation of such large houses as Simmons Hardware Company, Hibbard, Spencer, Bartlett & Co., Belknap Hardware & Mfg. Co., Janney Semple Hill & Co., and other houses of like calibre who have previously been independent in their action, and not affiliating with any association. This fact gave the action of the Convention a distinction in its importance scarcely anticipated at the outset.

It was deemed advisable to leave the consideration of where the next meeting of the Manufacturers' Association should be held to a special committee, composed of the following members: H. B. Lupton, F. R. Plumb and C. W. Asbury. It is being considered by some of the members of the Manufacturers Association that their own work is becoming of sufficient importance to make it desirable to hold their own meeting under circumstances that would enable them to give more individual attention to their own affairs.

IRBY BENNETT,
CHAIRMAN RECEPTION COMMITTEE.

It having been argued in several of the addresses that the only legitimate channel for the distribution of goods is through the jobbers to the retailers, to emphasize this as a number of exceptions to this theory have been made, the following resolution was adopted by the Jobbers' Association:

Whereas, Our attention has been called by the National Hardware Association of the United States to the fact that some manufacturers of Hardware are distributing their products through wholesale grocery houses, as well as through the medium of the wholesale hardware houses;

Resolved, That we recommend to the very favorable consideration of the members of the American Hardware Manufacturers' Association the request of the National Hardware Association of the United States that in the sale of hardware at jobbers' prices the wholesale hardware trade of the country be recognized as the only proper medium through which goods should be distributed to the retail trade.

THE NATIONAL RETAIL HARDWARE DEALERS' ASSOCIATION.

The National Association of Retailers was represented on invitation by some of their leading members. They were given a most cordial reception, and in discussion of the catalogue house question and other topics in which retail merchants are concerned the information they were able to give and the suggestions based upon experience in combating the disturbing influences were of much service.

OFFICERS OF THE SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

All the officers of the Southern Hardware Jobbers' Association were re-elected, as follows:

President, W. M. Crumley, Atlanta, Ga.

First vice-president, John Donnan, Richmond, Va.

Second vice-president, E. A. Peden, Houston, Tex

C. B. Carter, Knoxville, Tenn., was reappointed secretary-treasurer.

They were congratulated on every hand for the intelligent and effective manner in which their duties had been fulfilled, and the Association unanimously affirmed its admiration of their ability by re-electing them.

HOSPITALITY.

The various committees did their part well in furthering the comfort and plans of the guests. The musical entertainment on Tuesday evening at the Grand Opera House, the unconventional smoker on Wednesday evening, the banquet on Thursday evening and the barbecue on Friday were the formal entertainments extended. Besides this, however, the privileges of the clubs of the city were given and many other courtesies shown, together with individual attentions from the residents of the city. The visitors certainly carried away the pleasantest impressions of the city and its people.

THE BANQUET.

An elaborate banquet tendered by the manufacturers was enjoyed Thursday evening by a brilliant company assembled in the banquet hall of the Kimball House, many ladies being among

H. H. BEERS, SERGEANT-AT-ARMS.

the guests. After the dinner Henry B. Lupton, of Pittsburgh, introduced Irby Bennett, who assumed the position of toastmaster, a place which he filled with ability. His address of welcome was responded to by W. M. Crumley, president of the Southern Hardware Jobbers' Association, and in a more extended address by J. C. Birge, president of the American Hardware Manufacturers' Association. The speakers who followed and their subjects were as follows: OUR COUNTRY, James R. Gray, Atlanta; THE SOUTH, John Temple Graves, Atlanta; GEORGIA, Governor Joseph M. Terrell, Atlanta; ATLANTA, Clark Howell, Jr., Atlanta; AU REVOIR, T. James Fernley, Philadelphia.

CATALOGUE HOUSE COMPETITION.

BY S. NORVELL, PRESIDENT OF THE NORVELL-SHAPLEIGH HARDWARE COMPANY, ST. LOUIS, MO.

* * * * * * *

It is impossible to do justice to this subject, in all its various phases, in one paper. I will therefore outline, just as tersely as possible, for your consideration certain principles, thoughts and views that my own experience and my close and continuous association for almost 25 years with the retailers, jobbers and manufacturers of Hardware in this country have brought to me.

I will ask you to consider this paper as being suggestive, as I will make no attempt to treat this subject in an exhaustive manner.

Let us make six divisions of the subject:

1. The manufacturer.
2. The jobber.
3. The retailer.
4. The catalogue house.
5. The public.
6. What are we going to do about it?

Digitized by Google

THE MANUFACTURER.

* * * * * * *

In the Hardware line there is not on record a single instance in which a manufacturer has made a conspicuous success selling exclusively to the retail trade. All successful manufacturers have ultimately drifted to the jobbers as the most economical method of distribution. Manufacturers who have made great successes, who may have started selling to the consumer or the retail dealer, have ultimately, in every instance, gone to the jobbing trade as the best means of distributing their goods. The manufacturers who have confined their sales exclusively to the retail trade have stood still, while their neighbors who sold to the jobbers were taking gigantic strides.

Some manufacturers sell both retail dealers and jobbers. Their money is made selling the jobbing trade. The cost of obtaining business makes the retail trade unprofitable. The great Hardware consolidations of recent years have fully recognized the principle that the most economical distribution was through the jobbers, and have conducted their sales upon this principle.

The manufacturers of this country are today watching the drift of events; they are studying the signs of the time. If the catalogue houses sell the Hardware, they want the catalogue house business. If the jobbers and retailers continue to distribute the

W. P. BOGARDUS, PRES. NATIONAL RETAIL DEALERS ASSN.

great volume of Hardware of this country, then the manufacturers will want the business of the Hardware jobbers. In my opinion, this whole question is one of ability and capacity to sell goods.

THE JOBBER.

It is the jobber's first duty to protect his customer. His greatest obligation is to the retail dealer His obligation to the manufacturer is second to that of his obligation to the retail dealer. Many of us have forgotten this fundamental principle of the jobbing business.

The head of a manufacturing establishment has sat in the private office too often while the best customer was being handled in the sales department. How many old retail dealers have noticed this change in the attitude of the jobber toward the retailer? The retail dealer has been classified; he has been placed on the mailing list; he has received circular letters turned out by the thousand.

* * * * * * *

If just a few of the more prominent jobbers in this country had been keenly and aggressively alive to the interests of the retail dealers, conditions would not be what they are to-day. How many jobbers in this country know, of their own personal knowledge, as a result of their own investigation, just what has been done and is being done with goods and prices in the Hardware line by the catalogue house? How many heads of jobbing houses have collected these catalogues and devoted any considerable time to studying them? If these catalogue houses are such a menace to the interests of the jobber and the retailer, have not the stockholders of our jobbing houses a right to ask the executives of these companies if they have not been neglecting their duty in leaving these things so long unchallenged?

The jobber is a distributer; that is his essential function. He must be an economical distributer. Extravagant methods will naturally curtail his powers of distribution. He must conduct his business at the lowest possible cost, and the retail dealer and the public, as well as the jobber himself, must derive a share of the saving of economical distribution. The jobber must realize, just as the more intelligent manufacturers realize, that there is never safety in extravagant management.

If it is true, as I do believe, that the future of the jobber depends very largely upon his capacity to sell goods and to handle them economically, then he must not only consider carefully his cost of doing business, but he must study prevailing conditions and adjust his prices to meet these conditions. Suppose I should ask this gathering of the heads of jobbing houses how many of them have personally studied the prices of catalogue houses with a view to adjusting their prices to the retail trade to put their retail customers in a position to meet such prices. If you have not, I suggest it would be a good idea for all of us when we return home from this meeting to take up this subject, and to take it up personally and learn the situation, not from hearsay from some head of a department, but as the result of our own careful and personal investigation into the cost and selling prices and the selling prices that have been adopted by the catalogue houses.

* * * * * * *

THE CATALOGUE HOUSE.

The catalogue house exists only by the right of price cutting. At even prices with the retail dealer the catalogue house will have no reason for existence and cannot exist. The catalogue house trades upon the reputation that has been built up by others. The catalogue house reaps where it has not sown. It snatches the fruit that has been grown patiently and laboriously by others. It is not a creator of business. In a recent issue of *The Iron Age* I stated that the business of the catalogue house was just as honorable as that of the jobber or the retailer; but after more careful thought and investigation I must retract that statement. The catalogue house is today the highwayman of commerce. If these statements are not true, why does the catalogue house lay such stress upon selling well-known manufacturers' brands? If they do not get their business by price cutting, or by the appearance of price cutting when it is not true, why do their catalogues on every page bear down upon this one point of cutting prices?

* * * * * * *

The catalogue houses take only the easiest to handle and the most profitable part of the retail dealer's business. Many of them sell no Nails or Wire, or other staple goods. They do no repairing, and in the majority of cases list no repairs or parts of goods. They are willing that the retail dealer should enjoy this part of the business. It is a principle of business recognized by all that a certain part of our time, of our labor and of our money must be given to the public without direct compensation.

Every jobber and retail dealer is called upon to work in some shape or form for the general good of his community. The catalogue house gives no money, gives no time and gives no labor for the public welfare. The retail dealers pay their local taxes; they do their part to support churches, schools and enterprises in their neighborhoods. Tell me, has any one ever heard of a catalogue house doing any great public work? In times of fire and flood, when dire calamities have overtaken parts of our country, have any of you gentlemen ever seen any accounts of liberal contributions from catalogue houses? For my part, I have not, and I would be glad for any one in this meeting to tell me of any case where the catalogue house has ever done anything, as a catalogue house, to help any of the communities from which it has drawn its support.

THE PUBLIC.

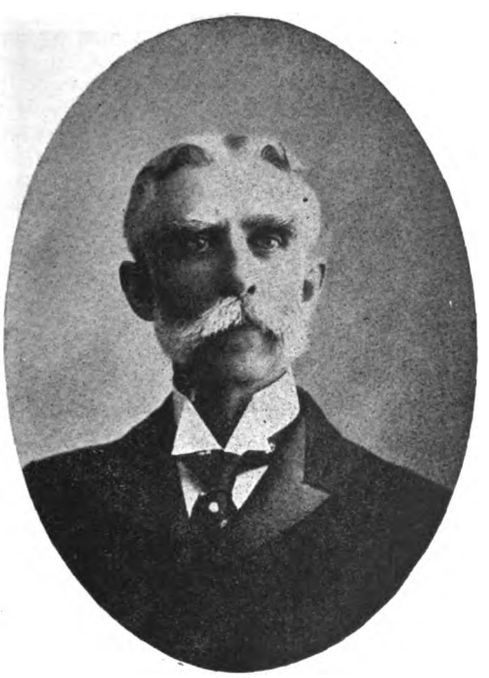
It has been claimed that the public at large will be benefited by the catalogue house method of distributing goods. I must deny this most emphatically. What is the standard of business to be applied as for the greatest good of the people?

The distribution of goods from manufacturers to jobbers and from jobbers to retailers means the greatest number of families living in comfort and respectability. The predominance of the catalogue house means a few great fortunes and thousands poorly paid, working long hours, in poorly lighted and poorly ventilated departments. It means the elimination of the prosperous towns that have grown up all over our country. It means that the many retail dealers who have come from the farm will return to their farms and become competitors of the farmers, and by their competition bring down the cost of the things that the farmer produces.

* * * * * * *

I believe that the intelligent retail merchant is better posted in regard to the facts of catalogue house competition than the jobbers, and I respectfully suggest to my fellow jobbers that you put yourselves in the way of listening and learning what your customers, the retail dealers, have to say on this subject.

THE RETAILER.



The retail dealer has had a superabundance of advice. It is not my desire to add to your burdens in this respect. With the retailer as with the jobber, this is a question of selling goods—of

Digitized by Google

controlling trade. The retailer should not ignore the catalogue house competition; he should not talk so much about poor quality of goods; he should make a sale even if he gives better goods than those offered by the catalogue house at the same price, and when he has secured such orders at catalogue house prices, freight and express added, he should insist upon his jobber selling him the goods at a price to leave him a reasonable profit.

If he is dealing with a jobber who declines to protect him, then he should give his business to others, as there are many who have decided, not as a matter of charity or philanthropy, but for their own interests, that it is a wise and farsighted policy to check the growth of catalogue houses by helping the retail dealer cut off their sales.

The jobber must assume his share of blame for present conditions. It has, however, been openly and freely stated in many quarters that the growth of the catalogue house was very largely the result of a lack of energy, intelligence and progressiveness on the part of the retail dealer, in not carrying a complete stock, not keeping an attractive store, not displaying goods properly and adding new lines as they are placed upon the market, and in not using all possible and legitimate methods in the way of advertising in papers and by circulars to keep business at home. Thousands of dollars have been spent by jobbers on catalogues and price-lists. Have the retail dealers carefully kept and arranged these catalogues? Are they in a position to intelligently use these catalogues, taking special orders for goods they do not carry regularly in stock?

F. S. KRETSINGER,
VICE-PRESIDENT MANUFACTURERS' ASSOCIATION.

In this matter of catalogue house competition I admit that jobbers are very much to blame; but now, even at the risk of offending some of the retail trade, I must lay a good share of the fault at your own doors.

If the retail dealers of this country will not rise to the occasion and sell the goods in their line in their own neighborhood; if they will not carry the stocks; if their stores look like junk shops; if they won't use the defensive weapons at hand, the case must be hopeless.

The jobber must be an increasingly aggressive seller. He must have salesmen of energy and intelligence. The ideas he gathers from the manufacturers he must pass on through his salesmen to the retail dealers. Salesmen who are not good conductors, who have not the intelligence, energy or ability to carry the electric current of commerce from the jobber to the retailer, must be eliminated. The retailer, in turn, must carry out this same aggressiveness in his business. He must remember all the time that the important thing is to sell goods. He must not good-naturedly permit his business to be taken away from him. If the retailer will not do his part in this campaign against catalogue houses, all the work of the jobber will be fruitless, and the best thing the jobber can do, if he is not supported in aggressiveness by the retail dealer, is to go into the catalogue house business himself.

* * * * * * *

We do not expect, nor will we try, to drive the catalogue house out of business. We fully realize that this is a work that will take many months. We expect that progress will be slow. It means a great deal of hard labor for which no one will receive credit. It means many interviews with manufacturers and jobbers. It means much traveling.

We believe that it will become very much more difficult for catalogue houses to obtain certain lines of goods; we believe their freedom in making prices will be very much curtailed. We believe the publicity that has been given this movement will lead to a more careful consideration of this subject both by manufacturers and jobbers. Of course, for the time being, in a readjustment of the situation, certain hardships may be worked upon the manufacturers.

We, of course, must expect retaliation on the part of the catalogue houses; but I believe if we are constant and steady in the work we have outlined that the catalogue house, like others, will pursue the line of least resistance. They carry many and various lines of goods; they have developed that part of their business from which they can make the most with the least effort. This happens to have been the Hardware line. When they find it very difficult to do a profitable business in Hardware they will after a while devote their attention to other lines.

It has frequently been asked since the agitation on this subject commenced, what can the jobbers and retailers do? We are not powerless; by united action we can accomplish a great deal. But to outline any plans at this time would hardly be fair to the committees to whom this work has been assigned and to the other committees that will be appointed.

N. A. GLADDING, OF MANUFACTURERS' ASSOCIATION.

Suppose, for instance, these committees should create a bureau of information to handle this subject exhaustively and intelligently for the benefit of the entire retail trade of the country. Suppose this bureau should compile a digest of all the lines of Hardware shown in these catalogues, with the prices and descriptions of the articles, the names of the manufacturers, the dates of the catalogues and the prices published? Suppose this digest was upon the desk of every jobber and retailer in this country, what would be the effect? I leave that to your careful consideration.

THE HARDWARE TRADE.

BY E. C. SIMMONS, SIMMONS HARDWARE COMPANY, ST. LOUIS, MO.

In these days of phenomenal business activity, when the demands upon the time, strength and energies of the average man are certainly increasing, it behooves us to stop once in a while to look about us and to quietly reflect upon conditions as they are to-day; to review the past to see what changes have occurred which, perhaps, have come so gradually as to have passed through the cycles of commercial events without apparently any special notice from us.

It is a well recognized fact that there are three divisions of the Hardware trade in this country, each very important in itself, and yet each one absolutely dependent upon the other for its welfare and success. These three divisions are those of the manufacturer, the jobber and the retailer. I speak to you from the standpoint of all three interests, because I represent the manufacturer by reason of the different factories that we are interested in, control or whose output we take. The manufacturers' class is—numerically speaking—a limited one, and for that reason should be the more easily reached, because of its lesser numbers, than the other two.

* * * * * * *

Digitized by Google

PROPER DISTRIBUTION OF GOODS.

During all this time to which I have briefly referred it has been a generally recognized fact that the manufacturer should distribute his goods through the jobber, who is, owing to the vast extent of this country, an absolute necessity as a distributer of goods to the small dealer who wants to buy in little lots from time to time as his needs require, and which is the only way that his limited capital will enable him to conduct his business successfully; that the manufacturer should avoid selling the retailer; that he owes a moral obligation to the jobber to confine his sales entirely to the Hardware jobber, and in turn the jobber should sell his goods only to the dealer, never selling to a consumer under any circumstances, and that there is a moral obligation on his part to refrain from interfering with the business of the retail dealer by selling to the consumer. And last, the retailer is expected to keep up and maintain his stock to an extent that enables him to supply the wants of the consumers in his immediate locality and causes them to be satisfied that they can obtain at home the merchandise to fill their requirements.

If there is any principle that I wish to impress upon this body or the trade at large it is that these relations be rigidly maintained: That the manufacturer will sell to the jobber only and

ROBERT GARLAND, OF MANUFACTURERS' ASSOCIATION.

not to the retailer; that the jobber will sell to the retailer only and never to consumers. Our house has never sold to consumers and never will except through our retail store, and that serves St. Louis people only.

RETAILERS PATRONIZE FACTORIES.

I have talked with some jobbers about this and they cite the fact that many retailers are buying from the factories—that they do not preserve the lines of moral obligation which they should, and for that reason these jobbers will sell to certain manufacturers or consumers; in fact, I know of a case that came under my own personal inspection where a large retailer—and the party is a simon pure retailer, doesn't pretend to be a jobber—stated distinctly to me that he would give preference to the manufacturer, at the same price, all the time, and he bought all the goods from the manufacturer that he could. These conflicts and conditions should be overcome if possible. It is my judgment that the manufacturer will serve his own interests best by confining the sale of his goods to the jobber and never allowing himself to be tempted to seek any other distributing course, and that the jobber should never sell his goods excepting to the retail dealer, under any circumstances. I believe that the jobber owes that to the retailer as an obligation, and when he does not fulfil that obligation he has no claim whatever upon the trade of the retail dealer.

UNITED EFFORT SHOULD BE MADE TO CHANGE THIS.

If we could, by any united effort, influence the manufacturer to sell his goods only through the jobber, and then let the jobber, under no circumstances, sell his goods to any one except to the retailers, leaving the retailer free to enjoy the trade of the consumers, which is his natural support, we would go a long ways toward solving many of the most difficult problems that now confront the Hardware trade of the United States.

* * * * * * *

Conditions just at present are unusually acute, begotten by dull times and a quiet year, which always aggravates such matters. It is said that the best lessons of our lives are those learned of adversity, and this may be the result of the present situation, for it will not be without great benefit to the retail Hardware dealer if it causes him to wake up and put more vim, snap and go into his business—to have on hand what the people want when they call for it, to sell it at a reasonable price—in fact, to compete with these other retailers, the catalogue houses—for that's what they are—just large retailers, that's all.

A discussion of this question must be done in the broadest gauged and most generous manner possible, there must be nothing suggested or even hinted at that is unreasonable; correct principles must govern; anything extreme, radical or unfair will bring its penalty—failure. There must be nothing attempted not based upon the "Golden Rule." These people have as much right to be in business as we have, their business is as legitimate as ours; if they have devised a better method than we have they deserve their reward. Any effort on the part of the manufacturers or jobbers to wipe out the catalogue houses is a mistake; they have come to stay and stay they will. If they are doing business on methods that are unhealthy to the Hardware trade, as I believe they are, we should do our best to regulate them—to correct those methods, or, in a sense to pull their teeth, so that if they

WM. M. PRATT, OF MANUFACTURERS' ASSOCIATION.

do bite they won't hurt. Public condemnation of catalgoue houses is the most serious blunder that we, as Hardware jobbers, can make, for it's simply a boomerang.

* * * * * * *

CATALOGUE COMPETITION.

No address of this kind would be complete without considering another kind of catalogue competition—houses doing a jobbing business by mail and soliciting from merchants only. I have had a lot of letters from customers and salesmen on this subject, complaining of this competition. My answer is that this is legitimate competition—we must respect it and meet it—if we can't, then our methods are not right, either too expensive, too clumsy or something else is wrong These people are doing a large and profitable business by catalogues and avoiding the great expense of traveling salesmen—is it not well to look into this matter; does it mean that we, too, in time, must gravitate to the same methods and do away with the salesmen? I think not; the salesman is with us to stay; he is necessary to the retailer; as a rule, he is the retail dealer's friend, he visits him regularly, tells him all the news, posts him as to probable changes in the market, keeps him informed as to new ideas and better methods which he has found to work successfully elsewhere. The retailer wants to have him continue his visits; likes to have him come, and draws much benefit from this contact with him. One of the axioms of our house is that the proper definition of a good salesman is "a man who helps his customers to prosper." But, on the other hand, is the retailer always loyal to the Hardware salesman, or will he not often order goods from mail order houses, without giving his friend, the Hardware salesman, a chance to furnish the goods at the same price?

As before stated, the interests of the retailer and the Hardware jobber are mutual, and now as the jobber is trying to help the retailer to the best of his ability, so let the retailer remain loyal to the jobber who supplies him.

* * * * * * *

Digitized by Google

SAME QUANTITY OF GOODS BOUND TO BE DISTRIBUTED.

I would convince, if I could, all manufacturers that they will sell more goods if they make their total distribution through the legitimate channel, the Hardware jobber, than they can possibly do by allowing so large a distribution of them to pass through the hands of the catalogue houses. In proof of that, I would say that the thousands and thousands of retail Hardware dealers will then each carry a small stock of their goods, and which will aggregate an enormous quantity. But if the retail dealers throw these goods out of their stock because they can make no money on them, then the sales of the manufacturer will be seriously curtailed, for if the whole country is practically supplied from two stocks, it stands to reason there will not be nearly so many goods bought or so many on hand in the possession of the merchants for sale, as there would be if there were a few of each in every retail store in the United States.

I, therefore, put this on the ground of being to the best interests of the manufacturers, believing, as I do, that that is the fact.

* * * * * * *

MANUFACTURERS' OBLIGATION.

And then I would appeal to the moral obligation which he owes to support his own people, his own class—a class that has in years gone by built him up; and in saying "class" I mean the jobber and the retailer both, because while the one has purchased and distributed the goods, the other has sold them to the consumer.

JOBBERS' ATTITUDE.

Now let me turn to the jobber, or what I may term my own legitimate class. The jobber is a great power in this matter, with a concentrated effort. I stand here as the representative of our house to say that we are ready and more than willing to co-operate with the National Hardware Association, with the Southern Hardware Jobbers' Association, or with any other Hardware interests to do all we can in this matter.

I don't think the jobber should sell the catalogue houses a dollar's worth of goods, for, even if they sold them at a satisfactory profit, it is unwise because it begets competition from other jobbers, which finally gravitates to excessively low and unhealthy prices, besides which it enables them to fill promptly orders for goods that they might not be able to obtain elsewhere. No, my friends who are jobbers, let's keep our hands off and skirts clear, and not furnish ammunition to shoot at our best friend, the retail Hardware dealer; let us, as I suggested for the manufacturers, come out in the open and state where we stand on this subject.

JOBBERS' OBLIGATION TO THE RETAILER.

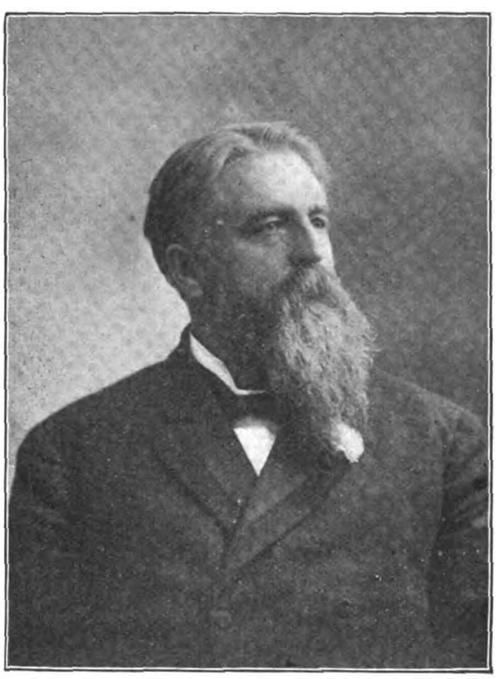
The wholesale Hardware trade is under a debt or obligation to the retail dealer, who has supported them and made them what they are, to the extent of helping them in a conflict of this kind to the best of their ability. No effort should be spared, no stone unturned, no trouble considered too great, to bring about the most thorough and complete protection for the retail Hardware dealer, and I am glad to go on record, pledging our house and myself as ready and willing to do anything in our power to accomplish this.

THE NECESSITY OF A CLOSER AFFILIATION BETWEEN JOBBERS AND RETAILERS.

BY W. P. BOGARDUS, PRESIDENT OF THE NATIONAL RETAIL HARDWARE DEALERS' ASSOCIATION, MT. VERNON, OHIO.

I think myself fortunate that I am permitted to address so notable an assembly. Thrice fortunate that I can come into this Southland and see with mine own eyes the progress that you are making. To see the results of the shifting of industrial power and activity from the field to the factory, so that the development of the new South shall be harmonious, and the field, and factory, and church, and school house, and the home shall join in an all-round development of this land, that is beautiful for situation and lovely to dwell in. It is a pleasure to come here and see in this new activity a future pregnant with greatness and power and usefulness.

But we are come here to-day to discuss a question that enters largely into the conditions of future success and prosperity of this great American people. And as I stand before this gathering of representative men, engaged in the business, that is the keynote to human industry, and the barometer that tells of the prosperity or depression of business life, I am buoyed up with the hope that our conference will result in the betterment of our conditions as business men.



DANGEROUS BUSINESS METHODS.

In these modern times there have arisen methods of doing business that are harmful to a large number of business men, because the success of the methods depends on creating false impressions, dangerous to society because of the efforts to centralize business in the large cities, and bound, in the near future, to bring disastrous results on us as a people, for centralization carried on to an extreme breeds anarchy.

For nearly 20 years these methods have been developing. For nearly ten years the retail organizations of the North have been fighting to hold in check what they have felt to be the illegitimate and unfair methods of the catalogue houses and department stores. Illegitimate, because they seek to carry the idea that the merchants in the towns, villages and hamlets all over this land are seeking to get exorbitant prices for the goods that they are offering to sell the public. Unfair, because they are seeking to create and deepen an antagonism between the country merchant and his customers, by offering to send to these customers standard goods at prices at which the merchants cannot buy and sell them. Using goods that have become well known to the public by the faithful efforts of the retailers who have introduced them and made them standard, as leaders to draw the unthinking public to patronize them.

WHILE VAUNTING THEMSELVES

as the "price makers of the country," and boasting of their greatness, they make this peculiar proposition, for honorable business men, that if the public will buy of them their "name will not appear on box, package, wrapper, tag, envelope or outside of merchandise," so that they can send their money to the catalogue house, and when the goods are received no one will be the wiser,

E. B PIKE, OF MANUFACTURERS' ASSOCIATION.

and no awkward questions will be asked by neighbors or home merchants. And they go on to say that as they handle such large quantities they "are enabled to own their own factories," and so cut out all profits except their own as manufacturers; that their expert buyers are on the lookout for overstocked manufacturers and jobbers, and by offering cash for their surplus are getting the goods for less than the cost to make. All this they are giving to the public. And they say further: "We sell to the largest merchants in the country, but we have only one price. The man with the dollar gets his goods just as cheap as the man who buys thousands."

THAT THE CATALOGUE HOUSE AND DEPARTMENT STORE HAVE A RIGHT to buy and sell goods goes without saying. But if the manufacturer has a right and the power to determine how his goods shall be sold, and at what prices they shall be sold to the retail trade, and goes so far as to say to the jobber, "If you deviate from these prices to your trade, we will cut you off from selling our goods," why cannot the manufacturer say to the catalogue house, "You must sell the goods you buy of us at such prices as we may determine, or we will not let you handle any of our output?" If it is right to make one restriction, why not another? If one class is to be controlled in selling the goods of the manufacturer, why not all? Why should any retailer be permitted to buy goods so as to demoralize the market? True, the catalogue house will buy more goods than any single retailer can be expected to buy. But he is and always will remain a competitor of the retailer. If the catalogue houses and the department stores bought the entire output of the manufacturers, then this discussion would have no place here, and neither would the jobber.

We must recognize the fact that the jobber, as a rule, does not sell to the catalogue house. Therefore the catalogue house becomes an immediate competitor of the jobber, and is doing all that it can to undermine the jobber and his customers by going direct to the customers of the jobber's customers and soliciting their trade. Being in a position and recognized as a large buyer, it is put on the same plane with the jobber, and even frequently above him as regards prices, so that it is enabled to undersell and

Digitized by Google

break down those to whom the jobber must look for support, if he is to remain a jobber.

IF QUANTITY IS THE ONLY THING THAT MAKES PRICE

then this condition of things will continue only as long as the rule that price is governed by quantity prevails. Buyers should be graded, and manufacturers owe it not only to themselves, but to the trade in general, to be governed by other things than quantity in making prices.

Why are certain goods offered by catalogue houses at such low prices? Because they are standard. Because they are known all over this country. Who made them known. Who brought them to the attention of the general public? Was it the catalogue houses? I tell you nay. But in every hamlet and village and town, merchants and storekeepers have sung their praises until they have become a household word. Because they are well known they have been used by the catalogue houses and department stores to create an impression that they were selling goods all the way through at such prices.

And the curious thing to me is that the manufacturers have joined with them, and, because they have given them sizable orders for goods, have helped them, unwittingly I believe, to break down the very people who have been instrumental in giving their goods the reputation they have gained before the public, and so building up the manufacturers' trade.

MANUFACTURER TO JOBBER.

I take it as a fact beyond dispute that the manufacturer would have but small trade unless he had some one to help distribute his output. For the manufacturer to get to the consumer means too large an expense account, and is not practicable. For him to go to the retailer is open to the same objection as regards expense, except in some few instances. To go to the jobber for help to distribute his product is the least expensive and most satisfactory method yet devised. Every time a manufacturer goes to a retailer and sells him goods he that much cripples his best friend, the jobber. He does not add to the consumptive capacity of the country one single cent, but brings confusion where there should be order. Mark you, I do not take the position that the manufacturer should sell to the retailer at the same price that you do to the jobber, even if he offers to buy more goods than the jobber at the time.

Do I say this as a retailer? I certainly do. Go into a great factory, where the revolving wheels are singing the song of human industry, and watch as the completed product comes forth and is boxed and piled tier on tier, ready to be shipped to the markets of the world, and you see but one line of goods. But go into the great warehouse of the jobber and see the accumulation of goods gathered from many factories, that are waiting to be sent forth on their mission of usefulness, and you will see where the retailer can turn with confidence that his wants will be supplied promptly and completely.

Such being the condition surrounding the retail and jobbing trade, is there not good reason for a close affiliation between jobber and retailer? Each is mutually dependent on the other.

THE JOBBER CANNOT EXIST

as a jobber unless he can sell the goods that he has gathered together to the retailer. He cannot go to the consumer. It is too expensive. Now, if his natural customer has been crippled by a competition that has been fostered and built up by a competition that price is governed by quantity, and which in every way possible seeks to convey the idea that it is better for the consumer to send his money away from home to buy his goods, what is the natural customer of the jobber going to do with the goods he buys from the jobber? To whom can he sell them? If a merchant's competitor has been given prices so low that he can sell for what it costs the other to buy, how is there going to be any competition?

Some may say that the catalogue house question is a small matter. Gentlemen, it is not a small matter. It vitally affects every retailer in all this country, and as it affects the retailer so it affects the jobber. So closely are their interests interwoven that the success of one means the success of the other.

IN THESE STRENUOUS TIMES

it seems that the modern business mind is impressed more by size than by a careful consideration of the justice and merit of a claim. In the hurry of business it seems impossible to get a hearing unless accompanied by size. There must be influence back of requests before they get a hearing. The individual has no place in the new order of things. It must be a company, or corporation, or combination, or trust, if our plans are to ripen into fruitage. So we turn to organization, the spirit of the age, whose wand brings order out of chaos, system out of confusion and success out of disaster, with the hope that a solution, fair and just to all, may come through this agitation.

We are not here to ask that any man shall be driven out of business. We are not here to ask that any business enterprise be throttled. But we are here to ask that men who are seeking to break down the retail dealer in order that they can climb upon the ruins may be hindred from accomplishing their objects. We are here to ask that the help heretofore given them may be withheld, and that other considerations besides quantity regulate the price.

GROWTH OF RETAIL ASSOCIATIONS.

Ten years ago there were no State Hardware associations. Today there are eighteen, with the prospect of several new ones during the year. During the year 1903 there was an increase of memership ranging from 15 per cent. to 50 per cent. to the association. The retailer is slowly recognizing his utter weakness when alone, and his power when organized. And he sees, as he hopes the jobber will see, what closer affiliation between the two associations will mean for both of them in the future.

SOUVENIRS.

The G. & H. Barnett Company, of Philadelphia, was ably represented by Joseph M. Hottel, who gave out as a souvenir a manicure file.

A trail of merriment always appeared in the wake of Sam H. Jacobs, of the Troy Nickel Works, who aroused the sporting proclivities of the Conventioners by distributing miniature roulette wheels.

An ash receiver was given out by The Yale-Towne Mfg. Co., represented by J. H. Towne, A. W. Clark and J. B. Parrent. An exhibit of this firm's goods was shown in their rooms in the Kimball.

Messrs. Stafford, Oheen, Smith and B. M. and N. A. Gladding, of E. C. Atkins & Co., were present. This firm's souvenir was an aluminum check perforator.

Harry Mayer, head of the firm of Mayer & Co., makers of "Gold Medal" files, passed around a very handy manicure file.

Wallace L. Pond, of the Nicholson File Co., made himself solid with the ladies by presenting to each a box of bon-bons at the banquet.

William G. Smythe, of the American Screw Co., added very materially to the enjoyment of the banquet by presenting each guest with a handsome bouquet.

The Peters Cartridge Company, represented by W. E. Keplinger, F. C. Tuttle, J. S. French, T. H. Keller, J. W. Hightower and H. P. Lemcke, gave out a letter opener of unique design.

Joseph J. McCaffrey, of McCaffrey File Company, distributed pocket files.

Frank J. Schollhorn, manager of the William J. Schollhorn Co., New Haven, Conn., gave out as a souvenir one of that firm's specialties, a pair of pliers.

The International Cutlery Company, Fremont, Ohio, represented by J. T. Rader, gave out one of the most useful souvenirs, a handsome razor. The ladies were each given a pair of scissors by Mr. Rader.

A. E. Welti, representing Keuffel & Esser, New York, presented the Conventioners with a handy pencil case containing a folding steel rule.

Mr. Frank S. Owerbacker, of the O. K. Stove & Range Co., Louisville, Ky., became one of the most wanted men at the Convention as soon as it was discovered that he was distributing what to outward appearance was a box of O. K. Stove Polish, but which contained instead a small bottle of real "Mountain Dew."

One of the most artistic souvenirs was that distributed by B. A. Hawley, vice-president of the Russell & Erwin Mfg. Co., assisted by A. R. Sesson and S. B. Bispham. It was a handsome piece of bronze which could be used for either a card tray or ash receiver.

A handsome pearl handle pocket knife, made by Dwight, Divine & Son, Ellenville, N. Y., was given out by C. H. Bennet, manager of the Daisy Mfg. Co., Plymouth Mich.

The Reading Hardware Company, besides furnishing music for nearly all of the entertainment features of the Conventions, distributed as souvenirs beautiful bronze horseheads, hand painted, bronze lizards for ornaments or paper weights, and two handsome books, one showing a large number of buildings in which Reading Hardware is used and the other the main points of interest of Atlanta, and of Reading, Pa.

Mr. F. Herbert Smith, formerly of the Nicholson File Co., was re-introducing himself as Southern representative of E. C. Atkins & Co.

A handsome leather pocketbook and a miniature leather-bound calendar were distributed by A. M. Whaley, Southern representative for John A. Roebling Sons Co., and The New Jersey Wire Cloth Co.

T. D. Halliwell, vice-president of Tower & Lyon Co., was for

Digitized by Google

first time in attendance and added very largely to his list of friends.

The Blacklock Foundry distributed boxes of miniature sad irons, useful as paper weights.

Wm. Vogel & Bros., represented by L. H. Vogel and W. I. Sherwood, exhibited a handsome line of their goods in their rooms at the Piedmont, and gave out brass oil cans as souvenirs.

The Stanley Works, New Britain, Conn., presented each visitor with a handsome fob with ribbon of heavy black silk and the charm made up of a miniature "Samson" Back Band Buckle, with a sterling silver heart pendant, the latter representing the trade mark of this firm.

Among the other souvenirs were the following: Standard Tool Co., Cleveland, penholder; Iver Johnson Arms & Cycle Works, leather change purse; W. A. Chenoweth, hatchet; A. Leschen & Sons Rope Co., cigar case and pencils; E. I. Dupont Powder Co., cuff button representing a powder can; Acme White Lead & Color Works, cigar cutter; Simonds Mfg. Co., key chain; Columbian Hardware Co., aluminum ink well.

"HARDWARE'S" Special started on the return trip at noon, May 28th, amid the cheers of hundreds who gathered at the station to say good-bye. The train was made up of Pullman cars Warbano, Pleiades and Otranto, a diner; the Reading Hardware Company's private car Rainbow, and a coach carrying the band. The cars were well filled and the trip will be long remembered by those on board.

ARKANSAS RETAIL HARDWARE DEALERS ASSOCIATION

The fifth annual convention of the Arkansas Retail Hardware Dealers' Association is being held at Little Rock, June 8th, 9th and 10th, with headquarters in Gleason's Convention Hall, as we go to press. The following is the order of business:

WEDNESDAY MORNING SESSION, 10 A. M.

Opening of Convention, President John F. Maxley, Ozark.
Roll Call.
Enrollment of New Members.
Address of Welcome to Little Rock, Mayor W. E. Lenon.
Response for the Association, J. B. Avera, Paragould.
Report of Executive Committee.
Remarks by Manufacturers, Jobbers and travelling men present.
Adjournment.

WEDNESDAY AFTERNOON SESSION, 2 P. M.

Enrollment of New Members.
President's Annual Address.
Secretary-Treasurer's Annual Report.
Appointment of Committees on Resolutions, Press, Finance, Auditing, Insurance, Nominations.
Paper—"What Can Be Done by Our Members to Create a More Active Interest in Association Work?" John M. Pittman, Prescott; E. E. Mitchell, Morrilton.
Papers—"The Best Method of Keeping a Well Established Business Up to Its Standard." Hamp Williams, Hot Springs; W. M. Graham, Clarendon.
Address—"What the National Association Is Doing for the Retail Hardware Dealer." National Secretary M. L. Corey of Argos, Ind.
New Business.
Adjournment.

THURSDAY MORNING SESSION, 9 A. M.

Papers—"Business Hints in the Hardware Line." C. T. Rosenthal, Batesville; P. J. Tidwell, Buckner.
Paper—"What Are the Best Methods of Extending Credit and Making Collections?" J. L. Davis, Magnolia.
Paper—"Best Method of Keeping Tab on Credit Sales, so as to Insure the Proper Charge." O. R. McDaniel, Prescott.
"Catalogue House Competition—Looked at From the Jobber's Standpoint." R. W. Shapleigh, St. Louis.
From the Retailer's Standpoint, National Secretary M. L. Corey.
General Discussion of the Subject.
Reports of Committees on Membership, Transportation, Grievances, Fraternal Relations, Program.
Unfinished Business.
New Business.
Adjournment.

THURSDAY AFTERNOON SESSION, 2 P. M.

Paper—"Shall Barbed Wire and Nails Be Profit Makers or Leaders With Us?" J. A. Plummer, Marianna.
Paper—"Business Leaks, and How to Stop Them." T. B. Stewart, Newport; S. F. Palmer, Mammoth Spring.
Unfinished Business.
Reports of Committees on Finance, Auditing, Insurance.
Question Box.
New Business.
Recess to 7.30 p. m.

FRIDAY MORNING SESSION, 9 A. M.

Unfinished Business.
New Business.
Question Box.
Reports of Committees on Resolutions, Press, Nominations.

FRIDAY AFTERNOON SESSION, 2 P. M.

Adjournment.
Installation of New Officers.
Announcement of Standing Committees.
General Discussion—"What Shall We Attempt to Do in the Fiscal Year Which We Are Just Entering."
Adjournment.

HARDWARE FACTS AND FICTION NOT GENERALLY KNOWN.

WRITTEN FOR HARDWARE.

Third Article.

THE MIDDLE AGES.

The iron workers of England during the middle ages and far on to its modern times carried on their operations in a very primitive manner. Strange to say, the districts where their furnaces glowed under the heat generated by fires of wood are now gone "back to the land," and, save traces here and there of the furnaces long burnt down, nothing remains of those workings. Rural England reigns in Kent and Sussex, the forests of which counties are cut down, and pasture and arable lands alone are seen. The scene has changed; with the discovery of coal, iron works were opened up in the Northern counties of England where wild romantic scenery had been rampant. Towns and cities—busy centres of commerce with works and fiery cupulas—occupy the places where the wild stag and now extinct game were hunted.

Searching Saxon records in the Life of St. Egwin, founder and first Abbot of Evesham Abbey and third Bishop of Worcester, who died A. D. 717, it is recorded that he visited the iron works in the royal domain at Alcester in order to convert the workers, who made such a noise with their hammers and their anvils that he could not be heard, whereupon he is said to have placed a curse upon them, so that no smith was able to prosper at Alcester thereafter.

Sussex from early times was an important seat of British iron industry; the earliest record of the trade there is contained in a grant made by Henry III. to the town of Lewes in 1266, by which the inhabitants were empowered to raise toll for the repair of the town walls after the battle. Every cartload of iron destined for sale, which came from the neighboring weald, was to pay one penny toll and every horseload of iron half that amount. In 1290 a sum of money was paid to a certain Master Henry, of Lewes, for the ironwork for the monument to Henry III. in Westminster Abbey, which fact reminds us that talented smiths were brought frequently from long distances for important works.

"Strike now or else the iron cools."
King Henry VI., 3:5:1. SHAKESPEARE.

"I saw a smith stand with his hammer thus,
The whilst his iron did on the anvil cool."
King John. Act IV, sc. 2.

In early times iron was not actually made to melt, but was separated and formed into a lump while in a pasty condition. When it was found to be sufficiently free from carbon, to be malleable, without any further processes, it was brought under a heavy tilt hammer worked by a cog-wheel and driven by water power (many large sheets of water in the wealds of Sussex and in Kent owe their existence to the manufacture of iron).

The manufacture of Hardware goods out of soft iron dates back beyond the days when cast iron grate backs were made in Sussex, and it may fairly be assumed that as soon as the metal was obtained in a workable form, the genius of man began to operate upon the crude lumps of metal, and by the aid of forge and bellows to shape it into tools, weapons, and implements of husbandry, afterwards modelling culinary utensils and domestic useful contrivances. In the year 1300 the Ferones (that is, those who dealt in iron), made a complaint to the Mayor and Aldermen of the City of London "for that the smiths of the Wealds and other merchants bringing down iron wheels for carts to the city made them shorter than anciently accustomed, to the great loss and scandal of the whole trade of ironmongers requiring a remedy upon their complaint," whereupon an inquisition was taken of lawful and honest men, "who presented three iron rods

JAP-A-LAC

"WEARS LIKE IRON"

JAP-A-LAC, the new wood finish, has grown in popular estimation until to-day it is the recognized superior of all wood finishes.

We have had unbounded confidence in **JAP-A-LAC** and have backed up this faith by the expenditure of vast sums of money to make it a household word in every corner of the land.

We are still spending money for this purpose and shall continue doing so.

Watch the leading magazines and exclusive women's publications and see what we are doing.

Start with the April issues of the *Ladies' Home Journal, Delineator, Designer, New Idea, Woman's Home Companion, Ladies' World, McCall's, Everybody's* and *Good Housekeeping* and many other publications, and try to realize the millions upon millions of people who each month read at least a portion of the "Story of **JAP-A-LAC.**"

Never before was a varnish product so thoroughly known. It insures millions of sales for **JAP-A-LAC,** and you will have your share of the demand.

Won't it pay you to place your order now and be ready to supply your customers' wants?

We have a specially alluring proposition for dealers and will gladly furnish information regarding it upon request.

The GLIDDEN VARNISH CO.

MAKERS OF HIGH GRADE VARNISHES

No. 44 Williamson Bldg., Cleveland, O.

(strytorum) of the anciently used lengths of the strytes, and also the length and breadth of the gropes belonging to the wheels of the cart, which rods were sealed with the seal of the Guildhall, London. One of these standard rods was deposited in the Chamber and another handed to John Dod and Robert De Paddington, both ironmongers of the Market, and a third to John Wymondeham, ironmonger of the Bridge." All comers were informed that no other wheels would be admitted into London market, other than those measured by these standards. It will thus be seen that the craft of ironmonger or dealer in iron and iron appliances was early an established trade. Self protection—the motive which actuated the pioneers of the association movement of recent years—caused the ironmongers of the fifteenth century to band themselves together, and form one of those powerful guilds by which the traders of London were enabled for so many centuries to maintain inviolate the secrets of their crafts, and prevent that overlapping of business, which prevails to so great an extent in the present day. The Ironmongers' Guild was incorporated in the third year of the reign of Edward IV., and in 1462 their Arms were granted by Lancester, King of Arms. Various charters were granted to the Guild confirming their rights by different sovereigns; Henry VI., Henry VIII., and Elizabeth all ratifying the charters of the company. Ironmongers' Hall, in Fenchurch Street, which is so soon to be pulled down, had the good fortune to escape the great fire of London. The Ironmongers' Company possess in trust many important sums of money. Samuel Pepys in his diary of 1661 refers to the trust left by Thomas Betton, whereby sums of money were to be devoted to the redemption of Christian slaves in barbary. Since Lord Exmouth's expedition no claims have arisen upon the fund, which is now administered for other purposes under the direction of the Court of Chancery. John Evelyn in his diary of 1671 records the fact that he dined in the City of London at the Fraternity Feast in Ironmongers' Hall, on which occasion the stewards chose their successors for the next year, with a solemn procession, wearing garlands about their heads, accompanied with the playing of musical instruments, afterwards drinking the health of the new stewards.

DON'T FAIL TO SEE IT.

Are you going to the St. Louis World's Fair? If so, don't miss seeing Warren's Model Hardware Store, 25x45 feet, in the first building at the right from the main entrance—Varied Industries—located on the north side, directly in front of Entrance No. 16.

NATIONAL CYCLE TRADE ASSOCIATION.

The third annual meeting of the National Cycle Trade Association will be held at the Cosmopolitan Hotel, corner Chambers Street and West Broadway, New York City, on June 22, 23 and 24. T. James Fernley, secretary-treasurer of the National Hardware Association, has been invited to address the joint session with the jobbers. Fred. C Gilbert, of the Pope Mfg. Company, has also been invited to address the gathering on the subject of present methods of stimulating interest in cycling. The following resolutions will be presented for discussion:

Resolved, That it is the sense of this meeting that all manufacturers should extend to jobbers the same dating on Spring orders that jobbers usually have to extend to their customers—viz., April 1.

Resolved, That it is the sense of this meeting that jobbers' prices should be extended to jobbers only.

Resolved, That a Classification Committee of 18, composed of three bicycle manufacturers, three coaster brake manufacturers, three tire manufacturers, seven jobbers and the president and secretary-treasurer of the N. C. T. A., be appointed by the president to formulate a list of those entitled to jobbers' prices; ten votes being necessary to place any name on the list.

Resolved, That it is the sense of this meeting that catalogues, price-lists or other advertising matter *reaching the rider* should not quote net trade prices.

The Entertainment Committee, comprising W. A. Graham, of John H. Graham & Co.; F. E. Castle, of the Twentieth Century Mfg. Company, and A. Seipel, of the Bridgeport Gun Implement Company, are arranging an attractive programme for the visitors, which will be announced soon.

REVIEW OF THE MARKETS.

WIRE NAILS. The market, while remaining firm in its general movement, is but normal in its demand, while the mills have contracts on their books yet unfilled. Deliveries are made with a greater degree of promptness, and back orders are now well in hand. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

Jobbers, carload lots.....$1.90
Retailers, carload lots..... 1.95
Retailers, less than carload lots..... 2.05

New York. The local market, confined as it has been of late to small lots from store, has been fairly active with prices remaining as previously quoted, as follows:

Single carloads $2.10
Small lots from store 2.20

CUT NAILS. Under a moderate demand the Cut Nail market is enjoying a limited activity which bids fair to continue, quotations remaining as previously quoted, as follows: On either Steel or Iron Nails, with no discrimination as to locality:

Carload lots .....$1.75 base
Less than carload lots 1.80

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. Trade fairly active; prices quite firm; demand only moderate; are the conditions of the local market. Quotations are as follows:

Carloads on dock $1.89½
Less than carloads on dock..... 1.97½
Small lots from store 2.05

BARB WIRE. Were it not for the business coming from filling orders already under contract, the new business would scarcely be noted. It is seasonably light. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots.....	$2.20	$2.50
Retailers, carload lots	2.25	2.55
Retailers, less than carload lots.....	2.35	2.65

SMOOTH FENCE WIRE. The mills have been turning out a satisfactory output based upon unfilled contracts and their usual requisitions. Quotations are as follows, f.o.b. Pittsburgh, terms, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads $1.80
Retailers, carloads 1.85
Less than carloads 1.95

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BINDER TWINE. While occasionally is heard of a little lower quotation on one or more of the grades controlling the market, the bulk of the regular business has been based on the prices established by the International Harvester Company, and which are as follows:

	Cents per lb.
Sisal	10¼
Standard	10¼
Standard Manila (550 feet).....	11¼
Manila (600 feet)	12¼
Pure Manila (650 feet)	13¾

Five-ton lots, ⅛-cent less; carload lots, ¼-cent less. Kansas City, Minneapolis, Omaha, Council Bluffs, ¼-cent higher. Pacific Coast points, 1 cent higher.

CORDAGE. The Cordage market has not been subjected to any change of moment in any of its several quotations. The manufacturers ruling quotations are nominally about as herewith given:

	Cents per lb.
Pure Manila, 7-16-inch and larger	11½
⅜ inch	12
¼ inch and 5-16	12½
No. 2 Manila	10@10½
Pure Sisal, 7-16-inch and larger	9
No. 2 Sisal, 7-16-inch and larger	8
⅜ inch	8½
¼ inch and 5-16-inch	9
Lath, Yarn, Medium and Coarse	8
Jute Rope, No. 1.....	6½
No. 2.....	6

PUMPS. The National Association of Cast Iron Pump Manufacturers was organized at a meeting held in Chicago on the 25th ult. The following manufacturers were represented at the meeting: Humphreyes Mfg. Company, F. E. Myers & Bro., Barnes Mfg. Company, Temple Pump Company, Mast, Foos & Co., Flint & Walling Mfg. Company, Moline Pump Company, Red Jacket Mfg. Company, J. E. Porter Company, Duplex Mfg. Company, Cedar Rapids Pump Company, Dempster Mill & Mfg. Company, Challenge Wind Mill & Pump Company. F. E. Myers was elected president; H. J. Parks, vice-president; T. R. Barnes, secretary, and E. H. Sleight, treasurer. It is understood that practically all of the Pump manufacturers are heartily in favor of the organization.

STILLSON WRENCHES. Walworth Manufacturing Co., Boston, Mass., manufacturers of the Stillson Wrench, have revised the list prices of Wrench parts, which is now as follows:

Revised List on Stillson Wrench Parts.

	6-in.	8-in.	10-in.	14-in.	18-in.	24-in.	36-in.	48-in.
Jaw	.75	.75	.80	1.00	1.33	2.10	4.75	7.25
Frame ..	.35	.35	.40	.50	.55	.80	1.30	1.50
Steel Handle	.95	.95	1.10	1.45	2.10	3.20	6.40	9.25
Nut	.11	.11	.14	.17	.22	.35	.55	.95
Wood Handle	.16	.16	.18	.25	.28			

To be in effect June 1st.

LINSEED OIL. Under date of June 6, the following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....40 cents per gallon.
In lots of 5 barrels or more.....39 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE ALBANY TRADE.

Conditions at this point are settling into some quietude as may be expected at this time of the year—barring the usual demands for "season" goods in the way of Screen Doors and Fixtures, Freezers, Refrigerators, Hammocks, together with the usual orders for Scythes, Snaths, Hay Forks and kindred goods. A satisfactory trade has prevailed thus far throughout the Spring considering the weather conditions which have been like most sections, backward. The flurry of hot weather we have had during the past few days brings us to a realizing sense that the "heated term" is to be in evidence and vacations will be the subject that will interest managers and clerks alike very soon. Prices are fairly well maintained on leading goods. The fortunates who contracted liberally early in the year have been able to sell at extremely low prices for carload orders in Heavy Hardware and Nails and a slight shrinking of the market on some leading goods will check under-selling but will enable the fortunate purchaser to meet changed conditions with but slight loss. There is very little of interest to report. The attention of careful observers has been turned towards the reports of the able papers that have been prepared by some of the master minds in the Hardware trade, and presented at recent Association meetings. They are certainly good reading and the views expressed, no doubt, agree in the main with those of the thinking Hardwareman. Competition everywhere is sharp, coming from all points, and developing from many new and unexpected centers and in new forms. We suppose it is a case of "the survival of the fittest" and the best posted and most level-headed houses will hold their own against "flighty" competition, winning out at last with not too large profit, but on the home stretch will get substantial returns from their well managed business. The St. Louis Exposition will undoubtedly draw merchants from all sections of the country and much interest may be expected in looking over the exhibits of Hardware and manufacturers' specialties which appeal so strongly to those engaged in the trade, and which "sandwich" in well with the other exhibits in art, science, and in the humorous side of the Exposition as well. The subject of collections always interests the financial man of every house, and it is pleasant to report an

SOLD BY ALL HARDWARE DEALERS.

improved condition by most of the houses in this section and an increase among smaller merchants of those who appreciate and endeavor to secure the premium for the prompt payment of bills. Barring the customary disturbances incident to a Presidential year, it is generally believed that a fair Fall trade may be expected.

Albany Hardware & Iron Co.

THE CLEVELAND TRADE.

"Be gentle and keep your voice low" is an excellent motto for salesmen when entering and leaving an office, as it will not interfere with others than the buyer, and to detain him only sufficient time to do the business, as others may be waiting to see him, and if the talk be loud, they may learn trade secrets, besides low talk is most impressive. Spring trade continues fair. How much "exhaust steam" has given it impetus, we can tell better in July, as the future outlook will depend on crops of grain and strikes. The strike crop may be modified by the organization of employers. The contest for open shops is so manifestly American, in principle it should prevail. Opportunity is essential to liberty and it is the glory of our flag that it guarantees that. Preparation for war is said to prevent it. With labor and employers both organized, both sides will be heard, and this will tend to prevent extreme action by either, and modify the feeling of selfishness. The partnership of interest between labor and capital is for the good of both and for the good of the country, but war may be the only specific for curing our ills. "Be gentle and keep your voice low" is good advice in all controversy, a the "Meek are to inherit the earth."

Lockwood-Taylor Hardware Co.

THE PITTSBURGH TRADE.

Some notable improvements are either contemplated or under way in Pittsburgh, which will give employment to a good many men. One is a filtration plant for the water supply, which is much needed for the health of our city. Another is the removal of what is known as the "hump," a portion of the business section covering several squares, which it is proposed to grade down some eighteen feet. The estimated cost of these two improvements is some $7,000,000. A warehouse terminal station comprising some forty large warehouses, said to be larger and better equipped than the famous Cupples Station at St. Louis, is already under way, the contracts for the buildings having been let and work started. The Wabash R. R. has about completed its entrance into our city at a very large outlay and has announced June 19 as the date for running regular trains into and out of the city. The bridge over the Monongahela River is a million dollar affair and the station and approaches to it are very substantial and handsome. Evidently the Wabash has come to stay and expects to get a large amount of business here.

Logan-Gregg Hardware Co.

THE CINCINNATI TRADE.

The heavy rains of the last of May, and the very hot days of the forepart of June have transformed the wire cloth business. Orders given for future shipment have been changed to orders for immediate shipment and screen doors and windows are in demand, as the "flies are simply swarming," writes a Southern Hardware dealer. Hose, screens, lawn mowers and covered galvanized cans are so greatly in demand that the dealers have little time to attend to much else. More lawn swings were sold in early June than all of last season. The wholesalers, H. Belmer & Co., B. H. Knapp and Johnson Bros. Hardware Co., had an over supply of wire fencing and poultry netting which they were anxious to get rid of at a reduced price; the fourth of June saw them entirely cleaned out. B. Schuette, of Schuchardt & Schuchardt, Berlin, Germany, one of the largest importers of machine tools in Germany, was a guest of Cincinnati manufacturers of machine tools the last of May. The firm purchases most of their tools in Cincinnati. Mr. Schuette gave several good orders for tools with local manufacturers before leaving. Hanging Rock, a short distance up the river, the scene of so much labor trouble in the iron region, is where the finest iron in the world is produced and which is the highest priced iron quoted on the market This iron is pronounced by experts as the only iron in America suitable for the manufacture of Krupp guns. Happily the militia has quelled the disturbance and the mills will be operated in full force, it is stated, at once. Buyers are manifesting great willingness to restock since the good weather set in; uncertainty has given place to comparative assurance now, where even to the first of the month buyers would hardly accord the salesman a hearing. It was thought that crops in this section would be damaged, but they are to the contrary, in the best condition, though retarded cherries, which should have been eatable, and were on last Decoration Day, are yet small and green. The First National Bank moved into its new sky-scraper on Fourth and Walnut Streets, and were ready for business June 9th. This building completes the list of high buildings which were in course of construction for the past year. The City Hall people claim that the tax duplicate for the city upon which the 1905 levy is to be based, will reach 221 million dollars, which will increase the revenue from taxation some $160,000.

The Cincinnati Press Association.

SAGINAW TRADE.

In this locality, we have had a cold, backward Spring, which has retarded planting sugar beets, corn and other seeds. The last few days it has been necessary to wear Winter clothing, in walking or riding out. These conditions have had a tendency to restrict trade and collections. With warmer weather, we look for more active business.

Morley Brothers.

THE DAVENPORT TRADE.

Orders are largely of the assorting up character, but they are sufficiently numerous to make the total footings about an average of previous years. There is no particular feature of the hardware trade that is at all remarkable; a quiet, conservative, easy-going way of doing things seems to pervade the whole business situation, and the people evidently enjoy a little respite or rest from the rushing, feverish conditions that have prevailed for so many years There are few, if any, complaints, and everybody seems satisfied and quite content with doing well, even if they do not expect that the year's gain will be as large as they have sometimes secured.

Sickels, Preston & Nutting Co.

THE CHICAGO TRADE.

Since the advent of warmer weather, orders have increased quite noticeably. From the nearby sections, considerable building is going on, or we should judge so from the fair-sized orders coming to us for Builders' Hardware, Gutters, Eaves Trough, Roofing Plate and Solder. Country trade is good in Barbed and Plain Wire, Cut Nails, Wire Nails, Painted Cloth, Lawn Mowers, and other Spring goods. Chicago city trade is only fair for this season of the year. Prices are without material change and are holding steady.

Wells & Nellegar Co.

ST. PAUL TRADE.

Conditions in our section are not improving as they should. A very late Spring with unseasonable weather ever since April 1st, has held back much business. We can see no improvement possible until the crops are assured. With the fear of lower prices and the lack of "ginger" in the people, it seems as though the danger of a bad condition was growing greater, and yet there is no excuse in our section for the depressed feeling. In the meantime, all jobbers are hustling, and some prices are demoralized. The retail merchant gets some bargains, even if his orders are light. We are glad to see that the manufacturer is holding his prices firm, as surely a decline in prices can be temporarily only, as there should be a good condition as soon as the people understand that no great disturbance can be in the air. For why should such come about, with a prosperous people such as we are; surely nothing should disturb us.

THE SAN FRANCISCO TRADE.

This city's hardware trade is pardonably proud of the fact that the Bradstreet and Dun agencies are mentioning the Pacific Coast as the source from whence proceeds America's best commercial reports. Our developing Oriental commerce is helping this section of the country out wonderfully. We are selling a large quantity of farm produce to the American, Russian and Japanese governments for their armies and navies in the Orient. Our supplies have been so reduced that we are going into the new crop year with our warehouses practically bare of everything, and as our crop prospects are excellent, we are justified in looking forward to another good year. Hence there is an air of confidence and cheerfulness throughout the whole coast and no complaints of any consequence are heard from any quarter.

Since last report of States Association work pertaining to retail Hardware circles an added force of enthusiasts of good and encouraging promise from the southern section of this commonwealth has rallied to the support of the State Association. Credit for this important factor is largely attributed to active personal efforts of O. F. Sites, the State Association's second term president, and Max M. Brown, one of his chiefs of staff. These two prominent San Francisco retailers have been south acting as a special committee from the California State Retail Hardware Association, and relating to their mission Mr. Sites accommodated the reporter by saying:

"Responsive to the urgent request of President Jas. W. Hellman, of the Southern California Retail Hardware and Implement Association, we went as a committee and attended the Southern Association's annual meeting. On entering the convention hall we were discouraged by the manifest lack of enthusiasm in association work, as roll-call showed barely twenty members present. No Los Angeles firms were represented. Being called upon for remarks we put in most of the day in missionary work, explaining how benefits are to be obtained from and through organization and in discussing plans to reach the hearts of all the dealers in the South to the securing of their co-operation by getting them to become members. After adjournment that afternoon between seventy and eighty telegrams were sent to the more widely scattered hardware dealers, and read as follows:

"'Retail Hardware and Implement interests at stake! Your presence urged for meeting, Odd Fellows' Hall, Friday morning. Answer.' Merchants near by were communicated with by telephone and both telegrams and 'phone messages were supplemented by a letter urging attendance at the Friday meeting to hear visiting members from the State Association relate successful experience in the northern part of the State and show how it is possible to bring to the Southern California hardware dealer the same profit and protection now being enjoyed by the trade in the North.

"The effort proved well worth the while. Eight Los Angeles firms were represented at the Friday meeting, also trade representatives from Santa Ana, Santa Barbara, Redlands, Azusa, Pomona, Santa Paula, Upland, Anaheim, Fullerton, Corona, Pasadena, Ocean Park, Compton, Orange, Riverside, Monrovia, Ontario, Long Beach, Oxnard, Covina, San Pedro and Ventura.

"Many communications were received from others who could not attend in person, but who expressed their full sympathy with the movement and signified their willingness to co-operate by joining the association. Both sessions, morning and afternoon, were enthusiastic meetings and full of promise, and the names of over twenty new members were added to the roster of the association's membership.

"We found the conditions, both in Los Angeles and other points in the southern country, to be no worse than those which originally confronted us in San Francisco and the North. The trouble with the members of the South has been from lack of understanding or knowledge as to how they should go to work to secure for themselves, through their organization, the benefits to which they are justly entitled and which we of the North now so happily enjoy.

"I believe we succeeded in shedding light upon these lines and that there should be no longer any good reason for the Southern association to remain apathetic. The South needs two associations, one for Los Angeles and one for the country, but both working co-operatively for the common good. So far as the country is concerned a healthy association is now an assured fact, and as for Los Angeles, it is my opinion that within a short time this prospering city will have a retail hardware association we shall be proud to welcome into our State Association.

"While we were South we had the pleasure of meeting at a most enjoyable banquet nearly all the hardware wholesalers of Los Angeles, and were pleased to hear them express their hearty approval of retail association work. They pledged us their support, and with the retail association plans once under way many of the evils now complained of must at least be mitigated or will entirely disappear.

"While in Los Angeles we were pleased at meeting an old acquaintance, S. V. Armstrong, now in the manufacturing trade at New Britain, Conn. He was formerly a retail Hardware merchant in San Francisco, and a member of the executive committee of the California State Retail Hardware Association Metaphorically speaking he took off his coat and was with us in our work at Los Angeles.

INDUSTRIAL PRESS ASSOCIATION.

THE PHILADELPHIA TRADE.

Summer has come with a rush and jobbers have for the last two months been getting some of the trade which was expected in the early part of the year. Retailers are also feeling the effect of the demand for hot weather goods, which are now moving. There is some complaint by manufacturers that the sale of Ice Cream Freezers is not quite up to the average, but this is, we think, explained by the fact that last Summer was unusually cold, and probably a large portion of the Freezers bought were carried over in the hands of the retailer this year. Screens seem to be in unusual demand, and the call for farming implements is quite active, although carpenter's tools are not so much in request. The falling off in this line is probably due to the high price of material and labor, which have done much towards discouraging building this year. As far as prices are concerned, there seems to be but little change in either direction. Manufacturers claim that while the cost of iron and steel has decreased somewhat it is more than offset for the higher prices paid for labor, while everything into which wood enters is costing more money, by reason of the increasing scarcity of lumber. Cotton goods are also firmly held, and it is surprising in how many articles in the Hardware line cotton finds a place, and as the price of spot cotton is still high there is very little important change in the prices of these goods. Collections seem to be improving as might be expected with the sale of early crops and farm products. The prospects throughout our section are good for large crops of berries and fruits. The only question is whether it will be possible to maintain prices with a crop of this size.

BRUSHES AND BROOMS.

In the mechanical world a need no sooner voices itself than some inventive genius answers it with a satisfactory device. New uses are constantly arising for the cleansing brush and new designs in various sizes are ready to hand before the use can be much more than anticipated. The broom with which the prehistoric housewife made neat her rude cave dwelling, with its rawhide door hangings, was doubtless a bunch of stiff twigs thong-lashed about a stick, and brooms of this shape were common in this country until recent years, and are still found among the rural districts of other lands. With the ever-growing need for brushes and brooms of every description, has kept pace the ever-widening search for suitable materials for use in their construction, and into their making have gone many strange things.

Upon the use to be made of a brush depends its shape, its manner of making and its composition, and as a result there are hundreds of different styles upon the market, from the dainty little camel's hair pencil to the big revolving wire brush used in street-cleaning machines. Among the smaller and finer brushes are those for artists' use, and they are fashioned from various soft materials, among them the elastic hair from the sable and the camel, and less expensive ones from the hair of the squirrel, rabbit and goat, while longer ones for varnishing purposes are made of the hair from the pretty gray badger and the bear.

Considerable skill is required in the manufacture of these fine brushes, for suitable hairs have to be selected and carefully washed and sorted as to size and length and all the tips must lie one way. The brushes are carefully formed so as to work to a point in using, and the original tip of the hair must be used, and not a stubby, cut end. The tiny, properly-shaped bunches are tied with a glue-soaked thread and finished with metal or wooden holders or else are inserted in quills soaked in hot water, and which upon cooling contract and hold the brush. Quills of domestic fowls are used, and the tiny ones from larks and quills.

Next in size come the various bristle brushes, with their endless shapes and uses, and for them the best and longest bristles come from Russia and Poland and other cold countries where the hog needs a more protective coat, and there the bristles sometimes grow to a length of from 7 to 12 inches. The American bristle is short and soft for here the hog is fattened young and rushed to slaughter before the bristles are of special market value, although they are used in the cheaper grades of brushes. Long bristles come also from the wild hog of China, and are gathered in the interior of that country and brought to the sea ports, where they are sorted by hand into little bundles containing the various lengths and with the tips all laid one way. They are also sorted as to the colors, which are black, white and red. In sorting as to length a workman takes a handful of the bristles, and striking their bases sharply on a hard surface forces them to stand evenly and then from the top he gently draws away all those overtopping a certain measure, and lays them in a certain pile, and so on down to the shortest lengths. Then they are tied up in bundles again and packed in bales for shipment. In this shape many imported bristles come to the different brush factories of this city, where they are worked up in numerous ways and reshipped all over the country. One maker, whose interesting plant is operated by electricity, fills many government orders and has just sent a large consignment of brushes to the Philippines, where Uncle Sam is putting a new face on things.

The first treatment given the bristles here is a thorough scouring, and the bleaching of the lighter shades. The cleaner grasps firmly by one end a handful of the stiff hairs, and on a common washboard, set in a tub of hot suds, he rubs them vigorously in a soapy froth, and, reversing the handful, he scrubs the other half until it resembles a clean paint brush. After rinsing the bristles, he opens them out in a loose, even layer on trays to dry, and when nearly dry, the trays, which are made of slats, are set one above another in a kiln, and under them a charcoal and sulphur fire is built, the fumes from which bleach and dry the bristles ready for use. As may be expected, many of the bristles get turned "wrong end to," and to get the tips all one way an ingenious process is carried out, which, simple as it is, must be seen to be appreciated, since it is based upon the well-known feather-like formation of hair, which enables it to slide smoothly in one direction only. A handful of the cleaned bristles is opened out in an orderly layer across a board covered with something like sandpaper, and across this layer a bar of wood is moved with a sawing motion up and down the bristles, which promptly crawl out from under the pressure like live things, and those found headed the wrong way can be reversed.

For the finer paint brushes of all kinds this sorting arrangement is necessary, since the original tip of the hair ends in a soft fringe and not a bristly stub.

The well-constructed paint brush has the outside covered with the graduated tips, which are also well scattered through it, and so tend to maintain its quality as its length gradually wears away. The longer bristles and the soft, long badger hair are used for the flat and round varnish appliers, and for other brushes known only to painters. The very best and stiffest and longest bristles are reserved for the shoemakers' own peculiar needs.

Some brushes are made by inserting tufts of the hair into holes drilled in wood, and this kind of work is called setwork, but when the holes are filled by a doubled bunch of the bristles, held in place by a wire through the loop, the work is called drawn work. In making the former brush a tuft of the bristles have one end dipped in hot liquid cement, composed principally of pitch, then are securely wrapped with a linen thread, redipped and thrust with a deft twisting motion into the drilled hole where the cooling cement holds them indefinitely. In the drawn work properly shaped pieces of wood or "stocks" are drilled full of holes, which are filled by having a loop of wire pushed through to receive within its curve a bunch of bristles and be jerked smartly back again, doubling the bunch into the hole in a flaring tuft. Over the unsightly wire stitches is glued or screwed a smooth veneer of wood, the bristles are trimmed an even length, and the brush is finished. In some of the factories the work is done by hand, and in others machines are used, but the principle is the same.

The power-run machine has an oscillating wheel which automatically delivers to the wire loop the bunches of bristles, the holes for the reception of which have been cut by rapidly revolving drills. In the solid-back brushes the tuft holes are sometimes connected by a laterally drilled tunnel, through which the wire is sent that holds the tufts in place.

Under the head of bristle work comes, among other things, the blacking brushes for both shoes and stoves, the round brush for adjustment on a long handle to use in washing tall windows and the similarly adjusted longer brush for cleaning dusty walls and ceilings. Whitewash brushes are of long, selected bristles, and beside being neatly bound with leather bands, have all interstices about the handle filled with a smooth cement which is ironed into place with a hot steel bar. Small cone-shaped brushes with a handle are used in washing beer glasses, narrower ones clean bottles, while much larger ones are made in crescent shape with bristles on both the outer and inner curves and are used in cleaning the outside and inside of beer vats. Various hair sweeping brushes are made to clean hardwood and tile floors and oval shapes are made with a leather strap across the back and are used in grooming horses.

Fine, soft white bristles are set in dainty handles of wood or celluloid for lather brushes, and hairbrushes are fashioned of bristles of varying sizes, down to the very finest for use on baby heads. The stiffest and coarsest bristles are caught between twisted wires and form round brushes for cleaning revolvers and steelwork. Large, round, stiff brushes are made for cleaning house, chimneys and have superseded the employment of tiny boys in that dusty work.

In the cheaper grade of brushes many things have been substituted for the expensive bristle, and some of the substitutes demand an expert to detect them, as the glossy hair from the tails of horses and mules is used with an admixture of genuine bristle until the result is calculated to deceive the very elect pig himself.

We Want to See You

in the Manufactures Building, Block No. 12A, at the greatest of all World's Fairs, St. Louis, 1904.

We want you to make Our Booth your headquarters. Ample arrangements have been made for your comfort and enlightenment. If you become tired, or want to write a letter or if you want to learn more about National Carpet Sweeper construction—you will find chairs for resting, desks and stationery for writing, demonstrators to explain the details of the manufacture of our product—our new patented features. Then, too, you will see for the first time (in addition to our regular improved line) our latest models—the most magnificent carpet sweepers ever produced by human mind and skill—including the **Louis XV, Hepplewhite, Sheraton** and **Mission** designs. Every one of these models is positively away ahead of any other carpet sweeper ever exhibited. The hand of art has never been more visible in the history of carpet sweeper building than is undeniably evident in our latest sweeper conceptions which permit no comparison—no competition. One more "NATIONAL WAY." Remember this page and look for what follows.

RAPID INCREASE IN IMPORTS OF INDIA RUBBER.

Imports of india rubber into the United States in the fiscal year about to end will exceed by far those of any earlier year, and will amount to over 40 million dollars in value. The demand for this article of exclusively foreign production for use in manufacturing has increased very rapidly in recent years, and the imports in the present fiscal year, as shown by the Department of Commerce and Labor through its Bureau of Statistics, will amount to about 60 million pounds, valued, as already indicated, at fully 40 million dollars. This rapid increase is apparently due, in a large degree, to the increasing use of this material for tires of vehicles of various classes, though in other lines of manufacture the demand is also very great.

The rapid growth in the use of this article of manufacture in the United States is illustrated in the fact that the total value of india rubber and gutta-percha imported in 1870 was less than 3½ million dollars, in 1880 9½ millions, in 1890 15 millions, in 1900 31 millions, and in 1904 will be fully 40 millions. The increase in quantity has not been quite so rapid as the increase in value, owing to the fact that prices have advanced materially by reason of the greatly increased demand of the various manufacturing sections of the world, especially the United States.

In 1880 the quantity of rubber imported into the United States amounted to 17 million pounds valued at 9½ million dollars, making the average price about 55 cents per pound. In 1890 the quantity imported was 34 million pounds valued at 15 million dollars, or slightly less than 50 cents per pound. In 1900 the quantity imported was 49 million pounds valued at 31 million dollars, or about 63 cents per pound; while in 1904 the record of the 10 months for which figures are now available shows an average value for rubber imported of 68 cents per pound. In addition to this, however, large quantities of material utilized in conjunction with india rubber are now imported.

Importations of "gutta-joolatong," a product of India, which is used in certain industries as a substitute for india rubber, now average more than a million pounds a month, while importations of old and scrap india rubber to be re-manufactured amounted to over 15 million pounds in the ten months of the fiscal year for which a record is now at hand. These importations of old and scrap rubber for re-manufacture and of gutta-joolatong as a substitute in certain lines of work are comparatively new and have only been reported by the Bureau of Statistics as a separate item during a very recent period. The fact that they are now utilized and that the importations of old and scrap rubber to be re-manufactured have reached such a large total indicates the great demand for this material in the manufacturing industries of the United States.

Brazil is the most important source of this material. More than one-half of the india rubber imported into the United States comes direct from Brazil, the total from that country alone being for the ten months 30 million pounds, valued at 20⅓ million dollars. The United Kingdom supplied in the same period over 7 million pounds, valued at 5¼ million dollars; Germany, 2 million pounds, valued at 1¼ million dollars; and "Other Europe," nearly 10 million pounds valued at over 7½ million dollars. These supplies of india rubber which come from the European countries are in practically all cases the product of their various colonies, Germany drawing her supplies from her colonies in Africa; the United Kingdom, from Africa, India, Ceylon, and the Straits Settlements, while the supply from countries designated as "Other Europe" is chiefly that obtained in Africa by Belgium from the Kongo country which it controls.

Belgium supplied in 1903 nearly 5½ million pounds of india rubber against less than 2¾ millions in 1900, less than 1 million pounds in 1897, and but 30,000 pounds in 1893. Germany's supply of rubber to the United States has grown from a little over 1½ million pounds in 1893 to practically 3 millions in 1903, while that from the United Kingdom has increased from 6½ million pounds in 1893 to nearly 10 millions in 1903. Portugal also draws considerable quantities of india rubber from her colonies in Africa, her total shipments to the United States having grown from 1½ million pounds in 1893 to over 2 millions in 1903. Brazil's supply of india rubber to the United States grew from 26,749,695 pounds in 1893 to 31,119,486 pounds in 1903, and in the year about to end that country will contribute about 35 million pounds, and probably exceed her total for any preceding year.

The table which follows shows the value of india rubber and

PFLEUGER'S ADVICE TO HIS TRAVELLING SALESMEN.

"As a great deal depends on our travelers, it is necessary that we watch this branch of the business very closely," writes E. A. Pflueger, secretary-treasurer of the Enterprise Manufacturing Company of Akron, Ohio, in an open letter to the company's corps of traveling salesmen. Continuing, he says: "If you are going to make a success you will have to work and work hard, for in these days of strong competition, you will find if you are a little lazy, the other fellow has got the business. You want to go out for business and do not forget that your tools, which consist of bulldog grit and ironclad nerve, must go with you.

"From this, do not gather the idea that we desire you to go out and horsewhip the first man you come to, but we do want you to go at your customer with the intention of doing business. When a customer says to you that he does not wish to buy goods, or that he is going to buy some other make, or your prices are too high, you want to be just as aggressive as a man can be and go for that customer, just as a dog goes for a rabbit, and never give up the chase until you have got your man.

"The great trouble of nine-tenths of the traveling men on the road to-day is, that they are not game and give up too easy, and if a customer says 'no,' they settle right down to what the customer says. Now, that kind of a man is not worth a cent to us and he had better be sawing wood, shoveling dirt or following the plow, than out on the road to sell goods.

"In these days of hustle the only way to make a success is to have a will power of your own that is stronger than the will power of the man you deal with and have him deal as you want him to deal and not as he wants you to deal. A good traveling man will never leave a town until he has sold a bill of goods and secured the best dealer in town. Now you may say that it is impossible to secure the best dealer in town—we will admit that once in a while it is the case, but if a traveler is made out of the right kind of stuff and has only got the courage and patience to keep up the fight, hang right on to his customer, he will get the dealer sooner or later, nine times out of ten.

"That is the kind of traveling man we want. We want a traveling man to go into a town and pick out the best dealers and go for them with all the vim and energy he can command and work up enthusiasm until he is carrying 200 pounds to the square inch and stay right with them until he sells a bill of Pflueger's goods. Another thing, many of our travelers put off the shipment of goods until February, March, etc. What we want to do is to ship the goods at once if possible. Instead of getting orders for $50, $75 or $100, get orders for $250, $500, and $1,000 and so on up; you can't make us feel badly as to the quantity. You don't get anything in this world unless you ask for it.

"Good orders are not thrown into your order book, but you have to work for them and work hard. If you make a squeal for a small order you will get a small order, but if you fight for a big order you will accomplish a great deal more than you would have done by working for a small one. There is no use in boring with a gimlet when you can take a two-inch auger. A gimlet hole is only a small hole compared with that of a 2-inch auger. We want our travelers to feel that we have the best goods in the world and that our prices are right and very reasonable; and they must impress upon everybody they meet and everybody they sell to that we have the best goods, and fill the dealers so full of 'Pflueger's goods' that they can't help but talk our goods.

"Now, if you will follow our instructions, each and every traveler will be more valuable than he has been heretofore. Do not say 'It can't be done;' if you feel that way, we would rather you would resign and quit, because when a man feels he can't accomplish anything, he will never make half the effort he would if he were determined to do it. Go to work as if your life depended upon what we have to say to you here, and you will be surprised at your success. Stop and think what we have travelers out on the road for; what are we paying such enormous sums of money for? It is to secure business in the first place, educate those to whom you sell goods, and advertise Pflueger's goods broadcast."

What Mr. Pflueger says of his line and the men who sell it will apply to other lines as well.

CHANGES IN THE SAFE INDUSTRY.

American manufacturers of safes came out with flying colors from the ordeal through which their products passed in the big Baltimore fire, demonstrating their superior merit in every way. The industry has always been an important one in America, but it has undergone many changes in recent years.

"The Baltimore fire has given as severe a test as could be desired of the safe and the safe-deposit vault that has been brought to perfection within the last ten years," said the manager of one of the largest safe manufacturing firms in New York a few days ago. "At the time of the Chicago fire there was nothing like them in existence. The modern safe is as much of an improvement over those in use then as the modern battleship is over those in use during the war of 1862.

"Fires in one part of the country and another are gradually taking the old-fashioned safe out of existence and manufacturers are not putting others on the market to take their places. There is no denying the fact that cheap safes are made. Some of them look handsome in an office, but they are no more protection against fire than so much wood.

"Manufacturers used to aim to make a safe that was both burglar-proof and fireproof. They do not do that now. A fireproof safe—that is, a safe that will absolutely preserve its contents in a fire—is of very different construction from a burglar-proof safe. The perfect system of night watchmen in American office buildings and banks has reduced the demand for burglar-proof safes. Any burglar who touches a safe nowadays or gets anywhere near the door of a safe-deposit vault is likely to set off an electric alarm system that will bring the police or an armed guard upon him before he can get away. We have not had a bank burglary of any account in New York for twenty years.

"In constructing fire-proof safes for offices in the skyscraper buildings we have to look out for danger from falls as well as destruction from fire. That is where the modern safe has stood the supreme test in the Baltimore fire. One of our safes, weighing 6,000 pounds, fell nine stories and is barely dented. Not long ago one of the modern safes fell twelve stories down the elevator shaft of a New York skyscraper. It cost $1,200 to repair the elevator shaft and only $26 to repair the safe. Some of the old-time safes were built of small iron plates—scrap iron, it might almost be called—riveted together at the corners. They might keep the fire out all right, but in a fall they went to pieces.

"The modern safe is a solid, one-piece angle frame, front and back, which cannot fall apart. It has eight flanges, compared with four in the old safes. The bolt-work and lock is away back of the fire-proof filling, and not on the edges of the door, as formerly. The fireproof filling in the flanges or steps is of asbestos, marble dust and chemicals. Each manufacturer uses his own composition of chemicals, and keeps it a secret. The chemicals generate steam during a fire, which not only assists in preserving the contents of a safe, but reduces the chances of metal expansion.

"It follows, naturally, that safes are more expensive than they were. A business man does not hesitate now to spend $1,000 to $5,000 on his safe. When you get far above the last-named price you get into vault work, which is a separate branch of the business. Safety vaults are built in conjunction with the construction of the building. The safes in them are designed by experts. They cost all the way from $10,000 to $300,000, which is the price of the vault in the First National Bank in Chicago.

"Steel is used in the construction of a safe whenever possible. For reasons not necessary to explain it is not always possible. Armor plate is not much good for safes. It is too expensive and does not work easily. We get the best results from a material manufactured for the purpose called chrome. Business men are buying more safes than they used to, because no man carrying a mercantile stock can get a fire insurance policy unless he keeps his books in a fireproof safe during the night, or in hours when they are not in use for business. Burglar-proof safes are still made for smaller towns or rural districts where the system of police supervision, night watchmen and burglar alarms is not so perfect as in New York."

WANTED—A salesman experienced in Hardware, Stoves and Housefurnishing Goods. Fine opening with a good house for the right man. Best references required. Day & Holt, Katskill, N. Y.

WANTED TO PURCHASE, Bankrupt Stocks or Discarded Patterns, and, in fact, anything in the Hardware, Paint or Stove line. Bael's Hardware Store, Trenton, New Jersey.

SIXTY YEARS OF THE TELEGRAPH.

The *Wall Street Journal* recalls that a notable event occurred on May 1, the sixtieth anniversary of the sending of the first Morse message over a telegraph wire in this country. On that day in 1844 a message was sent over the telegraph line building between Baltimore and Washington, telling of the proceedings of the convention in Baltimore which nominated Henry Clay for president. The development of the telegraph in the subsequent sixty years has transformed the business of the world. When it is said that there are in this country about 245,000 miles of telegraph lines, over which, in 1903, 91,391,443 messages were sent, some idea is conveyed of the enormous importance of the first message transmitted in May, 1844. There are now 1,764 private and government cables, having a length, in nautical miles of 204,527, and there are, taking the whole world into account, more than 1,000,000 telegraph and cable messages transmitted every day of the year. The following table shows the number of messages sent in each of the more important countries, the statistics for the United States being those of 1903; of Great Britain, those of 1902-3, and those of the other countries being for 1901:

	No. of messages.
United States	91,391,443
Great Britain	92,471,000
France	48,144,151
Germany	46,008,794
Russia	18,565,867
Austria	15,057,176
Hungary	14,370,439
Italy	9,064,484
Belgium	14,411,487
Netherlands	5,393,872
Spain	5,058,104
Norway	2,267,915
Sweden	2,643,742
Total	364,848,474

If, in addition to the telegraphic service, the statistics of telephones are added, the significance of the revolution brought about by the invention of the electric wire is intensified. In this country, taking into account only the lines of the American Bell Telephone, there are 3,281,000 miles of telephone wire and 1,277,000 telephone subscribers.

HISTORY OF WIRE ROPE.

It is not an uncommon thing in this age of advancement in industrial and engineering matters for the present-day engineer to assume that he knows much more than his ancient brother, and while this is true in many things, it frequently happens that an invention or appliance commonly believed to belong to modern times is found to have been known and used centuries ago.

Ropes made of various kinds of fibre and leather are of very ancient date. Ropes made of palm have been found in Egypt in the tombs of Beni-Hassan (abut 3,000 B. C.), and on the walls of these tombs is also shown the process of preparing hemp. In a tomb at Thebes of the time of Thotmes III. (about 1,600 B. C.), is a group representing the process of twisting thongs of leather and the method of cutting the leather into thongs. The Bible tells us that Samson was bound with ropes, and that the spies sent by Joshua into Jericho were let down in a basket, presumably by means of a rope.

At Nimrod, Assyria, a carved slab showing the siege of a castle was found on which a soldier was represented in the act of cutting a rope to which a bucket for drawing water from a well outside the castle walls was attached.

Although the Assyrians practiced the art of wire beating, no evidence has been found to indicate that they used wire for making rope. The excavations at Pompeii have, however, brought to light a piece of bronze wire rope nearly fifteen feet long and about one inch in circumference. This rope is now in the Musio Borbonico at Naples.

It consists of three strands laid spirally together, each strand being made up of fifteen wires twisted together, and its construction does not, therefore, differ greatly from that of wire ropes made to-day. Pompeii was buried A. D. 79, over 1,800 years ago, but how long wire ropes had then been known it is impossible to tell, though judging by the knowledge shown in the construction, it may be safely concluded that they had been known for a considerable time. The uses to which these ropes were put are not definitely known, but further excavations may shed some light on the subject.—*Mines and Minerals.*

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, etc.

Alton, Ill.—Beardslee Hardware Company has been incorporated; capital, $10,000; dealing in Hardware and agricultural implements; incorporators: H. H. Beardslee, Charles L. Beall, Levi Davis.

Amarillo, Texas.—Amarillo Hardware Company has been incorporated. Capital stock, $10,000. Incorporators: H. A. McDonald, I. J. Tolleson and J. W. Field.

Arlington, Oregon.—Arlington Implement & Hardware Company has been incorporated; $10,000; W. L. Barker, M. E. Shurte, Arthur Schilling, incorporators.

Boise City, Idaho.—The Loree & Son Hardware Company have opened a new Hardware store in the Wood Building between Ninth and Tenth Streets.

Brunswick, Me.—Eaton Hardware Company has been organized at Brunswick, for the purpose of carrying on a wholesale and retail Hardware business, with $25,000 capital stock. President, Chas. O. Eaton, of Brunswick.

Connellsville, Pa.—The Schell Hardware Co. has been incorporated. Capital stock, $60,000.

Daytona, Fla.—The Gruber-Morris Hardware Company has been incorporated. Capital stock $25,000.

Gibbon, O. T.—W. M. McGibbon has opened a general Hardware and agricultural implement business.

Iola, Wis.—The Thompson Hardware Co. has been incorporated. Capital stock, $5,000. Incorporators: Theo. Thompson, S. M. Myhre, G. A. Gullickson and F. W. Black.

Jackson, Mich.—The McCleland Hardware Company has been incorporated, capitalized at $100,000, and with $75,000 of that sum paid in. Thomas McCleland, president of the Jackson Bank, is president; his son, Vernon McCleland, is vice-president, and P. B. Bridges, late steward of the Lunatic Asylum, is secretary and treasurer. The other stockholders are among the leading business men of this section.

Jewett, Texas.—The Jewett Hardware & Lumber Company has been incorporated. Capital stock, $10,000. Purpose, purchase and sale of lumber, Hardware and builders' material. Incorporators: F. L. Berry, J. C. Hill, Houston, and John B. Peyton, Trinity.

Lexington, Ala.—Hardware Lumber Company has been incorporated with a capital stock of $30,000. Incorporators: W. L. Hocker, H. W. Watson and others.

Los Angeles, Cal.—The Los Angeles Hardware Company has been incorporated with a capital stock of $25,000. The directors are: R. E. Goodrich, H. C. Peet, M. W. Goodrich, C. I. Peet and D. O. Peet, all of Los Angeles.

Malone, N. Y.—Hiram D. Thompson, N. Monroe Marshall and Frederick J. Reilly are the incorporators of H. D. Thompson & Co., capitalized at $65,000 for dealing in Hardware.

Marshfield, Oregon.—Pioneer Hardware Company has been incorporated. Capital stock, $25,000. Incorporators: Eugene O'Connell, E. K. Jones, T. E. Hague.

New York, N. Y.—D. J. Hughes & Co. has been incorporated to deal in Hardware supplies; capital, $30,000. Incorporators and directors for the first year: D. J. Hughes, John Leacock, B. F. Hughes, New York.

Nottingham, Ohio.—The Nottingham Hardware and Supply Co. has been incorporated by Charles M. Mix, J. J. Linkhart, E. C. Kurtz, W. J. King, C. R. Stedman; capital, $10,000.

Oskaloosa, Iowa.—The C. N. Dack Hardware Company, with C. N. Dack and H. H. Harrold as managers, has been incorporated. Capital stock, $10,000. To conduct a retail and wholesale Hardware business.

Oskaloosa, Iowa.—The M. D. Gilchrist Company has been incorporated to conduct a wholesale and retail Hardware business which will be managed by M. D. Gilchrist and Frank Huber. Capital stock $10,000.

Palouse, Wash.—The Palouse Hardware and Implement Company has been incorporated. Capital stock $30,000.

Port Gibson, Miss.—The Claiborne Hardware Company has been organized in this city, with a capital stock of $25,000. The following are the directors: Joseph T. Drake, D. C. Houston, T. R. Warburton and H. W. M. Drake.

Salem, Mass.—The Bay State Hardware, Paint & Crockery Company has opened a new store at 26 Front Street with a full line of Hardware, paints, crockery, etc.

Salem, Mo.—Martin & Dent Hardware Company has been incorporated to do a general Hardware business; capital stock, $7,500, all paid. Incorporators: W. T. Martin, E. B. Martin and T. P. Dent.

Sarahsville, Ohio.—Sam Brown has opened a new Hardware store in the Foster Building.

Sawyer, Wis.—Schmidtke & May Company has been incorporated with a capital stock of $20,000, to carry on the wholesale business in agricultural implements, also to handle light Hardware.

Unionville, Conn.—The Union Cutlery and Hardware Company has been organized. Officers: President, H. C. Hart, of Unionville; vice-president, F. E. Faber, of Springfield, Mass.; treasurer and secretary, J. J. Ramage, of Holyoke, Mass.

Utica, N. Y.—Henry & Williams is the name of a new firm which has been formed and which is doing business in tinsmithing and dealing in Hardware and builders' supplies at 128 and 130 Court Street. The members are Joseph P. Henry, who has been in business at this stand for eight or ten years, and R. H. Williams, who was with Wright, Dana & Company for twelve years, with D. S. Foster five years and with Shaughnessy Brothers two years.

Worthington, Ind.—Shaw Hardware Company has been incorporated; capital stock, $10,000, by H. C. Shaw, C. N. Shaw and W. B. Harrah.

Changes.

Anoka, Minn.—C. M. Perry, of Minneapolis, has purchased the Vrooman Hardware store.

Bancroft, Neb.—The firm of Schwedhelm & Winter, dealers in Hardware, stoves, paints, sporting goods, etc., have dissolved partnership, Mr. Winter disposing of his interest to the senior partner, F. S. Schwedhelm, who will continue under his own name.

Canton, S. D.—Cloud Bros. & Johnson Co. has sold its Hardware business to John Seubert.

Eastport, Me.—Edw. F. Heffron, for the past few years junior member of the Hardware firm, Hinkley & Co., has recently come into possession of the entire business, which will be continued as formerly at the old stand.

Galesburg, Mich.—The Hardware stock of Havens Thomas, deceased, was sold by the administrator to F. C. Burroughs for $1,050. The stock invoices $2,600.

Kirklin, Ind.—McKinney Bros. are successors to the Ferrier Store, dealers in Hardware, stoves, paints, sporting goods, etc.

Marshalltown, Iowa.—Cronk Bros. succeed Miller & Crary in the Hardware business.

Mechanicsburg, Pa.—S. F. Hauck, of the firm of Hauck & Co., has bought the interest of the George W. Hauck estate in the Hardware store owned by the firm.

Mechanicsville, Iowa.—H. Webbles has purchased the interest of C. B. Carpenter in the Hardware store.

Rockford, Ill.—Because its manufacturing enterprises have overshadowed all other branches of its business and have outgrown the present quarters the J. L. Clark Hardware Company is to retire permanently from the retail Hardware business and devote all its energies to manufacturing. The company will dispose of its entire stock at the corner of East State and South Second Streets as rapidly as possible and will transfer its manufacturing business to the south wing of the Knowlton property.

Schuyler, Neb.—T. E. Molacek has sold his Hardware and implement business to parties from Central City.

Spencer, Iowa.—The Hardware firm of Leach & Wishard have dissolved, F. M. Wishard being succeeded by H. H. Thompson. The new firm will be known as Leach & Thompson.

Spencerville, Ohio.—On May 9th State Senator Berry closed a deal by which he acquired the interest of Mr. Mack, the junior member of the firm of Walfert and Mack, doing a Hardware business at Spencerville.

Steubenville, Ohio.—J. D. Porter has sold his Hardware establishment on Market Street to T. C. Weir and James McClave, of Toronto.

Waldo, Ohio.—Joseph Kraner and Wallace Klingle have purchased the Schlass Hardware store.

Walla Walla, Wash.—J. L. Elam Hardware Company have disposed of their Walla Walla business to the Drumhiller Hardware Company, who have taken possession.

Wetumka, I. T.—The Wetumka Hardware Company have succeeded Richards-Boyle Mercantile Company.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Adrian, Mich.—The Peerless Wire Fence Company, Ltd., has been incorporated to manufacture and sell woven wire fencing, gate tools, etc. The incorporators and managers of the company are as follows: Charles G. Hart, Amaziah D. Ellis, James V. DeFoe, Will H. Burnham and Byron L. Shaw, of whom Mr. Hart will be chairman. Mr. Burnham, treasurer, and Mr. Shaw, secretary.

Atlanta, Ga.—The Carmical Implement Manufacturing Company has been incorporated with a capital stock of $30,000, with privilege of increasing same to $100,000, which is expected to be done at an early date. Among the incorporators are: D. A. Carmical, of Fairburn; I. C. McCrory, of College Park; Malcolm McNeel and Chas. A. Neel, of Atlanta. The building, which will be located near East Point on the Central and West Point railroads, the headquarters of the corporation, will be in the Temple Court Building.

Berea, Ohio.—The Crescent Novelty Company has been incorporated. Capital stock $1,000.

Boston, Mass.—The American Lock Nut Company has been incorporated. Capital stock $200.000. Incorporators: Joseph H. Burrows, Alfred Moore and J. Otis Simonds.

Brookhaven, Miss.—The Brookhaven Furniture Company has been incorporated to manufacture furniture and Hardware and buying and selling the same. Capital stock $10,000

Chicago, Ill.—Park Gale Manufacturing Company has been incorporated; capital, $50,000; object, manufacturing tools and machinery; incorporators: George N. Lyman, G. R. Collins, Frank H. Lyman.

Chicago, Ill.—Wickey Company has been incorporated; capital, $10.000; manufacturing implements, machinery and tools; incorporators: Edward W. Wickey, B. B. Wickey, Monroe T. Moss.

Chrisman, Ill.—C. E. Bonner, George W. Fair, and D. B. Tucker are the incorporators of the C. E. Bonner Manufacturing Co., capitalized at $30.000 for the manufacture of the Victor pipe wrench.

Glen Rock, Pa.—Standard Screen Works has been incorporated. This company has been manufacturing window screens for some time. The capital is $10,000. The incorporators are: W. C. Seitz, E. K. Rohrbaugh, C. S. Rohrbaugh, F. A. Deihl, E. E. Seitz, Charles Harpe, George Warner, W. C. Hildebrand, J. F. Neuhaus, J. Q. A. Foust, M. S. Watson, Charles Fickes, Levi Anstine, Clyde H. Seitz and Allen M. Seitz.

Holcomb, Ill.—Hartwell Brothers, of Chicago, have commenced the erection of an extensive factory in which they will manufacture handles, which will represent an investment of $40,000.

Milwaukee, Wis.—Milwaukee Tool Company has been incorporated; capital stock, $5,000; incorporators: Otto F. Ewert, Arthur J. Machek and John Haas.

Newark, N. J.—Westbury Lamp Company has been incorporated and will be located in the Brabson Building, Liberty and Hamilton Streets, this city. The object of the company is to manufacture, purchase and sell incandescent electric lamps and other electrical devices and mechanisms. Harry Westbury and Charles A. Brach, of Harrison, and William H. Meadowcroft, of Boonton, are the incorporators. The capital stock is $5,000.

New York, N. Y.—Mary L. Bramble, Silas D. Scudder and Clarence G. Galston are the incorporators of the D. K. Bramble Co., capitalized at $15,000, for the manufacture of horseshoers' supplies.

Piqua, Ohio.—Blaine Harrow Manufacturing Company has been incorporated. Capital stock, $60,000. W. K. Boal, A. M. Leonard, E. E. Nutt, Frank McClintock, F. F. Campbell and George E. Blaine, incorporators.

Pomola, Cal.—R. C. Anderson, of El Paso, Texas, will erect a plant for the manufacture of his iceless refrigerators.

Richmond, Ind.—The Railroad Stove Company has been incorporated; capital, $30,000; directors: Benton D. Game, Edgar E. Brown and Robert D. Brown.

Rochester, N. Y.—The Safety Fruit Picker Co., of Rochester, has been incorporated with a capital of $5,000 to manufacture safety fruit pickers. The directors are: Willis H. Coon, Charles L. Hunt and George C. Haines, all of this city.

Salem, Mass.—The Pratridge Gas Heater Company has been incorporated. Capital stock $100,000. Promoters: Herbert V. Hunt, Calvin R. Washburn, W. M. Pratridge.

Saratoga Springs, N. Y.—Perfect Manufacturing Company has been incorporated (tools). Capital $15.000, and directors: S. C. Brown, W. P. Tarrant and H. C. Todd, of Saratoga Springs.

Unionville, Conn.—Union Cutlery and Hardware Company has been organized with a capital stock of $30,000. The incorporators are: H. E. Hart, Unionville; F. F. Taber, Springfield; and John J. Ramage, Holyoke.

Wheeling, W. Va.—Ground has been broken for the big plant of the Warwood Tool Co., just north of the city limits. This will be the largest concern of its kind in the country.

Changes.

Alliance, Ohio.—A transaction has just taken place whereby the Alliance Brace & Tool Company disposes of its business in this city. J. R. McGinley, of Pittsburg, has purchased the patent rights for making the Rue trenching brace and has also secured the special machinery for manufacturing the same. Mr. McGinley is connected with the Duff Manufacturing Company, but it is not known here whether the brace business will be combined with the former industry or operated by a separate company.

Boise City, Idaho.—The Idaho Implement Company has increased the capital stock from $25 000 to $150.000.

Hudson, Mich.—The Globe Fence Company is erecting a new plant at a cost of $17,500.

Le Roy, N. Y.—The Le Roy Plow Co. is constantly adding to their already well equipped plant. The growing business of the company has made it necessary to erect two more large buildings. One is now in course of construction, the foundation having been completed. The building will be used for pattern making and its dimensions will be 60x22. It will be a modern structure with steel covering. A fireproof vault will be installed to protect valuable patterns. A little later, a stone building 124x70 will be erected and will be used as a foundry building. This will also be equipped with a fireproof vault. An exhaust system is being installed at the plant. By this system all dust and shavings are picked up by the air process and carried from the building, thus keeping the interior of the building clean.

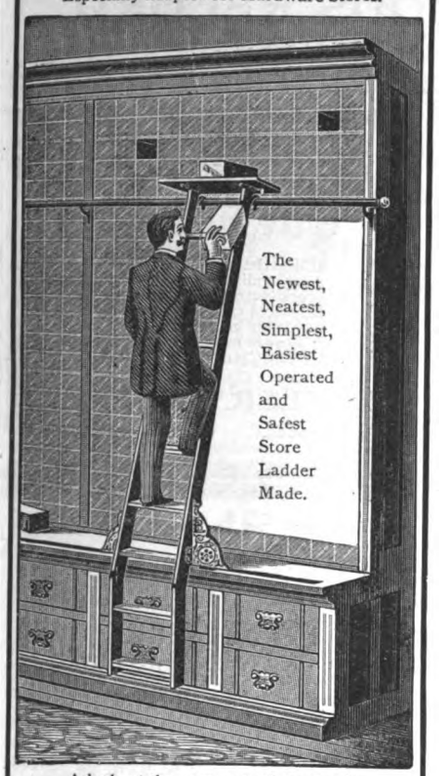
Louisville, Ky.—Turner, Day & Woolsworth, handle makers, will establish a branch at Decatur, Ala. The capital is $667,800.

New Albany, Ky.—The Gohmann Bros. & Kahler Company, stove manufacturers, have increased the capital stock of the concern from $10,000 to $25,000. The object of the increase of the capital stock is to increase the capacity of the plant of the company in East Fourth Street. An addition will be built to the foundry building, which will be equipped so as to double the capacity of the plant.

New Kensington, Pa.—The United States Furnace and Foundry Company, a concern recently organized with a West Virginia charter by Charles Bradley, of Pittsburg, has decided to locate its plant here. The plant of the Bradley stove foundry, which was absorbed by the Pittsburg Stove and Range Company and abandoned, has been purchased for $27,000, and will be put in shape to meet the requirements of the new company. Fifty men will be employed at the start.

New Orleans, La.—The National Manufacturing Company intend to erect an enameling works in St. Peter Street, between Gaiennie, Calliope and Tchoupitoulas Streets, which will cost $172,000. It will be a five-story brick structure, with a composition roof. It is expected the plant will be added to later on and made one of the largest in the South. Work will commence on the building shortly.

Fires.



Detroit, Mich.—The Skinner Harness and Carriage Hardware factory at Gananoque was destroyed by fire. Loss $75,000.

Pittsburgh, Pa.—Fire in the Liberty Street Building, occupied by H. J. Carnahan, Hardware and cutlery, and Johnson & Toman, decorating and molding, did $75,000 damages, partly insured.

PATENTS
procured promptly and with care in all countries. Also trade marks and copyrights.

GEM FOOD CHOPPER

We have been doing some very effective advertising of Sargent's Gem Food Choppers but we are planning to make the advertising of the coming fall and winter even more effective than any we have heretofore done, with the idea of impressing on the mind of every housekeeper the fact that the Gem is needed in her kitchen.

You should make the Gem one of your leaders, there is profit in it and we help you sell it by our general advertising and by furnishing you with helps for your local advertising.

Ask your jobber about the Gem.

HALL STAND HOOKS

These Hooks are intended not only for Hall Stands, but for Restaurants, Hotels, Barber Shops, Lodge Ante-Rooms, &c. The cut shows one of a number of patterns we make—some in solid bronze and some in iron. Notice that there is a hook for the coat and one for the hat; other styles are made double, two hooks for coats and two for hats. They are nicely finished goods that will sell if displayed and brought to the attention of prospective purchasers.

HAVE YOU HEARD OF

THE FOUR-LEAF CLOVER CREAM SEPARATOR?

Your customers have, and they will be asking you about it. This separator is a **money maker for you** because:

It is extensively and interestingly advertised—this advertising we already know, has caused a great demand from dealers. When the consumer is interested the path of the dealer is smooth. YOU don't have to create the demand. Your customers call for "The Four-Leaf" and you do the rest. Won't you ask us about YOUR part in the transaction—the profit-making part?

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, etc.

Milwaukee, Wis.—The Seaman Manufacturing Company has been incorporated to manufacture golf balls and athletic goods Incorporators are: E. M. Alexander, Chas. L. Eline and John F. Burke.

Newark, N. J.—Richard Hill Manufacturing Company has been incorporated to manufacture and deal in huntsmen's clothes and sporting goods. Capital stock $10,000. Incorporators: Isaac Cohen, R. F. Hill and Sigmund Loenwenberg.

New York, N. Y.—Schoverling & Welles have opened a sporting goods salesroom at 2 Murray Street. The senior member of the new firm is Albert A. Schoverling, who was a salesman in the employ of Schoverling, Daly & Gales for several years and is well known in the sporting goods trade. He, as well as F. W. Schoverling, also a member of the new firm, is a son of the late senior member of Schoverling, Daly & Gales. Harry S. Welles is also well known, especially in the gun and ammunition trade. He was employed by J. H. Lau & Co., 75 Chambers Street, until recently, and previously was with A. G. Spalding & Bro. until that firm discontinued the sale of guns, ammunition and fishing tackle in its Nassau Street store and devoted its attention to the sale of athletic goods and outdoor games instead. The new firm's location is good, just west of Broadway, near the sporting goods district, and in the center of the Hardware, machinery and yachting supplies district.

New York, N. Y.—The Crippen Athletic Goods Company has been incorporated by D. V. Hopps, B. M. L. Ernst and M. H. Cane. The capital stock, $50,000.

Pittsburg, Pa.—The Locust Mountain Powder and Dynamite Company has been incorporated. The capital stock is $10,000. The officers and directors: M. D. O'Hare, James A. O'Hare, P. H. Burke, W. J. Walsh, M. F. Gibson, B. V. O'Hare and E. D. Longacre, all of Shenandoah, Pa., and J. H. Behler, of Nesquehoning, Pa.

Point Pleasant, N. J.—Hayes Reynolds, of Plainfield, will open a sporting goods store, and will make a specialty of fishing tackle.

San Francisco, Cal.—A new corporation has been formed by Baker and Hamilton, sporting goods jobbers, and others, capitalized at $1,000,000.

Washington, D. C.—The Nuremberg Powder Company has been incorporated. Capital stock, $10,000, by Ellwood B. Brumm, James Leckie and Lottie Leckie.

York, Neb.—Grunz & Cook have opened a sporting goods store and repair shop. Mr. Grunz was for several years located in Grand Island and is an experienced repair man on guns and bicycle work. Guns, base ball goods, fishing tackle, ammunition, etc., are carried.

Changes.

Acton, Mass.—American Powder Company, of Boston, has purchased a plot of ground adjoining its mills on the Stow Road, and new buildings will be erected thereon in the near future, which will greatly increase the capacity of their plant.

Fort Smith, Ark.—Land has been purchased at a point between Fort Smith and Bonanza by the E. I. DuPont Company, where they will establish a powder mill.

Goshen, Ind.—The Goshen Rubber Company has increased its capital stock from $100,000 to $200,000.

New Haven, Conn.—The Winchester Repeating Arms Company will erect a three-story brick office building on Main Street. Adjoining this will be another building, 44 x158 feet, three stories high, to be used for factory purposes.

Pasadena, Cal.—W. J. Wenger & Son have succeeded to the bicycle business of J. O. Boehm, at 53 East Union Street. Wenger & Son were formerly at 26 South Raymond Avenue. All of the stock has been moved to the new location.

Plainfield, N. J.—S. W. Frucht has sold out his entire stock of bicycles, bicycle sundries and musical instruments at 224 Park Avenue and has removed to his new store at 224 West Front Street.

Rhinebeck, N. Y.—George Tremper & Co. have closed out their bicycle department in order to make space required for their regular line.

Terre Haute, Ind.—Langton & Co., manufacturers of gun stocks, will remove to East Peoria and will erect a factory, and will employ twenty men.

Waterloo, Iowa.—E. C. Davis, of Seneca Falls, has opened a branch of his bicycle repair shop in this village, on East Main Street.

Youngstown, Ohio.—John M. Owen has purchased the sporting goods store and rifle range formerly conducted by J. N. Cole, at 309 West Federal Street. Mr. Cole will devote his attention to automobile construction.

MANUFACTURERS RECORD,

Continued.

Rock Falls, Ill.—Cobb & Drew, manufacturers of rivets, tacks and nails, are building a new factory adjoining their wire mill, which was erected three years ago. Machinery will be supplied from their old factory in the Lawrence Building where they have been located for the last seven years.

Rockford, Ill.—The Dobson Manufacturing Co., churns, tanks and dairy supplies, is building a foundry, 70x170 feet, one story high. Heretofore the company has had its foundry work done by other firms.

Winthrop, Me.—The North Wayne Tool Company have purchased the Condensed Milk factory in this village and will manufacture axes here in connection with the business at North Wayne.

Miscellaneous.

Columbia, Pa.—At a recent annual meeting of the Keeley Stove Company the following directors were elected: Frederick Bucher, D. H. Detwiler, Horace Detwiler, Wm. B. Given, Esq., J. Haldeman Herr, William Morris, H. M. North, Esq., M. S. Shuman and John Westerman. The latter succeeds to the vacancy caused by the death of the late Hiram Wilson. Treasurer, J. E. Shomier.

Our Catalogue is "Our Drummer."

One for Bright Iron.
Also Liquid Polish.
W. W. CALLERY & CO.,
PITTSBURG, PA.

Grasp It, Mr. Retailer

When you have an opportunity of selling bent railings or special work of any kind in your locality forward us the specifications.

We manufacture Bent Brass Railings and Grill Work for Offices, Stores and Saloons and supply Brass, Bronze and Iron Hardware, Refrigerator Trimmings, Latches, Hinges, Hooks, etc. Write for our 1904 Catalogue.

Western Brass Mfg. Co.
63-65 South Canal St., Chicago, Ill.

OUR GASOLINE LIGHTING SYSTEM

and Lamps are delighting our customers, because our Improved Generators are properly constructed; we have been improving them for four years—anyone can easily clean them. Hundreds of testimonials from merchants. We don't ask you to take our word for it—we send them on trial. 600 candle power Lighting Systems—Arc Lamps—Gravity Lamps—all styles. We are selling hundreds of our Improved Generators (burners) to put on other lamps where the burner has proven worthless. Reduce your light bills 75 per cent., and sell to your neighbors.

Agents wanted everywhere. Absolutely safe. Permitted by Insurance Companies. We are headquarters for all kinds of mantles. Write for catalogue and prices.

STANDARD GAS LAMP CO. (Established 1899.)

THE HICHEST MARK

In tensile strength, elongation and elastic limit in Horse Nails has been attained by us in the

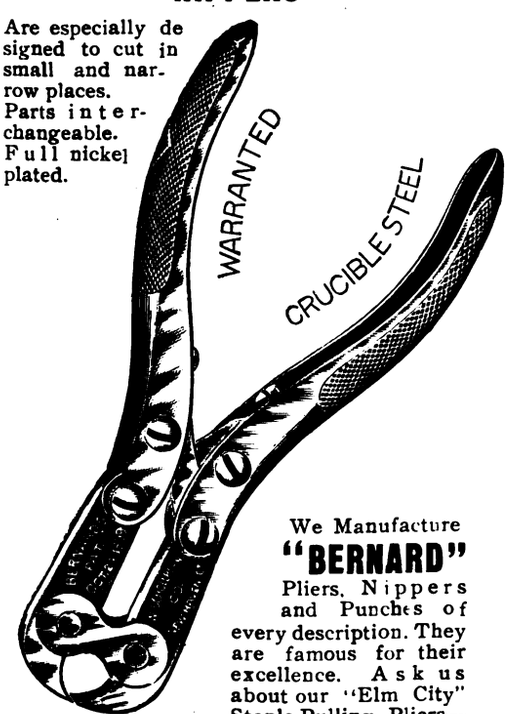
New Putnam

Ⓦ

Horse Nails

It is impossible, therefore, to crimp or break them; will not sliver nor cut off; will hold in the clinch and make work easier.

Our Special Offer



to Hardware dealers means money in their pockets. Write us about it. Mention HARDWARE.

PUTNAM NAIL CO.

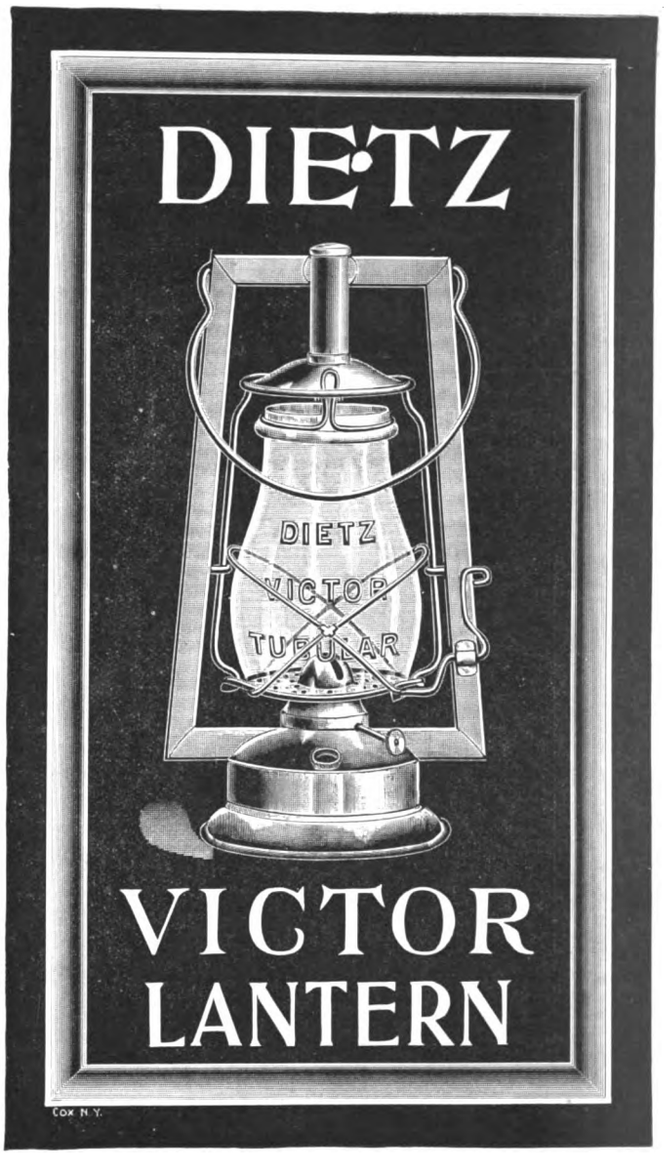
Neponset, Boston, Mass.

"BERNARD" Bicycle and Typewriter NIPPERS

Are especially designed to cut in small and narrow places. Parts interchangeable. Full nickel plated.

We Manufacture **"BERNARD"** Pliers, Nippers and Punches of every description. They are famous for their excellence. Ask us about our "Elm City" Staple Pulling Pliers—They have no equal.

Our latest Catalogue gives our complete line.



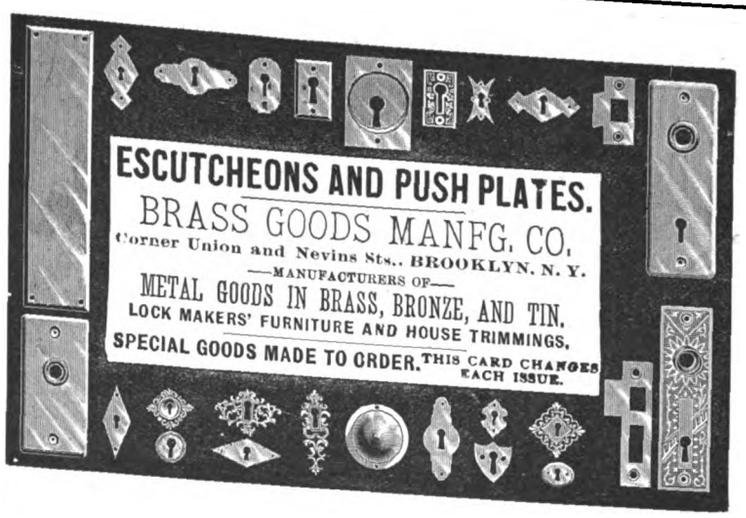
THE WM. SCHOLLHORN CO.
NEW HAVEN, CONN.

DIETZ "VICTOR" LANTERN

A wide known and deservedly popular lantern for general "every-night" use, with great powers to stand use (yes, and ab-use) It has a tinned-steel oil pot; simple device to get at the burner, which latter is locked in position, and has nothing to do but stay home, "say nothing," and give light—which latter it does, in great profusion. All Dietz lanterns are absolutely safe from taking fire or exploding.

It can be lighted, trimmed and regulated without removing the globe.

The Victor lantern is fitted with the best burner made (5/8in.) and a high grade No. 0 globe.



We issue complete catalogues (in Spanish and English) with price list and discounts, and are pleased to send them upon request to those interested.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Big Savings in Shavings

All That's Latest! All That's Best!
and most convenient has been wrought into our

NEW GEM RIGID MODEL SAFETY RAZOR

Frame is perfectly rigid. Has Famous Gem Adjustable Clips, but has neither spring, hinges nor push button to get out of order, thereby making perfect and quick cleaning possible. No better Safety Razor Frame made.

GEM Single Roll Stropping Machine

New GEM Rigid Model Safety Razor

Investigate *and* Compare

OUR SINGLE ROLLER GEM STROPPING MACHINE

With other stropping machines. Ours has only one single hard rubber roller in the centre, and self-reversing blade-holder. Impossible to get out of order. All metal parts are of German Silver. Ebony handle is detachable; can be used on safety frame.

ROCK BOTTOM PRICES. Ask us or your jobber about them.

"For Those Who Want the Best"

DOUBLE FALCON WRENCH

An inch and three-quarter off-set to allow work close to the wall or ceiling. Each one has two jaws, right and left hand. Made on an improved principle over the alligator wrench. Fixed and flaring jaws, the combination of the grasping jaw and serrated face. with the bearing jaw with straight bearing face. Grasps and releases a pipe with ease and certainty, the curved outline of the pipe finding a tangential bearing in all parts of the opening. The curved jaw first engages the pipe, and then the straight jaw slips under the pipe until jammed tightly into the opening between the jaws, the action being entirely automatic. A forging of the finest tool steel, teeth accurately milled, hardened in the best possible manner, polished and finished with cyanide.

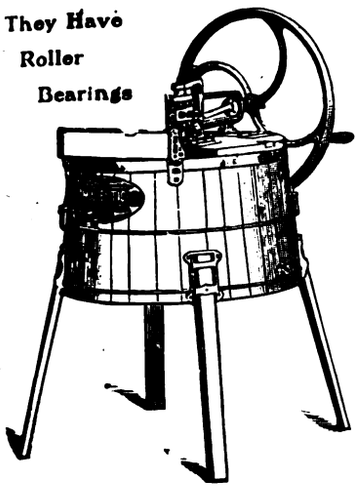
WHY IS THE

O. K. THE BEST ROTARY WASHING MACHINE?



—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing **the friction** and thus making machine **so light running** and almost **noiseless.**
